February 16-17 & 19, 2017 | Long Beach

Signature® Floor Sessions 1-5

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Long Beach Convention Center • Room 103A
300 E. Ocean Avenue • Long Beach, CA 90802

Session 1

Thursday, February 16 • 1:00 PM PT • Lots 3001-3601

Session 2 - PREMIER

Thursday, February 16 • 6:00 PM PT • Lots 3602-4152

Session 3 - MEDALS & TOKENS

Friday, February 17 • 10:00 AM PT • Lots 4153-4274

Session 4

Friday, February 17 • 2:00 PM PT • Lots 4275-4875

Session 5

Friday, February 17 • 6:00 PM PT • Lots 4876-5372

Signature® Internet Session 6

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 6

Sunday, February 19 • 2:00 PM CT • Lots 7001-8602

LOT SETTLEMENT AND PICK-UP

Friday, February 17 • 10:00 AM – 1:00 PM PT

Saturday, February 18 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 17.5% (minimum \$19) per lot

BIDDING METHODS

HERITAGE Live!^{®1} Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at HA.com/Live

Live Floor Bidding

Bid in person during the floor sessions.

Live Telephone Bidding (floor sessions only)

Phone bidding must be arranged on or before Wednesday, February 15, by 12:00 PM CT.

Client Service: 866-835-3243

Internet Absentee Bidding

Proxy bidding ends ten minutes prior to the session start time.

Live Proxy bidding continues through the session.

HA.com/1252

Fax Bidding

Fax bids must be received on or before Wednesday, February 15, by 12:00 PM CT. Fax: 214-409-1425

Mail Bidding

Mail bids must be received on or before Wednesday, February 15.

Dear Bidder,

Welcome to the Long Beach Expo and Heritage's official Signature auction! The new year started on an up note in Fort Lauderdale, and we are pleased to and head west after a successful FUN event. Our Florida U.S. Coins auction saw an increase of nearly 27% in prices realized over the year-ago FUN results. Our combined numismatic auctions (including World and U.S. Currency and the Heritage New York World and Ancient coins) topped \$65 million as of mid-month in January, 2017.

We fully expect the Long Beach Signature event to continue this positive trend. The total number of lots is up more than 50% from a year ago, including our Premier Session that presents an impressive 551 lots on Thursday evening of the show. Three floor sessions on Friday include a special Medals & Tokens auction slated for a 10:00 a.m. (Pacific Time) start.

Highlights are spread across numerous series and collector specialties. A strong representation of U.S. Colonials includes several rare issues:

- A 1787 Immunis Columbia copper, AU55 ★ NGC, Eagle Reverse, one of just four known struck on a broad flan (Ex: Parmelee, Ten Eyck, Newcomer, Green, Newman).
- 1785 Immune Columbia Silver, Nova Constellatio Reverse with Reeded Edge, graded AU53 NGC. CAC.
- The finest-known Running Fox New Jersey copper, Maris 77-dd, certified MS65 Brown NGC (Ex: Jackman, Green).

Silver type is well-represented, from early issues to later key dates and Mints:

- An attractive 1794 Flowing Hair silver dollar with VF details, the Laurence H. Gardner specimen.
- A 1798 Draped Bust dollar, MS63, Pointed 9, Wide Date, B-23, BB-105 – an always-popular Guide Book variety.
- A 1919-D Standing Liberty quarter, a Registry-grade showpiece, certified MS66 NGC.

Gold is in strong demand across all denominations. Highlights of the auction include:

- An 1807 Bust Right five dollar certified MS64+ PCGS – the BD-1 Small Stars reverse – second-finest at PCGS.
- An 1869 proof quarter eagle graded PR66 Deep Cameo PCGS, one of only 25 pieces struck and the finest-graded example.
- A 1921 Saint-Gaudens double eagle, an important key date, seldom seen at the present grade of MS62 PCGS.

The special Medals and Tokens session on Friday morning includes new-to-market Selections from the Eric P. Newman Numismatic Education Society as well as an important consignment of Betts medals. Together, these two consignments headline an outstanding medals and tokens offering. Several of the Eric P. Newman tokens are offered in group lots and we encourage bidders to pay close attention. Be sure to view the online images. Here is a brief sampling from the session:

- A seldom-seen one-bit token struck in German silver by Dr. Feuchtwanger, presumably on behalf of New York merchant R.E. Russell, with an obverse common to the HT-268 Feuchtwanger cents.
- An (1808) Sansom Medal MS63 Brown NGC, Julian CM-5b, Baker-58A, Greenslet-82, Musante GW-92. This is a splendidly executed bronze U.S. Mint medal engraved by John Reich, with conjoined busts of Washington and Franklin with an impressive eagle reverse.
- A 1677 Franco-Dutch war medal depicting the Dutch fleet burned at Tobago, Betts-56, MS62 PCGS, struck in silver.
- A 1687 Silver Shoals Treasure medal, Betts-67, silver, MS62 PCGS. Ex: Strathtay Collection.

In total, 177 individual consignors have entrusted a total of 3,973 lots to our Long Beach Signature sale, including nearly 1,000 lots to be auctioned in our Online Signature Session to be held on Sunday, February 19 following the event.

Bidding is simple, before the auction and instantaneous during the sale, wherever you are in the world. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® (our proprietary, award-winning online platform). If you are attending Long Beach in person we encourage you to stop by our booth on the bourse, view the lots on-site, and enjoy participating "live" from the auction floor.

Heritage wishes you the best of luck with your bids. We have a saying – "the Long Beach Expo never disappoints!"

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

Items identified as from the Eric P. Newman Numismatic Education Society (a Missouri not-for-profit corporation) are being sold from the extensive collection assembled by Eric P. Newman over a period of 90 years. Proceeds of the sale of all items will be used exclusively for supplementing the Society's museum operations and scholarly research efforts and for the benefit of other not-for-profit institutions selected by Eric P. Newman Numismatic Education Society for public purposes.

SESSION ONE

COLONIALS

1662 Large 2 Oak Tree Twopence VF Details, Noe-34

- 3001** 1662 Oak Tree Twopence, Large 2 — Chop Mark — PCGS Genuine. VF Details. Noe-34, W-240, Salmon 1-B, R.5. A letter D is counterstamped on the central obverse, but this cream-gray example is otherwise attractive. Mostly well defined, though a few peripheral letters exhibit greater wear. All Oak Tree twopence are from the same die pair, though the 2 in the date and the nearby letters AN were recut midway through coinage. The distinction between Noe-33 and Noe-34 is indefinite, related to the strength of the horizontal die crack through the date. Salmon (2010) merged Noe-32, Noe-33, Noe-33.5, and Noe-34 into a single listing. Whitman (2009) designated all Oak Tree twopence as W-240. Listed on page 40 of the 2017 *Guide Book*.

- 3002** 1722 Rosa Americana Penny, UTILE, AU55 PCGS. M. 2.21-Ea.3, W-1278, R.4. Glimpses of golden-brown emerge from protected areas, but this glossy penny is predominantly chocolate-brown. The strike is good and the surfaces lack any distractions. Ideal for the Early American type collector. Listed on page 44 of the 2017 *Guide Book*. Population: 17 in 55, 20 finer (1/17). NGC ID# 2ASP, PCGS# 113

- 3003** 1760 Hibernia-Voce Populi Halfpenny MS62 Brown PCGS. N. 4, Z. 2-A, W-1382X. A charming mahogany-brown example. The centers are incompletely brought up and retain the granular texture of the flan prior to the strike. An intermediate die state with moderate crumbling on POPULI. Certified in a green label holder. Listed on page 51 of the 2017 *Guide Book*. Population: 12 in 62 Brown, 18 finer (12/15). NGC ID# 2AUC, PCGS# 262

1787 Massachusetts Half Cent, MS62 Brown Well-Struck Ryder 4-C Example

- 3004** 1787 Massachusetts Half Cent MS62 Brown NGC. Ryder 4-C, W-5940, R.2. This is a pleasing type-coin example of the 1787 Massachusetts half cent, showing glossy burgundy-brown surfaces that are free of environmental impairments. The strike is even and well-centered. Central definition is above average — the shield is not fully defined, but HALF CENT is bold; the Indian's tunic is well-detailed. Satiny luster remains in the fields. Census: 9 in 62 Brown, 19 finer (1/17). NGC ID# 2B22, PCGS# 296

- 3005** 1786 New Jersey Copper, Narrow Shield, Straight Plow Beam, VF35 NGC. Maris 15-L, W-4820, R.4. An evenly struck and pleasing chocolate-brown example, without any planchet flaws or detrimental marks. Struck on an oval (26 x 30 mm) planchet, but all legends are complete. Listed on page 71 of the 2017 *Guide Book*. NGC ID# AUKJ, PCGS# 45423

- 3006** 1787 New Jersey Copper, No Sprig Above Plow, AU53 NGC. Maris 48-g, W-5275, R.1. An unabraded and evenly struck chocolate-brown example. The surfaces display scattered minor flan flaws, as produced. Struck several degrees off center toward 7:30, but all legends are intact. Listed on page 72 of the 2017 *Guide Book*. NGC ID# AUL8, PCGS# 506

- 3007** 1787 New Jersey Copper, No Sprig Above Plow — Corrosion — NGC Details. XF Maris 64-t, W-5380, R.1. The wide letter U in the reverse legends helps attribute this sharply defined New Jersey copper. The walnut-brown surfaces are much more pleasing than implied by the NGC designation, though the snout and shield are lightly granular. Listed on page 72 of the 2017 *Guide Book*.

- 3008** 1781 North American Token AU55 PCGS. W-13980, R.2. This scarce Dublin copper issue was exported to North America, the same journey undertaken by St. Patrick farthings more than a century prior. A lovely chocolate-brown piece with considerable shimmer and occasional mint-made laminations. Minor friction is noted on the face and sails. Listed on page 75 of the 2017 *Guide Book*. Population: 5 in 55, 5 finer (1/17).
Ex: Troy Wiseman Collection, Part Two (Heritage, 1/2007), lot 205; Dallas Signature (Heritage, 11/2007), lot 17, which realized \$1,380. NGC ID# 2B5H, PCGS# 589

- 3009** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, XF40 NGC. N. 12-X, W-6820, R.3. A walnut-brown representative with lightly worn but unmarked surfaces. An unobtrusive spot is on the lower rays of the sun, and a small flan flaw (as made) is noted on the reverse rim at 12 o'clock. Listed on page 89 of the 2017 *Guide Book*. NGC ID# AX5E, PCGS# 883

- 3010** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, XF45 PCGS. N. 12-X, W-6820, R.3. The specialist-familiar vertical die cracks at 1 o'clock on the obverse and 6 o'clock on the reverse identify the Newman variety. A walnut-brown example with moderate flan flaws (as made) on the second 7 in the date, the F in FUGIO, and the M in MIND. Listed on page 89 of the 2017 *Guide Book*. NGC ID# AX5E, PCGS# 883

- 3011** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU53 PCGS. N. 12-X, W-6820, R.3. A satiny walnut-brown Fugio with lightly circulated but unabraded surfaces. Mint-made flan flaws are noted on the rings near 9 o'clock and the sun's right-side rays. Struck slightly off center toward 10 o'clock. Listed on page 89 of the 2017 *Guide Book*. NGC ID# AX5E, PCGS# 883

1787 Fugio Cent, MS63 Brown N. 13-X, STATES UNITED Reverse

- 3012** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS63 Brown PCGS. N. 13-X, W-6855, R.2. Well-centered on a glossy, hard planchet, this is a Select Uncirculated example of the popular Federal issue. Medium chocolate-brown color covers the lustrous surfaces, while the strike is uniformly sharp with only slight weakness at the top dentils. The central motifs are especially well-defined, with a prominent radial die crack at 6 o'clock on the reverse that helps confirm the N. 13-X variety. A few faint glimpses of mint Red remain at the borders. NGC ID# AX5E, PCGS# 883

3013 1787 Fugio Cent, UNITED STATES, Cinquefoils AU50 PCGS. N. 15-H, W-6890, R.4. The bold radial die crack at 4:30 identifies Newman's 15 obverse. The UNITED STATES reverse locks in the attribution. This scarcer variety walnut-brown Fugio copper is well defined save for softness near 9 o'clock on each side. The borders display occasional granularity. Listed on page 89 of the 2017 *Guide Book*. NGC ID# 2B8F, PCGS# 889

3014 1789 Mott Token, Thin Planchet, Plain Edge MS63 Brown NGC. Breen-1021, Rulau-E-NY-611. An unmarked and coruscating medium to deep brown example. The late die state with a buckled central obverse, a large break from the upper left clock corner, and soft definition on the central reverse. A small curved clip is noted at 2:30, as made. Although dated 1789, the Mott token was likely issued during the Hard Times era. Listed on page 76 of the 2017 *Guide Book*. NGC ID# 2B5L, PCGS# 604

**1791 Washington Cent, MS64 Brown
Small Eagle, Baker-16**

3015 1791 Washington Small Eagle Cent MS64 Brown NGC. Baker-16, W-10630, Musante GW-17. A sharply struck and satiny chocolate-brown near-Gem. The surfaces display only infrequent, incidental contact. This handsome token variety was an attempt to secure a Federal coinage contract by the Westwood Mint of Birmingham, England. The dies were engraved by John Gregory Hancock, Sr. Listed on page 83 of the 2017 *Guide Book*. Census: 6 in 64 Brown, 3 finer (1/17). NGC ID# 2B73, PCGS# 705

**Washington Liberty & Security Penny
Baker-30, MS64 Red and Brown**

3016 (1795) Washington Liberty & Security Penny MS64 Red and Brown PCGS. Baker-30, W-11050, Musante GW-45, R.2. Copper, plain rims, lettered edge. The strike is bold and well-centered, and each side displays rich copper-red luster with intruding hues of amber-brown in the obverse fields that prevent a full Red designation from PCGS. A carbon speck near the W in WASHINGTON is the only one of note. A few light marks define the grade. Population: 13 in 64 Red and Brown, 4 finer (1/17). NGC ID# 2B7V, PCGS# 768

**Washington Funeral Urn Medal
XF Details, Silver, Baker-166A**

3017 (1800) Washington Funeral Urn Medal, Silver — Improperly Cleaned — NGC Details. XF Baker-166A, Fuld 1-B, Musante GW-70. 29.3 mm. Plain edge. A pearl-gray and charcoal example of this Jacob Perkins emission. Small hole at 12 o'clock, as issued and as always seen, since the medals were made to be worn at George Washington's civic funeral procession in Boston. Faint vertical hairlines cross the urn, but unlike most survivors, there are no noticeable marks.

3018 (1800) Washington Funeral Urn Medal, Silver, AU50 NGC. Baker-166A, Fuld 1-B, Musante GW-70. 29.3 mm, plain edge. Small hole at 12 o'clock, as issued. Massachusetts engraver Jacob Perkins made the Funeral Urn medals for mourners to wear at Washington's February 22, 1800 civic funeral procession in Boston. This lightly circulated but problem-free example has wheat-gold toning with glimpses of powder-blue near the rims.

**Washington Funeral Urn Medal, Baker-166C
White Metal, VF Details**

3019 (1800) Washington Funeral Urn, White Metal — Rim Damage — Genuine PCGS. VF Details. Baker-166C, Fuld 4-D, Musante GW-70F. Die varieties of Jacob Perkins' Funeral Urn medals were identified by George Fuld during the 1960s. The "D" reverse has no periods in US northwest of the urn. The "4" obverse shows only minor positional differences from other marriages. Virtually all known examples are holed near 12 o'clock, as issued to wear at Washington's Boston civic funeral procession, held on his birthday anniversary in 1800. This microgranular slate-gray representative is unblemished except for marks near the obverse rim at 9 o'clock, and on the reverse rim opposite at 3 o'clock.

HALF CENTS

3020 1793 C-1, B-1, High R.3 — Environmental Damage — Genuine PCGS. Fine Details. Manley Die State 3.0, "very rare," with an interesting rim die break on the upper right reverse. This single-year type coin offers evenly granular lavender-brown surfaces. The date is clear, as are most of the legends, although ONE CENT is unreadable due to the late die state. Our EAC grade Good 4.

**1794 Half Cent, Choice VF
C-9, Scarce Early Type**

3021 1794 High Relief Head, C-9, B-9, R.2, VF35 PCGS. Manley Die State 3.0. A medium to deep brown representative. The obverse border is moderately granular, as made on an impure alloy planchet. Marks are confined to a few tiny ticks. Evenly struck and attractive with wear apparent on the curls behind the ear and shoulder. Our EAC grade Fine 15. NGC ID# 2223, PCGS# 35063 Base PCGS# 35054

3022 1794 High Relief Head, C-9, B-9, R.2 — Corroded — ANACS. XF40 Details. Manley Die State 3.0 with a crack through the cap and a rim cud at 6:30 on the reverse. A richly detailed but evenly granular lavender-brown and sea-green representative. Marks are minimal and the eye appeal is relatively attractive. Our EAC grade VF20. NGC ID# 2223, PCGS# 35063 Base PCGS# 35054

3023 1795 Lettered Edge, Punctuated Date, C-2a, B-2a, R.3, VG10 PCGS. Manley Die State 3.0. A charming tan-brown example with generally bold legends. Marks are confined to a tick northwest of the C in CENT. The usual die state with a "heavy bulge" through the ER in AMERICA and a clash mark below the F in OF. Our EAC grade VG8. NGC ID# 2224, PCGS# 35070 Base PCGS# 1015

**1795 C-6a Half Cent, VF25
Plain Edge, No Pole
Double Struck Off Center**

3024 1795 Plain Edge, No Pole, Thin Planchet, C-6a, B-6a, R.2 — Double Struck, Second Strike 5% Off Center — VF25 PCGS Secure. Ex: Davy Collection. Both strikes were off center toward 9 o'clock. The first strike was 10% off center, and the second strike was 5% off center. Evidence of the first strike is apparent near the bust tip, the top of the cap, the 2 in the denominator, the N in UNITED, and the R in AMERICA. A charming tan-brown half cent. Nicely defined and void of verdigris. Nearly unmarked, though a slight obverse rim nick at 10:30 provides an identifier. Our EAC grade VF20.

**1795 C-6a Half Cent, VF30
Rotated Double Struck
Plain Edge, No Pole**

3025 1795 Plain Edge, No Pole, Thin Planchet, C-6a, B-6a, R.2 — Double Struck — VF30 NGC. Ex: Missouri Curio Cabinet. Rotated double struck. Both strikes were normal, but the dies rotated about 20 degrees counter-clockwise between blows from the press. The doubling is most prominent on UNITED STATES OF, though two dates and denominators are present, and the upper portion of the wreath is a jumble. A nicely defined medium brown half cent. Free from verdigris, though we note a couple of hair-thin lines on the portrait, and a small obverse rim depression at 4 o'clock. Our EAC grade Fine 12. Ex: EAC Convention Sale, 4/2016, lot 25. NGC ID# 2225, PCGS# 35089 Base PCGS# 1018

3026 1800 C-1, B-1, R.1, MS62 Brown NGC. Manley Die State 4.0. Despite its late die state, nearly all of the border detail is present on both sides of this lovely first-year Draped Bust half cent. Steel-brown surfaces retain hints of faded mint red in protected areas. Our EAC grade AU55. NGC ID# 222B, PCGS# 35119 Base PCGS# 1051

**1804 C-10 Half Cent, AU53
Crosslet 4, Stems
Double Struck in Collar**

3027 1804 Crosslet 4, Stems, C-10, B-9, R.1 — Double Struck in Collar, Close Overlap — AU53 PCGS. Manley Die State 3.0. All design elements are strongly strike doubled west. The spread is perhaps most prominent on HALF CENT and the date. A lightly circulated late die state example. The olive-brown surfaces are refreshingly free from marks, spots, or flan imperfections. Our EAC grade XF40.

3028 1808 C-3, B-3, R.1, AU58 PCGS. CAC. Manley Die State 3.0, "scarce." A coruscating olive-brown representative. Refreshingly free from marks or spots. The date was apparently first entered as 180. The final 8 was added later, using the 0 punch intended for the denominator. The dies are widely rotated, as often seen for C-3. Our EAC grade AU50. NGC ID# 26Y2, PCGS# 35206 Base PCGS# 1107

**1809/6 Half Cent, MS63 Brown
C-5, B-5, Scarce Classic Half Cent**

- 3029 1809/6 9 Over Inverted 9, C-5, B-5, R.1, MS63 Brown PCGS.** Manley Die State 2.0, "rare." Obverse dentils are present only between 11 and 12 o'clock. The reverse has dentils near 12 o'clock, and between 5 and 8 o'clock. Clashed near the T in CENT. This unabraded and lovely half cent is mostly chocolate-brown, although a blush of microgranular gray toning is present on the lower obverse. Our EAC grade AU55. NGC ID# 222N, PCGS# 35233 Base PCGS# 1126

- 3030 1828 12 Stars, C-2, B-3, R.2, MS63 Brown NGC.** Manley Die State 2.0. The popular Mint blunder with only 12 stars. This unmarked and satiny representative offers walnut-brown and gunmetal toning. The strike is bold except on the leaves opposite the bust tip. Our EAC grade AU50.
Ex: Dallas Signature (Heritage, 11/2005), lot 76, which realized \$1,437.50. NGC ID# 222W, PCGS# 35264 Base PCGS# 1150

- 3031 1834 C-1, B-1, R.1, MS65 Brown PCGS. CAC.** Manley Die State 1.0. Faded brick-red clings to stars and letters, while sea-green toning embraces the fields and high points. This coruscating Gem has an intricate strike and a mark-free appearance. Our EAC grade MS60. NGC ID# 2232, PCGS# 35285 Base PCGS# 1165

- 3032 1854 C-1, B-1, R.1, MS65 Red and Brown NGC.** Peach-red color occupies a majority of the reverse, and is also apparent on the obverse, surrounding the stars and portrait. Most of Liberty and the left obverse field are medium brown, and a small ebony spot is below star 1. Well struck and nearly mark-free. Our EAC grade MS63. NGC ID# 26YY, PCGS# 35331 Base PCGS# 1231

PROOF HALF CENT

- 3033 1852 First Restrike, Small Berries, B-2, R.4 — Holed — NGC Details. Proof, AU.** A 3 mm round hole is located where star 7 should be. Although 1852 is a proof-only date, the coin nonetheless entered commerce, and displays light wear on the letters in LIBERTY. The walnut-brown surfaces show very few marks. A prominent clash mark is above the C in CENT, highly unusual and worthy of further research. No EAC grade assigned.

LARGE CENTS

**1793 Chain Cent, Fair 2
AMERI., Sheldon-1**

- 3034 1793 Chain, AMERI., S-1, B-1, R.4, Fair 2 PCGS.** The chain is clear, UNITED is readable, and much of AMERI is evident. Several letters in the denomination are apparent, including the diagnostic position of the E in ONE relative to the chain. The obverse displays greater wear, but Liberty's profile and bust tip emerge beneath a strong light. The lower obverse has a few faint thin marks, but the tan and golden-brown surfaces are otherwise problem-free. Our EAC grade Poor 1. NGC ID# 223G, PCGS# 35432 Base PCGS# 1340

**1793 Chain Cent, Fair 2
AMERICA, S-2**

- 3035 1793 Chain, AMERICA, S-2, B-2, High R.4, Fair 2 PCGS.** The chain is bold, of course, but the legends on both sides are mostly clear. Liberty's profile is nicely outlined. The deep russet-gray surfaces are moderately granular, and we note a few faded thin marks on the central reverse and the right obverse field. Overall, a suitable example of this rare and briefly coined design type. Our EAC grade Poor 1. NGC ID# 223F, PCGS# 35435 Base PCGS# 1341

- 3036 1793 Chain, AMERICA, Periods, S-4, B-5, R.3 — Graffiti — Genuine PCGS. Good Details.** "1793" is awkwardly (but lightly) pincratched on the obverse exergue. LIBERTY and the subsequent period are bold, OF AMERICA is readable, and about half of the central reverse letters and numbers are clear. Free from verdigris, and mentionable marks are limited to a few small rim bumps and a horizontal line near the lips. Our EAC grade Poor 1.
Ex: Walter Mustain Collection; Harlan J. Berk, Ltd.

- 3037 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Corrosion — NGC Details. Fine.** A lavender-brown Wreath type cent with generally sharp legends. The date is faint but readable. Both sides are granular, and the portrait is pitted. The surfaces appear lightly burnished. The sole reportable marks are rim imperfections near the bust tip and fraction. Our EAC grade AG3.
Ex: Long Beach Signature (Heritage, 9/2010), lot 8118, which realized \$1,150.

- 3038 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Environmental Damage — Genuine PCGS. VF Details.** A well-defined Wreath cent with bold legends except for the fraction, which is very faint. The high points are walnut-brown, and the evenly granular fields are deeply toned. We note a slight reverse rim nick at 5:30 and an area of metal loss on the reverse at 7 o'clock. Our EAC grade Good 5.

3039 1793 Liberty Cap, S-13, B-20, Low R.4 — Environmental Damage — Genuine PCGS. Poor / Fair Details. Most of the date and LIBERTY are readable, and the portrait is outlined. The reverse is heavily worn but the ribbons, stems, and lower leaves are evident. Much of the obverse is pitted, and the lower half of the reverse displays faint pinscratches. Nonetheless, a genuine 1793 Liberty cap cent, rarest among the three major first-year cent types. Our EAC grade Poor 1.

3040 1797 Reverse of 1797, Stems, S-130, B-25, R.2, VF30 PCGS. Breen Die State V, "faint chip hangs from tip of nose." A midgrade medium brown Draped Bust cent. The right obverse field is lightly granular, and a few hair-thin marks are noted near the date and central reverse. Certified in a green label holder. Our EAC grade Fine 12. NGC ID# 2242, PCGS# 35930 Base PCGS# 1422

3041 1799 S-189, B-3, R.2, Poor 1 PCGS. The 1799 is key to a date collection of large cents. This example has a well-outlined portrait, and the top half of the date is present. About one-third of LIBERTY is readable. The reverse is smooth except for AMER, which is faint but perceptible. The sea-green and tan-gold surfaces are minimally marked and only lightly granular. Our EAC grade Poor 1. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

3042 1804 S-266a, B-1, R.2, AG3 PCGS. CAC. The early die state without the rim die breaks often seen on this key date cent. UNITED STATES OF is faint but mostly readable. The remaining legends are clear, including the date. The medium brown surfaces are evenly microgranular, and the reverse shows a minor edge knock at 9:30. Our EAC grade Fair 2. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

3043 1804 S-266c, B-1, R.2 — Environmental Damage — PCGS Genuine. Fine Details. This important key date cent retains most major design detail intact in outline, but the medium brown surfaces are moderately pitted. This piece represents a later die state, with sizeable cuds above the RTY in LIBERTY and MERIC in AMERICA. Our EAC grade Good 4.

**1814 S-294 Cent, AU53
Crosslet 4, Partly Lustrous**

3044 1814 Crosslet 4, S-294, B-1, R.1, AU53 PCGS. Breen Die State II, clashed. The two 1814 die marriages are easily distinguished by the shape of the 4 in the date. An ebony-brown representative with tan-brown high points. Lightly circulated, but luster shimmers from the legends, and there are no detrimental marks or spots. A conditionally challenging type. Our EAC grade XF45. NGC ID# 224Y, PCGS# 36520 Base PCGS# 1573

3045 1820 Large Date, N-13, R.1, MS64 Brown PCGS. A beautiful olive-brown Choice cent. Field marks are absent, and carbon is confined to minor flecks near the date. The lustrous surfaces are nicely struck, and the portrait is smooth aside from a tiny tick or two on the cheek. Our EAC grade MS60. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

3046 1820 Large Date, N-13, R.1, MS64 Brown PCGS. The present near-Gem exhibits satiny and unabraded apple-green and golden-brown surfaces. Small wedge-shaped rim depressions near star 1 appear as made. Likely once part of the famed Randall Hoard. Our EAC grade AU50. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

3047 1823/2 N-1, R.2, VF35 NGC. A deep brown cent with aquamarine undertones. Scattered small abrasions emerge beneath a lens. The mildly bright surfaces are nearly free from verdigris. A better Matron Head date. Our EAC grade Fine 15. NGC ID# 225B, PCGS# 36760 Base PCGS# 1630

**Key 1823 Cent, XF40
N-2 Normal Date**

3048 1823 N-2, R.2, XF40 NGC. Absent from the Randall Hoard, the 1823 is conditionally rare. Three die marriages are known, one of which is a privately made "restrike" that commands much less than the N-2 Normal Date and the N-1 1823/2 overdate. All three Newcomb varieties are listed in the *Guide Book*, with N-2 priced highest. The present moderately circulated example is a middle die state with unconnected rim breaks above stars 5 and 6. The chocolate-brown surfaces are attractive aside from a few thin marks near the E in ONE. Our EAC grade Fine 15. NGC ID# 225A, PCGS# 36757 Base PCGS# 1627

3049 1839 Petite Head of 1840, N-8, R.1, MS63 Brown PCGS. A lovely chocolate-brown example of the first Petite Head Newcomb variety. The strike is good, and the only reportable mark is a thin line near the bust tip. A late die state example that appears to exhibit rim cuds below the date. Our EAC grade AU55. NGC ID# 2265, PCGS# 37265 Base PCGS# 1817

**1839 Cent, N-8, MS64 Brown
Petite Head of 1840**

3050 1839 Petite Head of 1840, N-8, R.1, MS64 Brown PCGS. CAC. The Head of 1840 Large cent is a sought-after type that begins the short set of Braided Hair coins. This is a gorgeous example with shimmering luster over glossy, steel-blue and medium brown surfaces. Accents of powder-blue, mint-green, and gold enhance the appeal. Strongly defined on the portrait and wreath with softness on the stars and reverse rims. The obverse shows a couple of minor ticks. Our EAC grade MS62. Population: 20 in 64 Brown, 7 finer. CAC: 5 in 64, 1 finer (1/17). NGC ID# 2265, PCGS# 37265 Base PCGS# 1817

3051 1847 N-13, R.4, MS64 Brown PCGS. CAC. Grellman Die State d. The rim die break over the R in AMERICA confirms the late die state of this scarce Newcomb variety. A lovely chocolate-brown cent with pleasing surfaces despite a mint-made strike-through above the N in ONE. Our EAC grade MS60. Population: 3 in 64 Brown, 1 finer as 65+ Brown, 1 finer as 64 Red and Brown (12/16). NGC ID# 226D, PCGS# 37298 Base PCGS# 1877

**1848 N-35 Cent, MS65 Red and Brown
Appealing and Lustrous**

- 3052 1848 N-35, R.2, MS65 Red and Brown PCGS. CAC.** Die State a, with all diagnostics discernible for the variety. This piece is weakly struck on the peripheral stars as almost always. The central devices are bold, and both sides display a pleasing balance of copper-red and burgundy hues. There are no distracting abrasions, and a few small flecks are well hidden. Our EAC grade MS63. Population (all varieties included): 12 in 65 Red and Brown, 3 finer. CAC: 17 in 65, 1 finer (1/17). PCGS# 406529 Base PCGS# 1884

- 3053 1849 N-1, N-15, R.4, MS65 Brown NGC.** Grellman Die State c. A sharply struck and lustrous sea-green Gem. The central reverse displays hints of orange-red and lavender. Imperfections are limited to a flan flake above star 5 and a brief thin rim mark near star 4. Newcomb assigned two varieties to the same die pair. Middle die states (including the present piece) are N-15 with a line through the O in OF. Early and very late die states are N-1 without that line. Our EAC grade MS62. PCGS# 405634 Base PCGS# 1886

- 3054 1850 N-7, R.2, MS65 Red and Brown PCGS.** Die State b, dies worn and flowlined. The central devices are well-struck for the variety, although the peripheral stars and reverse border legends are soft, as is diagnostic of the variety. Designated Red and Brown by PCGS, this coin displays nearly full Red, frosty surfaces with only hints of auburn toning. No significant carbon spotting is present. Our EAC grade MS63. NGC ID# 226G, PCGS# 405881 Base PCGS# 1890

**1850 N-7 Mature Head Cent
MS66 Red and Brown**

- 3055 1850 N-7, R.2, MS66 Red and Brown PCGS. CAC.** Grellman Die State b. Orange-red color is extensive, especially on the reverse. The portrait and obverse field are steel-gray. A lustrous and unabraded Mature Head type coin. Carbon is essentially limited to a fleck between the 85 in the date. Newcomb-7 is typically attributed by die lumps on the E in CENT and the T in UNITED. Our EAC grade MS63. NGC ID# 226G, PCGS# 405881 Base PCGS# 1890

- 3056 1851 N-7, R.1, MS66 Red and Brown NGC.** Ex: Highland Collection. Eye appeal is the result of rich steel-blue patina intermixed with flashes of fire-orange coloration. Strongly rendered centrally, but somewhat incomplete around parts of the borders. One hair-thin mark noted below the E in LIBERTY. Our EAC grade MS63. Census (all varieties): 11 in 66 Red and Brown, 1 finer (1/17). PCGS# 406667 Base PCGS# 1893

- 3057 1851 N-38, R.1, MS66 Brown PCGS.** Grellman Die State b. Glimmers of the introductory fire-red color outline obverse design elements, but this satiny Premium Gem is predominantly olive-brown. No contact is apparent, even upon close evaluation, though each side shows a few pinpoint flecks. Our EAC grade MS62. NGC ID# 226H, PCGS# 406766 Base PCGS# 1892

**1854 N-30 Cent, XF40
Usual Die State, Rarest 1854 Variety**

- 3058 1854 N-30, High R.6, XF40 PCGS.** Bob Grellman reported that this variety was discovered in 1993, and that just six examples were known when *The Die Varieties of United States Large Cents 1840-1857* was published in 2001. A decade later, 13 pieces were identified, and this one may be a new example. This piece is equal in sharpness to the Dan Holmes coin, but without the surface marks of that example. Please olive-brown surfaces exhibit splashes of light orange patina. Our EAC grade VF20. PCGS# 406142 Base PCGS# 1904

- 3059 1855 Upright 55, N-4, R.1, MS64 Red PCGS.** Two lumps left of the ear lobe and two more on the neck confirm the variety. This lustrous and nicely struck pumpkin-gold Choice Mature Head cent has a few splashes of apple-green, but marks are virtually absent aside from a faint contact above the jaw. Our EAC grade MS64. Ex: *Long Beach Signature* (Heritage, 5/2008), lot 1815; *Houston Signature* (Heritage, 12/2009), lot 59. NGC ID# 226M, PCGS# 406155 Base PCGS# 1909

**1856 N-18 Cent, MS65 Red
Slanted 5**

- 3060 1856 Slanted 5, N-18, R.1, MS65 Red NGC.** Grellman Die State c with rough and flowlined fields, especially on the obverse. The field roughness, as struck, imparts a matte appearance to the brilliant and highly lustrous orange mint surfaces of this Gem cent. Our EAC grade MS65. Census: 13 in 65 Red, 1 finer for all 1856 varieties (1/17). PCGS# 406222 Base PCGS# 1924

- 3061 1856 Slanted 5, N-21, R.2, MS66 Brown NGC. CAC.** Grellman Die State b, late with flowlined fields. Although it is considered an available variety today, the N-21 die combination was unknown to Newcomb before his reference was posthumously published. This example has some claims to Condition Census for the variety. Excellent mint luster and gorgeous blue-brown color accompanies splashes of original frosty mint red. Slight peripheral weakness is a result of die wear as well as strike. Housed in a former generation holder. Our EAC grade MS62. NGC ID# 226N, PCGS# 406226 Base PCGS# 1922

FLYING EAGLE CENTS

- 3062 1857 MS63 PCGS. CAC.** This is a sharply struck Select example with the coveted CAC green label, showing satiny copper-orange luster and no major abrasions. This is an outstanding Flying Eagle type coin, excelling in technical quality and eye appeal for the grade. NGC ID# 2276, PCGS# 2016
- 3063 1857 MS64 PCGS. CAC.** A sea-green and straw-gold Choice cent. Sharply struck and refreshingly devoid of contact or carbon. Uncommonly nice for the designated grade. The date and OF AMERICA are strike doubled. NGC ID# 2276, PCGS# 2016
- 3064 1857 Doubled Die Obverse, Snow-3, FS-105, MS64 PCGS. CAC.** FS-101 and FS-105 exhibit very similar obverse die doubling, strongest on the eagle's eye and beak, and the final letters in AMERICA. The varieties are distinguished by their wingtips: FS-101 is from the missing wingtip hub, while FS-105 was coined from the broken wingtip hub. A sharply struck and lustrous chestnut-gold near-Gem. Marks and carbon are inconsequential. PCGS# 410231 Base PCGS# 2016
- 3065 1858 Large Letters MS64 PCGS. CAC.** High Leaves Reverse. Closed E in ONE. Light golden-brown, sea-green, and lilac-red shades visit this attractive type coin. A fully struck Choice cent with satin luster and minimal marks. One small spot is below the first A in AMERICA. NGC ID# 2277, PCGS# 2019

1858 Flying Eagle Cent, MS66
Large Letters, Mark-Free

- 3066 1858 Large Letters MS66 PCGS. High Leaves Reverse.** Closed E in ONE. A lustrous and high-grade chestnut-gold cent. Marks are essentially absent, although a few flecks are noted near the wingtip and the T in CENT. The strike is generally sharp except on the base of the eagle's tail. Population: 34 in 66 (2 in 66+), 2 finer (1/17). NGC ID# 2277, PCGS# 2019

1858 Flying Eagle Cent, MS65
Small Letters Obverse

- 3067 1858 Small Letters MS65 PCGS. Small Letters, Low Leaves, Close E in ONE.** This well-struck Gem Flying Eagle type coin displays luminous golden-orange surfaces with no severe abrasions. The Small Letters 1858 Flying Eagle cent is scarce in MS65 and rarely seen finer. Population: 84 in 65 (1 in 65+), 14 finer (1/17). NGC ID# 2279, PCGS# 2020

INDIAN CENTS

- 3068 1859 MS64 PCGS.** The obverse is practically mark-free, while the reverse displays minor grade-limiting ticks in the field below CENTS. Each side is bronze-gold with softly frosted luster and fully impressed motifs. A die break occurs from the rim through the left part of the wreath. First and single-year type. NGC ID# 227E, PCGS# 2052
- 3069 1859 MS64 PCGS.** Satiny bronze-gold luster displays faint lavender and rose overtones in the fields when tilted beneath a light. Minor die erosion appears around the peripheries, but the central devices are nonetheless sharp. NGC ID# 227E, PCGS# 2052

1859 Cent, MS65
Laurel Wreath Reverse

- 3070 1859 MS65 PCGS.** This is a razor-sharp Gem example of the one-year Laurel Wreath type, showing frosty tan-gold luster with iridescent hues that emerge when tilted beneath a light. The date is highly sought-after for type purposes, and pieces grading finer than the present coin are genuinely rare. NGC ID# 227E, PCGS# 2052

1859 Indian Cent, MS64
Popular Cherrypickers Variety, FS-302

- 3071 1859 Repunched Date, Snow-2, FS-302, MS64 PCGS. CAC.** An elusive and in-demand *Cherrypickers* variety, the repunching is most easily seen on the 1 and 8 in the date. This impressive Choice specimen exhibits well-detailed design elements and lightly marked original red surfaces that have mellowed to light brown in some areas. Population: 4 in 64, 2 finer (12/16). PCGS# 37390 Base PCGS# 2052

**1859 Cent, Snow-2, FS-302, MS65
Repunched Date, Tied for Finest Certified**

- 3072 1859 Repunched Date, Snow-2, FS-302, MS65 PCGS.** Repunching is clearest on the 8, but also at the base of the 1 and the flag of the 5. Snow-2 is very scarce to rare, according to the *Cherrypickers' Guide*. PCGS has only seen 16 submissions specifically designated as such. This is one of two Gems, and none are graded higher (1/17). Bright bronze-gold surfaces yield vibrant luster. Fully struck with a pale woodgrain pattern on the obverse, slightly deeper on the reverse. PCGS# 37390 Base PCGS# 2052

- 3073 1860 MS65 PCGS. CAC.** This shimmering, bronze-gold Gem emits cartwheel luster from each side, producing incredible visual quality. There is a single mark near Liberty's nose, but the fields are near-pristine. Boldly impressed with four strong diamonds. Seldom found in higher grades. NGC ID# 227F, PCGS# 2058

**1864 Copper-Nickel Cent, MS66
Only One Coin Known Finer**

- 3074 1864 Copper-Nickel MS66 PCGS.** This is a well-struck Premium Gem despite die erosion that leaves metal flowlines in the fields. Lemon-yellow hues accent bright bronze-gold surfaces, delivering unique eye appeal. There are no mentionable abrasions. The copper-nickel 1864 Indian cent is seldom offered in this grade and almost unknown finer. Population: 34 in 66 (3 in 66+), 1 finer (1/17). NGC ID# 227K, PCGS# 2070

- 3075 1864 Bronze No L MS66 Red PCGS.** A conditionally rare Premium Gem example with vibrant copper-red luster and no mentionable abrasions or carbon spotting. Struck from eroded dies that aid in producing the radiant cartwheel effect. The strike is nonetheless sharp. Population: 40 in 66 Red, 1 finer (1/17). NGC ID# 227L, PCGS# 2078

- 3076 1865 Fancy 5 MS65 Red PCGS.** This Gem shows a razor-sharp strike from fresh dies with vibrant copper-red luster. Close examination fails to reveal any noteworthy abrasions. A few tiny flecks do not detract. Population: 45 in 65 (2 in 65+) Red, 13 finer (1/17). NGC ID# 227N, PCGS# 2084

- 3077 1866 MS64 Red PCGS.** A scarce full Red example, this coin with near-Gem surfaces that display rich, satiny copper-red luster. There are no major abrasions or carbon specks. Population: 42 in 64 (3 in 64+) Red, 32 finer (1/17). NGC ID# 227P, PCGS# 2087

1866 Indian Cent, MS65 Red

- 3078 1866 MS65 Red PCGS.** From a mintage of more than 9.8 million pieces, the 1866 Indian cent is still an elusive issue at the MS65 grade level. The design elements of this spectacular Gem exhibit razor-sharp definition throughout, and the original red surfaces show no mentionable distractions. Vibrant mint luster radiates from both sides and eye appeal is terrific. Population: 25 in 65 Red, 7 finer (1/17). NGC ID# 227P, PCGS# 2087

- 3079 1869 MS64 Red PCGS.** Coppery-gold luster bathes each side, and the design elements are adequately impressed. Grade-limiting contact marks are visible on the Indian's cheek. The availability of this date in high grade has not increased much at all in the past ten years. Population: 41 in 64 (1 in 64+) Red, 36 finer (1/17). Ex: *New York Bulletin Sale (Heritage, 6/2005)*, lot 55. NGC ID# 227T, PCGS# 2096

- 3080 1871 MS65 Brown PCGS. CAC.** Bold N in ONE. A boldly struck Gem of this popular semikey date. Both sides retain glimpses of the initial fire-red color, but the high points and open fields are gunmetal-blue. Pristine aside from a slender curved field mark near the profile. NGC ID# 227V, PCGS# 2100

**1871 Indian Head Cent, MS66 Red and Brown
Richly Toned Condition Rarity**

- 3081 1871 MS66 Red and Brown NGC.** Bold N in ONE. Rich colors provide this Premium Gem example with wonderful eye appeal. Tiny intermingled splashes of gold, brown, and red appear on both sides, with denim-blue and dark mint-green present on the obverse. Clash marks appear. Census: 7 in 66 Red and Brown, 0 finer (12/16). NGC ID# 227V, PCGS# 2101

- 3082 1873 Open 3 MS65 Red and Brown PCGS.** Coins struck early in 1873 featured a Closed 3 in the date, but this delightful Gem exhibits the later Open 3 motif. The design elements are sharply detailed throughout and the well-preserved surfaces show an attractive mix of original red and lavender patina. Population: 76 in 65 Red and Brown, 6 finer (1/17). NGC ID# 227Y, PCGS# 2107

- 3083 1875 MS64 Red PCGS. Snow-6.** Many parallel vertical die lines cross the portrait, most prominently near the ear and Longacre initial. Snow writes, "this variety seems to appeal to collectors as something neat." The present fire-red example tops the Snow (2014) census, recorded as "{63RB, 58, 45, 35}." The lustrous and crisply struck surfaces are devoid of remotely relevant detractors. NGC ID# 2282, PCGS# 2123

**1882 Cent, MS66 Red
Only Two Coins Finer**

3084 1882 MS66 Red PCGS. A conditionally rare full Red example with satiny luster and no mentionable abrasions. The strike is razor-sharp on this high-end Registry coin. A few tiny specks do not detract. The 1882 Indian cent is prohibitively rare any finer. Population: 25 in 66 (1 in 66+) Red, 2 finer (1/17). NGC ID# 2289, PCGS# 2144

3085 1885 MS66+ Brown PCGS. CAC. Frosty luster illuminates rich burgundy-gray, rose, and steel-blue coloration on this high-end Premium Gem. The strike is sharp, and there are no distracting abrasions. Among the finest Brown coins at PCGS and CAC. Population: 8 in 66 (1 in 66+) Brown, 0 finer. CAC: 5 in 66, 0 finer (1/17). NGC ID# 228C, PCGS# 2151

3086 1886 Type One MS65 Red and Brown PCGS. CAC. The lowest headdress feather points between the IC in AMERICA on this earlier 1886 obverse type. The present Gem displays unabraded, satiny luster and sharp detail. Rich burgundy and rose-red hues accent coppery-orange mint luster. Population: 59 in 65 (1 in 65+) Red and Brown, 5 finer. CAC: 22 in 65, 3 finer (1/17). NGC ID# 228D, PCGS# 2155

3087 1887 MS65 Red PCGS. Blazing color emanates from both sides of this lustrous Gem. This example exhibits an attractive strike. A number of tiny carbon spots are visible on both sides and a strikethrough appears near 3 o'clock on the obverse. Population: 65 in 65 Red, 25 finer (12/16). NGC ID# 228F, PCGS# 2159

3088 1888 MS65 Red PCGS. A frosty and lustrous copper-orange coin with small daubs of violet color on the highest points of the obverse portrait. This Gem Red 1888 Indian cent is conditionally scarce and attractive. A loupe reveals a touch of softness on the upper three headdress feathertips. Population: 33 in 65 Red, 16 finer (1/17). NGC ID# 228G, PCGS# 2168

3089 1889 MS65 Red PCGS. This frosty, peach-gold Gem displays better-than-expected eye appeal for the grade, with unabraded surfaces and shimmering fields. The reverse is a shade deeper in color than the obverse. Slight strike weakness on the reverse bow transfers to the tips of the top three headdress feathers. Population: 51 in 65 (1 in 65+) Red, 11 finer (1/17). NGC ID# 2732, PCGS# 2174

3090 1899 MS67 Brown NGC. CAC. This is sole finest Brown 1899 Indian cent, never before offered at public auction (12/16). The coin is sharply struck and devoid of abrasions and carbon spotting. Radiantly lustrous surfaces showcase beautiful purple-lavender toning with original copper-red emerging from the protected regions of the fields. NGC ID# 22AM, PCGS# 2202

**1899 Indian Cent, MS66+ Red
Splendid Natural Coloration**

3091 1899 MS66+ Red PCGS. High end for the Premium Gem grade, this natural-Red example alternates among peach-gold, lilac, and copper-orange shades across the frosted and mark-free surfaces. Fully struck, there is no carbon on the coin, just areas of variable toning intensity that add to the indisputable eye appeal. Population: 15 in 66+ Red, 26 finer (1/17). NGC ID# 228U, PCGS# 2204

3092 1906 Repunched Date, Snow-20, FS-303, MS66 Red PCGS. A rather noticeable repunched date variety when studied with a loupe, Snow-20 is in high demand among Indian cent specialists. This Premium Gem Red example displays frosty copper-orange luster and a bold strike with no distracting carbon spots. This is the only Red coin currently attributed by PCGS (1/17). PCGS# 412797 Base PCGS# 2225

3093 1908 MS66 Red PCGS. The design elements of this delightful Premium Gem are well-detailed and the original red surfaces are impeccably preserved, with vibrant mint luster on both sides. Overall eye appeal is outstanding. Population: 86 in 66 (10 in 66+) Red, 2 finer (12/16). NGC ID# 2295, PCGS# 2231

3094 1908-S MS65 Red and Brown PCGS. The 1908-S is best known as the first minor coinage manufactured at a branch mint. The San Francisco facility struck 1.1 million Indian Head cents in 1908, examples of which are scarcely seen this fine. Fire-orange rims blend with chocolate-brown centers. Accents of mauve and light copper appear intermittently. Sharply defined with a tick above 90. NGC ID# 2296, PCGS# 2233

3095 1908-S MS66 Red and Brown PCGS. The well-preserved original red surfaces of this spectacular Premium Gem have mellowed to light brown in some areas, including a streaky pattern on the reverse. The design elements are sharply detailed and satiny mint luster radiates from both sides. Population: 15 in 66 (1 in 66+) Red and Brown, 0 finer (12/16). NGC ID# 2296, PCGS# 2233

3096 1909 MS66+ Red PCGS. A stunningly attractive, high-end Premium Gem, with variegated coloration ranging from pale-orange to rich ruby-red. The strike is nearly full, with the Indian's cheek smooth and rounded and the headdress feather vanes sharply rendered. A few tiny carbon flecks require a strong glass and provide no distraction from the frosty luster and dazzling eye appeal. Population: 27 in 66+ Red, 14 finer (1/17). NGC ID# 2297, PCGS# 2237

3097 1909 MS66 Red PCGS. CAC. The conditionally elusive final-year Indian cent, here seen with frosty copper-gold luster and no major abrasions or spotting. Each side displays an attractive cartwheel effect. PCGS reports only 14 numerically finer examples (1/17). NGC ID# 2297, PCGS# 2237

3098 1909 MS66 Red PCGS. CAC. Eagle Eye Photo Seal, card not included. This final-year Indian cent displays frosty copper-orange luster and no abrasions. A few microscopic specks on the reverse are seen with a loupe. The top three headdress feathers hint at a slightly incomplete strike. There are 14 finer examples at PCGS (1/17). NGC ID# 2297, PCGS# 2237

3099 1909-S MS64 Red and Brown PCGS. Rich tangerine hues accent copper-gold luster on this near-Gem Red and Brown 1909-S Indian cent. The strike is above-average for the issue, showing complete definition of most headdress feathers. There are no major abrasions. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

1861 Indian Cent, PR64+ Seldom Encountered in Finer Grades

- 3100 1861 PR64+ PCGS. CAC.** From a generous proof mintage of 1,000 pieces, this Plus-Graded Choice specimen exhibits sharply detailed design elements and well-preserved surfaces, with a mix of original red and light crimson patina. The fields are moderately reflective and eye appeal is quite strong. Population: 70 in 64 (1 in 64+), 28 finer. CAC: 10 in 64, 8 finer (12/16). NGC ID# 229B, PCGS# 2256

- 3101 1862 PR64 PCGS Secure.** Tan-gold patina blankets this well-preserved copper-nickel proof, accenting sharp design elements. The fields exhibit modest reflectivity, as expected. NGC ID# 229C, PCGS# 2259

1862 Cent, PR66 Cameo Scarce With Rich Field-Motif Contrast

- 3102 1862 PR66 Cameo PCGS.** Few 1862 proof cents achieve the Cameo designation, in part because not many display strongly mirrored fields such as this Premium Gem example. Coppery-orange luster gleams from the glassy-smooth surfaces and blankets the frosted devices. The sharp strike is emblematic of a no-question proof, and only a few minuscule copper flecks disturb the otherwise pristine surfaces. Population: 26 in 66 (2 in 66+) Cameo, 4 finer (1/17). NGC ID# 229C, PCGS# 82259

- 3103 1864 Copper-Nickel PR65 PCGS.** A full strike and mirrored fields deliver excellent visual appeal on this Gem copper-nickel type coin. Both sides offer pleasing tan-gold coloration but with light olive overtones on the reverse. The obverse displays appreciable cameo contrast. Population: 45 in 65, 10 finer (1/17). NGC ID# 229E, PCGS# 2265

- 3104 1867 PR65+ Red and Brown PCGS. CAC.** A woodgrain-toned obverse features accents of rose, while the reverse shows captivating fire-orange coloration. Magnification fails to confirm where this Plus-designated, CAC-approved Gem lost points. From an estimated mintage of 850 to 1,100 Indian cent specimens. Population: 48 in 65 (1 in 65+) Red and Brown, 16 finer. CAC: 8 in 65, 4 finer (1/17). NGC ID# 229K, PCGS# 2289

1872 Indian Cent, PR65 Red Challenging Date, Rare High-Grade Proof

- 3105 1872 PR65 Red PCGS.** With exception of the 1877, the 1871 and 1872 Indian Head issues are the most challenging of the series in high grade. Proofs are slightly more available than business strikes in Gem or finer grades. In Red format, the proofs are very scarce and we seldom offer more than a couple of 1872 Gems during the course of an auction year. This delightful PR65 Red example is razor-sharp with glittering blaze-orange color. Aside from some tiny, nondistracting carbons and minor cloudiness at the outer mirrored fields, there are no limiting factors. The eye appeal is great. Population: 11 in 65 Red, 6 finer (1/17). NGC ID# 229R, PCGS# 2305

- 3106 1875 PR65+ Red and Brown PCGS. CAC. Snow-PR3.** The flag of the 5 is lightly repunched north. A predominantly pumpkin-gold Gem with glimpses of apple-green on the obverse field. The reverse displays hints of dusky rose-red. Sharply struck, flashy, and beautiful. NGC ID# 229U, PCGS# 2313

- 3107 1876 PR66 Brown PCGS. CAC.** Among the finest Brown coins at PCGS and the only piece in this grade endorsed by CAC. This high-end proof displays a full strike and reflective fields. Hints of rose, green, and olive-brown emerge from the fields when tilted beneath a light. Population: 12 in 66 Brown, 0 finer. CAC: 1 in 66, 0 finer (1/17). NGC ID# 229V, PCGS# 2315

1877 Cent, PR64 Red and Brown Nearly Full Red Surfaces

- 3108 1877 PR64 Red and Brown PCGS.** Collectors who find the 1877 Indian cent to be out of reach in high grade often opt for the more collectible proof variant to fill the hole in their date collections. This Choice Red and Brown example is more Red than Brown. Rose-gold and coppery-orange hues adorn each side, complemented by reflective fields and sharp devices. NGC ID# 229W, PCGS# 2319

- 3109 1880 PR66 Red PCGS.** Coppery-orange surfaces yield hints of deeper red on each side of this Premium Gem proof, complementing mirrored fields and sharp, frosty design elements. The obverse alone might have earned a Cameo designation, although the reverse is less contrasted. Population: 19 in 66 Red, 8 finer (1/17). NGC ID# 229Z, PCGS# 2329

- 3110 1881 PR67 Brown PCGS. CAC.** The single finest Brown proof at PCGS (1/17), this CAC-endorsed 1881 Indian cent displays a unique combination of amber-orange and mint-green toning over deeply reflective fields. The devices are sharply defined. NGC ID# 22A2, PCGS# 2330

- 3111 1881 PR66 Red and Brown PCGS.** An attractive array of olive-green, peach-yellow, apricot, and lavender-red hues emerge from mirrored fields on this sharp Premium Gem proof. There are no mentionable distractions. Population: 37 in 66 (1 in 66+) Red and Brown, 11 finer (1/17). NGC ID# 22A2, PCGS# 2331

**1883 Cent, PR67 Brown
Vivid Blue Coloration**

- 3112 1883 PR67 Brown PCGS.** Vivid ocean-blue and violet hues adorn each side of this Superb Gem Brown proof. The strike is full, and each side offers subtle field-device contrast through the patina. The 1883 is rarely seen this fine, and higher-grade Brown coins are unknown. Population: 21 in 67 (4 in 67+) Brown, 0 finer (1/17). NGC ID# 842U, PCGS# 2336
- 3113 1907 PR66 Red and Brown PCGS.** The obverse is peach-gold with iridescent rose-red and lime-green undertones. The colorful reverse exhibits cherry-red, olive-gold, and lavender shades. Well struck and undeniably attractive. NGC ID# 22AW, PCGS# 2409
- 3114 1908 PR66 Red and Brown PCGS.** From a nominal proof mintage of 1,620 pieces, this delightful Premium Gem exhibits razor-sharp definition on all design elements, and the reflective fields are impeccably preserved. The surfaces show a vivid mix of original red and violet patina, with outstanding eye appeal. Population: 32 in 66 (1 in 66+) Red and Brown, 5 finer (1/17). NGC ID# 22AX, PCGS# 2412

LINCOLN CENTS

**1909 Lincoln Cent, MS67+ Red
Significant First Year of Issue**

- 3115 1909 VDB MS67+ Red PCGS.** Overlooked by many collectors because of the VDB's one-year type status, the 1909 is nevertheless a significant first-year issue and one that was not as extensively saved in high grades. This is a magnificently preserved example, one that displays rich red mint luster. The surfaces just glow with mint frost. Sharply defined in all areas and free from any distractions. NGC ID# 22AZ, PCGS# 2425
- 3116 1909 VDB MS67 Red PCGS. CAC.** The 1909 VDB cent has a huge following at the Superb Gem Red level, as even though the two major services have certified a few hundred pieces in that grade, it is the finest practically obtainable. This thoroughly lustrous Superb Gem is precisely struck and practically pristine, with flaming orange-red surfaces, a bold strike, and enormous eye appeal. An outstanding representative of this single-year design subtype. PCGS has graded only a single example finer. CAC: 42 in 67, 0 finer (1/17). Ex: *Central States Signature* (Heritage, 5/2004), lot 5566; *FUN Signature* (Heritage, 1/2010), lot 280; *Long Beach Signature* (Heritage, 6/2010), lot 93. NGC ID# 22AZ, PCGS# 2425

**1909 VDB Lincoln Cent, MS67+ Red
Only One Coin Certified Finer at PCGS**

- 3117 1909 VDB MS67+ Red PCGS. CAC.** An incredibly lustrous and appealing Superb Gem of the highest quality, combining peach-gold and coppery-red highlights across the finely textured, coruscating surfaces. The 1909 VDB is somewhat available through the MS67 grade, but Plus-graded coins with CAC endorsement are extremely rare in the context of this supremely collectible series. Population: 21 in 67+ Red, 1 finer. CAC: 42 in 67, 0 finer (12/16). NGC ID# 22AZ, PCGS# 2425
- 3118 1909 VDB Doubled Die Obverse, FS-1102, MS65 Red PCGS. CAC.** The obverse legends have thick letters, but extra thickness is most apparent on the tail of the first 9 in the date. This highly lustrous peach-gold Gem has a precise strike and mark-free surfaces. Distributed minor carbon is all that limits the grade. Population: 37 in 65 (1 in 65+) Red, 20 finer (1/17). NGC ID# 22AZ, PCGS# 37636 Base PCGS# 2425
- 3119 1909-S VDB MS64 Brown PCGS.** A well-struck coin from slightly worn dies that show faint metal flowlines near the rims. The date, mintmark, and designer's initials are clear. This Brown near-Gem displays satiny luster with hints of orange-gold showing through chestnut brown patina. NGC ID# BYKW, PCGS# 2426
- 3120 1909-S VDB MS63 Red and Brown NGC.** An impressive Select specimen of this famous, sought-after key, with well-detailed design elements that show the all-important designer's initials on the reverse. The original red surfaces have mellowed to light brown in many areas and the mint luster is slightly subdued. NGC ID# 22B2, PCGS# 2427
- 3121 1909-S VDB MS63 Red and Brown PCGS.** Lustrous copper-orange surfaces yield chestnut-brown overtones on each side, although no significant abrasions are observed. The strike is weak from worn dies, which blurs the peripheral legends. Victor D. Brenner's initials remain visible, and the mintmark is clear. NGC ID# 22B2, PCGS# 2427
- 3122 1909-S VDB MS64 Red and Brown NGC.** A sharp, satiny example of this key date with golden luster and chocolate-brown colors forming a woodgrain pattern on each side. There are no mentionable abrasions. NGC ID# 22B2, PCGS# 2427
- 3123 1909-S VDB MS64 Red and Brown PCGS. CAC.** A boldly defined '09-S VDB cent, this example exhibits brilliant orange mint luster that has just begun to fade to light brown on the high points. This famous variety is by far the most popular Lincoln cent, and ranks among the best-known of all 20th century varieties, regardless of denomination. Ex: *Baltimore Signature* (Heritage, 3/2009), lot 260. NGC ID# 22B2, PCGS# 2427
- 3124 1909-S VDB MS65 Red and Brown PCGS.** A mostly red Gem but with a few faint wisps of amber color that earn the Red and Brown designation from PCGS. This piece is sharply struck and displays vibrant mint luster. There are no major abrasions. NGC ID# 22B2, PCGS# 2427
- 3125 1909-S VDB MS64 Red PCGS.** This dusky peach-gold key date example displays good luster and is void of visible contact. The strike is precise, particularly on the all-important VDB initials. Scattered minor carbon cannot deny the eye appeal. The 1909-S VDB has been in-demand almost since the day it was first minted, and the clamor has grown in the century-plus since. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS65 Red
Splendid Original Coloration**

- 3126 1909-S VDB MS65 Red PCGS.** A wonderfully wholesome, peach-orange Gem 1909-S VDB, alive with frosty mint luster and natural eye appeal. The strike is uniformly sharp with a crisply struck VDB. A few flyspecks and tiny marks are nondistracting, serving as testimony to the original surfaces of this high-quality cent. Always the premier demand rarity of the Lincoln series. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS65 Red
Well-Known 20th Century Key**

- 3127 1909-S VDB MS65 Red PCGS.** Even, light red mint luster glows over each side and shows just a hint of the characteristic yellow color seen on most S-VDBs. Sharply defined throughout with a few tiny specks of carbon. This is a solid Gem example of this perennial 20th century favorite with its well-known mintage of 484,000 pieces. NGC ID# 22B2, PCGS# 2428

- 3128 1909-S MS65 Red PCGS.** A beautifully preserved Gem Red coin with softly frosted golden-orange luster and a sharp strike. There is no carbon spotting, and a loupe fails to reveal any noteworthy abrasions. Housed in an old green label holder and appearing quite high-end for the grade. NGC ID# 22B4, PCGS# 2434

- 3129 1909-S MS65 Red PCGS. CAC.** A beautiful orange-gold Gem of this first-year and low mintage branch issue. Boldly struck, unabraded, and lustrous with a hint of lilac shading on the field near the beard. The mintmark is unusually distant from the date. NGC ID# 22B4, PCGS# 2434

- 3130 1910 MS67 Red PCGS.** This luminous 1910 Lincoln cent displays frosty copper-orange luster with no abrasions and no unsightly spots. Both sides are uniformly colored the same hue, giving this coin significant eye appeal. None are numerically finer at either service. Population: 38 in 67 (4 in 67+) Red, 0 finer (1/17). NGC ID# 22B5, PCGS# 2437

- 3131 1911-D MS66 Red PCGS.** The 1911-D Lincoln cent is relatively available for an early mintmarked Lincoln cent even up to the Gem Red level, but finer-graded Red examples are seldom seen. The surfaces of this Premium Gem are brick-red and show few signs of contact as well as good preservation. Some signs of die fatigue appear, as made, in the form of metal flowlines nearer the rims. Population: 59 in 66 (6 in 66+) Red, 1 finer (12/16). NGC ID# 22B8, PCGS# 2446

- 3132 1913-D MS65 Red PCGS.** The 1913-D Lincoln cent is a rare issue as a Gem with original orange-red surfaces and a sharp strike. The present coin meets all three criteria, and should inspire spirited bidding when this lot is called. Rarely encountered any finer. Ex: Connelly Collection (Heritage, 9/2010), lot 3305, which realized \$3,105. NGC ID# 22BE, PCGS# 2464

1914-D Cent, Strong MS62 Brown

- 3133 1914-D MS62 Brown PCGS. CAC.** Specialists recognize the 1914-D as a key to the series in any grade, given its low mintage of 1.1 million coins. Deep brown tones and blue accents color each side, combining with subdued satin luster. Each side is sharply detailed, including the hair and O in ONE. Slight softness occurs on the beard, and the upper reverse exhibits a few scattered marks, but those traits are undistracting. NGC ID# 84BX, PCGS# 2471

1914-D Lincoln Cent, MS63 Red and Brown

- 3134 1914-D MS63 Red and Brown NGC.** The obverse is lilac-red, the reverse is orange-gold, and both sides approach a Red designation. Boldly struck and lustrous with blushes of powder-blue on the obverse margin at 2 o'clock and 3:30. a lightly marked and visually impressive example of this low-mintage Denver Mint key. This coin should find a home in a fine collection of Lincoln cents. NGC ID# 22BH, PCGS# 2472

**1914-D Lincoln Cent, MS64 Red and Brown
Time-Tested Key Issue**

- 3135 1914-D MS64 Red and Brown PCGS.** Rich copper-orange color with burgundy and bluish-gray accents define this attractive Lincoln cent key issue. A conditionally scarce near-Gem survivor, the coin displays a needle-sharp strike and offers a near absence of marks. Only a few carbon flecks join the areas of deeper toning including a scattering of shades in the right obverse field, all of which contribute to the originality of the coin and the lustrous eye appeal that emerges from the Choice surfaces. PCGS reports just 58 numerically finer examples in Red and Brown (1/17). NGC ID# 22BH, PCGS# 2472

- 3136 1915-D MS65+ Red PCGS.** This is a well-struck Gem with the coveted Plus designation Registry Set collectors look for. Each side offers satiny golden-orange luster and largely unmarked surfaces with no distracting carbon spotting. NGC ID# 22BL, PCGS# 2482
- 3137 1915-S MS64 Red and Brown PCGS.** This Choice Red and Brown example displays satiny golden-orange mint luster shining through a dusting of brown toning. The O in ONE is a trifle soft, but the strike is otherwise well-executed. Finer Red and Brown coins are scarce. NGC ID# 22BM, PCGS# 2484
- 3138 1915-S MS64 Red and Brown PCGS.** A boldly struck and minimally marked near-Gem with soft copper-red surfaces that show pale brown overtones. Mattelike luster adds to the eye appeal. Finer Red and Brown examples are scarce, with only 27 such coins certified at PCGS (1/17). NGC ID# 22BM, PCGS# 2484
- 3139 1915-S MS65 Red and Brown PCGS.** Auburn-brown hues appear over each side of this golden-orange Gem Red and Brown coin, masking any small contact marks. The strike is sharp, and eye appeal is pleasant considering the reputation of the 1915-S for lacking aesthetic merit. Population: 27 in 65 Red and Brown, 0 finer (1/17). NGC ID# 22BM, PCGS# 2484
- 3140 1918-S MS66 Red and Brown NGC.** Tied with one other NGC coin as the finest 1918-S cent in the Red and Brown color category (1/17). This Premium Gem offers a bold strike and satiny autumn-brown and reddish toning. The reverse rim displays planchet lamination from 9 to 12 o'clock. NGC ID# 22BX, PCGS# 2511
- 3141 1918-S MS64 Red PCGS.** Satiny copper-orange luster adorns each side of this near-Gem Red 1918-S cent. The strike is bold, and there are no major abrasions. A lone speck appears below the US in TRUST. Population: 70 in 64 (2 in 64+) Red, 17 finer (1/17). NGC ID# 22BX, PCGS# 2512
- 3142 1919-D MS65 Red NGC.** The obverse of this MS65 1919-D cent offers amazing copper-orange color that shines boldly with occasional suggestions of rose. The reverse displays a degree of faint spotting through the upper obverse, but the coin nonetheless displays well. Census: 20 in 65 Red, 0 finer (12/16).
Ex: Long Beach Signature (Heritage, 2/2010), lot 170. NGC ID# 22BZ, PCGS# 2518
- 3143 1920-S MS65 Red and Brown PCGS. CAC.** A high-end Red and Brown coin that shows blended copper-orange and olive-green hues over satin luster. Well-struck despite die wear around the peripheries. Population: 32 in 65 (1 in 65+) Red and Brown, 1 finer. CAC: 11 in 65, 0 finer (1/17). NGC ID# 2547, PCGS# 2529
- 3144 1922 No D, Strong Reverse, FS-401, XF40 PCGS.** Die Pair 2. The lines in the wheat ears are sharp on this key date cent, an indication that the coin has much less actual wear than implied by Lincoln's cheek and jaw. Diagnostic for the Strong Reverse variety, TRUST and the second 2 in the date are much sharper than the rest of the obverse legend. A pleasing, problem-free chocolate-brown example. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285
- 3145 1922 No D, Strong Reverse, FS-401, XF40 PCGS.** Bold lines in the wheat ears confirm that this key date cent has witnessed only moderate circulation, even though Lincoln's cheekbone is flat, as always for FS-401. The medium brown surfaces are lightly marked aside from a single thin line on Lincoln's shoulder. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1922 No D Lincoln Cent, AU50
Strong Reverse, FS-401**

- 3146 1922 No D, Strong Reverse, FS-401, AU50 PCGS.** Die Pair 2. Lincoln cents were only struck at the Denver Mint in 1922, but excessive die wear effaced the mintmark on three obverse dies, resulting in the sought-after No D variety. This lightly worn and lightly abraded specimen is from Die pair 2, with a heavily polished obverse and a strongly detailed fresh reverse die. Die Pair 2 coins are by far the most desirable of the No D varieties. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285
- 3147 1923-S MS65 Red and Brown NGC.** A lustrous and virtually unabraded peach-gold Gem. A glimpses of lilac toning is east of the T in CENT, and a small flan flake is on the reverse rim at 9 o'clock. An early branch issue, the 1923-S has a low mintage and is rarely encountered in full Red. NGC ID# 22CB, PCGS# 2547
- 3148 1924-D MS64 Red PCGS.** Satiny copper-pink luster shows excellent preservation on this near-Gem Red 1924-D cent. The coin is well-struck despite moderate metal flowlines in the fields, produced by worn dies. Die erosion is a common characteristic of Denver Mint cents from this period. NGC ID# 22CD, PCGS# 2554

1925-D Cent, Beautiful MS65 Red

- 3149 1925-D MS65 Red PCGS.** The 1925-D, while not in the same class of challenge as the 1925-S, is nonetheless elusive in Gem Red grade. This beautiful pumpkin-gold Red Gem has an impressive strike, especially on Lincoln's shoulder and opposite on the O in ONE. The surfaces are essentially unabraded, and carbon is virtually absent. Exemplary quality for this scarce branch mint issue. Population: 69 in 65 (1 in 65+) Red, 2 finer (1/17).
Ex: Long Beach Signature (Heritage, 9/2008), lot 415, which brought \$4,887.50; Long Beach Signature (Heritage, 6/2010), lot 141, where it brought \$5,462.50. NGC ID# 22CG, PCGS# 2563
- 3150 1926-D MS65 Red PCGS.** Softly struck from worn dies and yet distinctly attractive with glowing copper-orange luster and abrasion-free surfaces. Scattered microscopic flecks on the reverse appear only with a loupe. Finer Red coins are rarely seen. Population: 57 in 65 Red, 4 finer (1/17). NGC ID# 22CK, PCGS# 2572
- 3151 1928-S Large S, FS-501, MS64 Red PCGS.** Concerning the 1928-S cent, *Cherrypickers* states that the "large, trumpet-style S mintmark is very scarce and highly collectible." A lower mintage branch mint issue, it is conditionally rare regardless of the mintmark size. This coruscating orange-gold cent shows a hint of lilac on the reverse. Carbon and contact are absent. NGC ID# 22CT, PCGS# 37708 Base PCGS# 2593

3152 1929-D MS66 Red PCGS. 30th Anniversary Green Label Holder. A magnificent orange-red example. A lens reveals only trivial imperfections. An important acquisition for the competitive Registry holding. Population: 31 in 66 (1 in 66+) Red, 0 finer (1/17). NGC ID# 22CV, PCGS# 2599

3153 1929-S MS66 Red PCGS. The 1929-S is among the more available S-mint Lincoln cent issues of the 1920s, but at the Premium Gem Red level, it is a different matter. This specimen boasts an adequate strike on both sides, with lovely two-toned coloration: Orange-red predominates, complementing hazel and blond near the left rims on each side. A pretty coin. Population: 42 in 66 (2 in 66+) Red, 0 finer (1/17).
Ex: *Long Beach Signature (Heritage, 6/2010), lot 153.* NGC ID# 22CW, PCGS# 2602

**1931-S Cent, MS66 Red
None Certified Finer**

3154 1931-S MS66 Red PCGS. Conditionally scarce in MS66 Red, this 1931-S Lincoln cent is among the finest certified by either service. The coin displays a bold strike from fresh dies with luminous copper-orange luster. A few gray flecks on the reverse are not obtrusive to the naked eye. An excellent Registry candidate. NGC ID# 22D4, PCGS# 2620

3155 1931-S MS66 Red PCGS. CAC. Conditionally scarce this fine and among the highest-graded 1931-S cents known in Red condition (1/17). The surfaces display beautiful, frosty copper-pink luster with rose-red highlights. The strike is slightly soft from die wear only, which is evident in the fields around the relief elements. NGC ID# 22D4, PCGS# 2620

3156 1936-D MS67+ Red PCGS. CAC. Although plentiful in MS67 Red, the 1936-D Lincoln cent is rarely seen as such with a Plus designation, and finer coins are unknown at PCGS. This CAC-endorsed Registry candidate displays a bold strike and satiny copper-orange luster. There is no bothersome carbon spotting. Population: 17 in 67+ Red, 0 finer. CAC: 26 in 67, 0 finer (1/17). NGC ID# 22DF, PCGS# 2653

3157 1937-S MS67+ Red PCGS. One of only two dozen MS67+ Red coins at PCGS with none finer (1/17), this Registry-grade 1937-S cent displays frosty copper-orange luster and unabraded, carbon-free surfaces. The strike is soft due to die wear, which produces metal flowlines in portions of the fields, but eye appeal is excellent. NGC ID# 86CM, PCGS# 2665

3158 1938-D MS67+ Red PCGS. A sharp, lustrous copper-orange Registry coin with luminous, carbon-free surfaces. The 1938-D is rarely seen this fine, and the present coin is an ideal Registry Set candidate. Population: 19 in 67+ Red, 1 finer (1/17). NGC ID# 22DM, PCGS# 2671

3159 1939-S MS67+ Red PCGS. Although plentiful in MS67 Red, the 1939-S cent is unknown in MS68 Red. This Plus-graded MS67 Red coin is tied with 36 others as the finest at PCGS (1/17). The strike is bold, and each side displays satiny tangerine-orange luster with no carbon spotting. NGC ID# 22DS, PCGS# 2683

3160 1940-S MS67+ Red PCGS. CAC. Satiny copper-orange luster gives this high-end Superb Gem pleasing visual appeal, while a sharp strike and lack of carbon spotting add to the desirability. Only a single Red coin is finer at either service (1/17). NGC ID# 22DV, PCGS# 2692

3161 1941 Doubled Die Obverse, FS-101, MS66 Red PCGS. Described in the *Cherry-pickers'* reference as an "old school" doubled die that has been known for decades. Distinctive die doubling is present on all obverse lettering. This high-end Red coin displays a bold strike and frosty copper-orange luster. There is no carbon spotting present. Population: 5 in 66 Red, 0 finer (1/17). NGC ID# 22DW, PCGS# 37780 Base PCGS# 92695

3162 1941-D MS67+ Red PCGS. CAC. Although plentiful in MS67 Red, the 1941-S cent has a population of only 10 coins in MS67+ Red at PCGS, with none finer (1/17). This top-grade Registry coin displays glowing, frosty luster with swirling copper-orange, mint-green, and deeper rose hues. Eye appeal is terrific. NGC ID# 22DX, PCGS# 2698

3163 1941-D MS67+ Red PCGS. CAC. PCGS reports only nine other Plus-graded MS67 Red examples (1/17), making this piece a rare top-grade Registry coin. The strike is razor-sharp from fresh dies, and the carbon-free surfaces are devoid of abrasions. NGC ID# 22DX, PCGS# 2698

**1944-D/S Cent, MS65 Red
FS-511, Significant Guide Book Variety**

3164 1944-D/S FS-511 MS65 Red PCGS. This *Guide Book* and *Cherry-pickers'* variety shows a the secondary S mintmark above and behind the primary D. A scarce and popular variety, it is seldom available in Gem Red grade. Lustrous orange-red surfaces display blue accents and just two or three microscopic carbon flecks on this example. Sharply struck, only a few minor ticks on the shoulder are noted but they are largely inconsequential to the strong eye appeal. Population: 44 in 65 (1 in 65+) Red, 12 finer (1/17). NGC ID# 2734, PCGS# 37834 Base PCGS# 2728

**1944-D/S Cent, MS65 Red
FS-511, Sought-After Variety**

3165 1944-D/S FS-511 MS65 Red PCGS. The errant S mintmark is evident north of the D. This is the scarcer of the two D Over S varieties for the date and is in high demand. The present Gem Red example is ideal for Registry Set collectors. The strike is bold, and each side displays vibrant copper-orange and rose-red hues. A few scattered specks are not out of line for the grade. Population: 44 in 65 (1 in 65+) Red, 12 finer (1/17). NGC ID# 2734, PCGS# 37834 Base PCGS# 2728

**1945 Lincoln Cent, MS67+ Red
Tied for Finest at PCGS**

- 3166 1945 MS67+ Red PCGS. CAC.** Alive with blazing mint luster and stunning flame-orange coloration, this high-end Superb Gem is supremely handsome and visually spectacular. Tied as one of the finest-graded examples at PCGS, it is an obvious candidate for Registry Set consideration for the most advanced Lincoln cent specialist. The CAC endorsement is an important factor. Population: 111 in 67 (7 in 67+) Red, 0 finer. CAC: 15 in 67, 0 finer (1/17). NGC ID# 22EG, PCGS# 2734

- 3167 1948-D MS67+ Red PCGS.** Among the finest known, this high-end Superb Gem 1948-D cent displays a razor-sharp strike and vibrant, frosty mint luster with no abrasions. Rich copper-orange hues bleed into lighter golden colors near the borders. A single carbon speck is noted above the N in ONE. Population: 83 in 67 (6 in 67+) Red, 0 finer (1/17). NGC ID# 22ET, PCGS# 2764

**1953 Lincoln Cent, MS67 Red
Tied for Finest Certified**

- 3168 1953 MS67 Red PCGS. CAC.** Rich, peach-orange color glows evenly across both sides of this spot-free and attractive Superb Gem cent. Even a strong lens fails to locate any marks needing mention. Lincoln's beard characteristically lacks definition on the 1953, but the strike is sharp overall. CAC endorsement is especially meaningful among the MS67-graded examples, since neither service reports a numerically finer coin. Population: 18 in 67 Red, 0 finer. CAC: 5 in 67, 0 finer (1/17). NGC ID# 22LD, PCGS# 2806

- 3169 1955 Doubled Die Obverse, FS-101 — Improperly Cleaned — NGC Details. AU.** A sharply struck chocolate-brown example of the historically important 1955 doubled die cent. The right obverse field exhibits subtle marks, but the overall eye appeal is pleasing.

- 3170 1955 Doubled Die Obverse, FS-101 — Improperly Cleaned — NGC Details. AU.** A sharply defined example of the famous and dramatic doubled die variety. Both sides are blanketed in blended lavender and walnut-brown patina. The reverse is unmarked, and the obverse field appears disturbed beneath the toning.

- 3171 1955 Doubled Die Obverse, FS-101, MS62 Brown PCGS.** The 1955 FS-101 is the most prominent among all Lincoln cent doubled die varieties. The spread is remarkably wide, and the first hubbing is as bold as the second. A carbon-free and charming olive-brown example with lustrous and minimally marked surfaces. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3172 1955 Doubled Die Obverse, FS-101, MS63 Brown NGC.** A coruscating lavender-brown representative of this desirable and prominent doubled die variety. The fields display a few unimportant marks, and the strike is slightly shy of complete on Lincoln's jaw and cheekbone. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 FS-101 Cent, MS64 Brown
Doubled Die Obverse**

- 3173 1955 Doubled Die Obverse, FS-101, MS64 Brown NGC. CAC.** The doubled die 1955 cent created a hobby sensation upon release. The strong first hubbing, and the wide clockwise spread between hubbings, ensured its status as the most famous variety of its kind. A quantity were soon saved from commerce, but most survivors are toned Brown, such as the present Choice cent. Protected areas retain the initial orange-gold color. Impressively devoid of spots or marks. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3174 1964-D MS67 Red PCGS. 30th Anniversary Green Label Holder.** Rich and exquisite fire-red color is consistent throughout this lustrous and unabraded Superb Gem. Well struck and free from carbon. A prize for the Registry collector. Population: 18 in 67 (3 in 67+) Red, 0 finer (1/17). NGC ID# 22G8, PCGS# 2893

- 3175 1966 MS67 Red PCGS. 30th Anniversary Green Label Holder.** A spectacular orange-gold Superb Gem. Intricately impressed and essentially immaculate. The right obverse field displays myriad die lines. Unimprovable at either service. Population: 12 in 67 Red, 0 finer (1/17). NGC ID# 22LV, PCGS# 2900

- 3176 1970-S Large Date, Doubled Die Obverse, FS-101, MS63 Red and Brown NGC.** *Cherrypickers'* states, "this very strong doubled die is extremely rare." IN GOD WE TRUST and LIBERTY show the most significant spread between hubbings, although the 0 in the date is also prominently doubled. Well struck and lustrous with a full Red obverse and a dusky brick-red reverse. NGC ID# 22GN, PCGS# 37998 Base PCGS# 2938

- 3177 1972 Doubled Die Obverse, FS-101, MS66 Red PCGS. CAC.** *Cherrypickers'* lists nine doubled die obverse varieties for the 1972 cent, but the *Guide Book* FS-101 is by far the most prominent. The obverse legends have a spread almost comparable with the 1955 FS-101. This lustrous pumpkin-gold Premium Gem is devoid of detriments and exhibits outstanding eye appeal. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

- 3178 1995 Doubled Die Obverse, FS-101, MS69 Red NGC.** A practically perfect example of this popular Lincoln cent doubled die, one of the most widely reported varieties ever to appear in the mainstream press. Pale copper-gold and pink surfaces are all but flawless. For the variety, Census: 19 n 69 Red, 0 finer (1/17). NGC ID# 22JS, PCGS# 38105 Base PCGS# 3127

PROOF LINCOLN CENTS

1915 Lincoln Cent, PR65 Red In-Demand Matte Proof Issue

- 3179 1915 PR65 Red PCGS.** The design elements of this delightful Gem exhibit razor-sharp definition throughout, and the original red surfaces are impeccably preserved, with strong matte luster characteristics. Overall eye appeal is terrific. From a matte proof mintage of 1,150 pieces. Population: 16 in 65 Red, 10 finer (1/17). NGC ID# 22KY, PCGS# 3323

1936 Lincoln Cent, PR66 Red Scintillating Type Two, Brilliant Finish

- 3180 1936 Type Two — Brilliant Finish PR66 Red PCGS.** A stunning, glassy-mirrored Brilliant Finish proof with alternating areas of vibrant cherry-red and pumpkin-orange color on both sides. The obverse is essentially faultless and spot-free, while the reverse is nearly its equal with only a few isolated, inconspicuous flecks that require a strong lens to view. The strike is razor-sharp and the eye appeal is extraordinary. Population: 56 in 66 (4 in 66+) Red, 2 finer (12/16). NGC ID# 22L3, PCGS# 3335
- 3181 1936 Type Two — Brilliant Finish PR63 Red Cameo PCGS.** An eye-appealing Cameo that appears nicer than the PR63 grade suggests. This fully struck 1936 brilliant proof yields copper-pink coloration with wisps of lavender on each side. There are minimal lines in the fields. Population: 1 in 63 Cameo, 9 finer (1/17). NGC ID# BY3A, PCGS# 83335

1937 Lincoln Cent, PR67 Red None Certified Finer

- 3182 1937 PR67 Red PCGS.** The original red surfaces of this spectacular Superb Gem are impeccably preserved, with deeply mirrored fields and no mentionable distractions. The design elements exhibit razor-sharp definition and eye appeal is terrific. From a limited proof mintage of 9,320 pieces. Population: 21 in 67 Red, 0 finer (1/17). NGC ID# 22L7, PCGS# 3338

- 3183 1937 PR66 Red Cameo PCGS.** An intricately struck orange-gold specimen. No marks are apparent, though each side exhibits a couple of tiny violet freckles. A scarce proof issue with appreciable cameo contrast. Population: 27 in 66 (2 in 66+) Cameo, 4 finer (1/17). NGC ID# 22L5, PCGS# 83338

- 3184 1939 PR67 Red PCGS.** This carbon-free Superb Gem is among the finest Red proofs certified, and it is conditionally scarce as such. The strike is sharp, and the mirrored fields offer excellent eye appeal. Population: 43 in 67 (1 in 67+) Red, 0 finer (1/17). NGC ID# 22L6, PCGS# 3344

- 3185 1942 PR66 Cameo PCGS.** Beautifully preserved copper-pink surfaces display appreciable cameo contrast on each side of this brilliant Premium Gem proof. The strike is full, and a couple of faint flecks in the left obverse field seem to vanish into the mirrored backdrop. Population: 16 in 66 Cameo, 4 finer (1/17). NGC ID# 22L9, PCGS# 83353

TWO CENT PIECES

1864 Two Cent, Blazing MS66 Red Large Motto, Tied for Finest at CAC

- 3186 1864 Large Motto MS66 Red PCGS. CAC.** Blazing luster runs over both sides of this great-looking sunset-orange Premium Gem Red Large Motto two cent. The obverse displays some interesting peripheral die cracks, the heaviest from the 18 in the date running left to the fletchings and the lower leaves. It progresses upward to join the left corner of the scroll bearing the motto, seemingly an obverse die that was, well, about to do just that. The reverse die appears terminal as well, although U.S. Mint dies have proven surprisingly doughty. A few dark flecks on the obverse are far from overt and fail to diminish either the beauty or the collector appeal. Population: 63 in 66 (2 in 66+) Red, 2 finer (1/17). NGC ID# 22N9, PCGS# 3578
- 3187 1868 MS65 Red and Brown NGC.** Sharp motifs accent satiny, original mint luster that shows rich copper-orange undertones shining through subtle chestnut-brown patina. There are no obvious abrasions or spots. Finer Red and Brown coins are rare. Census: 76 in 65 Red and Brown, 9 finer (1/17). NGC ID# 22NC, PCGS# 3598

PROOF TWO CENT PIECES

- 3188 1870 PR65 Red PCGS.** Reflective fields, sharp design elements, and bright copper-orange color characterize this Gem Red 1870 two cent proof. Finer Red examples are rarely offered. Population: 44 in 65 (1 in 65+) Red, 15 finer (1/17). NGC ID# 274Z, PCGS# 3644

- 3189 1871 PR66 Red and Brown PCGS. FS-102.** Doubled die obverse, as always on the proofs. This Premium Gem is far more Red than Brown, although wisps of amber toning on each side confirm the grade. The strike is sharp, and there are no obvious carbon specks. Population: 25 in 66 (1 in 66+) Red and Brown, 0 finer (1/17). NGC ID# 22NH, PCGS# 3646

- 3190 1871 PR66 Red and Brown PCGS. FS-102.** Orange-gold is predominant, but the obverse high points are lilac-red, and central reverse field is moderately mellowed. Fully struck and unabraded. TRUST is die doubled counter-clockwise, as always seen on proofs of this date. NGC ID# 22NH, PCGS# 3646

**1873 Closed 3 Two Cent Piece
Gem Red and Brown Proof**

- 3191 1873 Closed 3 PR65 Red and Brown PCGS.** Glimmering fields yield lovely violet and amber overtones atop bright coppery-orange patina on this Gem Red and Brown 1873 proof two cent piece. The strike is sharp, and slight cameo contrast is discernible on the reverse. The Closed 3 logotype in the date is plain when viewed with a glass. NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

- 3192 1851 MS66 PCGS.** A frosty, champagne-tinted first-year type coin, showing excellent preservation. The usual strike softness is seen on the central shield, but the peripheral legends and stars are sharp. PCGS lists 20 Superb Gems finer (1/17). NGC ID# 22YX, PCGS# 3664

**1851-O Silver Three Cent, MS66
Among the Finest at PCGS**

- 3193 1851-O MS66 PCGS.** Frosty, glowing mint luster adorns beautifully preserved surfaces, while each side offers warm champagne toning. The shield shows slight weakness, as usual, but the rest of the design is well-defined. No numerically finer examples of the only branch mint three cent silver issue are reported by PCGS. Population: 32 in 66 (3 in 66+), 0 finer (1/17). NGC ID# 22YY, PCGS# 3665
- 3194 1854 MS65 PCGS.** This Gem example is toned golden and sharply struck. A loupe fails to reveal any significant abrasions. Eye appeal is pleasing. Finer examples are rare. Population: 55 in 65 (1 in 65+), 13 finer (1/17). NGC ID# 22Z3, PCGS# 3670
- 3195 1857 MS64 PCGS. CAC.** The design elements of this attractive Choice specimen are well detailed, with a touch of softness on the outline of the obverse star and the reverse stars on the right. Clash marks are evident on both sides. The well-preserved surfaces radiate vibrant mint luster and eye appeal is quite strong. Population: 84 in 64, 47 finer. CAC: 9 in 64, 16 finer (12/16). NGC ID# 22Z6, PCGS# 3673

**1858 Three Cent Silver, Originally Toned MS66
Last of the Type Two Issues**

- 3196 1858 MS66 PCGS.** Final year (and most plentiful) of the Type Two series. The three cent series — both silver and nickel — can rightfully be termed as overlooked by type collectors, most likely because of their diminutive size. Few were set aside, though, and when type takes off again the Type Two three cent silver pieces are poised for significant gains. This piece displays thick mint frost beneath golden-gray and sea-green toning. Die clashed, as usual. Population: 38 in 66 (2 in 66+), 12 finer (1/17). NGC ID# 22Z7, PCGS# 3674

- 3197 1859 MS66+ NGC.** This high-end Premium Gem displays virtually pristine surfaces under shades of lavender-gray and sea-green toning. The design elements are well-detailed and both sides exhibit dramatic clash marks. Census: 20 in 66 (3 in 66+, 2 in 66★), 2 finer (12/16). NGC ID# 22Z8, PCGS# 3677

PROOF THREE CENT SILVER

- 3198 1861 PR64+ PCGS. CAC.** Razor-sharp devices and mirrored fields exhibit few marks of any kind. This high-end near-Gem displays deep aquamarine, gold, lavender, and russet toning. Finer examples are elusive. Population: 50 in 64 (1 in 64+), 34 finer. CAC: 6 in 64, 14 finer (1/17). NGC ID# 27C8, PCGS# 3710
- 3199 1865 PR64 PCGS.** Dusky shades of lavender-gray and cerulean-blue toning blanket the well-preserved surfaces of this impressive Choice example, with sharply detailed design elements and reflective fields underneath. Population: 64 in 64, 49 finer (12/16). NGC ID# 27CB, PCGS# 3715
- 3200 1867 PR65 PCGS.** Shades of cerulean-blue, slate-gray, and pale gold toning visit the well-preserved surfaces of this attractive Gem, from a mintage of 625 pieces. The design elements are sharply detailed and reflective fields shine through the patina. Population: 55 in 65 (1 in 65+), 31 finer (12/16). NGC ID# 27CD, PCGS# 3717

**1868 Three Cent Silver, PR66 Cameo
Only Two Finer Coins at PCGS**

- 3201 1868 PR66 Cameo PCGS.** A small proof mintage of 600 three cent silver pieces was accomplished in 1868, to accompany a paltry business-strike production of 3,500 pieces. This delightful Premium Gem exhibits sharply detailed, frosty design elements that contrast boldly with the deeply reflective fields. The well-preserved surfaces are enhanced by hints of pale gold toning, with terrific eye appeal. Population: 12 in 66 (1 in 66+) Cameo, 2 finer (1/17). NGC ID# 27CE, PCGS# 83718

THREE CENT NICKELS

1866 Three Cent Nickel, MS66+ Rarely Encountered CAC Coin

- 3202 1866 MS66+ PCGS. CAC.** The 1866 three cent nickel is scarce in MS66 and rare any finer. The present Plus-graded Premium Gem is struck from clashed and cracked dies with slight weakness along the lower obverse and upper reverse rims. The nickel-gray surfaces show a hint of iridescence and excellent preservation. Population: 49 in 66 (9 in 66+), 3 finer. CAC: 18 in 66, 6 finer (1/17). NGC ID# 22NK, PCGS# 3732

- 3203 1870 MS66 PCGS.** A beautifully preserved, satiny Premium Gem with iridescent champagne toning and no obtrusive abrasions. Some weakness on the reverse wreath is likely due to a partially clogged die. A thin, threadlike strike-through is evident on Liberty's jaw line. Population: 32 in 66 (3 in 66+), 0 finer (1/17). NGC ID# 22NM, PCGS# 3736

- 3204 1875 MS66 PCGS. CAC.** This is a boldly struck and well-preserved example with satiny luster and semireflective fields. Hints of pale champagne toning grace each side. The 1875 nickel three cent piece is scarce this fine and rare any finer. Population: 35 in 66 (6 in 66+), 4 finer. CAC: 15 in 66, 4 finer (1/17). NGC ID# 22NS, PCGS# 3743

- 3205 1875 MS66+ PCGS. CAC.** With a mintage of 227,300 pieces, the 1875 can hardly be termed rare, and yet few three cent nickels of any date were saved in any appreciable numbers. This is an all-brilliant, highly lustrous example that is sharply defined throughout. Population: 35 in 66 (6 in 66+), 4 finer. CAC: 15 in 66, 4 finer (1/17). NGC ID# 22NS, PCGS# 3743

1884 Three Cent Nickel, AU55 An Important Series Key

- 3206 1884 AU55 PCGS.** The 1884 boasts the second-lowest mintage among three cent nickels (1,700 coins, behind only the 1885's 1,000). However, it has a much lower survival rate than the 1885. This outstanding Choice AU example is minimally circulated with few abrasions. The motifs are razor-sharp, showing only the slightest bit of friction. Steel-gray with glints of olive-gold. Population: 6 in 55, 18 finer (1/17). NGC ID# 2766, PCGS# 3752

- 3207 1888 MS67 PCGS.** Hints of iridescence highlight delicate champagne-gray luster on this frosty Superb Gem example. The strike is sharp, and eye appeal is exceptional. Only a single coin is numerically finer. Population: 50 in 67 (1 in 67+), 1 finer (1/17). NGC ID# 275H, PCGS# 3757

1888 Three Cent Nickel, MS67 Merely One Coin Finer

- 3208 1888 MS67 PCGS. CAC.** With the series nearly at a close, the Mint struck 36,501 three cent nickels in 1888. Examples are very scarce in this impressive grade. Not a single tick or fleck worthy of mention appears on either side. Lively luster cascades over brilliant surfaces and pinpoint-sharp motifs. Population: 50 in 67 (1 in 67+), 1 finer. CAC: 17 in 67, 2 finer (1/17). NGC ID# 275H, PCGS# 3757

- 3209 1889 MS66 PCGS. CAC.** Jewel-like silver luster ripples across the untuned surfaces of this exquisite Premium Gem — an exceptionally well-produced and preserved example, with thick mint frost and almost no evidence of contact. This is an important type coin as the final year of the denomination with terrific eye appeal. Population: 37 in 66 (5 in 66+), 22 finer. CAC: 8 in 66, 8 finer (1/17). NGC ID# 275J, PCGS# 3758

1889 Three Cent Nickel, Outstanding MS67

- 3210 1889 MS67 PCGS. CAC.** Jade-green margins bound the pale reddish fields and devices. Swirling luster and a powerful strike complete the eye appeal of this desirable Superb Gem. A pristine representative of this low mintage series-ending date. Population: 21 in 67, 0 finer. CAC: 8 in 67, 0 finer (1/17). NGC ID# 275J, PCGS# 3758

PROOF THREE CENT NICKELS

- 3211 1867 PR66 Cameo PCGS.** The deeply mirrored fields of this impressive Premium Gem contrast boldly with the frosty, sharply detailed design elements to create a startling cameo effect. The virtually pristine surfaces show a few subtle hints of pale gold toning. Population: 40 in 66 (3 in 66+) Cameo, 4 finer (12/16). NGC ID# 275M, PCGS# 83763

- 3212 1867 PR66 Cameo PCGS.** The design elements of this spectacular Premium Gem are sharply detailed and frosty, creating intense cameo contrast with the deeply mirrored fields. A few hints of greenish-gold toning visit the well-preserved surfaces. Population: 40 in 66 (3 in 66+) Cameo, 4 finer (12/16). NGC ID# 275M, PCGS# 83763

**1869 Three Cent Nickel, PR66+ Deep Cameo
Only Three Pieces Finer at PCGS**

- 3213 1869 PR66+ Deep Cameo PCGS. CAC.** Minor hub doubling on the reverse wreath is an interesting sidelight, but the main attraction is brilliant, high-contrast surfaces of this Plus-graded Deep Cameo proof with CAC-endorsement. Frosted motifs float on glassy-smooth, mirrored fields. A glass reveals only a few pinpricks on the sharply defined devices. Only a few coins exceed this example in technical grade and it is doubtful any deliver a more impressive visual impact. Population: 19 in 66 (4 in 66+) Deep Cameo, 3 finer. CAC: 16 in 66, 0 finer (1/17). NGC ID# 275P, PCGS# 93765

**1869 Nickel Three Cent, PR66+ Deep Cameo
Conditionally Scarce**

- 3214 1869 PR66+ Deep Cameo PCGS. CAC.** Thick, frosty luster sets the design elements off from the deep, watery mirroring of the fields on this high-end Premium Gem proof. The strike lacks slightly on left two Roman numerals on the reverse but is otherwise excellently impressed. The coin is brilliant and without contact marks. Population: 19 in 66 (4 in 66+) Deep Cameo, 3 finer. CAC: 16 in 66, 0 finer (1/17). NGC ID# 275P, PCGS# 93765

**1875 Three Cent Nickel, PR66+ Cameo
Finest at Both Services**

- 3215 1875 PR66+ Cameo NGC. CAC.** The combination of bold field-device contrast, complete brilliance, and a razor-sharp strike explains the appeal of this amazing Premium Gem Cameo three cent nickel. From a reported mintage of 700+ proofs. There are none graded higher at either service. Census: 5 in 66 Cameo (1 in 66+, 1 in 66★), 0 finer. CAC: 10 in 66, 0 finer (1/17). NGC ID# 22NV, PCGS# 83771

**1875 Three Cent Nickel, PR66 Cameo
None Certified Finer, FS-301 Misplaced Date**

- 3216 1875 Misplaced Date, FS-301, PR66 Cameo PCGS. CAC.** An impressive Misplaced Date, with the flag (or possibly the base) of an errant 1 visible at the front of Liberty's neck. While the variety is not rare, this is the finest example we can recall seeing among high-grade proofs. Pale champagne-gold surfaces display nice contrast with the mirrored fields, which retain die polish lines from lapping of the dies. A stunning, CAC-endorsed Premium Gem with unmarked surfaces and excellent visual impact. Population (all varieties): 14 in 66 (1 in 66+) Cameo, 0 finer. CAC: 10 in 66, 0 finer (1/17). PCGS# 524941 Base PCGS# 83771

- 3217 1878 PR67 Cameo NGC. CAC.** This delightful Superb Gem exhibits dramatic cameo contrast between the sharply detailed, frosty design elements and the deeply mirrored fields. The surfaces are impeccably preserved and eye appeal is terrific. From a proof-only mintage of 2,350 pieces. Census: 31 in 67 Cameo (1 in 67+, 3 in 67★), 2 finer. CAC: 35 in 67, 0 finer (12/16). NGC ID# 275Y, PCGS# 83774

- 3218 1878 PR67 Cameo PCGS Secure. CAC.** A satiny silver-gray Superb Gem that is fully struck aside from the reverse dentils, which slope slightly toward the field. No carbon is present, and there are no contact marks. A high grade example of this scarce proof-only date. Population: 38 in 67 (6 in 67+) Cameo, 1 finer. CAC: 35 in 67, 0 finer (1/17).
Ex: ANA Signature (Heritage, 8/2010), lot 4079. NGC ID# 275Y, PCGS# 83774

- 3219 1881 PR66 Deep Cameo PCGS. CAC.** While 3,575 three cent nickel proofs were sold in 1881, an paltry number of specimens enjoy the bold contrast and impeccable preservation seen here. Untoned and profoundly mirrored. Marks are on the holder rather than the coin. Population: 5 in 66 (1 in 66+) Deep Cameo, 2 finer. CAC: 3 in 66, 1 finer (1/17). NGC ID# 2763, PCGS# 93777

- 3220 1883 PR67 Cameo NGC. CAC.** Deeply mirrored fields produce modest cameo contrast on this Superb Gem proof type coin. The strike is full, and each side displays a hint of light champagne toning. The usual array of small lintmarks is absent from this piece. Census: 23 in 67 Cameo (1 in 67+, 1 in 67★), 7 finer. CAC: 33 in 67, 1 finer (1/17). NGC ID# 2765, PCGS# 83779

**1883 Three Cent Nickel, PR67+ Cameo
Bold Contrast, Faultless Appeal**

- 3221 1883 PR67+ Cameo NGC. CAC.** A limited mintage of circulation strikes (just 4,000 pieces struck) is outnumbered by the proofs issued for the 1883 (6,609 proofs minted), putting pressure on proofs to fill openings in high-grade sets. This Superb Gem contrasted proof is suitably high-end for such purposes and displays both the PCGS Plus designation and CAC endorsement. Brilliant with a faint blue sheen over the mirrored fields, the strike is first-rate and the surfaces are essentially without fault. Finer pieces are only subjectively so. Census: 23 in 67 Cameo (1 in 67+, 1 in 67★), 7 finer. CAC: 33 in 67, 1 finer (1/17). NGC ID# 2765, PCGS# 83779

- 3222 1888 PR67 Cameo PCGS.** Crisp silver-white surfaces offers excellent field-device contrast on this Superb Gem Cameo proof. The strike is full, and mint-made strike-throughs are almost nonexistent. No Cameos are known numerically finer. Population: 18 in 67 (1 in 67+) Cameo, 0 finer (1/17). NGC ID# 276B, PCGS# 83785

- 3223 1889 PR67 PCGS. CAC.** A beautifully preserved, razor-sharp proof with delicate pastel rainbow toning in concentric hues on each side. This CAC-endorsed Superb Gem fails to reveal a single noteworthy defect. Population: 60 in 67, 2 finer. CAC: 23 in 67, 1 finer (1/17). NGC ID# 22NW, PCGS# 3786

SHIELD NICKELS

- 3224 1866 Rays MS65 PCGS. CAC.** An excellent With Rays type coin, showing satiny battleship-gray luster and no obvious abrasions. A hint of pale champagne color graces each side. The strike is sharp, but a very shallow planchet void appears in the opening of the loop of the 5 on the reverse. Peripheral die cracks occur on each side. NGC ID# 22NX, PCGS# 3790

**1866 Rays Nickel, MS66+
'With Rays,' Tied for Finest Certified**

- 3225 1866 Rays MS66+ NGC.** The first-year With Rays Shield nickels presented nothing but problems for Mint employees, either from the new design itself or from the rock-hard nickel/copper alloy that proved intractable for mint equipment and dies. This lustrous and high-end Premium Gem is as attractive and highly graded as can be found for the issue. Tied for finest at either service by virtue of the Plus designation, the lustrous silverlike surfaces gleam with traces of clear golden toning. The strike is extremely sharp for a With Rays nickel, defying numerous bold die cracks on both sides. There are no significant marks or abrasions from post-Mint handling. Census: 29 in 66 (3 in 66+), 0 finer (1/17). NGC ID# 22NX, PCGS# 3790

- 3226 1869 MS66 PCGS.** A conditionally scarce Premium Gem example, among the finest at PCGS. This 1869 Shield nickel displays a bold strike and satiny luster cast in iridescent champagne toning. No major abrasions are observed. Population: 19 in 66 (1 in 66+), 0 finer (12/16). NGC ID# 22P3, PCGS# 3796

- 3227 1870 MS66 PCGS. CAC.** Almond-gold toning graces this lustrous and well struck Premium Gem. Both sides display delicate die cracks but are virtually void of contact or carbon. The reverse has a couple of minuscule strike-throughs, as coined. Population: 27 in 66 (3 in 66+), 0 finer. CAC: 5 in 66, 0 finer (1/17). NGC ID# 22P4, PCGS# 3797

- 3228 1880 — Cleaning — Genuine PCGS. XF Details.** The 1880 has a tiny business mintage of 16,000 pieces. Unlike the Seated, gold dollar, and three dollar issues that year, Philadelphia dealers overlooked the 1880 nickel. The business issue is rare in all grades, although proofs can be obtained with little difficulty. The present stone-gray example is hairlined and shows moderate wear on the upper horizontal shield stripes.

- 3229 1883/2 FS-302 AU50 NGC.** The bold diagonal die crack above the date confirms the late die state of this scarce overdate variety. The "point" of the 2 is apparent southwest of the lower knob of the 3. An original chestnut-gold example with moderate peripheral carbon and generally unmarked surfaces. PCGS# 38413 Base PCGS# 3813

**1883 Shield Nickel, MS67
Nearly Pristine Type Coin**

- 3230 1883 MS67 PCGS. CAC.** The Shield nickel design was abandoned in 1883 in favor of Charles Barber's Liberty Head design. The switch prompted collectors to set aside examples of each type, accounting for the accessibility of these final-year Shield nickels. This brilliant Superb Gem is fully struck and nearly pristine. Numerous die cracks appear on the obverse. Population: 16 in 67 (1 in 67+), 0 finer. CAC: 9 in 67, 0 finer (1/17). NGC ID# 22PH, PCGS# 3813

PROOF SHIELD NICKELS

- 3231 1866 Rays PR64 PCGS.** A sharp With Rays type coin that shows soft nickel-gray coloration and reflective fields. A loupe reveals some planchet roughness on each side, which is occasionally seen on early issues of this type. Traces of light golden toning are present. NGC ID# 276G, PCGS# 3817

1866 Shield Nickel, PR66 Cameo
Popular First-Year Type Coin

3232 1866 Rays PR66 Cameo NGC. Always in demand as a first-year type coin, the 1866 Shield nickel is definitely rare with the PR66 Cameo designation. The present coin is crisply detailed and features brightly reflective surfaces. The fields are virtually free of distractions and show no trace of toning. Census: 29 in 66 Cameo (2 in 66★), 10 finer (1/17).
Ex: Summer FUN Signature (Heritage, 7/2010), lot 3256. NGC ID# 276G, PCGS# 83817

3233 1867 No Rays PR65 PCGS. A nicely struck, untuned, and unmarked Gem. Post-strike imperfections are limited to a few pinpoint flecks. A scarce early proof date with a *Guide Book* mintage of 600+ pieces. NGC ID# 4T4L, PCGS# 3821

3234 1870 PR66 Cameo PCGS. A sharp, contrasted Premium Gem Cameo with light golden toning over each side. There are no contact marks or other distractions. The 1870 proof Shield nickel is rare this fine and extremely rare in better grades. Population: 25 in 66 (3 in 66+) Cameo, 2 finer (1/17). NGC ID# 276L, PCGS# 83824

3235 1870 PR66 Cameo PCGS. CAC. A fully struck and dramatically contrasted brilliant Premium Gem proof with exceptional eye appeal. Cameos are rare this fine and extremely rare any finer. Population: 25 in 66 (3 in 66+) Cameo, 2 finer. CAC: 11 in 66, 0 finer (1/17). NGC ID# 276L, PCGS# 83824

3236 1876 PR66 Cameo PCGS. CAC. This Premium Gem is among the finer Cameos certified by PCGS, showing nearly immaculate surfaces and obvious contrast on each side. The frosty design elements are sharply brought up. The stark, cool appearance of the nickel alloy is warmed on this coin by a light golden overlay. Population: 34 in 66 (7 in 66+) Cameo, 8 finer. CAC: 18 in 66, 7 finer (1/17). NGC ID# 276T, PCGS# 83830

3237 1876 PR66+ Cameo PCGS. CAC. An impressively sharp and well-contrasted Cameo proof, this high-end Premium Gem 1875 Shield nickel displays remarkable strike quality and outstanding preservation. Hints of pale champagne color appear on each side. Population: 34 in 66 (7 in 66+) Cameo, 8 finer. CAC: 18 in 66, 7 finer (1/17). NGC ID# 276T, PCGS# 83830

3238 1877 PR6 PCGS. The rarer of the two proof-only dates in the Shield nickel series. The present wheat-gold and stone-gray example has bold legends, although the shield lines are mostly worn smooth. The only mentionable mark is on the O in OF. Housed in a green label holder. NGC ID# 276U, PCGS# 3831

3239 1878 PR67 Cameo NGC. A rare Superb Gem Cameo example of this essential proof-only Shield nickel, showing well-contrasted surfaces and brilliant, unmarked fields. The strike is razor-sharp. This piece is among the finest Cameos at either service. Census: 5 in 67 Cameo, 0 finer (1/17). NGC ID# 276V, PCGS# 83832

3240 1882 PR67 Cameo PCGS. A stone-white Superb Gem with mirrored fields and an absence of either carbon or contact. Minor retained laminations (as made) are apparent near the large 5 and on the obverse at 2 o'clock. Population: 26 in 67 (1 in 67+) Cameo, 1 finer (1/17). NGC ID# 5EBF, PCGS# 83837

3241 1883 PR67 PCGS. Razor-sharp devices offer subtle contrast against reflective fields on this Superb Gem final-year proof Shield nickel. Traces of light champagne color appear on each side. Among the finest at PCGS. Population: 36 in 67 (1 in 67+), 0 finer (1/17). NGC ID# 276Z, PCGS# 3838

LIBERTY NICKELS

1883 Liberty Nickel, MS67
No Cents, One-Year Type Issue

3242 1883 No Cents MS67 PCGS. CAC. An outstanding example of this one year type coin. While common in lower grades, the No Cents nickel is very scarce in high grade, and also very popular with type collectors. This is a thoroughly brilliant coin that has bright, semi-prooflike fields and sparkling mint luster. Well-struck throughout, the only mark of any note is a tiny one on the left upright of the V in the denomination. Population: 34 in 67 (1 in 67+), 0 finer. CAC: 15 in 67, 0 finer (1/17). NGC ID# 2772, PCGS# 3841

1884 Liberty Nickel, MS66
Just One Coin Numerically Finer at PCGS

3243 1884 MS66 PCGS. We seldom see a Liberty nickel with the extreme eye appeal and surface quality of this beautifully toned 1884. The fields are more satiny than frosted, and when viewed at the right angle they display a large degree of cameo contrast. Viewed otherwise, the full colorful effect of the toning captures the eye: Lavender at the margins, ceding to autumn-gold and champagne centers. Fully struck on both sides, there are no detractors. Two planchet flakes at TE of UNITED are minor and can be ascribed to the Mint's ongoing struggle with the hard nickel flans. Population: 42 in 66 (9 in 66+), 1 finer (1/17). NGC ID# 22PJ, PCGS# 3845

3244 1884 MS66+ NGC. The surfaces on this Premium Gem are highly lustrous, and show subtle rose and lilac toning. This exceptionally attractive piece is fully struck except on the left ear of corn. A number of delicate die cracks traverse both sides.
Ex: Houston Signature (Heritage, 12/2010), lot 3332, which realized \$2,127.50. NGC ID# 22PJ, PCGS# 3845

3245 1885 AU50 ANACS. Key to the business series, the 1885 is desired in all grades. This briefly circulated example displays considerable cartwheel sheen, and the dove-gray surfaces are free from any distractions. NGC ID# 2773, PCGS# 3846

**1886 Liberty Nickel, MS64
Popular Series Key**

- 3246 1886 MS64 PCGS.** The key-date 1886 Liberty nickel claims the third-lowest mintage of the series, at 3.3 million pieces. This impressive Choice specimen exhibits well-detailed design elements, with a touch of the usual softness on the stars and lower wreath. The surfaces are well-preserved and lustrous, under shades of lavender-gray and golden-tan toning. PCGS has graded 57 numerically finer examples (1/17). NGC ID# 277U, PCGS# 3847

**1886 Liberty Nickel, MS64
Brilliant Key Date**

- 3247 1886 MS64 PCGS.** Die cracks travel through the stars and the top of Liberty's head. This Choice Uncirculated key date nickel is fully brilliant, save a couple specks of translucent golden patina on the obverse. The strike displays bold detail on the motifs, softening slightly on the lower left corn ear. NGC ID# 277U, PCGS# 3847
- 3248 1887 MS66 PCGS.** A mainly brilliant coin with frosty luster and no noticeable abrasions. This Premium Gem 1887 Liberty nickel is well-struck on the wreath and stars and offers pleasing visual appeal. Finer examples are extremely rare. Population: 38 in 66 (3 in 66+), 3 finer (1/17). NGC ID# 22PL, PCGS# 3848
- 3249 1887 MS66 PCGS.** A conditionally scarce Premium Gem example of this otherwise plentiful Liberty nickel issue, showing well-preserved satin luster with a hint of light champagne toning. The corn ear to the left of the wreath bow and Liberty's temple area show the expected strike weakness. Population: 38 in 66 (3 in 66+), 3 finer (1/17). NGC ID# 22PL, PCGS# 3848
- 3250 1890 MS65 PCGS. CAC.** A well-preserved coin with vibrant, brilliant luster and no distracting abrasions. The corn ear to the left of the wreath bow and several obverse stars exhibit the usual strike softness. Finer 1890 Liberty nickels are rare. Population: 66 in 65, 27 finer. CAC: 16 in 65, 9 finer (12/16). NGC ID# 22PM, PCGS# 3851
- 3251 1890 MS66 PCGS.** Magnificent apricot-gold, powder-blue, and lavender shadings grace this lustrous, fully struck nickel. The visual quality matches the exceptional level of preservation. Each side is remarkably clean. A lint mark (as made) occurs on the cheek. Population: 26 in 66 (7 in 66+), 1 finer (1/17). NGC ID# 22PM, PCGS# 3851
- 3252 1891 MS66 PCGS.** A remarkably well-struck Premium Gem example of this popular Liberty nickel issue, showing frosty luster with a faint blush of light golden color. Two tiny ticks below Liberty's eye appear to be all that limit the grade. Population: 32 in 66 (5 in 66+), 2 finer (1/17). NGC ID# 2776, PCGS# 3852

- 3253 1892 MS65 PCGS. CAC.** Wheat-gold toning embraces this thoroughly lustrous and well preserved Gem. The strike is sharp, and the eye appeal is impressive. The obverse displays bold clash marks. Encapsulated in a green label holder. CAC: 19 in 65, 15 finer (1/17). NGC ID# 2777, PCGS# 3853

- 3254 1894 MS65+ PCGS. CAC.** Apricot-gold, olive-green, and lilac-red shades embrace this pristine and lustrous high-end Gem — the only Plus-graded Gem at PCGS (1/17). The stars and the left ear of corn show typical weakness. The 1894 is a lower-mintage date that is rarely seen finer. Population: 57 in 65 (1 in 65+), 41 finer. CAC: 11 in 65, 13 finer (1/17).
Ex: Long Beach Signature (Heritage, 9/2012), lot 3631. NGC ID# 2779, PCGS# 3855

- 3255 1895 MS66 NGC.** The Liberty Head nickel issues of the mid-1890s are more elusive in high grade than generally believed. They also have lower mintages than surrounding dates. The present lustrous example is nicely struck and unabraded with light chestnut-gold toning. Census: 12 in 66 (1 in 66+), 0 finer (1/17).
Ex: Long Beach Signature (Heritage, 9/2010), lot 3470, which realized \$3,450. NGC ID# 277A, PCGS# 3856

- 3256 1899 MS66+ PCGS. CAC.** Well-defined for this late 19th century issue, particularly on the obverse stars. Light nickel-gray surfaces appear overall with pleasing luster and a splash of peach at the right reverse. Population: 80 in 66 (6 in 66+), 6 finer. CAC: 26 in 66, 1 finer (1/17). NGC ID# 22PR, PCGS# 3860

**1899 Liberty Nickel, MS66+
Solid Registry Set Contender**

- 3257 1899 MS66+ PCGS. CAC.** Sparkling mint luster emanates from this high-end Premium Gem that exhibits exceptional, sharply struck devices. Only the corn kernels left of the bowknot are a tad soft. Delightful shades of pale ice-blue and flaxen gold gleam from the immaculate, frosted surfaces. Population: 6 in 66+, 6 finer. CAC: 26 in 66, 1 finer (1/17). NGC ID# 22PR, PCGS# 3860
- 3258 1900 MS66+ PCGS. CAC.** Wisps of olive-gold toning appear on each side of this high-end Premium Gem, masking any trivial marks that deny a Superb Gem designation. The coin is sharply struck and offers satiny mint luster. Finer examples are rare. Population: 77 in 66 (9 in 66+), 10 finer. CAC: 31 in 66, 4 finer (1/17). NGC ID# 22PS, PCGS# 3861
- 3259 1903 MS66+ PCGS. CAC.** This high-end Premium Gem offers sharply detailed design elements and vibrant mint luster throughout, with a few hints of pale gold toning. PCGS reports only six finer examples (1/17). NGC ID# 277E, PCGS# 3864
- 3260 1904 MS66+ PCGS. CAC.** Aquamarine, butter-gold, and lilac-red toning consumes this lustrous and nicely struck representative. A loupe reveals only inconsequential contact. Desirable in the present stellar quality. Population: 96 in 66 (18 in 66+), 2 finer. CAC: 43 in 66, 0 finer (1/17). NGC ID# 277F, PCGS# 3865
- 3261 1908 MS66 PCGS. CAC.** Frosty luster shows delicate ice-blue and champagne hues on each side of this Premium Gem example. The lower-left portion of the wreath exhibits the usual strike softness, but the obverse stars are well-defined. This piece is among the finest at both PCGS and CAC. Population: 28 in 66 (5 in 66+), 0 finer. CAC: 9 in 66, 0 finer (1/17). NGC ID# 24FR, PCGS# 3869

- 3262 1912-D MS65+ PCGS.** This Plus-graded Gem exhibits sharply detailed design elements in many areas, but the lower wreath shows a touch of the usual softness. The impeccably preserved surfaces display attractive shades of lavender and pale gold toning, with vibrant mint luster underneath. PCGS has graded 46 numerically finer examples (12/16). NGC ID# 277P, PCGS# 3874

1912-S Liberty Nickel, Delicately Toned MS65

- 3263 1912-S MS65 PCGS.** The issue is always strike-challenged, with softness appearing — minor on this example — on the waves of Liberty's hair just below LIBERTY and on the lower-left wreath. The delicate olive and jade patina adds to the considerable appeal, but minor marks on the chin and neck preclude an even finer grade. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

- 3264 1883 No Cents PR67 PCGS.** A one-year type coin without CENTS on the lower reverse. This Superb Gem proof is among the finest reported by the grading services, with PCGS having certified only nine coins in this non-Cameo grade (1/17). The strike is sharp on the obverse but lacking definition on the reverse corn ear left of the wreath bow. The obverse has modest field-device contrast, and both sides enjoy delicate iridescent toning. NGC ID# 22PU, PCGS# 3878
- 3265 1883 No Cents PR67 NGC.** The flag of an errant numeral 1 protrudes from the left upright of the primary 1 in the date. The variety is interesting, but the real attraction is the Superb Gem quality of this ice-blue proof. Fully struck on the raised devices, the hair, stars, and wreath are razor-sharp. A few scattered areas of gray patina along the left reverse edge add to the toning palette. Neither PCGS nor NGC report a numerically finer example of this one-year type. Census: 20 in 67 (1 in 67★), 0 finer (1/17). NGC ID# 22PU, PCGS# 3878
- 3266 1883 With Cents PR66+ PCGS.** CAC. A conditionally scarce Premium Gem example of the third nickel type of 1883. This Plus-graded, CAC-approved coin displays a sharp strike and modest field-device contrast beneath a blanket of pastel toning. Population: 55 in 66 (5 in 66+), 9 finer. CAC: 19 in 66, 1 finer (1/17). NGC ID# 277S, PCGS# 3881
- 3267 1892 PR67 PCGS.** A lovely, razor-sharp Superb Gem proof with delicate ice-blue surfaces that yield warmer peach color on the left-hand side of the obverse. This subtly contrasted type coin delivers when it comes to eye appeal, and the technical quality holds up just fine under 10x magnification. Extremely rare this fine. Population: 2 in 67, 0 finer (1/17). NGC ID# 2782, PCGS# 3890

1893 Nickel, PR67 Cameo No Cameos Finer at Either Service

- 3268 1893 PR67 Cameo NGC.** CAC. Among the finest Cameo 1893 proof nickels known, this NGC CAC coin displays a bold strike and significant field-device contrast. The deeply mirrored fields are devoid of noticeable imperfections. Ideal for type or Registry purposes. Census: 12 in 67 Cameo (4 in 67★), 0 finer. CAC: 13 in 67, 0 finer (1/17). NGC ID# 2783, PCGS# 83891
- 3269 1893 PR66 Deep Cameo PCGS.** From a fairly modest mintage of 2,195 pieces, the 1893 proof Liberty nickel is very rare in PR66 condition, with Deep Cameo contrast. This delightful Premium Gem exhibits razor-sharp definition on all design elements and the deeply reflective fields contrast profoundly with the frosty devices. The impeccably preserved surfaces show delicate traces of pale gold toning. Population: 2 in 66 Deep Cameo, 4 finer (1/17). NGC ID# 2783, PCGS# 93891
- 3270 1894 PR67 PCGS.** This delightful Superb Gem proof exhibits sharply detailed design elements and the fields are deeply mirrored throughout. The impeccably preserved surfaces display a few subtle hints of lavender and lime-green toning on the reverse. Population: 4 in 67, 0 finer (12/16). NGC ID# 2784, PCGS# 3892
- 3271 1897 PR67 PCGS.** CAC. Razor-sharp definition is apparent on all design elements of this spectacular Superb Gem, even on the usual trouble spots in the lower wreath. The fields are deeply mirrored and the virtually pristine surfaces show a few hints of lime-green toning. Population: 31 in 67 (9 in 67+), 1 finer. CAC: 8 in 67, 0 finer (12/16). NGC ID# 2787, PCGS# 3895

1897 Liberty Nickel, PR66 Rare Deep Cameo Example

- 3272 1897 PR66 Deep Cameo PCGS.** The sharply detailed design elements of this delightful Premium Gem are richly frosted, creating intense cameo contrast with the deeply mirrored fields. The surfaces are impeccably preserved, with a delicate touch of pale gold toning. Eye appeal is exceptional. Population: 5 in 66 (2 in 66+) Deep Cameo, 1 finer (1/17). NGC ID# 2787, PCGS# 93895
- 3273 1905 PR67+ PCGS.** CAC. Ice-blue and lemon-yellow hues decorate mirrored fields on this high-end proof Liberty Head type coin, complementing sharp, satiny devices. The 1905 is rare this fine and prohibitively so finer. Population: 15 in 67 (1 in 67+), 1 finer. CAC: 11 in 67, 1 finer (1/17). NGC ID# 278F, PCGS# 3903
- 3274 1908 PR67 PCGS.** Conditionally rare and among the finest non-Cameos at PCGS, this Superb Gem proof 1908 Liberty nickel displays a bold strike and golden-toned surfaces with subtle field-device contrast on each side. Population: 24 in 67 (4 in 67+), 0 finer (1/17). NGC ID# 278J, PCGS# 3906

3275 1908 PR67 PCGS. CAC. Glimmering mirrored fields reside beneath warm golden toning, while the satiny devices showcase bold definition. No numerically finer non-Cameos are reported by PCGS. Population: 24 in 67 (4 in 67+), 0 finer. CAC: 14 in 67, 1 finer (1/17). NGC ID# 278J, PCGS# 3906

3276 1909 PR67 PCGS. Vivid sun-yellow and lavender-orange hues surround the peripheries of this Superb Gem proof, while the interiors display lighter ice-blue and lavender. The strike is sharp, and each side exhibits subtle field-device contrast. Population: 45 in 67, 3 finer (1/17). NGC ID# 278K, PCGS# 3907

BUFFALO NICKELS

1913-S Buffalo Nickel, MS65 Challenging Type Two Issue

3277 1913-S Type Two MS65 PCGS. Scarcer than the Type One design by a considerable margin and among the lowest mintages of the series at just 1.2 million pieces struck, the 1913-S Type Two nickel remains a series key. The San Francisco Mint struggled with quality when striking the Type Two design, with weakness of the peripheral elements and die clashing. This Gem example offers terrific eye appeal with iridescent toning and sharply struck central elements. The strike is less sharp at the obverse border where LIBERTY is blurry and the bottom-most portion of the first 1 in the date is soft. Population: 119 in 65 (2 in 65+), 41 finer (1/17). NGC ID# 22R3, PCGS# 3923

1915-S Buffalo Nickel, MS65 Rich Pastel Toning

3278 1915-S MS65 NGC. Gorgeously toned, particularly on the obverse, this Gem 1915-S nickel exhibits rich pastel hues of yellow, pink, green, orange, violet, and red. The level of design detail is strong, aside from minor weakness at LIBERTY. Tiny flecks of carbon are confined to the reverse. NGC has awarded higher grades to only 28 examples (1/17). NGC ID# 22R9, PCGS# 3929

3279 1916-D MS65 PCGS. The 1916-D is collectible in this grade but rare any finer. A hint of champagne toning graces satiny surfaces, and there are no major abrasions. Moderate strike weakness appears on the central high points and occasionally around the borders, with evidence of die erosion in the reverse fields. PCGS has seen 20 numerically finer submissions (1/17). NGC ID# 22RB, PCGS# 3932

3280 1917-D MS65 PCGS. Here is a well-preserved coin with satiny luster and iridescent champagne toning. The reverse is struck from a fresh die, while the obverse shows evidence of lapping and die erosion in the fields. Both sides have slightly weak strike definition on the central high points as well as on the Bison's head and the tips of the Indian's feathers. PCGS has seen only 25 numerically finer representatives (1/17). NGC ID# 22RE, PCGS# 3935

3281 1917-D 3 1/2 Leg, FS-901, AU58 PCGS. CAC. This is a well-preserved, barely circulated coin with satin luster in the fields. Both sides show die erosion and metal flowlines, but the reverse is far more deteriorated in that regard, showing weakness on the bison's shoulder and head; the Indian's hair and feathers are well-defined. NGC ID# 22RE, PCGS# 38441 Base PCGS# 3935

3282 1918/7-D FS-101 VG10 NGC. The 1918/7 overdate is apparent despite considerable blending from circulation. A small diagnostic die crack appears above the tie on the braid. Silver-gray and olive tones color each side. The legends are clear, and the central devices maintain good detail. A lovely key date representative. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

3283 1918/7-D FS-101 Fine 12 NGC. This well-circulated piece shows the 8 over 7, although the date displays considerable blending. Stone-gray surfaces exhibit deeper shades near the recesses. Myriad marks, including a small dig right of the bison's front leg, are unsurprising for a coin in this grade. An in-demand *Guide Book* variety. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

3284 1918/7-D FS-101 Fine 12 NGC. The underdigit is clear on this attractive Fine 12 representative. Light gray patina shows over each side. This is a well-defined piece, with about two-thirds of the horn showing. The mintmark is sharp. There are no significant marks or spots.

Ex: Long Beach Signature (Heritage, 9/2008), lot 751. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

3285 1918/7-D FS-101 — Environmental Damage — PCGS Genuine. VF Details. Like most examples of this popular *Guide Book* variety, the point of the undertype 7 can be barely distinguished beneath the 8, due to moderate wear experienced by this coin before it was pulled from circulation. The surfaces are lightly abraded for the grade.

3286 1918-S MS62+ NGC. A better date in high grade, the 1918-S Buffalo nickel remains accessible in the current MS62+ level. This piece displays satiny luster and iridescent orange-gold toning that deepens toward the borders. Considerable die erosion and metal flowlines contribute to a less than full strike, as usual. NGC ID# 22RK, PCGS# 3940

3287 1918-S MS63 NGC. *Ex: ANA Money Museum.* A mark-free cream-gray example of this conditionally scarce early branch issue. A few tiny flecks are noted near the left obverse border and on top of the bison's hump. Struck from long-in-use dies, with a prominent orange-peel texture on the fields and Indian.

This lot has been deaccessioned from the ANA Money Museum and is being auctioned to help fund the Museum's mission. Heritage is donating 100% of its fees and NGC has donated their grading and certification fees to the ANA. NGC ID# 22RK, PCGS# 3940

3288 1919-S MS64 PCGS. The 1919-S is a somewhat better date in circulated grades and a conditionally rare key in Mint State. A sharply struck Choice Uncirculated representative like the one here offered is a great treasure that should command significant attention. Minimally toned in golden hues with luminous luster. Rare any finer. NGC ID# 22RN, PCGS# 3943

3289 1919-S MS64 NGC. A delightful Choice representative of this famously challenging San Francisco issue, well-defined with delicate gray-gold and tan accents across each side. Though this well-struck piece shows significant die erosion in the fields, the luster remains pleasing, and the overall preservation is solid. NGC has graded just 21 numerically finer examples (1/17). NGC ID# 22RN, PCGS# 3943

1920-S Buffalo Nickel, Appealing MS64

3290 1920-S MS64 NGC. David Lange, in his *The Complete Guide to Buffalo Nickels*, calls this date in Mint State "among the scarcest coins in the series." The present near-Gem specimen has beautiful deep greenish-gold patination that evenly coats both sides. The strike is somewhat weak on the Indian's braid and the high points of the buffalo, but the overall eye appeal is quite high. NGC ID# 22RS, PCGS# 3946

3291 1921-S AU58 PCGS. CAC. From a smallish mintage of 1.5 million pieces, the 1921-S Buffalo nickel is an elusive issue, in the context of the series. This pleasing near-Mint specimen shows just a trace of high-point wear, and the lightly abraded surfaces retain a few traces of original mint luster. NGC ID# 22RU, PCGS# 3948

3292 1924-S AU55 NGC. Pleasing light gray patination displays soft gold undertones. This remarkably clean piece exhibits relatively good definition though some of the typical localized softness is evident, especially in the hair of the bison's head. Most of the horn is outlined. The 1924-S is one of the key dates in the series. Ex: *FUN Signature* (Heritage, 1/2010), lot 565. NGC ID# 22RZ, PCGS# 3953

1925-D Buffalo Nickel, MS65 Lightly Toned, Rare Any Finer

3293 1925-D MS65 PCGS. One of the premier condition rarities in the series, the 1925-D is scarce in MS65 condition and rare any finer. More than 4.4 million pieces were struck, most with worn and eroded dies. The surfaces of this lustrous Gem are satin-smooth and imbued with a faint sheen of translucent gold toning. The strike is typically weak on the high points but better than many comparable pieces at this high grade level. PCGS reports just 13 coins in a finer numeric grade (12/16). NGC ID# 22S3, PCGS# 3955

1925-D Buffalo Nickel, MS65

3294 1925-D MS65 PCGS. This Gem is not immune to the striking softness that is endemic to virtually the entire issue, but it is certainly better struck than the average '25-D, and the weakness is primarily noticeable on LIBERTY, the bison's head, and FIVE CENTS. The greenish-gray toning yields to rose-gold hints near the peripheries. Both sides are essentially blemish-free. The reverse exhibits a counterclockwise rotation of approximately 45 degrees. PCGS has graded 13 numerically finer examples (1/17). Ex: *Long Beach Signature* (Heritage, 5/2008), lot 1311. NGC ID# 22S3, PCGS# 3955

3295 1926-D MS64 PCGS. CAC. This is an attractive near-Gem with clean surfaces and glistening ice-blue luster with hints of gold throughout. The strike is a trifle soft in the usual places: on the hair above the Indian's braid and on the upper feathertip, as well as on the bison's shoulder and head. These are minor considerations considering the often lackluster and poorly struck appearance of the 1926-D in this grade. NGC ID# 22S6, PCGS# 3958

3296 1928-D MS66 PCGS. Among the finest at PCGS and immensely attractive as such. This frosty Premium Gem 1928-D nickel displays vivid lemon-yellow and mint-green toning over unabraded surfaces. Scarce in this outstanding condition. Population: 55 in 66 (2 in 66+), 0 finer (1/17). NGC ID# 22SC, PCGS# 3964

1930 Buffalo Nickel, MS67 Radiant Mint Luster, Sharply Struck

3297 1930 MS67 PCGS. CAC. The 1930 is one of the best-produced of all Buffalo nickels. The mint luster is consistently bright and frosted. The only warning for collectors is not all coins are well struck — but this one is. Just the slightest hint of rose and lilac patina can be seen over each side, highlighted, as one would expect, by radiant mint luster. Population: 36 in 67 (1 in 67+), 0 finer. CAC: 7 in 67, 0 finer (1/17). NGC ID# 22SH, PCGS# 3969

**1930-S Buffalo Nickel, MS66+
Condition Rarity in Finer Grades**

- 3298 1930-S MS66+ PCGS. CAC.** From a mintage of 5.4 million pieces, the 1930-S Buffalo nickel is very rare in grades above MS66. This Plus-graded Premium Gem offers well-detailed design elements, with just a touch of the usual softness on the hair above the braid. The impeccably preserved surfaces radiate satiny mint luster, with a few hints of golden-tan toning. PCGS has graded eight numerically finer examples (1/17). NGC ID# 22SJ, PCGS# 3970

- 3299 1931-S MS66+ PCGS.** Impressive blue-green, purple-red, and orange-gold toning consumes both sides. This low mintage branch mint Buffalo nickel appears pristine and has well struck borders. The centers show moderate blending. PCGS has certified 35 as MS66+ with only 7 finer (12/16). NGC ID# 22SK, PCGS# 3971

1934-D Buffalo Nickel, MS66

- 3300 1934-D MS66 PCGS. CAC.** This spectacular Premium Gem is one of the finest certified examples of this popular D-mint delivery. Warm pastel color overlays the smooth, distraction-free surfaces. The features are above average in striking definition with unbroken satin luster. Eye appeal is outstanding. Population: 87 in 66 (5 in 66+), 0 finer. CAC: 24 in 66, 0 finer (1/17). NGC ID# 22SM, PCGS# 3973

**1935 FS-803 Nickel, AU58
Doubled Die Reverse**

- 3301 1935 Doubled Die Reverse, FS-803, AU58 PCGS.** A scarce *Cherrypickers'* variety, often confused with the better-known FS-801 reverse doubled die, although the FS-803 may in fact be rarer. Doubling is most visible on the fattened letters of FIVE CENTS, particularly at the top-right of VE and NTS. Die doubling exists on UNITED STATES OF AMERICA and E PLURIBUS UNUM as well, abundantly visible on this example at F in OF. The *Guide Book* shows the two *Cherrypickers'* varieties combined as one listing. PCGS# 38466 Base PCGS# 3974

- 3302 1935-D MS66+ PCGS. CAC.** Glistening mint luster showcases lovely iridescent toning on this high-end Premium Gem 1935-D Buffalo nickel. The strike is a trifle soft on the bison's shoulder and the hair above the Indian's braid, as usual, although this is a minor complaint in light of the eye appeal generated by the lustrous surfaces. PCGS has seen only nine finer submissions (1/17). NGC ID# 22SP, PCGS# 3975

- 3303 1936-D 3 1/2 Legs, FS-901, VF30 PCGS.** This is a rare Buffalo nickel variety that is rapidly growing in popularity, due to its association with the more-famous, less-elusive 1937-D Three-Legged Buffalo, and also because of the expanding Registry Set phenomenon at PCGS and at NGC. This variety is worth a whopping nine points in the PCGS Complete Variety collection, and five in the Major Variety collection. This attractive coin has light, even wear and consistent nickel-gray toning, giving every appearance of a coin that some fortunate collector pulled out of circulation.

Ex: *Summer FUN Signature* (Heritage, 7/2010), lot 3385. NGC ID# 22ST, PCGS# 38471 Base PCGS# 93978

- 3304 1937-D Three-Legged, FS-901, AU58 PCGS. CAC.** An unusually well-struck example of this popular *Guide Book* variety, showing satin luster and little evidence of any true wear. Both sides exhibit primarily yellow-gold toning, although the borders show attractive iridescence. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3305 1937-D Three-Legged, FS-901, MS62 NGC.** Straw-gold toning visits this lustrous and unabraded key date nickel. Carbon is absent, and the strike is above average. Diagnostics for the variety are unmistakable, such as the die erosion on the field between the legs. Ideal for the advanced collector. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3306 1937-D Three-Legged, FS-901, MS62 NGC.** This is a pleasing lower-grade Mint State representative of this popular *Guide Book* variety. A loupe reveals the beginning signs of die erosion in the fields near the borders, as is typical for the issue, but the strike is nonetheless well-executed. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3307 1937-D Three-Legged, FS-901, MS62 NGC.** Heavy die polishing created this popular *Guide Book* variety, with the bison's right front leg almost completely effaced. This is a boldly struck, highly pleasing Mint State example, with dusky golden-gray toning over each side. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Buffalo Nickel, MS63
Classic Three-Legged Variety**

- 3308 1937-D Three-Legged, FS-901, MS63 PCGS.** The 1937-D Three Legged Buffalo nickel is one of the most sought-after varieties of the series. This admirable Select specimen is well struck, with attractive ice-blue and gold patina over the pleasing surfaces. Strong luster is evident underneath the patina. Undeniable eye appeal. Ex: *Long Beach Signature* (Heritage, 9/2010), lot 3536. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three Legged Buffalo, MS63
A Numismatic 'Urban Legend'**

- 3309 1937-D Three-Legged, FS-901, MS63 PCGS.** The Three-Legged Buffalo is one of those few coins that have attained "urban legend" status; even the most green numismatic neophyte has heard of this issue, probably ranking it alongside the famous 1943 copper "pennies." The issue is simply impossible to keep in stock at coin shows, as they fly out of dealers' cases much faster than they can be restocked. David Lange's reference calls the issue "scarce" in Mint State, although this may itself be a bit of a stretch, since PCGS has certified more than 1,000 Mint State examples (undoubtedly including resubmissions). The present lovely example has decent luster for the issue — the eroded state of the dies diffuses the reflected light — and a light patina of gold and heather on both sides. There are no mentionable distractions. Certified in a green-label PCGS holder.

Ex: Long Beach Signature (Heritage, 6/2006), lot 872; Sacramento Signature (Heritage, 3/2011), lot 3271. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

- 3310 1914 PR66 PCGS.** An eye-appealing melange of multihued patina covers this Premium Gem proof nickel in shades of rose, gold, and sky-blue. Each side is fully struck, as one should expect. The Mint manufactured 1,275 matte proof Buffalo nickels in 1914. NGC ID# 278T, PCGS# 3991

**1915 Buffalo Nickel, PR67+
Sharply Detailed and Unusually Lustrous**

- 3311 1915 PR67+ NGC.** A stunning proof Buffalo nickel from a mintage of just 1,050 pieces, this high-end Superb Gem exhibits razor-sharp definition on all design elements. The slightly granular matte surfaces are unusually lustrous and mostly brilliant, with just a wisp of sea-green toning on the reverse and a dab of amber color below the Indian's eye on the obverse. Census: 36 in 67 (1 in 67+, 1 in 67★), 4 finer (12/16). NGC ID# 278U, PCGS# 3992

**1916 Nickel, Sharp PR66
Key to the Proof Series**

- 3312 1916 PR66 NGC.** Wide, square rims and mirrored edges help confirm the matte proof status of this Premium Gem 1916 nickel. A scant mintage of just 600 pieces in proof format is likely overstated, since some proofs did not sell prior to a 20-year hiatus of Mint proofs. The matte surfaces are essentially immaculate and razor-sharp, with a few microscopic flyspecks but no significant distractions of note. The attractive fields and devices display pleasing mint luster beneath areas of pale reddish-gold patina. Census: 54 in 66 (1 in 66+, 1 in 66★), 22 finer (12/16). NGC ID# 278V, PCGS# 3993

- 3313 1936 Type One — Satin Finish PR67 PCGS.** A lovely satin finish proof showing a full strike and beautifully preserved, golden-toned surfaces. There are no distracting marks. PCGS reports only 43 numerically finer representatives (1/17). NGC ID# 278X, PCGS# 3994

JEFFERSON NICKELS

- 3314 1941 MS67+ Full Steps PCGS.** This high-end Superb Gem is attractively toned in shades of ice-blue and greenish-gold, with vibrant mint luster under the patina. The design elements are sharply detailed throughout, with Full Steps on Monticello, and virtually pristine surfaces. Population: 55 in 67 (15 in 67+) Full Steps, 0 finer (1/17). NGC ID# 22TG, PCGS# 84010

- 3315 1941 MS67+ Full Steps PCGS.** This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements, including Full Steps on Monticello. The impeccably preserved, lustrous surfaces are enhanced by attractive shades of pale gold toning. Population: 55 in 67 (15 in 67+) Full Steps, 0 finer (1/17). NGC ID# 22TG, PCGS# 84010

**1943/2-P Nickel, MS66 Full Steps
In-Demand FS-101 Overdate**

- 3316 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS.** A sharp, untuned example of the popular Guide Book overdate, which also displays doubling on the obverse legends. Strong mint luster adds to the vibrant eye appeal. Remnants of the underlying 2 beneath the 3 of the date are readily apparent with magnification. The Bowers reference suggests about 200,000 circulation strikes of the FS-301 variety were produced from an overall mintage of more than 271 million nickels. This example is sharply struck with just a few microscopic marks on the jawline. Population: 40 in 66 (5 in 66+) Full Steps, 7 finer (1/17). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

3317 1943-P Doubled Die Obverse, FS-106, MS67 PCGS. Doubling occurs on Jefferson's eye, on the date, and the word LIBERTY. This Registry-quality Premium Gem and ever-popular *Guide Book* variety exhibits satiny luster and near-immaculate surfaces with only slight marks on the top reverse visible beneath a loupe. PCGS has certified only six submissions in MS67 and none finer (1/17). Ex: *Orlando FUN Signature (Heritage, 7/2014)*, lot 3231, which realized \$1,292.50. NGC ID# 22TP, PCGS# 38497 Base PCGS# 4174

3318 1951 MS66 Full Steps PCGS. This spectacular Premium Gem exhibits sharply detailed design elements, including Full Steps definition on Monticello. The impeccably preserved surfaces radiate vibrant mint luster, under shades of greenish-gold toning. Population: 26 in 66 (2 in 66+) Full Steps, 2 finer (12/16). NGC ID# 22UG, PCGS# 84043

1951-S Jefferson Nickel, MS66+ Full Steps Tied for Finest, Serious Registry Candidate

3319 1951-S MS66+ Full Steps PCGS. Rarely seen with Full Steps, this stately and amazingly preserved nickel is but a few tiny ticks away from full Superb Gem status. Smooth and nearly brilliant surfaces display a hint of border patina and a razor-sharp strike for this challenging San Francisco issue. No coin is numerically finer at PCGS. Population: 42 in 66 (3 in 66+) Full Steps, 0 finer (12/16). NGC ID# 22UJ, PCGS# 84045

1952-S Jefferson Nickel, MS66 Coveted Full Steps Example

3320 1952-S MS66 Full Steps PCGS. An exceptional representative of the 1952-S issue, sharply struck with Full Steps and strong definition on the portrait. Only microscopic marks visit the otherwise brilliant and superb surfaces. This is a notoriously challenging issue, with finer coins than the Premium Gem level nonexistent and few qualified candidates for Registry Set inclusion. Population: 13 in 66 (3 in 66+) Full Steps, 0 finer (12/16). NGC ID# 22UM, PCGS# 84048

1955 Jefferson Nickel, MS66 Full Steps Only One Finer Coin at PCGS

3321 1955 MS66 Full Steps PCGS. The design elements of this spectacular Premium Gem exhibit razor-sharp definition throughout, with Full Steps on Monticello. The virtually pristine surfaces radiate vibrant mint luster, under attractive shades of pale gold toning. Housed in a new 30th Anniversary green label holder. Population: 3 in 66 Full Steps, 1 finer (1/17). NGC ID# 22UV, PCGS# 84056

3322 1958-D MS67 PCGS. Attractive highlights of lime-green and lavender toning visit the impeccably preserved surfaces of this delightful Superb Gem, with well-detailed design elements and vibrant mint luster underneath. Population: 3 in 67, 0 finer (12/16). NGC ID# 22V5, PCGS# 4064

PROOF JEFFERSON NICKELS

1939 Reverse of 1938 Nickel, PR68 Gorgeous Light Toning, None Certified Finer

3323 1939 Reverse of 1938 PR68 NGC. While the vast majority of 1939 proofs are the Reverse of 1938 variant (with "wavy steps" on Monticello), the distinction is for practical purposes moot at the conditional rarity of this Superb Gem proof. Only about a dozen PR68 coins of both varieties combined exist, of which only one is the Reverse of 1940. The rest are the Reverse of 1938 such as this example. Glimmering mirrored surfaces surround the lightly frosted devices with iridescent toning in the fields. Glimpses of steel-blue, lilac, rose, and wheat-gold shades embellish surfaces that are virtually free of marks. A microscopic dimple hidden near the back of Jefferson's collar serves as a useful pedigree marker. Census (Reverse of 1938): 2 in 68, 0 finer (1/17). NGC ID# 279X, PCGS# 4176

3324 1950 PR66 Deep Cameo PCGS. Delicate highlights of greenish-gold toning enhance the impeccably preserved surfaces of this spectacular Premium Gem. The design elements are sharply detailed and frosty, creating a stunning cameo effect against the deeply mirrored fields. Population: 9 in 66 (1 in 66+) Deep Cameo, 11 finer (1/17). NGC ID# 27A5, PCGS# 94182

3325 1975-S PR70 Deep Cameo PCGS. A conditionally rare, flawlessly preserved Deep Cameo and an essential acquisition for a high-ranking Registry Set. This 1975-S proof Jefferson nickel boasts incredible field-device contrast and a hint of light champagne toning. Population: 35 in 70 Deep Cameo (1/17). NGC ID# 27AN, PCGS# 94208

EARLY HALF DIMES

- 3326** 1797 13 Stars, V-1, LM-4, R.5, VG8 NGC. The *Guide Book* lists three varieties of 1797 half dimes, and the 13 Stars variety is rarest. It is represented solely by Valentine-1, the final die marriage struck bearing that date. This example has bold legends and microgranular sea-green and slate-gray surfaces. Scattered incidental marks are of little import. Housed in a former generation holder. NGC ID# 36PT, PCGS# 38600 Base PCGS# 4260
- 3327** 1800 LIBEKTY, V-2, LM-3, R.4 — Corroded, Cleaned — ANACS. XF40 Details. The popular LIBEKTY variety derives its name from a broken letter punch used when the die was created. The top of the R is absent, and resembles a K. The late die state with advanced buckling below the eagle's beak. A well-defined piece with moderately granular surfaces. The centers are slate-gray and the borders display lavender and golden-brown patina.
Ex: Orlando Signature (Heritage, 1/2008), lot 867, which realized \$2,185.

BUST HALF DIMES

- 3328** 1829 V-12, LM-13.1, R.1, MS64 PCGS. CAC. Pastel lavender and gold patina graces this satiny and well preserved Choice Capped Bust type coin. The strike is sharp and marks are absent. Unobtrusive spots are noted above the eagle's beak and shoulders. NGC ID# 232B, PCGS# 38628 Base PCGS# 4276
- 3329** 1830 V-7, LM-7, R.2, MS64+ PCGS. CAC. A hint of gold patina adorns lustrous and splendidly smooth surfaces. The strike is precise except near the left shield border. No marks are more than inconsequential, and the eye appeal is exceptional for the conservatively assessed third-party grade. NGC ID# 232C, PCGS# 38645 Base PCGS# 4277

1833 Half Dime, MS65
V-1, LM-10, Variegated Patina

- 3330** 1833 V-1, LM-10, R.1, MS65 NGC. CAC. The second S in STATES is filled, and a "Scarface" vertical die crack ascends the portrait of Liberty. Variegated tobacco-brown and forest-green toning embraces the reverse and the lower right obverse. Lustrous and unmarked with a solid strike. Census (all varieties): 40 in 65 (1 in 65+, 1 in 65★), 41 finer. CAC: 16 in 65, 23 finer (1/17). NGC ID# 232F, PCGS# 38701 Base PCGS# 4280

1835 Half Dime, Sharp MS65
V-9, LM-6

- 3331** 1835 Large Date, Small 5C, V-9, LM-6, R.2, MS65 PCGS. Razor-sharp detail complements beautifully preserved surfaces on this Gem 1835 Capped Bust half dime. Both sides display primarily light golden toning, however faint lavender and mint-green hues are also observed near the borders. The Logan-McCloskey-6 die variety is plentiful for the issue, often represented in type collections. NGC ID# 232H, PCGS# 38714 Base PCGS# 4283

SEATED HALF DIMES

1838 Half Dime, Toned MS66
Large Stars, No Drapery

- 3332** 1838 Large Stars, No Drapery, MS66 PCGS. Suitable for type purposes, this Premium Gem No Drapery half dime offers razor-sharp detail and rich luster. Sea-green and amber-red toning appears in the peripheries, leaving the interiors with warm golden color. There are no mentionable abrasions. The Large Stars, No Drapery 1838 issue is scarce this fine and rarely offered finer. Population: 35 in 66 (4 in 66+), 8 finer (1/17). NGC ID# 2TXX, PCGS# 4317
- 3333** 1843 MS65 NGC. Satiny silver luster accentuates sharp design elements on this Gem 1843 half dime. Daubs of olive, lavender, and sea-green border toning add to the eye appeal. The reverse has a spindly die crack across the center. Rarely offered this fine. Census: 22 in 65, 11 finer (1/17). NGC ID# 2334, PCGS# 4332

1853 No Arrows Half Dime, Colorful MS66

- 3334 1853 No Arrows MS66 PCGS. CAC.** This phenomenal Premium Gem is boldly struck, with a lushly toned obverse periphery in shades of amber, russet, and electric blue, with brilliant centers and a basically untinted reverse with a light smoke-gray overlay. Sharp detail stands out on Liberty's head, gown, and the star centrils. There are no mentionable abrasions, although each side displays die clashing. Very few 1853 No Arrows half dimes exist at this level of eye appeal and preservation, as confirmed by the CAC endorsement. Population: 9 in 66 (1 in 66+), 2 finer. CAC: 4 in 66, 2 finer (1/17). NGC ID# 233M, PCGS# 4351

1853 Arrows Half Dime, MS66+ Lustrous and High-End

- 3335 1853 Arrows MS66+ NGC. CAC. Ex:** Highland Collection. Necessary as a three-year type, the Arrows half dimes were struck in large quantity in 1853 with a mintage exceeding 13 million pieces. It is anyone's guess why more coins approaching the Superb Gem level did not survive the huge mintage. This is a lustrous and sharp high-end Premium Gem, struck from faintly clashed dies. Variegated toning intensifies at the borders with shades of steel-blue, tan-gold, and cream-gray in evidence. Scattered and small deep-gray freckles dot the portrait and obverse fields. A tiny depression on Liberty's cheek is the only mark of note, while the eye appeal is excellent. CAC endorses the coin. Census: 2 in 66+, 1 in 66★, 23 finer. CAC: 12 in 66, 7 finer (1/17). NGC ID# 233Y, PCGS# 4356

- 3336 1854 Arrows MS66 NGC.** A conditionally rare Premium Gem with vibrant, brilliant mint luster and no major abrasions. The strike is sharp throughout. The 1854 Arrows Seated half dime is a popular type-coin issue. Census: 22 in 66 (2 in 66+), 4 finer (12/16). NGC ID# 2342, PCGS# 4358

- 3337 1855 Arrows MS65 PCGS.** The 1855 Arrows half dime is the most elusive issue of this popular, short-lived design type from the Philadelphia Mint. This delightful Gem offers sharply detailed design elements and well-preserved, lustrous surfaces, with a few hints of champagne-gold toning. Population: 28 in 65, 17 finer (1/17). NGC ID# 2344, PCGS# 4360

1856 Half Dime, MS67 Magnificent Rainbow Patina

- 3338 1856 MS67 NGC.** Magnificent rainbow patina sets this Superb Gem half dime apart from its peers. Concentric rings of violet, reddish-orange, yellow, green, and blue progress from the peripheries toward the centers. The strike is strong, if a bit soft over the right-hand stars and the rims. Unsurpassed eye appeal and extraordinary preservation are sure to generate much attention when this lot is called. Census: 6 in 67, 1 finer (1/17). NGC ID# 233P, PCGS# 4363

1861/0 Half Dime, MS66 FS-301 Cherrypickers' Variety

- 3339 1861/0 FS-301 MS66 PCGS.** The faint remnant of what has been called an underlying 0 is evident at the left base of the final 1 in the date. Although not recognized as a true overdate in the 2017 *Guide Book*, this variety is scarce in Mint State, and the present coin is near the Condition Census of pieces attributed by PCGS. The strike is sharp except for on the upper-left portion of the wreath, and each side offers satiny mint luster with attractive olive-green and gold toning. Close examination with a loupe fails to reveal any noteworthy abrasions. PCGS# 145479 Base PCGS# 4380

PROOF SEATED HALF DIMES

- 3340 1859 PR66 NGC. Flynn-RPD-001.** The date is repunched south, most prominently at the base of the 1. A fully struck Premium Gem bathed in ocean-blue, straw-gold, and gunmetal-gray toning. The short-lived Paquet obverse with hollow-centered stars, used only on the 1859 Philadelphia issue and the rare transitional patterns. Census: 17 in 66 (1 in 66+), 8 finer (7/16). NGC ID# 235P, PCGS# 4438

- 3341 1862 PR65 Cameo NGC.** The sharply detailed design elements of this delightful Gem have a frosty texture that creates noticeable cameo contrast with the deeply reflective fields. The well-preserved surfaces display delicate shades of pale gold toning. Census: 4 in 65 Cameo (1 in 65★), 14 finer (1/17). NGC ID# 235X, PCGS# 84445

- 3342 1868 PR66 NGC.** In 1868, the Mint struck 600 proof half dimes and 88,000 circulation strikes. Shades of cobalt-blue and violet patina frame iridescent peach-orange and rose hues at the centers. The rich, variegated patina delivers superb visual appeal while masking the few grade-defining contact marks. Census: 17 in 66 (1 in 66★), 4 finer (1/17). NGC ID# 2365, PCGS# 4451

- 3343 1868 PR66 PCGS.** A high-end proof with bold design elements and glimmering, mirrored fields. The interiors display warm golden toning, while the borders yield deeper russet and bluish hues. There are no distractions. Population: 12 in 66, 3 finer (1/17). NGC ID# 2365, PCGS# 4451

**1869 Half Dime, PR67 Cameo
Excellent Field-Device Contrast**

- 3344 1869 PR67 Cameo NGC.** Cameo examples of the 1869 proof half dime are scarce in any grade, and this Superb Gem is genuinely rare. The strike is bold, and each side displays stark field-device contrast benefited by deep aquamarine and lavender-gold toning in the fields. There are no distractions on this lovely coin. Census: 10 in 67 Cameo (3 in 67 ★), 2 finer (1/17). NGC ID# 2366, PCGS# 84452

- 3345 1872 PR65 Cameo PCGS.** This is a rare Gem Cameo with delicate golden toning that accents starkly contrasted proof surfaces. The upper-left portion of the wreath shows trivial softness, but the obverse is well-struck. A few light marks are not out of line for the grade. Population: 4 in 65 Cameo, 7 finer (1/17). NGC ID# 2369, PCGS# 84455

EARLY DIMES

- 3346 1800 JR-2, R.5 — Repaired, Cleaned — NGC Details. XF.** This gunmetal-gray early dime is well defined, and has a pleasing appearance upon cursory examination. Careful inspection reveals smoothing on the cheek and obverse field.
- 3347 1807 JR-1, R.2, VG10 PCGS.** The central devices are well-defined for the grade, making up for the rims that blend into the peripheral stars and legends in certain areas. This circulated Draped Bust type coin has pleasing olive-gray patina with warmer orange-gold undertones. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIMES

**1814 Capped Bust Dime, MS63
Large Date, JR-3**

- 3348 1814 Large Date, JR-3, R.2, MS63 PCGS.** A distinctive die marriage with prominent obverse clash marks and multiple reverse die cracks that intersect within the shield. This satiny and nearly unabraded representative displays lavender-gray toning on the portrait. The fields are chiefly wheat-gold, although olive-green and lilac shades are also present. NGC ID# 236W, PCGS# 38775 Base PCGS# 4488

- 3349 1827 Pointed Top 1, JR-7, R.3, MS61 NGC.** The obverse has a gunmetal-gray border and a lightly toned center. The reverse is mostly pearl-white. The strike is good aside from a few stars. Mentionable marks are confined to a vertical line below the shield, though we note a small bright area on the field above the eagle's right (facing) shoulder. A conditionally rare variety. PCGS# 38817 Base PCGS# 4504

- 3350 1829 Small 10C, JR-7, R.1, MS62 PCGS.** An almond-gold Capped Bust type coin with powder-blue patina on the cheek and left obverse field. The satiny surfaces are unblemished, and the strike is intricate throughout. PCGS# 38832 Base PCGS# 4511

- 3351 1829 Curl Base 2, JR-10, FS-301, R.6 — Damaged or Tooling — PCGS Genuine. Good Details.** A single die variety features the Curl Base 2, and it is rare. JR-10 is rated R.6, and almost all known examples are in very low grades and/or exhibit problems. This Good Details coin has minor tooling marks in the fields and generally glossy pewter-gray surfaces. The reverse rims are complete, but the obverse border shows weakness below the date and left of the portrait.

- 3352 1829 Medium 10C, JR-12, R.3, MS62 NGC.** The vertical die crack through the date helps attribute this coruscating and minimally marked Bust dime. Ocean-blue toning adorns the borders. The strike is slightly soft on the eagle's claws and upper neck. Ex: *Long Beach Signature* (Heritage, 5/2008), lot 64; *Los Angeles Signature* (Heritage, 8/2009), lot 446; *Long Beach Signature* (Heritage, 9/2009), lot 417. PCGS# 38838 Base PCGS# 84511

- 3353 1831 JR-1, R.1, MS62 PCGS. CAC.** Ruby-red centers are bounded by broad bands of forest-green. The peripheries display glimpses of olive-gold toning. Unabraded and intricately impressed. A late die state with the 0 in the denomination partly filled. NGC ID# 237B, PCGS# 38849 Base PCGS# 4520

- 3354 1832 JR-5, R.2, MS63 PCGS.** Generous blushes of golden-brown and apple-green endow this well struck Select dime. The coruscating surfaces are without any mentionable marks. An impressive Capped Bust type coin. PCGS# 38859 Base PCGS# 4521

- 3355 1837 JR-4, R.1, MS62 PCGS.** A bisecting obverse vertical die crack attributes this final-year Bust dime. A precisely struck and satiny representative with generally smooth surfaces. A small mint-made strike-through above the drapery, and a roundish mark on the R in PLURIBUS, determine the third-party grade. NGC ID# 237H, PCGS# 38894 Base PCGS# 4529

SEATED DIMES

- 3356 1837 No Stars, Large Date, F-101b, R.2, MS62 NGC.** Pie-shaped die cracks appear on the obverse at 4 and 7 o'clock, although the dies have not yet clashed. This sharp, satiny Mint State coin displays only minor abrasions and has dusky lavender-gray and light golden toning over each side. NGC ID# 237R, PCGS# 537636 Base PCGS# 4561

**1837 Seated Liberty Dime, MS64
No Stars, Small Date**

- 3357 1837 No Stars, Small Date, F-104, R.3, MS64 PCGS.** Unlike the 1837 No Stars half dime, the Small and Large Date logotypes for the dime are easily distinguished by their size alone. In addition, the Small Date 3 has a curved top and the Large Date 3 is flat across the top. This well struck near-Gem displays light caramel-gold toning over frostlike silver-gray surfaces. Smooth surfaces show minor contact near the O in OF and a subtle reverse spot at 3 o'clock, plus a small deep toning area near Liberty's left elbow. Die clashing near the E in DIME and slight counterclockwise rotation of the reverse help confirm the Fortin variety. Population (all Small Date varieties): 17 in 64, 12 finer (1/17). PCGS# 537642 Base PCGS# 4562

3358 1840-O No Drapery, Small O, F-104, R.4, AU50 PCGS. The well-detailed design elements of this impressive AU50 example show just a touch of wear, and the lightly abraded surfaces are visited by highlights of sea-green, lavender-gray, and magenta toning. Population: 14 in 50, 32 finer (1/17). NGC ID# 5NM9, PCGS# 537733 Base PCGS# 4574

3359 1843 F-105a, R.2, MS64 NGC. The seated Liberty is lavender-gray, while the remainder of both sides is olive-green. A satiny and unmarked Choice dime. The strike is good, and very few are certified finer. Census for all die varieties: 11 in 64, 6 finer (1/17). PCGS# 537814 Base PCGS# 4583

3360 1852 MS65 NGC. The 1852 is an available date through MS64, but Gems are scarce. This piece displays a sharp strike and satiny mint luster. Olive-gold toning embraces each side, warming to peach-gold as it nears the centers. Census: 11 in 65, 7 finer (1/17). NGC ID# 238N, PCGS# 4597

1853 Arrows Dime, MS66 Exceptional Sharpness and Luster

3361 1853 Arrows MS66 PCGS. A razor-sharp strike complements frosty original luster on this Premium Gem Arrows type coin. Champagne toning graces each side, and a loupe fails to reveal any noteworthy imperfections. This date is scarce as fine as MS66 and is rarely encountered better. Population: 42 in 66 (3 in 66+), 20 finer (1/17). NGC ID# 2398, PCGS# 4603

3362 1853 Hubbed Date and Arrows, F-107, MS65 PCGS. Numerous delicate die cracks and rim cud below the date allow attribution by Fortin variety. This sharply struck and coruscating type coin is impressively unabraded. Dappled autumn-brown and apple-green toning enriches the borders. The fields and centers are mostly stone-gray. PCGS# 537961 Base PCGS# 4603

3363 1854 Arrows, F-101, R.3, MS65 PCGS. This Arrows Obverse type-coin issue is scarce in Gem condition and is rarely seen finer. The present coin displays a bold strike with satiny luster and hints of olive-gold toning. A few tiny marks are not out of line for the grade. Population: 24 in 65, 15 finer (12/16). PCGS# 538010 Base PCGS# 4605

3364 1862 Doubled Die Obverse, F-103, R.4, MS66 PCGS. A Top 100 Variety. STATES exhibits minor die doubling, but the pick-up point for Fortin-103 is a diagonal die line between the NE in ONE. An essentially brilliant Civil War dime that boasts booming luster and practically pristine preservation. PCGS# 538188 Base PCGS# 4635

1865 F-101a Dime, MS66 Just 10,000 Pieces Struck

3365 1865 Repunched Date, F-101a, R.5, MS66 NGC. A Civil War date with a scant commercial production of 10,000 pieces. Ahwash believed proofs (Fortin-101) were struck from this die pair, but none have been confirmed. The present business strike example is brilliant and semiprooflike, with visible die polish lines across the fields on each side. Census: 8 in 66 (1 in 66★), 10 finer (12/16). Ex: Long Beach Signature (Heritage, 2/2007), lot 2896; Milwaukee ANA Signature (Heritage, 8/2007), lot 537, which realized \$3,737.50. PCGS# 538204 Base PCGS# 4641

3366 1873 Closed 3, No Arrows, Repunched Date, F-103, FS-301, R.3, MS65 NGC. A Top 100 Fortin Variety, F-103 shows strong repunching on the date. The Closed 3 dime in general is rare this well-preserved, and the present Gem offers an appreciably bold strike. Splashes of ocean-blue toning accent satiny silver surfaces on each side, and there are no major abrasions. PCGS# 145494 Base PCGS# 4659

3367 1873 Arrows, F-114, R.2, MS64 PCGS. CAC. Light olive-gold toning adorns this lustrous and minimally marked near-Gem. The strike is sharp except on the hair. Fortin-114 is identified by two die chips on the seated Liberty. The date is entered low. Encapsulated in a green label holder. PCGS# 538315 Base PCGS# 4665

3368 1873 Arrows, F-122, R.4, MS64+ PCGS. A lightly toned almond-gold and stone-gray near-Gem that boasts a good strike and an absence of mentionable marks. An unlisted late die state with obverse rim die breaks near OF A. Struck from clashed dies. PCGS# 538323 Base PCGS# 4665

3369 1873 Arrows, F-123, R.3, MS64 PCGS. From a mintage of 2.3 million pieces, the 1873 Arrows dime is very scarce in MS64 condition, and finer coins are rare. This attractive Choice example displays well-detailed design elements, with just a touch of softness on the lower shield. The lustrous surfaces show only minor signs of contact. Population: 47 in 64 (4 in 64+), 21 finer (1/17). PCGS# 538324 Base PCGS# 4665

1874 Arrows Dime, Colorful MS66

3370 1874 Arrows, F-108, R.3, MS66 PCGS. The date and arrow placement are the only pickup points for this Fortin variety. Fantastic multihued patina draws the eye of the viewer, with blended shades of rose, violet, orange, green, and blue intermixed over impeccably preserved surfaces. Mint luster glistens through the toning, furthering the aesthetic quality of this Premium Gem. Liberty's head and sandal, and the upper left wheat stalks are incomplete, but the corn kernels are fully defined. Population (all varieties): 21 in 66, 12 finer (1/17). PCGS# 538339 Base PCGS# 4668

3371 1880 F-102a, R.4, MS67 PCGS. In 1880, the Philadelphia Mint was consumed with Morgan dollar production, and coined only 36,000 dimes for commerce. Approximately 300 Uncirculated pieces were secured by dealers connected with the Mint, but few among those are as nice as the present Superb Gem. Lustrous, brilliant, bold, and pristine. Population: 15 in 67, 1 finer (12/16). NGC ID# 23AT, PCGS# 538644 Base PCGS# 4688

3372 1882 F-104, R.2, MS67 NGC. This attractive, richly toned Superb Gem displays shades of gunmetal-gray, forest-green, and golden-brown patina. Wispy die cracks appear on both sides. Boldly struck and well preserved. Census: 26 in 67, 2 finer (12/16). PCGS# 538650 Base PCGS# 4690

**1890 Dime, MS67
Excellent Type Coin**

3373 1890 MS67 PCGS. CAC. Fortin-Unlisted This appears to be an unlisted pairing of Fortin's Obverse 12 and Reverse N. Each side boasts vibrant, frosty luster without a hint of color. The motifs are well-defined in general, but the strike is notably sharp on the wreath elements. Eye appeal is wonderful. An excellent type coin. Population: 7 in 67 (1 in 67+), 0 finer. CAC: 5 in 67, 0 finer (1/17). NGC ID# 23BB, PCGS# 4704

PROOF SEATED DIMES

3374 1859 F-101, R.4, PR64 PCGS. A strongly reflective Choice proof with a few light field hairlines hidden under distinct toning. Gray centers give way to cobalt-blue border toning on the obverse, counterbalanced by light olive-gold patina on the reverse. Nice eye appeal throughout the glistening surfaces. NGC ID# 23CD, PCGS# 538999 Base PCGS# 4748

3375 1863 PR65+ Cameo PCGS. CAC. F-101, R.4. A single die pair was used for dime coinage in 1863, including 14,000 circulation strikes and 460 proofs. This high-end Gem proof displays a sharp strike and remarkable cameo contrast. Both sides yield beautiful lemon-gold, blue, and lavender toning that captivates the eye. Population: 11 in 65 (3 in 65+) Cameo, 8 finer. CAC: 8 in 65, 5 finer (1/17). NGC ID# 23BS, PCGS# 84756

**1872 Dime, PR67 Cameo
Tied for Finest at Both Services**

3376 1872 PR67 Cameo NGC. The 1872 is a popular, earlier date proof Seated dime with a mintage of 950 pieces. This deeply mirrored example features strongly contrasting frosted devices on each side. The golden toning on the obverse is limited to the margins, but the same color is sprinkled more liberally across the reverse. Essentially a defect-free coin and one of the finest certified. Census: 4 in 67 Cameo, 0 finer (1/17). Ex: *Chicago Signature* (Heritage, 8/2011), lot 3582; *Pittsburgh Signature* (Heritage, 10/2011), lot 3514. NGC ID# 23CW, PCGS# 84765

**1873 Arrows Dime, PR65 Cameo
Low Proof Population**

3377 1873 Arrows PR65 Cameo PCGS. F-102. Although the dies were used to strike both proofs and circulation strikes, there is no doubt about the proof status of this glittering Gem. A hint of pale champagne-gold visits both sides, but the coin is essentially brilliant with frost-white central motifs for strong field/device contrast. Just 500 proofs were made, and as with most proof examples, the coin is lightly struck on the upper-right wreath and at the obverse rock base as well as Liberty's foot. Population: 6 in 65 Cameo, 4 finer (1/17). NGC ID# 23DH, PCGS# 84769

**1873 Seated Liberty Dime, PR65 Cameo
Short-Lived Arrows Design**

3378 1873 Arrows PR65 Cameo PCGS. F-102. Iridescent golden-brown borders, with a few hints of magenta, frame stone-white centers. The design elements are sharply detailed and frosty throughout and the fields are deeply mirrored. A very rare proof issue with well-preserved surfaces and bold field-device contrast. Population: 6 in 65 Cameo, 4 finer (1/17). NGC ID# 23DH, PCGS# 84769

3379 1875 PR66 Cameo PCGS. F-101, R.3. Icy devices rise above glassy fields. This attractive Premium Gem is brilliant save for a hint of almond-gold toning on the right obverse field. The obverse die was lapped, since low relief portions of Liberty's drapery are absent. NGC ID# 23CY, PCGS# 84772

3380 1881 PR66 Cameo PCGS. F-102, R.3. Cameo examples of the 1881 proof dime are scattered across many grades, but Premium Gems are only occasionally offered at auction. This piece displays a bold strike and brilliant surfaces with excellent contrast. Population: 12 in 66 (1 in 66+) Cameo, 10 finer (1/17). NGC ID# 23D6, PCGS# 84778

3381 1882 PR66 Cameo PCGS. CAC. F-101, R.3. Both sides display gorgeous ruby-red, jade-green, and honey-gold toning. A fully struck and flashy Premium Gem. Perfect aside from a trio of tiny ticks above the M in DIME. Population: 22 in 66 (3 in 66+) Cameo, 11 finer. CAC: 11 in 66, 11 finer (1/17). NGC ID# 23D7, PCGS# 84779

3382 1886 PR66 Cameo NGC. This Premium Gem Cameo proof 1886 dime shows the date further left than on the two Fortin-listed proof die pairings. The variety is interesting for a broken tassel above the ear of corn. A brilliant Premium Gem with unblemished surfaces and a hint of striking softness on the top of Liberty's head. Census: 14 in 66 Cameo (2 in 66★), 15 finer (12/16). NGC ID# 23DB, PCGS# 84783

3383 1889 F-102, R.4, PR66 NGC. Fully brilliant on the obverse with a hint of pale champagne toning on the reverse. This Premium Gem proof displays a sharp strike and no distracting marks. Rarely seen finer. Census: 36 in 66 (1 in 66 ★), 10 finer (12/16). NGC ID# 23DE, PCGS# 539065 Base PCGS# 4786

BARBER DIMES

1893-S Barber Dime, MS65+ Original, Multicolor Toning

3384 1893-S MS65+ PCGS. An overlay of dove-gray, russet, and violet-blue toning blankets the well-preserved surfaces of this Plus-graded Gem, with vibrant mint luster underneath. The strike is needle-sharp with bold forecurls and complete kernel definition on the ear of corn. An original, eye-appealing example. Population: 17 in 65 (1 in 65+), 18 finer (1/17). NGC ID# 23DS, PCGS# 4802

1896-S Barber Dime, MS65 Underrated, Low-Mintage Issue

3385 1896-S MS65 PCGS. From a small mintage of 575,056 pieces, the 1896-S Barber dime is an underrated issue, rarely seen in MS65 condition and very rare any finer. This spectacular Gem exhibits well-preserved lustrous surfaces and sharply detailed design elements, under shades of golden-brown, violet, and slate-gray toning. Population: 15 in 65, 11 finer (12/16). NGC ID# 23E2, PCGS# 4811

3386 1898-S MS65 PCGS. A sharply struck Gem with satin luster and well-preserved surfaces. Mottled olive-gray and champagne toning blankets much of each side. The 1898-S dime is rarely offered this fine. Population: 6 in 65 (1 in 65+), 8 finer (1/17). NGC ID# 23E8, PCGS# 4817

1898-S Dime, Multihued MS65+ Expatriated San Francisco Issue

3387 1898-S MS65+ PCGS. Multihued toning on both sides of this high-end Gem dime display colors ranging from autumn-gold to sea-green to ocean-blue, with rose accents at the centers. Mint luster shines through the rich patina. The 1898-S dime is famous for its ties to the Philippines, when most the mintage was shipped en masse to the islands. Few coins were preserved domestically, a fact that is unmistakably confirmed by the low population at either service in high Uncirculated grades. This is a wonderfully mark-free coin, with a clean cheek on Liberty and full details throughout both sides from a razor-sharp strike. It is the sole Plus-graded Gem at PCGS. Population: 6 in 65 (1 in 65+), 8 finer (1/17). NGC ID# 23E8, PCGS# 4817

3388 1899-O MS64 PCGS. A scarce near-Gem example of this conditionally better New Orleans issue, showing a bold strike and satiny mint luster. Hints of iridescence highlight soft champagne toning on each side. Population: 12 in 64 (2 in 64+), 27 finer (1/17). NGC ID# 23EA, PCGS# 4819

3389 1900-O MS64 NGC. The strike is sharp, and satiny devices are accentuated by semi-reflective fields. A hint of light golden toning over each side adds a degree of warmth to the eye appeal. A small strike-through on Liberty's cheek should not be mistaken for an abrasion. Census: 13 in 64 (1 in 64+), 14 finer (12/16). NGC ID# 23ED, PCGS# 4822

1900-S Barber Dime, MS66
Just One Coin Numerically Finer

3390 1900-S MS66 PCGS. Medium peach-gold, olive-green, and stone-gray toning embraces this precisely struck and lustrous century-straddling dime. Despite a bountiful mintage, the 1900-S is conditionally rare as a Premium Gem. In 1901, a new obverse and reverse hubs were introduced with subtle modifications to the raised devices — particularly on the obverse — which are of little import to collectors but seem to have improved points of wear. Population: 15 in 66 (1 in 66+), 1 finer (1/17). NGC ID# 23EE, PCGS# 4823

3391 1901 MS66 PCGS. This spectacular Premium Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces that show a few subtle hints of golden-tan toning. Eye appeal is terrific. Population: 22 in 66 (4 in 66+), 1 finer (1/17). NGC ID# 23EF, PCGS# 4824

3392 1903-S AU58 PCGS. CAC. Light blue overtones are important to this near-Mint coin's eye appeal. So too are the prominent luster and the solid strike. An important lower mintage issue. Population: 10 in 58, 62 finer. CAC: 2 in 58, 9 finer (1/17). NGC ID# 23EP, PCGS# 4832

1911 Dime, MS67+
Eye-Catching Radiance

3393 1911 MS67+ PCGS. This is a stunning, high-end Superb Gem 1911 Barber dime with frosty silver luster that yields splashes of champagne, amber, russet, and pale-blue color, with the deeper hues most prominent on the reverse. Few examples of this date can equal this coin for overall quality and eye appeal, and multiple submissions at the top of the population reports must be considered with a coin of this quality. Population: 20 in 67 (2 in 67+), 2 finer (1/17). NGC ID# 23FJ, PCGS# 4857

3394 1915-S MS65 PCGS. From a small reported mintage of 960,000 pieces, the 1915-S Barber dime is an elusive issue in MS65 condition. This attractive Gem offers sharply detailed design elements and well-preserved surfaces with radiant mint luster on both sides. A few hints of greenish-gold toning add to the outstanding eye appeal. Population: 25 in 65 (1 in 65+), 14 finer (1/17). NGC ID# BLAS, PCGS# 4869

1916 Barber Dime, MS67
Frosty Registry Candidate

3395 1916 Barber MS67 PCGS. The final-year issue for the Barber dime overlaps with Weinman's new "Mercury" design. This is a highly lustrous example with mostly brilliant surfaces, augmented by slight evidence of golden-tan toning on each side. A fully struck and frosty Superb Gem. None are finer at either service. Population: 9 in 67 (2 in 67+), 0 finer (1/17). NGC ID# 23FY, PCGS# 4870

PROOF BARBER DIMES

3396 1894 PR67 NGC. Rich apple-green borders encompass ruby-red centers. A magnificent and fully struck Superb Gem. Delicate grazes on the neck provide the sole imperfections. One of just 972 proofs produced. Housed in a prior generation holder. NGC ID# 23G6, PCGS# 4878

1898 Dime, Lightly Toned PR67
Exceptional Eye Appeal

3397 1898 PR67 PCGS. Although plentiful in lower grades, the 1898 proof Barber dime is seldom offered in Superb Gem condition, even without a Cameo designation. This piece displays a full strike and exceptional preservation. Eye appeal is outstanding. A Cameo designation might have been awarded were it not for light champagne, green-gold, and lavender toning that encompasses much of each side. Population: 12 in 67, 1 finer (1/17). NGC ID# 23GB, PCGS# 4882

1899 Dime, Toned PR67
Only One Numerically Finer at PCGS

3398 1899 PR67 PCGS. Pale mint-green, gold, and lavender hues appear over deeply mirrored fields on this sharp Superb Gem 1899 proof Barber dime. Both sides show modest field-device contrast, but the toning prevents a Cameo designation from PCGS. The 1899 proof is seldom seen this fine, and higher-grade pieces are rare. Population: 20 in 67 (2 in 67+), 1 finer (1/17). NGC ID# 23GC, PCGS# 4883

3399 1904 PR67 NGC. Vivid shades of sea-green, lavender-gray, powder-blue, and burnt-orange toning blanket the impeccably preserved surfaces of this delightful Superb Gem, from a small proof mintage of 670 pieces. The design elements are razor-sharp and deeply mirrored fields shine through the patina. Census: 9 in 67 (2 in 67★), 2 finer (1/17). NGC ID# 23GH, PCGS# 4888

3400 1910 PR65 NGC. CAC. Dappled powder-blue, autumn-brown, and apple-green toning encompasses this fully struck and coruscating Gem. A trace of aqua residue is between the IM in DIME. Only 551 proofs were produced. Encased in a former generation holder. NGC ID# 23GR, PCGS# 4894

MERCURY DIMES

3401 1916-D VG10 PCGS. Most 1916-D dimes are in Fair to Good grades. VG10 is decidedly above average for the issue. This pearl-gray representative has bold legends and smooth surfaces. The fasces lines are partly present. Certified in a green label holder. NGC ID# 23GY, PCGS# 4906

1917-D Dime, MS65 Full Bands Original Blue and Gold Patina

3402 1917-D MS65 Full Bands PCGS. CAC. In 1917, the Denver Mint boosted its Mercury dime output by more than 35 times over the previous year. The facility struck 9.4 million coins, yet the issue is exceedingly rare in Gem condition with Full Bands. Mixed blue and gold patina allows significant brilliance to shine through, especially on the reverse. Needle-sharp and beautifully preserved. Population: 43 in 65 Full Bands, 14 finer. CAC: 6 in 65, 6 finer (1/17). NGC ID# 23H3, PCGS# 4913

3403 1917-S MS67 PCGS. Although the 1917-S claims a substantial mintage of 27.3 million coins, Superb Gems are very rare with or without Full Bands. Softly frosted luster issues from the all-brilliant surfaces of this early branch-mint Mercury dime. The central hair strands are a touch soft, and the bands, while nearly fully separated, are insufficiently so for a formal designation. Nevertheless, an appealing Registry-quality example. Population: 3 in 67, 0 finer (1/17). NGC ID# 23H4, PCGS# 4914

3404 1919 MS66+ Full Bands PCGS. CAC. Marvelously preserved, wholly original surfaces offer splashes of crimson, cobalt-blue, and golden-orange patina that mix with areas of brilliance on each side. Strike characteristics are as bold as the eye appeal is high. Population: 86 in 66 (5 in 66+) Full Bands, 16 finer. CAC: 22 in 66, 6 finer (12/16). NGC ID# 23H8, PCGS# 4923

3405 1919-S MS66 PCGS. CAC. In high grades, the 1919-D and 1919-S dimes rank among the rarest issues of the Mercury series. This practically pristine Premium Gem is brilliant and displays interesting die breaks along the reverse rim between 8 and 12 o'clock. NGC ID# 5LLM, PCGS# 4926

3406 1920-D MS65 Full Bands PCGS. An attractive Gem representative of this popular branch mint issue with sharply detailed design elements and fully split and rounded bands on the fasces. The well-preserved brilliant surfaces radiate vibrant mint luster and eye appeal is terrific. Population: 52 in 65 Full Bands, 27 finer (1/17). NGC ID# 23HC, PCGS# 4931

1920-S Dime, MS65 Full Bands Rarely Encountered Finer

3407 1920-S MS65 Full Bands PCGS. This satiny Gem Full Bands example displays mainly brilliant interiors surrounded by light golden border toning. Abrasions are at a minimum, and eye appeal is pleasing for the issue. The 1920-S dime is seldom offered this fine in the full bands category. Population: 35 in 65 (1 in 65+) Full Bands, 12 finer (1/17). NGC ID# 23HD, PCGS# 4933

1921-D Mercury Dime, MS64 Full Bands Sought-After Better Date

3408 1921-D MS64 Full Bands NGC. From a smallish mintage of just over 1 million pieces, the 1921-D Mercury dime is very scarce at the MS 64 grade level. This impressive Choice specimen exhibits sharply detailed design elements, with Full Bands definition on the fasces. The well-preserved, lustrous surfaces show highlights of greenish-gold toning. Census: 53 in 64 (1 in 64+) Full Bands, 56 finer (12/16). NGC ID# 23HE, PCGS# 4937

1923-S Dime, MS65 Full Bands Uniformly Toned and Lustrous

3409 1923-S MS65 Full Bands PCGS. A bold strike emerges from satiny fields on this Gem Full Bands 1923-S Mercury dime. Each side displays rich olive-gold toning with wisps of lavender throughout. There are no noticeable abrasions. The 1923-S is scarce in this grade and rare any finer. Population: 43 in 65 (1 in 65+) Full Bands, 5 finer (1/17). NGC ID# 23HH, PCGS# 4941

3410 1925 MS67 Full Bands PCGS. The mint luster seems to actually glow on this magnificent Superb Gem. Each side is mostly brilliant, but there also are pale horizontal streaks of golden-russet on the obverse. There are no reportable abrasions and, in short, this is a simply spectacular type coin from the 1920s. Population: 26 in 67 Full Bands, 3 finer (1/17). NGC ID# 23HM, PCGS# 4949

3411 1927-S MS64 Full Bands PCGS. The San Francisco silver issues of 1927 are famous for their often weak strikes. This Choice Full Bands dime is conditionally scarce. The strike is boldly rendered, and satiny luster illuminates golden and russet toning on each side. Abrasions are minimal. NGC ID# 23HW, PCGS# 4965

3412 1929-S MS67 Full Bands PCGS. A beautifully preserved coin with frosty mint luster, this Superb Gem 1929-S Mercury dime shows fully separated bands on the fasces with rich olive-green, crimson, gold, and russet toning over each side. Among the finest certified. Population: 48 in 67 (1 in 67+) Full Bands, 0 finer (1/17). NGC ID# 23J4, PCGS# 4977

1930 Dime, MS67 Full Bands None Finer at PCGS or NGC

3413 1930 MS67 Full Bands NGC. Only a faint hint of pale-apricot patina fights for a foothold on the overwhelmingly brilliant, frosted-white surfaces that radiate dazzling silver luster. Rounded, split bands attest to the pinpoint-sharp strike that attends the obverse portrait and peripheral elements as well. There are no marks beyond a few tiny ticks on the fasces, and the Superb Gem quality shines forth in all aspects of this conditionally rare Philadelphia issue. Census: 4 in 67 Full Bands, 0 finer (1/17). NGC ID# 23J5, PCGS# 4979

3414 1931-S Doubled Die Obverse, FS-101, MS65 Full Bands PCGS. The date is lightly die doubled, most prominently on the tail of the 9. A well struck Gem with many tiny freckles of golden-brown toning accompanying lustrous surfaces. The reverse is pristine and the obverse shows only wispy contact. PCGS# 145444 Base PCGS# 4987

3415 1931-S Doubled Die Obverse, FS-101, MS65 Full Bands PCGS. The date is die doubled, most apparent on the tail of the 9. A highly lustrous butter-gold and powder-blue Gem. The strike is intricate and the fields are immaculate. The cheek is also well preserved. A low mintage Great Depression issue. PCGS# 145444 Base PCGS# 4987

3416 1936-S MS67+ Full Bands PCGS. Brilliant aside from a hint of forest-green on the upper obverse, and a tiny ebony freckle on the N in ONE. A sharply struck and lustrous Superb Gem of this lower mintage Great Depression issue. Magnificently preserved. PCGS has certified 17 as MS67+ Full Bands, with just three pieces finer (1/17). NGC ID# 23JH, PCGS# 5003

3417 1937-S MS68 PCGS. CAC. Tied with one other as the finest non-Full Bands example at PCGS, and the sole finest endorsed by CAC (1/17). This Condition Census 1937-S Mercury dime displays a sharp strike everywhere except on the central fasces, and yields frosty, radiant luster throughout. Multicolor peripheral toning frames silver-gray interiors. NGC ID# 23JL, PCGS# 5008

3418 1942/1 FS-101 AU58 ANACS. A predominantly pearl-gray example of the popular and scarce wartime Philadelphia overdate. The borders display freckles of russet patina. Substantial luster accompanies the peripheries and devices, and no marks are remotely relevant. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

3419 1942/1 FS-101 AU58 PCGS. Ice-blue and wheat-gold patina graces this briefly circulated key date dime. Luster dominates both sides, but the central bands display slight wear. Void of relevant marks, and an attractive example of the World War II overdate. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

3420 1942/1-D FS-101 AU58+ PCGS. Barely a brush of high-point friction keeps this Plus-designated near-Mint coin from an Uncirculated grade. The strike is sharp, and the horizontal fasces bands are nearly completely separated. Traces of light golden toning grace satiny luster on each side. There are no major abrasions. NGC ID# 384N, PCGS# 145475 Base PCGS# 5040

PROOF MERCURY DIMES

3421 1937 PR68 NGC. Bold design elements rise above deep, glassy fields on this high-end Superb Gem proof. The peripheries show glimpses of sun-gold, olive, and russet toning, but the remainder of each side is near-brilliant. This piece is among the finest proof 1937 Mercury dimes certified. Census: 37 in 68 (2 in 68+, 2 in 68 ★), 0 finer (12/16). NGC ID# 27DH, PCGS# 5072

3422 1937 PR68 PCGS. This is a fully struck proof with exceptionally deep mirroring in the fields and sharp design elements. Dusky milk-white toning appears over each side with iridescent hues throughout. Population: 33 in 68 (1 in 68+), 0 finer (1/17). NGC ID# 27DH, PCGS# 5072

3423 1937 PR68 PCGS. A modest mintage of 5,756 proof Mercury dimes was accomplished at the Philadelphia Mint in 1937, and few survivors can match the high technical quality and incredible eye appeal of the present coin. This magnificent PR68 specimen exhibits sharply detailed design elements and impeccably preserved brilliant-finish surfaces with deeply reflective fields. Population: 33 in 68 (1 in 68+), 0 finer (1/17). NGC ID# 27DH, PCGS# 5072

1938 Dime, PR68 A Top-Graded Proof

3424 1938 PR68 PCGS. Alternating shades of blue, green, and gold drape the surfaces of this amazing PR68 dime. Marks are unseen, and the eye appeal is extraordinary. The Mint sold 8,728 proofs in 1938, making this one of the most elusive dates in the set. Population: 16 in 68 (1 in 68+), 0 finer (1/17). NGC ID# 27DJ, PCGS# 5073

3425 1939 PR68 NGC. Deeply mirrored, unmarked fields and expectedly fully struck motifs define each side. This nearly flawless Mercury dime proof, one of only 9,321 coins minted in 1939, ranks among the finest specimens at NGC and PCGS (1/17). NGC ID# 5AMD, PCGS# 5074

ROOSEVELT DIMES

3426 1949-S MS67+ Full Bands PCGS. Tied for the finest certified, this high-end Full Bands 1949-S Roosevelt dime is an unsurpassed Registry Set candidate with frosty, champagne-tinged luster. Close examination fails to reveal a single notable flaw. Population: 23 in 67 (7 in 67+) Full Bands, 0 finer (1/17). NGC ID# 23KW, PCGS# 85093

3427 1951-S MS68 Full Bands PCGS. A Condition Census example of the 1951-S Roosevelt dime, a must-have item for the Registry Set collector. This piece displays frosty, untouched mint luster with lavender-tinted silver interiors surrounded by vivid rust-orange and gold border toning. An outstanding coin both technically and visually. Population: 8 in 68 Full Bands, 0 finer (1/17). NGC ID# 23L4, PCGS# 85099

**1953-S Dime, MS68
Vibrant Multicolor Toning**

- 3428 1953-S MS68 PCGS.** Spectacular cherry-red, lemon-gold, forest-green, and powder-blue toning encompasses this lustrous and essentially immaculate representative. Encapsulated in an old green label holder, and likely the first '53-S dime to attain the MS68 level at PCGS. Population: 3 in 68, 1 finer as 68 Full Bands (12/16). NGC ID# 23LA, PCGS# 5105

**1959 Roosevelt Dime, MS67+ Full Bands
Vivid, One-Sided Toning, Registry Grade**

- 3429 1959 MS67+ Full Bands PCGS.** The obverse of this Plus-graded Superb Gem is blanketed in vivid shades of greenish-gold and violet toning, while the reverse remains completely brilliant. The design elements are sharply rendered, with Full Bands on the torch, and the lustrous surfaces are virtually pristine. Population: 39 in 67 (6 in 67+) Full Bands, 0 finer (1/17). NGC ID# 23LP, PCGS# 85118

**1964 Roosevelt Dime, MS67+ Full Bands
Last Silver Issue, None Finer at PCGS**

- 3430 1964 MS67+ Full Bands PCGS.** Vivid shades of burnt-orange and magenta toning visit the impeccably preserved surfaces of this Plus-graded Superb Gem. The design elements are sharply detailed, with Full Bands on the torch, and vibrant mint luster shines through the patina. This was the last 90% Business-strike silver issue. Population: 31 in 67 (4 in 67+) Full Bands, 0 finer (1/17). NGC ID# 23M2, PCGS# 85128

PROOF ROOSEVELT DIMES

**1950 Roosevelt Dime, PR68 Deep Cameo
None Certified Finer**

- 3431 1950 PR68 Deep Cameo PCGS.** The Mint resumed commercial proof set offerings in 1950, with a mintage of 51,386 Roosevelt dimes. This magnificent specimen is one of the finest survivors, with sharply detailed design elements, virtually perfect surfaces, and deeply reflective fields that contrast boldly with the frosty devices. Population: 7 in 68 Deep Cameo, 0 finer (1/17). NGC ID# 27EJ, PCGS# 95225

1951 Roosevelt Dime, Brilliant PR67 Deep Cameo

- 3432 1951 PR67 Deep Cameo PCGS.** The 1951 proof Roosevelt dime claims a mintage of 57,500 pieces, but examples with Deep Cameo surfaces are seldom encountered. This spectacular Superb Gem displays sharply detailed, frosty design elements and profoundly contrasted deeply mirrored fields. The brilliant surfaces are impeccably preserved. Population: 5 in 67 (1 in 67+) Deep Cameo, 4 finer (1/17). NGC ID# 27EK, PCGS# 95226

**1970 No S Roosevelt Dime, PR69 Cameo
Tied for Finest at PCGS**

- 3433 1970 No S PR69 Cameo PCGS.** A virtually perfect example of the popular No S 1970 Roosevelt dime, with sharply detailed design elements and deeply mirrored fields that contrast boldly with the frosty devices. The brilliant surfaces are just one tick away from perfection and eye appeal is tremendous. Population: 13 in 69 Cameo, 0 finer (1/17). NGC ID# 59SD, PCGS# 85248

- 3434 1973-S PR70 Deep Cameo PCGS.** The fully struck, frosty design elements of this incredible Roosevelt dime seem to float on the deeply mirrored liquid fields and the brilliant surfaces are technically perfect. Eye appeal is tremendous. Population: 40 in 70 Deep Cameo, (12/16). NGC ID# 27KM, PCGS# 95251

- 3435 1973-S PR70 Deep Cameo PCGS.** Fully struck and flawlessly preserved, this Deep Cameo 1973-S proof Roosevelt dime ranks among the finest known, the ideal status for a Registry Set acquisition. Pieces grading this fine are seldom offered at auction. Population: 42 in 70 Deep Cameo, (1/17). NGC ID# 27KM, PCGS# 95251

TWENTY CENT PIECES

- 3436 1875 MS63 NGC. BF-1, R.1.** Deep autumn-brown and cobalt-blue toning embraces this sharply struck and minimally marked representative. According to Brunner and Frost, BF-1 first struck commercial pieces, then was used to coin proofs, and later again produced business pieces. The present semiprooflike example was likely among the latter coined.
Ex: FUN Signature (Heritage, 1/2014), lot 8762, which realized \$1,116.25. NGC ID# 23R5, PCGS# 5296

- 3437 1875 MS64 PCGS. BF-1, R.1.** A lightly toned near-Gem example from the denomination's introductory year. The Philadelphia Mint struck only 38,500 pieces, substantially fewer than the CC- and S-mint issues. The dusky caramel-gold surfaces are sharply struck.
Ex: Chicago ANA Signature (Heritage, 8/2014), lot 3534, which realized \$1,645. NGC ID# 23R5, PCGS# 5296

- 3438 1875-CC AU55 PCGS. CAC. BF-2, R.1.** Slight doubling occurs on the 5. This is the most available variety for the 1875-CC twenty cent, representing about 75% of the 133,290 coins struck. Remaining luster glows from silvery surfaces. The peripheries are clear, but the centers display typical incompleteness. A tick is noted on Liberty's head. NGC ID# 23R6, PCGS# 5297

- 3439 1875-CC AU58 PCGS. BF-2, R.1.** Faint caramel-gold toning overlies coruscating pearl-gray surfaces. LIBERTY exhibits slight wear. Noticeable marks are confined to a small cluster on the field below the left (facing) wing. NGC ID# 23R6, PCGS# 5297

- 3440 1875-CC AU58+ PCGS. BF-4, R.2.** The only attainable CC twenty cent piece, this reverse die was reused the following year to strike the ultra-rare 1876-CC. This is a lovely coin that displays brilliant surfaces and noticeable luster surrounding the devices. A number of grade-consistent abrasions are scattered around each side. NGC ID# 23R6, PCGS# 5297

1875-CC Twenty Cent Near-Gem Carson City Issue

- 3441 1875-CC MS64 NGC. BF-2, R.1.** The two most-available twenty cent pieces of the short-lived series are both branch mint issues, the 1875-S and the 1875-CC. Of the two, the Carson City issue is the preferred option for many collectors. This lustrous near-Gem is brilliant and frosty with a faint tinge of gold at the rims. The coin is sharply struck with only slight incompleteness at the high point of the eagle's breast feathers — all else displays nearly full details. Only minor abrasions are visible under a loupe, individually inconsequential and widely scattered on the lustrous fields. Census: 94 in 64 (4 in 64+), 39 finer (1/17). NGC ID# 23R6, PCGS# 5297

1875-S Twenty Cent Piece, MS65+ Excellent Type Coin

- 3442 1875-S MS65+ PCGS. CAC.** This Plus-graded Gem exhibits an average strike for the issue, with some general softness on the devices and an extensive network of die cracks through the reverse legend. The well-preserved surfaces display vibrant mint luster, with delicate highlights of pale gold toning. Eye appeal is quite strong. NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECES

- 3443 1875 PR62 PCGS. BF-1, R.1.** Milky champagne toning graces mirrored fields on each side of this collectible proof 1875 twenty cent piece. Grade-limiting marks are minor, making this piece ideal for the budget-conscious type collector seeking a nice coin for the grade. NGC ID# 27GZ, PCGS# 5303

1875 Twenty Cent, PR64 Cameo Sharp Field/Device Contrast

- 3444 1875 PR64 Cameo PCGS. BF-1.** The first of just four proof issues in a short and most-pursuable series. This Choice Cameo proof is well-contrasted, despite a faint cloudiness to the smooth, mirrored fields that bolster the impact of the sharp, frosty devices. Attractive gold and sea-green toning frames the peripheries. No contact marks are present, and only a few delicate, stray lines in the fields define the assigned grade. Population: 21 in 64 Cameo, 15 finer (1/17). NGC ID# 23X7, PCGS# 85303

1876 Twenty Cent, PR63 Cameo Low Total Mintage, Boldly Contrasted

- 3445 1876 PR63 Cameo PCGS. BF-1, R.4.** The Philadelphia Mint produced a total of 15,900 twenty cent pieces in 1876, the second year of the denomination's issuance and the final year of circulation-strike output. Only 1,150 proofs were sold, and they are seldom found today with Cameo contrast. This Select proof is largely brilliant with daubs of pale olive patina. Boldly contrasted on each side and fully struck. NGC ID# 27H3, PCGS# 85304

**1876 Twenty Cent, PR63 Cameo
Nearly Brilliant, Bold Contrast**

- 3446 1876 PR63 Cameo PCGS. BF-1.** The 1876 Philadelphia issue is the scarcest twenty cent piece in regular-issue circulation strike format, a signal for collectors to consider a relatively more-available proof, although the 1876 proofs are scarce as well — this despite a *Guide Book* mintage of 1,150 pieces in the nation's centennial year. The present Select example is brilliant except for a thin crescent of clear gold toning at the lower obverse rim. It displays a razor-sharp strike on the frost-white motifs, suggestive of an even higher grade despite a few delicate lines that crisscross the glassy-mirrored fields. Population: 26 in 63 Cameo, 59 finer (1/17). NGC ID# 27H3, PCGS# 85304

EARLY QUARTERS

**Collectible 1796 B-2 Quarter
AG Details**

- 3447 1796 B-2, R.3, PCGS Genuine. AG Details.** The Small Eagle quarter ranks among the rarest silver types, as it was struck only in 1796, the first year of the denomination. On the present piece, a name and date were lightly and indistinctly pinscratched on the reverse by a proud 19th century finder. The date is sharp, the portrait is nicely outlined, and the eagle is outlined save for the left (facing) wing. LIBERTY and UNITED STATES OF AM are mostly worn smooth.

- 3448 1807 B-1, R.2, VF25 PCGS.** Moderate wear is evident on all design elements and the left side of the drapery is indistinct, but still discernible. The lightly abraded dove-gray surfaces show hints of sea-green and blue-steel in selected areas, with a few amber spots on the obverse. NGC ID# 23RF, PCGS# 38939 Base PCGS# 5316

BUST QUARTERS

1818/5 B-1 Quarter, MS62

- 3449 1818/5 B-1, R.2, MS62 NGC.** Tompkins Die State 3/5 with conspicuous reverse die cracks. Blushes of autumn-gold, russet-brown, and steel-blue overlies the predominantly pearl-gray surfaces. Nicely struck and unblemished with satin cartwheel luster throughout the reverse. B-1 and B-3 both share the same obverse die, but only B-1 shows clear indications of the 5 underdigit. *Ex: FUN Signature (Heritage, 1/2008), lot 1091; Long Beach Signature (Heritage, 2/2009), lot 1057, which realized \$3,451.15.* NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323

- 3450 1818 B-9, High R.5, Fine 12 PCGS.** Smooth wear and attractive, slate-gray surfaces with cream-gray highlights give this Browning-9 quarter nice eye appeal. The rims are full with sharp dentils and only minor weakness beneath the date. The B-9 is the scarcest of 10 die marriages for the 1818 quarters. The surfaces are problem-free and well-defined. NGC ID# 23RH, PCGS# 38950 Base PCGS# 5322

- 3451 1820 Small O, B-4, R.2 — Improperly Cleaned — NGC Details. AU.** Rich forest-green, plum-mauve, and russet-brown toning encompasses this briefly circulated representative. No marks are noticeable, and the strike is good except on the eagle's right (facing) claw.

**1821 B-2 Quarter, MS62
Semiprooflike Fields**

- 3452 1821 B-2, High R.4, MS62 NGC.** Tompkins Die State 2/2 with a delicate vertical die crack on the cheek. Deep sea-green and golden-brown toning blankets this glossy Bust quarter. Well struck aside from the claws and the IB in PLURIBUS. The fields are prooflike and minimally abraded beneath the rich patina. *Ex: Boston ANA Signature (Heritage, 8/2010), lot 4644, which realized \$3,220.* NGC ID# 23RM, PCGS# 38964 Base PCGS# 5331

- 3453 1821 B-4, R.3, — Improperly Cleaned — NGC Details. AU.** A die scratch from the point of the lowest leaf to the rim identifies the somewhat scarce B-4 variety. The pleasing surfaces of this lightly worn specimen show some scattered minor abrasions and hints of lavender-gray and golden-tan toning. The luster is dimmed by the effects of the noted cleaning.

- 3454 1824/2 B-1, R.3, VG10 PCGS. CAC.** The only 1824 die variety and sought-after in all grades. This collectible VG example displays smooth surfaces with deep olive-gray fields and lighter tan-gray motifs. The borders are complete, and the central eagle shows unusually strong feather detail. Some of Liberty's larger hair curls are also visible. NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

3455 1825/4(2) B-2, R.2, — Improperly Cleaned — NGC Details. AU. Just a trace of wear shows on the sharply detailed design elements, and the lightly abraded surfaces exhibit shades of greenish-gold and lavender toning. Despite the noted cleaning, traces of prooflike reflectivity are evident in selected areas.

3456 1832 B-1, R.1, AU58 PCGS. Tompkins Die State 2/2. A sharply struck Borderline Uncirculated example. The obverse field displays minute flecks of gray patina, but both sides are otherwise brilliant. No marks are noticeable, and the eye appeal is attractive. NGC ID# 23RX, PCGS# 38987 Base PCGS# 5351

3457 1833 B-1, R.2, MS61 NGC. The popular B-1 variety is easily recognized by the period after C on the reverse. This attractive Mint State specimen is softly struck on the lower obverse and the mint luster is subdued by shades of sea-green and lavender-gray toning. Housed in a prior generation holder. NGC ID# 23RY, PCGS# 38989 Base PCGS# 5352

1838 Capped Bust Quarter, MS62 B-1, Perfect Closing-Year Type

3458 1838 B-1, R.1, MS62 PCGS. The final-year Capped Bust quarter is a perfect choice for type representation. The issue claims a sizeable mintage of 366,000 coins, and example can be located through lower Uncirculated grades with little trouble. This is a lovely Mint State piece with subdued, satiny luster beneath antique blue and gold patina. Well-defined over the centers with softness on the stars and the denomination. NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357

SEATED QUARTERS

1840-O Drapery Quarter, Large O, XF40 Briggs 1-A, FS-501, Doubled Denticles

3459 1840-O Drapery, Large O, FS-501, XF40 PCGS. Briggs 1-A. Equally sought for the Large O mintmark and the usual doubled denticles on the reverse, this *Cherrypickers'* variety is seldom seen and it is among the rarest Seated quarter varieties regardless of date or Mint. We have only offered a few examples over the past 20 years of our archives. This example is an ideal collector coin for series specialists — most of whom are well aware of its rarity. Smooth, golden-gray patina deepens at the rims while the surfaces show only moderate wear and an absolute minimum of marks. This piece is a coup for the successful bidder. PCGS# 395925 Base PCGS# 5398

3460 1840-O Drapery MS62 PCGS. Briggs 2-C. A satiny olive-gray example of this challenging With Drapery issue, showing smooth, lustrous surfaces. The strike is slightly weak on Liberty's central figure and the eagle's left (facing) leg. A very appealing coin for the MS62 grade level. Population: 8 in 62, 18 finer (1/17). NGC ID# 23SJ, PCGS# 5398

3461 1844-O MS63 PCGS. Briggs 1-A, Flynn RPD-001. The 4s in the date are faintly recut. This Select Mint State 1844-O Seated quarter displays a bold strike and minimal abrasions. Deep aquamarine and lavender-gold toning blankets each side. The 1844-O is rarely seen this fine, and we believe the issue is underrated in the current grade. Population: 6 in 63, 6 finer (1/17). NGC ID# 23SU, PCGS# 5407

3462 1847-O XF45 PCGS. Briggs 1-B. Deep steel-gray patina encompasses this unmarked antebellum New Orleans quarter. The strike is good except on the fletchings, the upper left stars, and the eagle's left (facing) leg. Minor laminations (as made) are noted near the TA in STATES. The 1847-O is scarce this fine and rarely seen finer, suggesting that it is underrated at current price levels. Population: 7 in 45, 23 finer (1/17). NGC ID# 23SY, PCGS# 5411

3463 1850-O AU55 PCGS. CAC. This is a challenging New Orleans issue, particularly in the upper circulated and Mint State grades. This CAC-approved Choice AU representative displays bold design elements beneath medium olive-gold toning. Luster remains in the fields. Population: 12 in 55, 24 finer. CAC: 3 in 55, 6 finer (1/17). NGC ID# 23T5, PCGS# 5416

**1853 Seated Liberty Quarter, MS64
Short-Lived Arrows and Rays Design Type**

- 3464 1853 Arrows and Rays MS64 PCGS.** Arrows and Rays were added to the design of the quarter in 1853 to signify a weight change in silver coinage that year. The Rays were dropped the following year, but the Arrows remained through 1855. This attractive Choice example is well-detailed, with just a touch of flatness on some star centers. The well-preserved, lustrous surfaces are visited by shades of champagne-gold and lavender-gray toning. PCGS has graded 29 numerically finer examples (12/16). NGC ID# 23U4, PCGS# 5426

**1853 Seated Liberty Quarter, MS64+
Popular Arrows and Rays Type**

- 3465 1853 Arrows and Rays MS64+ PCGS.** The popular Arrows and Rays design was instituted in 1853 to signify a weight change. This high-end Choice specimen displays sharply detailed design elements, with an interesting die crack through the bottom of the date and another from the rim at 4 o'clock, past Liberty's toe, and through the arrow head. The lustrous surfaces show hints of lavender-gray and golden-brown toning. PCGS has graded 29 finer examples (1/17). NGC ID# 23U4, PCGS# 5426

**1858 Quarter, Plus-Graded Gem
Originally Toned Type Coin**

- 3466 1858 MS65+ PCGS.** The 1858 Seated quarter is a plentiful No Motto issue, ideal for type purposes. This conditionally elusive, high-end Gem example displays outstanding preservation of frosty mint luster, with hints of pale amber toning in the protected regions. The strike is sharp, and eye appeal benefits from blatant originality. Population: 3 in 65+, 15 finer (1/17). NGC ID# 23TH, PCGS# 5445

- 3467 1860-S VG8 PCGS. Briggs 1-A.** The 1860-S is scarce in all grades and prohibitively rare in Mint State. This collectible Very Good example displays smooth lavender-gray and olive surfaces with only a single, old mark at Liberty's cap. LIBERTY is entirely visible save for about half of the L. Population: 7 in 8, 52 finer (1/17). NGC ID# 442R, PCGS# 5453

- 3468 1861 MS64+ PCGS. CAC. Briggs 6-E.** Type Two Reverse. This plentiful type-coin issue becomes scarce in Gem condition. The present Plus-graded near-Gem offers an affordable option for the budget-conscious collector that yet displays outstanding eye appeal and strike sharpness. Olive-green and lemon-gold toning encompass each side. NGC ID# 23TT, PCGS# 5454

**1862 Seated Liberty Quarter, MS65
Popular No Motto Issue**

- 3469 1862 MS65 PCGS. Briggs 1-A.** A substantial mintage of 932,000 Seated Liberty quarters was accomplished at the Philadelphia Mint in 1862, but the issue is more difficult to locate than the large production total would suggest. The 1862 quarters may have been heavily melted during the Civil War. This sharply detailed Gem offers well-preserved, lightly toned surfaces with vibrant mint luster throughout. Population: 13 in 65, 12 finer (12/16). NGC ID# 23TV, PCGS# 5456

- 3470 1869 AU50 PCGS. Briggs 1-A.** Coming from a mintage of only 16,000 coins, the 1869 quarter dollar is scarce in all grades and rare in Mint State. This AU example displays strong detail and partially lustrous fields. Pale blue and lavender hues appear throughout otherwise silvery patina. Light field chatter is typical of the grade. Population: 1 in 50, 15 finer (1/17). NGC ID# 23UH, PCGS# 5474

- 3471 1869 AU55 PCGS. Briggs 1-A.** The Philadelphia Mint struck only 16,000 1869 quarters for commerce, due to fractional currency and Gresham's Law. This partly lustrous representative is brilliant and well struck. Mentionable marks are limited to a few thin field marks near AMERICA. NGC ID# 23UH, PCGS# 5474

- 3472 1873 Arrows MS64 NGC. Briggs 3-B.** This is a frosty, smooth near-Gem example of this popular and in-demand type coin. The silver-white surfaces show a glimmer of gold, and there are few relevant marks aside from a couple on Liberty's torso that likely preclude an even finer grade. The strike is excellent. Census: 33 in 64, 9 finer (1/17).
Ex: Boston Signature (Heritage, 8/2010), lot 4716. NGC ID# BZMG, PCGS# 5491

**1874-S Seated Liberty Quarter, MS64+
Appealing Arrows Type Coin**

- 3473 1874-S Arrows MS64+ PCGS. CAC.** Brief areas of golden-tan and deep iridescent toning are interspersed with large areas of lustrous and lightly toned silver-gray patina. The strike is sharp across most of the coin but not full on Liberty's uppermost hair strands. Struck with arrows on either side of the date to denote an increase in its weight (and slightly higher intrinsic value), the Arrows design is a two-year type in the quarter series. This example is high-end for the Choice Mint State grade, free of all but a handful of tiny ticks over the frosty surfaces. CAC endorsed and the sole coin with the PCGS Plus designation at the MS64 level. Population: 63 in 64 (1 in 64+), 91 finer. CAC: 8 in 64, 11 finer (1/17). NGC ID# 23VY, PCGS# 5495

**1874-S Arrows Quarter, MS65
Pale Golden Overlay**

- 3474 1874-S Arrows MS65 PCGS. Briggs 1-A.** A total of 392,000 Seated Liberty quarters were struck at the San Francisco Mint in 1874, the second and final year of the two-year With Arrows subtype. Examples are very scarce at this impressive grade level. This mostly brilliant Gem offers a pale overlay of golden color and an abundance of frosty mint luster. The devices are uniformly sharp. Clean for the grade and housed in a green label holder. NGC ID# 23VY, PCGS# 5495
- 3475 1875-S MS64+ PCGS. Briggs 3-C.** Type Two Reverse. Medium S. A lustrous and lovely near-Gem silver type coin. Chestnut-gold and stone-gray toning enrich impressively unabraded surfaces. Briggs 3-C is interesting for its heavy die cracks throughout the reverse periphery. NGC ID# 23UZ, PCGS# 5500
- 3476 1877/77-CC Large CC, Briggs 2-B, FS-301, Flynn RPD-001, MS64 PCGS.** Areas of prooflikeness surround the frosted central devices of this Choice Uncirculated quarter, with attractive swaths of amber-gold toning at the margins. Bright mint luster gleams from the silver surfaces. A scarce die pair for this readily available Carson City issue, struck from heavily rusted dies. Both 7s in the date show wide repunching at their bases. PCGS# 395941 Base PCGS# 5505

PROOF SEATED QUARTERS

**1857 Seated Quarter, PR62
Early and Rare Proof Date**

- 3477 1857 PR62 NGC. Briggs 7-G.** Navy-blue, lavender, and straw-gold toning endow this fully struck and flashy specimen. The eye appeal is exceptional for the third-party grade. The mintages of proof coins were not recorded until 1859, but the 1857 is undoubtedly rare in proof format. PCGS estimates 75 to 100 examples are known. Certified in a former generation holder. NGC ID# 23WJ, PCGS# 5553
- 3478 1863 PR64+ PCGS.** Apple-green toning is prevalent, though the field above the eagle is violet-red and the obverse margin displays olive-gold. Fully struck and void of contact. One of 460 proofs issued for this Civil War date. The reverse is Briggs D but the obverse die is unlisted, different from Briggs 4. NGC ID# 23WR, PCGS# 5559
- 3479 1864 PR63 PCGS. Briggs 3-C.** A lovely apricot-gold Select specimen. The strike is precise, and hairlines are far fewer than anticipated for the designated grade. Both major devices are frosty, and contrast with glassy fields. A mere 470 proofs were issued for this Civil War date. NGC ID# 23WS, PCGS# 5560

**1867 Seated Quarter, Richly Toned PR66+
Sole Plus-Graded Coin at This Level**

- 3480 1867 PR66+ PCGS. CAC.** The importance of proofs from this year (just 625 pieces struck) is magnified by the absolute rarity of circulation strikes, of which only 16,000 pieces were produced. This lovely example features beautiful cobalt-blue toning, interspersed with small splashes of pale-purple, over both the obverse and reverse. The fields offer a high degree of reflectivity, highlighting the superbly struck design elements. No significant blemishes are apparent on the relatively pristine surfaces. This is the sole Plus-graded example at PCGS, as well as one of the very few to display CAC endorsement. Population: 5 in 66 (1 in 66+), 2 finer. CAC: 6 in 66, 0 finer (1/17). NGC ID# 23WY, PCGS# 5566
- 3481 1874 Arrows PR64 PCGS. CAC. Briggs 5-D.** An attractive Choice specimen from a limited proof mintage of 700 pieces, this coin offers well-detailed design elements and reflective fields, under low-intensity shades of greenish-gold and cerulean-blue toning. Housed in a green label holder. Population: 70 in 64, 58 finer. CAC: 5 in 64, 8 finer (1/17). NGC ID# 23XS, PCGS# 5575
- 3482 1883 PR66 NGC. Briggs 1-A, Flynn-MPD-001.** Kevin Flynn describes the misplaced date variety as "the tops of an 88 or 83 in denticles between the first and second 8 and below the second 8." A boldly struck Premium Gem with consistent caramel-gold toning. An outstanding representative of this low mintage date. NGC ID# 23XF, PCGS# 5584

- 3483 1883 PR66+ NGC. CAC. Briggs 1-A.** The virtually pristine surfaces of this Plus-graded Premium Gem are enhanced by vivid shades of cobalt-blue and sea-green toning, with deeply reflective fields underneath. Razor-sharp definition is evident on all design elements and overall eye appeal is tremendous. Census: 29 in 66 (1 in 66+), 17 finer. CAC: 9 in 66, 10 finer (1/17). NGC ID# 23XF, PCGS# 5584

**1883 Seated Liberty Quarter, PR67
Vivid Toning, Reflective Fields**

- 3484 1883 PR67 NGC. Briggs 1-A.** This spectacular Superb Gem exhibits impeccably preserved surfaces and deeply reflective fields, under vivid shades of cerulean-blue, lime-green, and golden-brown toning. The design elements are well-detailed throughout. A single reverse die was used to strike both the proof and business strike quarters of 1883, but the proofs are easily differentiated by the tops of an errant 83 seen in the dentils below the date. Census: 15 in 67 (1 in 67+, 1 in 67★), 2 finer (1/17). NGC ID# 23XF, PCGS# 5584

- 3485 1884 PR66 PCGS. Briggs 2-B.** Pumpkin-gold centers cede to ocean-blue margins. The strike is full, and the mirrored fields exude eye appeal. The eagle and Liberty's shield are frosty, though no Cameo designation is assigned. One of only 875 proofs produced. NGC ID# 3TWH, PCGS# 5585

- 3486 1884 PR66 PCGS. Briggs 2-B.** Rich peach-gold and cherry-red toning embraces the borders of this sharply struck specimen. The preservation appears pristine aside from delicate contact on the left obverse field. The motifs exhibit substantial white-on-black contrast, although PCGS omits a Cameo designation. NGC ID# 3TWH, PCGS# 5585

- 3487 1885 PR66 PCGS. Briggs 3-B.** Ocean-blue centers are framed by butter-gold and ruby-red margins. This flashy and well struck Premium Gem appears perfect aside from a circular dollop of gray toning near the eagle's right (facing) wingtip. NGC ID# 23XH, PCGS# 5586

**1885 Seated Liberty Quarter, PR66+
Attractive Multicolor Toning**

- 3488 1885 PR66+ PCGS. CAC. Briggs 3-B.** From a typical proof mintage of 930 pieces, this Plus-graded Premium Gem exhibits well-detailed design elements, with a touch of softness on Liberty's bodice. The impeccably preserved surfaces are blanketed in shades of greenish-gold and cerulean-blue toning, with deeply reflective fields underneath. Population: 23 in 66 (3 in 66+), 3 finer. CAC: 7 in 66, 2 finer (1/17). NGC ID# 23XH, PCGS# 5586

- 3489 1888 PR66 Cameo NGC. Briggs 2-B.** A flashy, fully brilliant specimen with appreciable contrast between the glassy fields and the snow-white design elements. Not often encountered at this lofty level. Census: 10 in 66 Cameo, 6 finer (12/16). Ex: Long Beach Signature (Heritage, 9/2005), lot 2715; Brian Loncar Collection, Part II (Heritage, 6/2014), lot 3735. NGC ID# 23XL, PCGS# 85589

BARBER QUARTERS

- 3490 1892 MS66 Prooflike NGC. Type Two Reverse.** A spectacular Premium Gem from the first year of the Barber design, with impeccably preserved surfaces and sharply detailed design elements, under subtle hints of pale gold toning. The fields display prooflike reflectivity throughout. Census: 1 in 66 Prooflike, 3 finer (12/16). NGC ID# 23XT, PCGS# 75601 Base PCGS# 5601

- 3491 1897-O MS64 PCGS.** From a mintage of 1.4 million pieces, this attractive Choice specimen offers sharply detailed design elements and well-preserved lustrous surfaces, with hints of lavender and golden-gray patina. Population: 14 in 64, 39 finer (12/16). NGC ID# 23YB, PCGS# 5617

- 3492 1901-S AG3 PCGS.** A problem-free coin with smooth battleship-gray surfaces. The obverse has a complete rim and boldly outlined portrait. The reverse shows the eagle's wingtips and the border legends merging with the rim, but the mintmark is yet plain. NGC ID# 23YR, PCGS# 5630

**1905 Barber Quarter, MS66+
Only One Finer Coin at PCGS**

- 3493 1905 MS66+ PCGS. CAC.** Mint records indicate nearly 5 million Barber quarters were struck at the Philadelphia Mint in 1905, but few survivors can match the quality and eye appeal of this Plus-graded Premium Gem. The design elements are sharply detailed and the impeccably preserved surfaces radiate vibrant mint luster, with subtle hints of pale gold toning. Population: 19 in 66 (2 in 66+), 1 finer. CAC: 8 in 66, 0 finer (12/16). NGC ID# 23Z2, PCGS# 5639

- 3494 1908-D MS66 NGC.** The Denver facility produced 5.7 million quarters in its third year of operation. Examples are rarely encountered in MS66. Dramatic russet and slate-gray toning covers the obverse of this piece, and radiant mint brilliance illuminates the reverse. Several stars show strike softness, but the usually weak right shield corner is bold. Census: 4 in 66, 4 finer (1/17). NGC ID# 23ZD, PCGS# 5650

- 3495 1909-S MS65 PCGS.** The obverse is lightly toned in pale gold and lilac hues, while the reverse is completely brilliant. That side shows a full strike on the right shield corner, fletchings, talons, and tailfeathers. The obverse stars are equally bold. A couple of small marks appear on the cheek. Population: 26 in 65, 18 finer (12/16). NGC ID# 23ZK, PCGS# 5656

- 3496 1912 MS66 PCGS.** Satiny luster shows a few wisps of light golden toning on this Premium Gem 1912 Barber quarter. The eagle's right (facing) talons and the fletchings show the only discernible strike softness. This issue is rarely seen this fine. Population: 31 in 66 (3 in 66+), 2 finer (1/17). NGC ID# 23ZS, PCGS# 5662

**1912-S Barber Quarter, MS66+
Elusive, Low-Mintage Issue**

- 3497 1912-S MS66+ PCGS.** This Plus-graded Premium Gem exhibits sharply detailed design elements in most areas, with just a touch of softness on the eagle's claw and arrow fletching. The well-preserved surfaces are visited by dusky shades of champagne-gold and lavender toning, with vibrant mint luster underneath. From a mintage of 708,000 pieces. Population: 15 in 66 (2 in 66+), 4 finer (1/17). NGC ID# 23ZT, PCGS# 5663

- 3498 1914-D Doubled Die Obverse, FS-101, MS66 PCGS.** Housed in an old green label holder without a variety designation, but the left-side stars and IN GOD WE TRUST are nicely die doubled toward the rim. Nicely struck and lustrous with smooth surfaces and light chestnut-gold and sea-green toning. PCGS# 395947 Base PCGS# 5668

- 3499 1916 MS66 PCGS. CAC.** Faint tan-gold toning adorns thoroughly lustrous and fully struck surfaces. A beautifully preserved final-year Barber type coin. Population: 33 in 66 (2 in 66+), 5 finer. CAC: 8 in 66, 2 finer (1/17). NGC ID# 2425, PCGS# 5673

- 3500 1916-D MS66 PCGS.** A beautifully preserved Barber type coin with dazzling luster and a sharp strike the obverse showcases vivid ocean-blue, lavender, and gold toning, while the reverse offers a blush of light champagne. PCGS records 17 Superb Gems finer (1/17). NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

- 3501 1896 PR65 NGC. Gold CAC.** A magnificently toned Gem. The borders are ocean-blue and golden-brown, while the centers remain brilliant. The portrait and eagle display icy frost, but no cameo designation is present, since the coin is housed in a former generation holder. NGC ID# 23Y7, PCGS# 5682

**1902 Barber Quarter, PR67
Attractive Toning, Slight Contrast**

- 3502 1902 PR67 NGC.** A conditionally elusive Superb Gem example of this early 20th century proof quarter. This piece is fully struck, and modest field-device contrast is seen on the reverse — unusual and desirable for proofs of this period. The obverse shows delicate multicolor peripheral toning around a soft champagne and lavender interior, while the reverse displays a much more dominating violet and pale gold palette. Census: 19 in 67 (1 in 67★, 1 in 67+★), 5 finer (1/17). NGC ID# 242H, PCGS# 5688

- 3503 1904 PR65 PCGS. Gold CAC.** A brilliant and beautiful Gem. The unperturbed surfaces exude eye appeal. Cameo contrast is apparent, though the first-generation holder ensures no such designation is present. One of just 670 proofs issued. NGC ID# 242K, PCGS# 5690

**1906 Barber Quarter, PR67
Lightly Toned and Contrasted**

- 3504 1906 PR67 PCGS.** An impressive Superb Gem proof, this 1906 Barber quarter exhibits hints of champagne toning on brilliant silver surfaces. Slight contrast is noted on both sides of this lovely piece, an unusual occurrence on proof coins of this era. Population: 26 in 67 (2 in 67+), 4 finer (1/17). NGC ID# 242M, PCGS# 5692

**1908 Quarter, PR66 Cameo
Only 545 Specimens Produced**

- 3505 1908 PR66 Cameo PCGS. CAC.** This is one of the 545 Barber quarter proofs manufactured at the Mint in 1908, a relatively low production bested by only a handful of other dates in the series. Cameo representatives are rarely offered, especially at this grade level. The obverse is brilliant, while the boldly contrasted reverse displays speckled tones. Population: 3 in 66 (1 in 66+) Cameo, 5 finer. CAC: 2 in 66, 4 finer (1/17). NGC ID# 242P, PCGS# 85694

**1910 Barber Quarter, PR66
Only 551 Proofs Minted**

- 3506 1910 PR66 NGC. CAC.** Gold, violet, and sea-green iridescence paints each side of this spectacular Premium Gem proof quarter. The surfaces are impressively unmarked, even for the lofty PR66 grade, and the CAC approval sticker is well-earned. A total of 551 specimens were sold in sets to collectors. Few survive as fine as this. Encapsulated in a prior generation holder. Census: 26 in 66, 35 finer. CAC: 6 in 66, 7 finer (1/17). NGC ID# 242S, PCGS# 5696

**1913 Barber Quarter, PR67
Only 613 Pieces Struck**

3507 1913 PR67 PCGS. Modest field-motif contrast shows on this high-end Superb Gem. Whispers of gold-brown concentrate at the borders, while Liberty's cap assumes multicolored toning. The design elements are solidly struck and close examination reveals no mentionable marks. From a relatively small mintage of 613 pieces, the 1913 proof quarter is notably rare in the higher numerical grades. Population: 12 in 67 (3 in 67+), 3 finer (1/17). NGC ID# 242V, PCGS# 5699

3508 1914 PR66 NGC. Gleaming fields and sharp, satiny devices reside beneath a blanket of russet-gold and pale lilac toning. A few faint hairlines are well-masked by the rich patina. Census: 29 in 66, 26 finer (1/17). NGC ID# 242W, PCGS# 5700

3509 1915 PR66 NGC. A well-preserved, brilliant proof with remnants of faint die polishing lines in the obverse fields. The strike is sharp, and eye appeal is excellent. Census: 26 in 66 (1 in 66+), 19 finer (1/17). NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

3510 1917 Type One MS66+ Full Head PCGS. Struck from a slightly later die state that produces vibrant, frosty luster on each side of this high-end Full Head 1917 Type One quarter. The strike is sharp as usual, and a small mark on Liberty's outstretched arm is the only mark of note. A hint of light champagne toning graces each side. NGC ID# 242Z, PCGS# 5707

3511 1917-D Type One MS66 Full Head PCGS. This issue was saved in substantial quantities as a first-year type. This carefully preserved Premium Gem features an exceptional strike, with Full Head detail, complete shield rivets, and bold definition over the eagle's breast and wing feathers. Mostly brilliant but with just a hint of marginal russet toning around both sides. PCGS has certified only 26 numerically finer submissions (1/17). NGC ID# 2432, PCGS# 5709

3512 1917-D Type One MS66 Full Head PCGS. CAC. The 1917-D Type One quarter is readily available through Gem, even with Full Head details. The population declines in Premium Gem and becomes very elusive any finer. The lustrous surfaces of this offering exhibit well-struck design elements and are nicely preserved. PCGS has seen only 26 specimens finer (1/17). NGC ID# 2432, PCGS# 5709

3513 1917-D Type One MS66+ Full Head PCGS. CAC. Softly frosted luster illuminates champagne toning on each side of this high-end Premium Gem, while flecks of russet appear around the relief elements. There are no mentionable abrasions, and the strike is just sharp enough to qualify for a Full Head designation. NGC ID# 2432, PCGS# 5709

3514 1917-S Type One MS64 Full Head PCGS. CAC. This is a needle-sharp near-Gem that boasts luminous mattelike luster and uniform champagne-gray toning. Close inspection with a loupe fails to reveal any mentionable abrasions. This is a high-end coin for the grade, as denoted by the CAC green label. NGC ID# 2433, PCGS# 5711

3515 1917-S Type One MS65 Full Head PCGS Secure. Bright silver luster with an attractive pebbled texture and a faint hint of bluish toning. While the 1917-S is not as popular as its Philadelphia counterpart among type collectors, the series enthusiast will recognize the date as anything but a pushover in Full Head grades. Ex: *Long Beach Signature (Heritage, 9/2010)*, lot 4018. NGC ID# 2433, PCGS# 5711

3516 1917-S Type One MS65 Full Head PCGS. CAC. A stunning mintmarked example of this premier Standing Liberty design. Liberty's face and hairline are separated all along the length of her brow, and all of the shield rivets are full. The satiny surfaces are powder-gray with glints of amber-gold near the rims. Certified in an old green label holder. Ex: *Baltimore Signature (Heritage, 3/2009)*, lot 1162. NGC ID# 2433, PCGS# 5711

3517 1917 Type Two MS66+ Full Head PCGS. Hints of pale lavender accent warm champagne toning on this high-end Full Head 1917 Type Two quarter. The sharp strike is seen on Liberty's head, the shield rivets, and the eagle's breast and wing. PCGS reports only 14 finer Full Head examples (1/17). NGC ID# 2434, PCGS# 5715

3518 1917-D Type Two MS65 Full Head PCGS. Ex: Cherny. With the change from the Type One to the Type Two Standing Liberty quarter design in 1917, the relief of the design elements also increased, revealing striking difficulties at the branch mints. The 1917-D Type Two is seldom seen with Full Head detail in high grade. This Gem example displays satiny golden luster without significant abrasions. Liberty's head shows adequate definition, but the figure and eagle exhibit more typical strike weakness. Population: 68 in 65 Full Head, 29 finer (1/17). NGC ID# 2435, PCGS# 5717

3519 1918 MS65 Full Head NGC. CAC. Caramel-gold, ice-blue, and lilac toning graces this lustrous and smooth Gem. The strike is unusually sharp for the series, and shows nearly full detail on the two shield rivets near the waist. The date shows unimportant incompleteness. Encapsulated in a prior generation holder. NGC ID# 2437, PCGS# 5721

3520 1919-S — Improperly Cleaned — NGC Details. Unc. Golden-brown, lavender-red, and cobalt-blue toning embraces this satiny and unmarked quarter. Although undesignated as such, Liberty's head is close to full. The usual two shield rivets are absent, but the rest of the strike is crisp. An early branch mint semikey issue.

3521 1920-D MS65 PCGS. A well-detailed Gem, with well-preserved surfaces that radiate vibrant mint luster on both sides. A few subtle hints of greenish-gold toning add to the outstanding eye appeal. Housed in a green label holder. Population: 40 in 65 (1 in 65+), 40 finer (12/16). NGC ID# 243F, PCGS# 5736

3522 1920-D AU58 Full Head PCGS. CAC. The 1920-D is a better date in Full Head grades. The present coin is the sort that is often seen nowadays in MS61 or MS62 holders, but it is correctly graded AU58 Full Head in an older blue-label holder with a trace of friction over the highest points of the design. The head and shield rivets are sharp, but the tops of the date numerals blend with the pedestal. Each side shows light champagne toning. NGC ID# 243F, PCGS# 5737

3523 1920-S MS65 PCGS. CAC. This Gem is unusually sharp for a 1920-S, including bold date numerals, stars, and above-average definition of the shield rivets. Only Liberty's head lacks a sufficient impression for full details. The surfaces display largely light-gold coloration, with natural russet overtones that accent the highest points of the figure. Population: 50 in 65, 23 finer. CAC: 5 in 65, 8 finer (12/16). NGC ID# 243G, PCGS# 5738

3524 1921 AU58 NGC. From a smallish mintage of 1.9 million pieces, the 1921 Standing Liberty quarter is a key date in the series. This attractive Near-Mint specimen shows just the slightest trace of wear on the well-detailed design elements and the lightly abraded, lustrous surfaces exhibit shades of lavender-gray toning. NGC ID# 243H, PCGS# 5740

**1921 Quarter, MS64 Full Head
Light Golden Toning**

3525 1921 MS64 Full Head NGC. Some high-point handling marks on the obverse figure deny a finer grade, but satiny luster emerges from the fields and illuminates light golden toning. Sharp head detail accompanies bold shield rivets and well-defined feathers on the eagle. The date numerals are also well-defined. NGC ID# 243H, PCGS# 5741

3526 1923 MS65 Full Head PCGS. A surprisingly small number of Full Head examples exist for the 1923 Philadelphia issue, a fact not always recognized by collectors since nearly 10 million pieces were struck. This Gem coin displays lightly toned lilac-silver surfaces with hints of gold across each side. Only slight weakness on three of the shield rivets is noted, while Liberty's head is full-featured. Marks are tiny and widely spaced. Population: 45 in 65 Full Head, 44 finer (1/17). NGC ID# 243J, PCGS# 5743

3527 1923-S AU50 PCGS. A lightly circulated key date quarter. Stone-white aside from a blush of navy-blue and autumn-brown on the eagle's front wing. No marks are more than incidental, and luster dominates the legends. NGC ID# 243K, PCGS# 5744

**1923-S Quarter Dollar, MS64
Brilliant Key-Date Coin**

3528 1923-S MS64 PCGS. CAC. A brightly lustrous near-Gem representative of this lower-mintage San Francisco quarter issue (1.36 million pieces), well-struck save for the typical softness at Liberty's head and the shield rivets. Nearly brilliant surfaces show wispy marks and a few small ticks, including one on Liberty's knee, consistent with the grade.
Ex: *FUN Signature* (Heritage, 1/2010), lot 2666. NGC ID# 243K, PCGS# 5744

**1923-S Quarter, Frosty MS66
Good Strike, Excellent Luster**

3529 1923-S MS66 NGC. Glistening luster shows a hint of light golden toning on this Premium Gem 1923-S quarter. No major abrasions are observed, and the strike is above average. Strong feather detail on the eagle complements a bold date and nearly Full Head on the obverse. This is an excellent example of the date for the series collector. Census: 21 in 66, 3 finer (1/17). NGC ID# 243K, PCGS# 5744

**1923-S Standing Liberty Quarter, MS66
Low-Mintage Better Date**

3530 1923-S MS66 PCGS. The 1923-S Standing Liberty quarter is always in demand because of its low mintage of 1.3 million pieces. This impressive Premium Gem displays well-detailed design elements, with just a touch of the usual softness on the shield rivets and Liberty's ear. The well-preserved, lustrous surfaces show a few hints of champagne-gold toning. Population: 35 in 66 (1 in 66+), 7 finer (1/17). NGC ID# 243K, PCGS# 5744

**1923-S Quarter, AU58 Full Head
Largely Brilliant Semikey**

3531 1923-S AU58 Full Head PCGS. CAC. The 1923-S needs no introduction. It is well-known to series specialists and casual collectors alike as one of the most elusive Standing Liberty quarter issues. This strongly struck near-Mint example has bold head and chainmail detail. Each side is mostly brilliant with a faint golden cast. Still lustrous and eminently appealing. NGC ID# 243K, PCGS# 5745

1923-S Quarter, MS63 Full Head
Lustrous and Appealing for the Grade

3532 1923-S MS63 Full Head NGC. Nearly untoned, a faint hint of olive-gold toning in the right obverse field joins the bright, satiny mint luster that radiates from both sides of this Select Uncirculated quarter. As often seen on the issue, slight weakness on two of the shield rivets is noted, although the other devices are sharply struck. Marks are limited to Mint-related parallel die striations — perhaps from planchet preparation, or from polishing to remove clash marks. A brilliant Full Head coin, pleasing in all respects. NGC ID# 243K, PCGS# 5745

3533 1924-D MS64 Full Head PCGS. A remarkably sharp 1924-D, showing full shield rivets and head detail. The tops of the date numerals blend with the pedestal as usual. This coin displays satiny luster with a dusting of lavender-gold toning over each side. NGC ID# 243M, PCGS# 5749

3534 1924-S MS64 PCGS. Struck from heavily clashed dies with heavy die polishing evident on each side where numerous die striations are seen in the fields. Liberty's head is nearly complete, lacking only in the region of the ear. The date numerals are needle-sharp. Both sides exhibits slight central weakness as expected. NGC ID# 243N, PCGS# 5750

3535 1924-S MS64 NGC. An impressive Choice example of this popular issue, with well-detailed design elements that show just a touch of the usual softness on the shield rivets and Liberty's ear. The well-preserved surfaces radiate vibrant mint luster, with a few hints of golden-tan toning. From a mintage of 2.8 million pieces, the 1924-S is an elusive issue in higher grades. NGC ID# 243N, PCGS# 5750

1924-S Quarter, MS64 Full Head
Sharp Definition, Natural Appeal

3536 1924-S MS64 Full Head PCGS. CAC. Always challenging when well-struck, the 1924-S requires extra effort to find a sharp example. This Choice Uncirculated piece is crisply defined for the issue, not only at the head details (which clearly qualify for the assigned Full Head designation), but on the shield rivets, central portrait features, the eagle's plumage, and the wing edges. Golden toning with a russet hue combines with pearlescent silver surfaces for natural eye appeal. Some areas of deeper toning exist in crevices of the obverse devices. One of the few CAC-endorsed coins at this level or finer. Population: 81 in 64 (1 in 64+) Full Head, 45 finer. CAC: 14 in 64, 6 finer (12/16). NGC ID# 243N, PCGS# 5751

3537 1927-D MS64 Full Head PCGS. A sharp Full Head and bright, brilliant luster are the hallmarks of this near-Gem 1927-D quarter. The shield rivets and Liberty's toes retain the usual strike softness. A loupe reveals only light, grade-consistent marks, leaving eye appeal pleasant. NGC ID# 243V, PCGS# 5763

3538 1927-D MS64 Full Head PCGS. CAC. Delicate iridescent toning accents satiny luster on this CAC-approved near-Gem. Liberty's head is bold, but the shield rivets and Liberty's toes show the usual incompleteness. There are only light, scattered marks that limit the grade. NGC ID# 243V, PCGS# 5763

3539 1927-S AU50 PCGS. The low mintage 1927-S is the most desirable issue from the later years of the Standing Liberty series. This lightly circulated and untuned example displays clash marks but is free from consequential contact. Certified in a green label holder. NGC ID# 243W, PCGS# 5764

3540 1927-S AU53 NGC. The acknowledged late-series key to the Standing Liberty quarter series, the 1927-S is at the top of many collectors' want lists and elusive even at the AU level. The paltry mintage of 396,000 pieces puts the issue far below all others, save for the 1916. This lightly circulated slate-gray piece offers a modicum of luster remaining, despite the high-point wear that is consistent with the grade.
Ex: Central States Signature (Heritage, 4-5/2010), lot 794. NGC ID# 243W, PCGS# 5764

3541 1928-S MS66 Full Head PCGS. CAC. This satiny Premium Gem is boldly struck at the head, date, and on the eagle, lacking definition only slightly on the shield rivets. Warm golden toning appears over each side, and there are no significant abrasions. PCGS reports 23 numerically finer submissions (1/17). NGC ID# 243Z, PCGS# 5771

3542 1930 MS67 Full Head PCGS. A common date but conditionally scarce in Superb Gem Full Head. This piece displays vibrant, frosty luster and a hint of light champagne toning. There are almost no discernible signs of contact on the surfaces. Population: 45 in 67 (1 in 67+) Full Head, 1 finer (1/17). NGC ID# 2445, PCGS# 5779

3543 1930-S MS67+ PCGS. CAC. This Plus-graded Superb Gem offers well-detailed design elements and impeccably preserved lustrous surfaces, with a few hints of sea-green toning. Housed in a new 30th Anniversary green label holder. Population: 25 in 67 (2 in 67+), 0 finer. CAC: 15 in 67, 0 finer (12/16). NGC ID# 2446, PCGS# 5780

3544 1930-S MS66 Full Head PCGS. A hint of iridescence graces the frosty, well-preserved surfaces of this Premium Gem Full Head example. Liberty's head and the eagle are well-defined, although the shield rivets show the almost always seen weakness. There are no mentionable abrasions. PCGS lists 29 finer Full Head coins (12/16). NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

3545 1932-D MS63 PCGS. An attractive Select example of this sought-after, first-year key, with sharply detailed design elements and lightly marked, lustrous surfaces that show subtle hints of golden-tan toning. From a low mintage of 436,800 pieces. NGC ID# 2448, PCGS# 5791

3546 1932-D MS63 NGC. Although the mintage of the 1932-D Washington quarter is slightly higher than its S-mint counterpart, the Denver issue is more elusive. This sharply detailed Select specimen features lightly marked, lustrous surfaces, with a few delicate hints of greenish-gold toning. NGC ID# 2448, PCGS# 5791

3547 1932-D MS64 PCGS. The 1932-D is scarcer than its San Francisco counterpart in Mint State levels, despite a slightly higher mintage. Soft, frosty luster occurs over lightly champagne-toned surfaces and sharp enhances the appeal of this key date. NGC ID# 2448, PCGS# 5791

**1932-S Washington Quarter, MS65
Important First-Year Key**

- 3548 1932-S MS65 PCGS.** Always in-demand as a first-year, low-mintage issue, the 1932 Washington quarter is one of the acknowledged keys to the series. This delightful Gem exhibits sharply detailed design elements and vibrant mint luster, with vivid shades of sea-green toning. PCGS has graded four numerically finer examples (12/16). NGC ID# 2449, PCGS# 5792

**1932-S Quarter, MS65
Very Challenging in Such High Grade**

- 3549 1932-S MS65 PCGS Secure.** The 1932-S Washington quarter has languished in the shadow of its more-elusive sibling, the 1932-D, for many years, but the 1932-S in Gem condition is nonetheless a challenging issue. The obverse of this Gem is mostly silver-white with sprinkles of cinnamon, while the reverse is more boldly colored in shades of pinkish-gray, amber, and mahogany near the rims. The lack of mentionable abrasions qualifies this piece at the Gem level.

Ex: Long Beach Signature (Heritage, 6/2010), lot 978. NGC ID# 2449, PCGS# 5792

- 3550 1934 Doubled Die Obverse, FS-101, MS63 PCGS.** IN GOD WE TRUST exhibits a blatant spread to the southeast. The date and LIBERTY have thick letters. A *Guide Book* variety, and very scarce in Uncirculated grades relative to the number of Washington quarter collectors. One small obverse dollop of multicolor toning at 3 o'clock. Population: 17 in 63, 60 finer (12/16).

Ex: Dallas Signature (Heritage, 3/2013), lot 3469, which realized \$1,410. NGC ID# 244A, PCGS# 5900 Base PCGS# 5795

- 3551 1934 Doubled Die Obverse, FS-101, MS64 PCGS.** CAC. LIBERTY and the date appear very thick, but IN GOD WE TRUST is the key attribution feature, with strong doubling in a clockwise direction. A highly lustrous and practically brilliant Choice quarter. A loupe displays only minor contact. Population: 27 in 64 (1 in 64+), 33 finer. CAC: 7 in 64, 9 finer (12/16). NGC ID# 244A, PCGS# 5900 Base PCGS# 5795

**1934 FS-101 Quarter, MS65
Doubled Die Obverse**

- 3552 1934 Doubled Die Obverse, FS-101, MS65 PCGS.** IN GOD WE TRUST and the date are widely die doubled on this important *Guide Book* variety. Ice-blue and butter-gold shades adorn this lustrous and well struck Gem. The reverse appears pristine, while the obverse displays minor field marks. Population: 19 in 65 (3 in 65+), 14 finer (12/16). NGC ID# 244A, PCGS# 5900 Base PCGS# 5795

- 3553 1935 MS67+ PCGS.** CAC. A Condition Census example of the date, this high-end 1935 Washington quarter boasts thick, frosty luster and virtually unabraded surfaces. Warm champagne interiors cede to lovely iridescence near the borders. PCGS reports 23 pieces in MS67+ and a single MS68 coin finer (1/17). NGC ID# 244D, PCGS# 5797

- 3554 1935-D MS67 PCGS.** A lightly to moderately toned Superb Gem that displays ice-blue, olive-green, and autumn-gold tints. Lustrous and crisply struck with potent luster and a mark-free obverse. Reverse contact is confined to the eagle's legs and left (facing) wing. The obverse displays faint concentric lathe lines, as made. A low mintage issue. Population: 25 in 67 (1 in 67+), 0 finer (1/17). Ex: George's Army Collection (Heritage, 4/2012), lot 4260, which realized \$4,887.50. NGC ID# 244E, PCGS# 5798

- 3555 1936 Doubled Die Obverse, FS-101, MS63 PCGS.** IN GOD WE TRUST show clear doubling, while LIBERTY and the date have very thick letters. Apricot and steel-blue colors endow this lustrous and sharply struck example. Attractively preserved from a technical perspective; a small planchet flaw (as made) is on the forehead. Ex: Long Beach Signature (Heritage, 2/2005), lot 6817; Orlando FUN Signature (Heritage, 7/2014), lot 7717, which realized \$1,645. NGC ID# 244G, PCGS# 146091 Base PCGS# 5800

- 3556 1936-D MS66 PCGS.** The 1936-D is a scarce date in the Washington quarter series. Moreover, collectors seeking a higher-grade example will be disappointed, as PCGS and NGC have seen just 22 examples finer (12/16). This Premium Gem displays frosty luster and just an occasional wisp of grayish-tan color. A moderate mark is seen on the right (facing) leg. Ex: FUN Signature (Heritage, 1/2012), lot 5864. NGC ID# 244H, PCGS# 5801

- 3557 1936-D MS66 PCGS Secure.** Ex: Monge Collection. In Mint State, the 1936-D is among the scarcest issues of the series, perhaps due to competition from the re-introduced proof set or the plethora of silver commemorative types available that year. Light walnut-tan toning visits the lustrous and well preserved surfaces. Ex: Long Beach Signature (Heritage, 9/2010), lot 4052, which realized \$1,840. NGC ID# 244H, PCGS# 5801

- 3558 1937 Doubled Die Obverse, FS-101, MS63 PCGS.** An impressive *Guide Book* variety with strong clockwise die doubling on the date and motto. The coin is lustrous and well-struck with unmarked surfaces and delicate chestnut-gold and pearl-gray toning. Population: 3 in 63, 10 finer (12/16). Ex: Dallas Signature (Heritage, 10/2009), lot 608; Central States Signature (Heritage, 4/2013), lot 2649. PCGS# 145291 Base PCGS# 95803

**1937-S Quarter, Superb Gem
Third-Lowest Mintage of the Series**

- 3559 1937-S MS67 PCGS. CAC.** The 1937-S claims the third lowest mintage (1.6 million pieces) of the Washington quarter series behind the 1932-D and 1932-S keys. The present well-struck Superb Gem exhibits mottled lavender, crimson, yellow-green, orange-gold, and tan toning. Both sides are impeccably preserved and yield great eye appeal. Population: 41 in 67 (3 in 67+), 0 finer. CAC: 9 in 67, 0 finer (1/17).
Ex: Houston Signature (Heritage, 12/2013), lot 3622, which realized \$4,700. NGC ID# 244M, PCGS# 5805

- 3560 1938-S MS67+ PCGS. CAC.** Golden-brown, sea-green, and lavender-red dominate the obverse. The reverse displays similar shades but they are relegated to the lower border. A lustrous, crisply struck, and nearly pristine Superb Gem. Population: 80 in 67 (9 in 67+), 0 finer. CAC: 14 in 67, 0 finer (12/16). NGC ID# 244P, PCGS# 5807

- 3561 1938-S MS67+ PCGS. CAC.** For Registry purposes, this Plus-graded 1938-S Washington quarter is unsurpassed in a PCGS holder. The strike is sharp, and the satiny surfaces yield a hint of pale champagne toning. The obverse appears pristine, while two small ticks on the reverse eagle are apparently the only grade-limiting factors. Population: 79 in 67 (9 in 67+), 0 finer. CAC: 14 in 67, 0 finer (1/17). NGC ID# 244P, PCGS# 5807

- 3562 1942 Doubled Die Reverse, FS-801, MS64 PCGS.** The right-side reverse legends exhibit exceptionally strong die doubling. AMERICA is the pick-up point. A splendidly preserved Choice quarter with dynamic luster and barely a hint of golden patina. Population: 4 in 64, 2 finer (12/16). PCGS# 146057 Base PCGS# 5817

- 3563 1942 Doubled Die Reverse, FS-801, MS64 PCGS.** Dramatic die doubling is seen on all reverse design elements but is most prominent on the legends. This Choice example displays brilliant, satiny mint luster with no severe abrasions. The strike is sharp throughout. Few FS-801 coins have been attributed this fine at the grading services. Population (FS-801): 4 in 64, 2 finer (12/16). PCGS# 146057 Base PCGS# 5817

**1942-S Washington Quarter, MS67+
Only Two Coins Finer at PCGS**

- 3564 1942-S MS67+ PCGS. CAC.** A mintage exceeding 19.3 million pieces might suggest a higher availability for the 1942-S at this grade level, but such is not the case. Examples graded MS67 are very scarce. Superb Gems with CAC approval are rare, and Plus-graded, CAC-approved coins are major condition rarities. This piece is thickly frosted with a ring of golden-russet, violet, and blue patina around the edges. Population: 62 in 67 (10 in 67+), 2 finer. CAC: 26 in 67, 0 finer (1/17). NGC ID# 3TEN, PCGS# 5819

- 3565 1943-S Doubled Die Obverse, FS-101, MS64 PCGS. CAC.** The obverse legends are strongly die doubled, with the spread most conspicuous on TRUST. Lightly toned and lustrous with pleasing preservation and moderate peripheral incompleteness of strike. Population: 56 in 64 (1 in 64+), 39 finer. CAC: 5 in 64, 11 finer (12/16). NGC ID# 2457, PCGS# 145154 Base PCGS# 5823

- 3566 1943-S Doubled Die Obverse, FS-101, MS65 PCGS.** An obverse die rotated clockwise between hubbings. The result was the present Gem, which shows exceptional doubling on all obverse legends, especially GOD and TRUST. This smooth and lustrous Gem has a brilliant obverse. The reverse exhibits tiny freckles of tan patina. Population: 25 in 65 (1 in 65+), 14 finer (12/16). NGC ID# 2457, PCGS# 145154 Base PCGS# 5823

**1945-S Quarter, Frosty MS67+
Among the Finest Examples at PCGS**

- 3567 1945-S MS67+ PCGS. CAC.** Few 1945-S quarters have achieved a Superb Gem grade, especially considering that more than 17 million coins were struck. Not only has this colorfully toned example been awarded that rarified grade, but it boasts a Plus designation and CAC approval, confirming its place among the very finest survivors. Thickly frosted with mottled blue, gold, and magenta patina. Population: 70 in 67 (12 in 67+), 0 finer. CAC: 31 in 67, 1 finer (1/17). NGC ID# 245D, PCGS# 5829

- 3568 1945-S Doubled Die Obverse, FS-102, MS66 PCGS.** Knob S mintmark. Minor die doubling is seen on LIBERTY and IN GOD WE TRUST. The *Cherrypickers'* reference calls FS-102 "another very tough variety to locate." This Premium Gem example displays a bold strike with frosty, champagne-tinted mint luster. Population (FS-102): 4 in 66, 0 finer (12/16). NGC ID# 3T5B, PCGS# 145575 Base PCGS# 5829

- 3569 1948 MS67+ PCGS. CAC.** Thin rainbow crescents appear around portions of the peripheries on this Registry-grade 1948 Washington quarter, while the interiors display dusky champagne luster. The strike is bold, and the original surfaces are unmarred by abrasions. PCGS lists only two coins finer (12/16). NGC ID# 245L, PCGS# 5836

**1948-D Washington Quarter, MS67+
Tied for Finest at PCGS**

- 3570 1948-D MS67+ PCGS. CAC.** From a mintage of 16.7 million pieces, the 1948-D Washington quarter is not difficult to locate in grades through the Gem level, but the issue is very scarce in MS67 condition. This Plus-graded Superb Gem is tied with six other coins for finest certified honors at PCGS (1/17). The design elements are sharply detailed and the impeccably preserved lustrous surfaces are blanketed in shades of orange, russet, violet, and green toning. Eye appeal is terrific. NGC ID# 245M, PCGS# 5837

3571 1950 Doubled Die Reverse, FS-801, MS67 PCGS. The eagle's beak has a doubled point, characteristic of this popular *Cherry-pickers'* variety. This later die state Superb Gem displays dynamic luster and unmarked surfaces. Freckles of forest-green and autumn-brown toning are prevalent near the date. Population: 5 in 67 (2 in 67+), 0 finer (12/16). NGC ID# 245S, PCGS# 145633 Base PCGS# 5841

3572 1950-D/S FS-601 MS64 PCGS. CAC. Remnants of the undertype S are visible just to the left of the primary mintmark, and slight strike-doubling is evident on the D. This impressive Choice specimen is sharply detailed, with lustrous, well-preserved brilliant surfaces. NGC ID# 245T, PCGS# 145638 Base PCGS# 5843

3573 1950-S/D FS-601 MS65 PCGS. This *Guide Book* variety clearly shows both mintmarks. A serif of the D is noted near the upper left of the S, and the curve of the D dominates the right border of the overmintmark. Lustrous and lightly toned with a sharp strike and smooth surfaces. Encased in a green label holder. Population: 50 in 65 (2 in 65+), 61 finer (12/16).

Ex: Long Beach Signature (Heritage, 2/2010), lot 455, which realized \$1,897.50. NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

1950-S/D FS-601 Quarter, MS66 Popular *Guide Book* Variety

3574 1950-S/D FS-601 MS66 PCGS. *Ex: Michael Fuller Collection.* The curve of a prior mintmark is prominent to the right of the upper loop, and a serif from the D is present in the northwest corner. A beautifully preserved Premium Gem. Any incompleteness of strike is limited to the centers of the RTY in LIBERTY. Blushes of caramel-gold toning visit uncommonly smooth fields. Population: 55 in 66 (11 in 66+), 6 finer (12/16). NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

3575 1952-D MS67 PCGS. Richly toned on both sides, this Superb Gem specimen displays numerous deep shades, including red, olive-green, cherry, bright yellow, apple-green, teal, electric-blue, and violet. Die cracks extend through the upper portion of Washington's head as well as the eagle's head. None are reported finer at PCGS. Population: 18 in 67, 0 finer (12/16). NGC ID# 2462, PCGS# 5850

3576 1952-D MS67 PCGS. Shades of sea-green, magenta, and amber toning visit the impeccably preserved surfaces of this impressive Superb Gem, with well-detailed design elements and vibrant mint luster, under the patina. Population: 19 in 67, 0 finer (1/17). NGC ID# 2462, PCGS# 5850

3577 1952-D Large D, FS-501 MS64 PCGS. CAC. *Cherry-pickers'* states that "the size of this D mintmark is unknown on any other U.S. coin" and adds, "the huge D mintmark is considered very rare." A lustrous and well-preserved near-Gem with delicate almond-gold toning. Population: 5 in 64, 5 finer (12/16). NGC ID# 2462, PCGS# 147814 Base PCGS# 5850

1961 Washington Quarter, MS67 None Finer at PCGS

3578 1961 MS67 PCGS. CAC. Type A Reverse. This bonafide Registry Set candidate is lightly toned in iridescent shades that deepen to a crescent of rainbow colors at the lower obverse, while the reverse is slightly less patinated with similar coloration. Sharply struck and supremely lustrous, marks are limited to a few microscopic ticks and a tiny nick on the eagle's left (facing) leg. One of just three pieces at the Superb Gem grade to receive CAC endorsement, with no coins exceeding the MS67 level at either service. Population: 12 in 67, 0 finer. CAC: 3 in 67, 0 finer (1/17). NGC ID# 246M, PCGS# 5870

3579 1961-D MS67 NGC. The 1961-D is available in roll quantity, but the present Superb Gem rises above its peers due to nearly flawless preservation. A hint of green-gold toning visits lustrous and well-struck surfaces. Census: 11 in 67, 0 finer (1/17). NGC ID# 246N, PCGS# 5871

1964-D Quarter, MS67+ Unsurpassed Quality

3580 1964-D MS67+ PCGS. CAC. Type A Reverse. The 1964-D was struck throughout the mid-1960s, until the supply of silver planchets ran out. One could easily underestimate the challenge of locating an example in MS67, but Superb Gems are very scarce. Melded shades of fire-red, apple-green, and lemon-gold cover the obverse. The reverse shows a broad peripheral band of peach patina, along with rose-red and powder-blue shades. Well-struck Registry coin. Population: 66 in 67 (10 in 67+), 0 finer. CAC: 31 in 67, 0 finer (12/16). NGC ID# 246V, PCGS# 5877

3581 1967 MS67+ PCGS. Within the Condition Census for the issue, this Plus-designated Superb Gem 1967 quarter is an exceptional Registry Set candidate. The strike is sharp, and each side offers light golden toning. Moderate die erosion on each side produces metal flowlines that generate vibrant cartwheel luster when rotated beneath a light. Population: 76 in 67 (6 in 67+), 1 finer (1/17). NGC ID# 2494, PCGS# 5880

3582 1968-D MS68 NGC. Brilliant aside from a slender arc of tan toning on the lower left obverse. This lustrous quarter appears pristine aside from slight contact on the eagle's right (facing) wing. Census: 11 in 68, 0 finer (1/17). NGC ID# 2472, PCGS# 5882

3583 1969 MS67 NGC. A fully struck and stone-white Superb Gem. Close to pristine, and an important addition to the competitive Registry holding. Unsurpassed at either NGC or PCGS. Census: 6 in 67, 0 finer (1/17). NGC ID# 2473, PCGS# 5883

- 3584 1971 MS67 NGC.** Light butter-gold toning visits this lustrous and essentially immaculate Superb Gem. Slight peripheral incompleteness of strike provides the only imperfection. Tied for the finest available from either leading service. Census: 3 in 67, 0 finer (1/17). NGC ID# 2477, PCGS# 5887

**1971 Doubled Die Reverse Quarter
Very Rare FS-801, MS65
Only Certified Uncirculated Example**

- 3585 1971 Doubled Die Reverse, FS-801, MS65 PCGS.** All reverse legends are clearly die doubled in a counter-clockwise direction. FS-801 is extremely rare. The Third Edition of *Cherrypickers'* stated "only specimen known is XF! Discovered by Natalie Halpern." Few additional pieces have since emerged; total NGC Census is four pieces with none above AU53, and PCGS (as of 1/17) has certified a total of six pieces with only one coin (the present lot) above AU58. Lustrous and unabraded with light to medium golden-brown toning. One small spot noted above Washington's jaw. PCGS# 5901 Base PCGS# 5887

- 3586 1982-P MS68 NGC.** A Registry collector's dream coin, this high-end Superb Gem is tied with one other MS68 for the finest 1982-P quarter at NGC. The comparable grade at PCGS includes only a single additional submission (1/17). Rich, satiny luster glows beneath warm champagne toning and the design elements are boldly rendered. The surfaces are virtually flawless. Mint sets were not sold for 1982 and 1983. NGC ID# 247U, PCGS# 5912

PROOF WASHINGTON QUARTERS

**1936 Quarter, Superb Gem Proof
Scarcest Proof Mintage of the Series**

- 3587 1936 PR67 NGC.** Fewer than 4,000 proof 1936 Washington quarters were struck and only a handful qualify as Superb Gems today. This PR67 piece is partly toned blue-to-gold, with a speckling of the former color most visible as an obverse overtone while the latter gold patina gathers at the borders, but considerable silver-mirrored surface shines through. Census: 24 in 67 (1 in 67★), 0 finer (12/16). NGC ID# 27HN, PCGS# 5975

- 3588 1937 PR67+ PCGS. CAC.** Glittering silver surfaces display traces of light golden toning that grace the borders. Importantly, no 1937 proof Washington quarters have received Cameo grades, making high-end Superb Gems the finest obtainable. This Plus-graded PR67 PCGS coin displays CAC endorsement on its resume as well. The strike is bold and the mirroring deep. PCGS reports only three superiors in PR68 (1/17). NGC ID# 27HP, PCGS# 5976

**1939 Quarter, Lightly Toned PR68
Registry-Grade Preservation**

- 3589 1939 PR68 NGC.** An exceptionally well-preserved proof, one of 8,795 pieces produced and among the lowest proof mintages of the series. Fully struck throughout (especially on Washington's portrait), the mirrored surfaces are immaculate and lightly iridescent in translucent shades of gold, blue, and lavender. Neither PCGS nor NGC has seen a numerically finer proof. Census: 16 in 68, 0 finer (12/16). NGC ID# 27HS, PCGS# 5978

- 3590 1940 PR68 NGC.** A fully struck, all-brilliant specimen of this important proof Washington quarter, with virtually perfect surfaces and incredible eye appeal. A prime Registry Set candidate. Census: 28 in 68, 0 finer (12/16). NGC ID# 27HT, PCGS# 5979

- 3591 1941 PR68 NGC.** An immaculate PR68 Washington quarter. Very few have been so graded by either of the major services. Don't expect contrast, but the fields and devices will definitely dazzle the viewer of this impressive coin. Brilliant. Census: 31 in 68 (5 in 68★), 0 finer (12/16).
Ex: *Summer FUN Signature* (Heritage, 7/2007), lot 839; *New York Signature* (Heritage, 11/2013), lot 3484. NGC ID# 27HU, PCGS# 5980

- 3592 1941 PR68 NGC. CAC.** Reddish-orange color around the rims merges with dusky hues of violet, green, and powder-blue toward the interiors. The original patina, exceptional level of preservation, and outstanding visual quality undoubtedly explain the CAC endorsement. Census: 31 in 68 (5 in 68★), 0 finer. CAC: 7 in 68, 0 finer (1/17). NGC ID# 27HU, PCGS# 5980

**1942 Washington Quarter, PR68
Wartime Condition Rarity**

- 3593 1942 PR68 NGC.** A conditionally rare example, among the finer-known proof 1942 Washington quarters. The strike is bold, and the fields are highly reflective. Most of each side displays dusky cream-gold toning, but the upper and lower obverse rims exhibit a tinge of deep amber and crimson. Census: 22 in 68 (3 in 68★), 1 finer (12/16). NGC ID# 27HV, PCGS# 5981

**1951 Quarter, PR68 ★ Cameo
Sole Finest Contrasted Proof at NGC**

- 3594 1951 PR68 ★ Cameo NGC.** A brilliant and flashy high-grade specimen with frosty devices and pristine glassy-mirrored surfaces. Though Gems without relevant cameo contrast are fairly common, immaculate pieces with white on black contrast are surprisingly rare. This is the sole PR68 Cameo with the coveted Star designation, a beacon for Registry collectors. Census: 28 in 68 Cameo (1 in 68★), 0 finer (12/16). NGC ID# 27HX, PCGS# 85983

**1953 Washington Quarter, PR68 Ultra Cameo
Only One Finer Coin at NGC**

- 3595 1953 PR68 Ultra Cameo NGC.** The design elements of this majestic PR68 specimen are sharply detailed throughout and the deeply mirrored fields contrast profoundly with the frosty devices to create a stunning cameo effect. The brilliant surfaces are impeccably preserved and eye appeal is tremendous. Census: 13 in 68 Ultra Cameo, 1 finer (12/16). NGC ID# 4C5K, PCGS# 95985
- 3596 1953 Doubled Die Obverse, FS-101, PR68 Cameo PCGS.** IN GOD WE TRUST is lightly die doubled. A brilliant and pristine specimen. Frosty motifs rise in full detail above glassy fields. Population: 2 in 68 Cameo, 2 finer as PR68 Deep Cameo (12/16). PCGS# 144447 Base PCGS# 85985

**1954 Washington Quarter, PR69 Ultra Cameo
Tied for Finest at NGC**

- 3597 1954 PR69 Ultra Cameo NGC.** A tiny speck of golden color in the left obverse field is the only visible mark on this virtually perfect coin. That is not really a flaw, but it is the closest we can find to one on this magnificent Washington quarter. Add to that the dense mint frost over the devices and the illimitable depth of reflectivity in the fields and the result is a coin of unsurpassable beauty and technical preservation. Census: 6 in 69 Ultra Cameo, 0 finer (12/16). Ex: Long Beach Signature (Heritage, 9/2006), lot 1802. NGC ID# 27HY, PCGS# 95986

- 3598 1955 PR69 Ultra Cameo NGC.** This incredible PR69 specimen exhibits fully struck design elements with a frosty texture that creates intense cameo contrast with the deeply mirrored fields. The brilliant surfaces are virtually pristine and eye appeal is tremendous. Census: 13 in 69 Ultra Cameo, 0 finer (12/16). NGC ID# 27HZ, PCGS# 95987

- 3599 1957 PR68 Deep Cameo PCGS.** A fully white and crisply struck example. Although struck in great numbers, proof 1957 quarters rarely exhibit the prominent white-on-black contrast seen on the present pristine piece. Population: 29 in 68 Deep Cameo, 5 finer (1/17). NGC ID# 4C6M, PCGS# 95989

**1959 Washington Quarter, PR69 Ultra Cameo
None Finer at NGC**

- 3600 1959 PR69 Ultra Cameo NGC.** A virtually perfect specimen of this popular Washington quarter, with razor-sharp definition on all design elements and deeply mirrored brilliant fields that contrast profoundly with the richly frosted devices. Eye appeal is incredible. Census: 7 in 69 Ultra Cameo, 0 finer (12/16). NGC ID# 248Z, PCGS# 95991

STATEHOOD QUARTERS

- 3601 Three-Piece 2004-D 25C Wisconsin Variety Set MS67 NGC.** The set includes the **Extra Leaf High, FS-5901; Extra Leaf Low, FS-5902;** and the **regular Wisconsin quarter.** All three coins are identically graded MS67 by NGC, and are housed in a single large format NGC holder. Included with the lot is a laminated card, 5 of 100, signed by Bob Ford. The card states "the accompanying three-piece set of 2004-D Wisconsin Extra Leaf quarters is among the group initially found by the discoverer, Bob Ford, in Tucson, AZ, on December 11, 2004." (Total: 3 coins)

End of Session One

COLONIALS

1652 Pine Tree Threepence, VF30
Noe-36, Late Die State

- 3602** 1652 Pine Tree Threepence VF30 PCGS. Noe-36, W-640, Salmon 2-B, R.4. No Pellets at trunk. A distinct die line beneath the M in MASSACHUSETTS identifies the late die state of this scarce piece. Slightly imperfect centering favors the right side of the obverse and left side of the reverse where the beading is well in from the edge of the planchet. ETS of the obverse is partially off the flan, and NG on the reverse is weakly defined. A lovely pewter-gray example with splashes olive and steel toning on each side. Listed on page 41 of the 2017 *Guide Book*. NGC ID# CFSE, PCGS# 45366

1652 Pine Tree Shilling, MS65
Large Planchet, No Pellets
Finest Known Noe-3

3603 1652 Pine Tree Shilling, Large Planchet, No Pellets at Trunk, MS65 NGC. Noe-3, W-710, Salmon 3-C, R.6. Ex: Hanson / Donald G. Partrick Collection. 74.1 grains. No Pellets at Trunk. N in IN Reversed. The Norweb catalog (lot 1193) description for a different Noe-3 shilling stated that "the finest example of this rare variety known to the present writer is currently in a major Eastern collection and is an exceptionally well struck and perfectly round example," a reference to the present coin. There is little if any doubt that this Noe-3 Pine Tree shilling is the single finest known.

The present lot is clearly superior to the Noe plate coin, which has a smaller diameter and shows a diagonal mark to the right of the tree roots. The Boyd-Clarke-Wurtzbach-Norweb-Hain specimen had "two planchet wrinkles" and a noticeable straight edge clip at 3 o'clock. The Mills-Boyd-Ford example has a similar distracting clip at 3 o'clock. Garrett's coin is comparable in grade to the present lot, but has an edge split and a smaller diameter. The Newcomer-Clarke-Boyd example from New Netherlands' 60th sale had an "irregular flan split." The Stickney-Breisland-Roper coin is circulated, oval-shaped, and "has a few old minor scratches and some incrustation." Three circulated examples are held by in the ANS. The variety was absent from Stearns, Eliasberg, Picker, Oechsner, Hawn, and Massachusetts Historical Society auctions.

A remarkable Gem, this MS65 example displays shimmering luster across lightly toned and unabraded gunmetal, ice-blue, and caramel-gold surfaces. The strike is bold and the reverse legends are complete. The obverse legends are nearly complete, with only the very tops of N MA absent. In fact, a majority of the outer beaded circle is present on both sides, something that can be said about few Large Planchet shillings. The aesthetic, technical, and market appeal are all outstanding and unsurpassable.

Ex: Donald Groves Partrick Collection / FUN Signature (Heritage, 1/2015), lot 5570. NGC ID# 5JDU, PCGS# 45370 Base PCGS# 23

1787 Massachusetts Cent, MS63+ Brown
Ryder 2b-A, 'Horned Eagle'

- 3604** 1787 Massachusetts Cent, Horned Eagle, MS63+ Brown PCGS. Ryder 2b-A, W-6040, R.3. The "Horned Eagle" is among the best known Massachusetts copper varieties. The "horn" is a blade-shaped die break above the eagle's forehead. The present walnut-brown representative is unabraded aside from minor contact near the N in CENT, which may have been on the planchet prior to the strike. No spots, laminations, or other deficiencies are apparent. Population: 1 in 63 (1 in 63+) Brown, 2 finer (1/17). Listed on page 61 of the 2017 *Guide Book*. NGC ID# 2B26, PCGS# 305

1785 Immune Columbia Silver, AU53
 Nova Constellatio Reverse
 Reeded Edge, W-1985

3605 1785 Immune Columbia, Nova Constellation Silver, Reeded Edge, AU53 NGC. CAC. Breen-1120, W-1985, Low R.7. 90.4 grains, 93% silver, 5% copper per NGC metallurgical tests. On this variety, the Pointed Rays reverse from the Nova Constellatio series lacks punctuation between the words. The same die was used for 1785 Nova Constellatio coppers identified as Crosby 3-B. This Immune Columbia variety exists in copper with about three known, and in silver as offered here with about 12 to 15 known. Michael Hodder estimated 15 known in the Ford catalog, while the Whitman Encyclopedia rates the variety "URS-4(?)" which suggests only five to eight are known. This is one of many colonial issues where an accurate published census would be extremely valuable.

In his 1988 *Encyclopedia*, Walter Breen attributed these pieces to George Wyon's Birmingham Mint under the guidance of engraver Walter Mould. Breen stated that Mould emigrated in 1785, bringing dies and other equipment with him. Research has shown that Mould actually arrived in America two years earlier in 1783. Since these pieces and the Nova Constellatio coppers were all struck in 1785 or later, it is clear that either: 1. These coins were made in America, or 2. They were not made by Walter Mould. The numismatic debate about who, when, and where continues.

An exceptional silver example of this important die marriage with reflective surfaces beneath delicate champagne and pale blue-green patina. A glass reveals the few trivial marks and faint hairlines that are consistent with the age and grade of this important piece.

Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part V (*Heritage*, 11/2014), lot 3022, which realized \$135,125. NGC ID# 2AZD, PCGS# 829

1785 Inimica Tyrannis Americana Copper, XF40
 Small Stars Confederatio
 Tied for Second-Finest Known

3606 1785 Inimica Tyrannis Americana, Confederatio, Small Stars, W-5635, Low R.7, XF40 NGC. CAC. Ex: Roper / Donald G. Partrick Collection. 142.7 grains. This splendid copper ranks near the top of the short Condition Census of eight known examples. The discovery specimen, now in the Roger S. Siboni Collection, is the finest known example. The Donald Groves Partrick coin is tied with the Norweb example for the second finest. This piece has exceptional olive and chestnut-brown surfaces with hints of peripheral maroon toning. A single rim bump at the upper obverse is the only imperfection.

A 12-page pamphlet dated May 13, 1785 was published at the same time as the report in the *Journal of the Continental Congress*. The pamphlet, *Propositions Respecting the Coinage of Gold, Silver, and Copper*, is attributed to Thomas Jefferson, and also included the work of Hugh Williamson, Robert Morris, and Gouverneur Morris. That report stated the original vision for the Inimica Tyrannis obverse design:

“An Indian, his right foot on a crown, a bow in his left-hand, in his right-hand thirteen arrows, and the inscription MANUS INIMICA TYRANNIS.”

The two Confederatio reverse dies are distinguished by the size of stars, and the size of the circle containing those stars, small or large. Those two dies were combined with various obverse dies to create eight varieties, each in copper except as noted. The numbers in parenthesis are the estimated number known for each variety:

1. Inimica Tyrannis America, Large Circle W-5630 (7)
2. Inimica Tyrannis America, Large Circle, silver (1)
3. Inimica Tyrannis Americana, Small Circle W-5635 (9)
4. General Washington, Large Circle W-5645 (6)
5. 1786 Immunis Columbia, Large Circle W-5665 (2)
6. 1786 Heraldic Eagle, Large Circle W-5690 (2)
7. 1787 Heraldic Eagle, Small Circle W-5695 (2)
8. Libertas et Justitia (Nova Constellatio), Large Circle (1)

With nine examples known, the Americana Small Stars (Circle) Confederatio is the most plentiful variety, if indeed any could be called plentiful. This example has similar sharpness to the Eric P. Newman specimen from our November 2014 sale, but with much finer surfaces. A second example in the Donald Groves Partrick Collection is slated to appear in a future Partrick sale. It is graded AU50 NGC, but possesses granulated surfaces.

Ex: George C. Ham Collection; *Stack's* (6/1973), lot 828; *Park Sale* (*Stack's*, 5/1976), lot 126; John L. Roper, 2nd (*Stack's*, 12/1983), lot 215; Marvin Browder; Ed Milas; *Stack's*; Jon Hanson (8/8/1998); Donald Groves Partrick; Donald Groves Partrick Collection / FUN Signature (Heritage, 1/2015), lot 5640. NGC ID# B8DZ, PCGS# 846

1787 Immunis Columbia Copper, AU55 ★
 Eagle Reverse, Breen-1136
 One of Four Known With a Broad Flan
 Ex: Parmelee, Ten Eyck, Newcomer, Green, Newman

3607 1787 Immunis Columbia, Eagle Reverse, Wide Planchet, AU55 ★ NGC. Breen-1136, W-5680, R-7. 167.8 grains. Ex: Parmelee/Ten Eyck/Newcomer/Green/ Newman. There are two formats known for the 1787 Immunis Columbia coins. The narrow planchet coins are typically 26 to 27 mm., with about 100 examples known. The wide planchet overstrikes, such as the present piece, are about 29 to 30 mm., with just four examples believed to survive. Typically, overstruck coins used random coppers pulled from circulation to provide additional planchet stock. But each of the known wide planchet Immunis Columbia pieces are on identical New Jersey varieties, suggesting these Immunis Columbia pieces were coined alongside certain New Jersey coppers.

In *New Jersey State Coppers*, Roger Siboni, John Howes, and Buell Ish identify the broad planchet overstrikes as 1) an example in the Col. Phares O. Sigler Collection; 2) the present Newman coin; 3) an example in the 1976 ANA sale; and 4) the Garrett specimen.

The present example is exceptionally original and high-end for the AU55 NGC grade, as indicated by the NGC Star designation. The oversized flan allows the design to be viewed in its entirety, including all dentilation, the legends, and a full date. Ample evidence of the undertype exists, especially at the margins where a second row of dentils remains from the undertype. The medium-brown surfaces are boldly struck and display hints of orange-brown patina.

The 1787 broad-flan design is not to be confused with the more common Immunis Columbia pieces that were struck on smaller diameter planchets, with the legends and/or the date running off the too-small flans. Those coins are thought to have been struck later than the broad-flan coins, possibly at the Rahway mint in 1788 or later in Elizabethtown, NJ. Listed on page 57 of the 2017 *Guide Book*.

Ex: Lorin G. Parmelee Collection (*New York Coin & Stamp*, 6/1890), Lot 596; James Ten Eyck; Albany Historical Society; James Ten Eyck (B. Max Mehl, 5/1922), Lot 845; Waldo Newcomer (circa 1931 via B. Max Mehl); "Colonel" E.H.R. Green; Green Estate; B.G. Johnson in the early 1940s; Eric P. Newman, purchased for \$50.00; Eric P. Newman Numismatic Education Society; Newman Collection, Part IV (Heritage, 5/2014), lot 30425; Anaheim ANA Signature (Heritage, 8/2016), lot 3931. NGC ID# BFJL, PCGS# 841

1788 New Jersey Copper, VF25
Rare Head Left Variety
Maris 50-f, W-5475

- 3608** 1788 New Jersey Copper, Head Left VF25 PCGS. Maris 50-f, W-5475, R.3. Just three die marriages of New Jersey coppers depict the horse head facing left. Examples trade for many multiples of the relatively common 1788 Head Right subtype. This is a deep walnut-brown representative with evenly microgranular surfaces. On the reverse, a few faded hair-thin marks emerge beneath a lens. Listed on page 73 of the 2017 *Guide Book*. NGC ID# 2B53, PCGS# 527

1788 New Jersey Copper, MS65 Brown
The Finest Running Fox, Maris 77-dd
The Jackman-Green Specimen

3609 1788 New Jersey Copper, Running Fox Before Legend MS65 Brown NGC. M. 77-dd, W-5535, R.2. 138.9 grains. Eric P. Newman's envelope notes that his piece is "From the Jackson [sic]-Green Collection." There are five different varieties of Running Fox coppers, and the last has three distinct die states, each with a separate census. For all the varieties combined, there are two Mint State coins and seven AU examples recorded. This and the other Mint State piece are each noted as "unverified" in the *New Jersey State Coppers* census. We are confident that this example from the Eric P. Newman Collection is the finest existing Running Fox copper.

The Newman coin appeared in the 1918 Henry Chapman sale of the Allison W. Jackman Collection:

"1788 Cent. Small head to horse. R as last. Uncirculated. Even, sharp brilliant impression. Light olive with some of the original red still showing. Very slight dent on edge, hardly showing. A wonderful specimen and the finest. I believe unique in this condition, rare in any and when found at all it is usually of a very dark color but here is a gem that will delight the most fastidious collector and be a joy forever to him. Plate. M. 77-dd."

Although little border detail is evident, the strike is nicely centered and bold, with the brushed mane of the horse fully detailed. A short die crack or defect extends in from the border through the letter C. Minor clash marks are noted on both sides of this Gem. The surfaces are smooth and glossy olive-brown, showing faint bluish overtones. Considerable faded mint red remains visible on both sides, primarily through the letters. The only mark of note is a trivial obverse rim bruise at 9 o'clock, and that feature enabled plate matching with the Jackman coin. This is an extraordinary Running Fox copper that is destined for an advanced specialized collection. Ex: Allison W. Jackman Collection (Henry Chapman, 6/1918), lot 172; "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$90.00; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection Part IV (Heritage, 5/2014), lot 30233. NGC ID# AUKF, PCGS# 524

1785 Nova Constellatio Copper, MS63 Brown
Small Date, Crosby 2-A
Only Example Certified as Mint State

- 3610** 1785 Nova Constellatio Copper, Pointed Rays, Small Date MS63 Brown PCGS. CAC. Crosby 2-A, W-1885, High R.4. Crosby 2-A is the sole Small Date 1785 Nova Constellatio die variety, and as such merits its own *Guide Book* entry. The variety is very scarce, particularly relative to Crosby 3-B, and is typically encountered in VF condition. PCGS has certified just four examples in grades above XF40, and only the present piece has been graded as Mint State by that service. Additionally, none have been certified by NGC finer than XF40.

This is an exceptional medium brown example with satin luster and mark-free surfaces. The strike is incomplete near the all-seeing eye, and opposite at the top of US, but the impression is otherwise crisp. One small spot on the upper left loop of the U in US provides an identifier. Listed on page 56 of the 2017 *Guide Book*. Population: 1 in 63 Brown, none finer (1/17).

Ex: *Houston Signature* (Heritage, 12/2013), lot 3502. NGC ID# 2AZ4, PCGS# 823

1787 Fugio Cent, MS64 Brown
N. 8-B, UNITED STATES Reverse

- 3611** 1787 Fugio Cent, UNITED STATES, Cinquefoils MS64 Brown PCGS. N. 8-B, W-6740, R.3. A satiny and nearly unabraded medium brown representative. The strike is sharp at the centers and on FUGIO and the date, though soft definition is noted on the upper and lower margins. One subtle spot is concealed within the sun's rays. N. 8-B is significantly scarcer in the present grade than some of the "X" reverse Fugio varieties from the Bank of New York holdings. Listed on page 89 of the 2017 *Guide Book*. Population: 31 in 64 (2 in 64+) Brown, 8 finer (12/16). NGC ID# 2B8F, PCGS# 889

HALF CENTS

1794 C-1a Half Cent, AU53
Double Struck

- 3612** 1794 Normal Head, C-1a, B-1a, R.3 – Double Struck, Second Strike 95% Off-Center – AU53 PCGS Secure. Ex: Davy Collection. Manley Die State 3.0, the usual late die state for the C-1 half cents. The reverse is rotated about 30° counterclockwise, a usual die alignment for State 3.0. Heavy clash marks are located adjacent to Liberty's chin, mouth, and nose, with similarly heavy clash marks inside the left side of the wreath. This lovely example has pleasing olive, maroon, and tan surfaces. A thin lintmark is located below the bust, through the right side of the 4. The first strike was normally centered, and a second strike is 95% off-center at 4 o'clock. The cataloger for the Davy Collection noted that this piece was double struck over a partial obverse brockage. Our EAC grade VF35.

Ex: Gordon Wrubel (12/3/1983); Davy Collection (Goldberg Coins, 9/2010), lot 4. NGC ID# 2223, PCGS# 35018 Base PCGS# 35015

1794 Half Cent, C-2a, XF40
Small Edge Letters

- 3613** 1794 Normal Head, C-2a, B-2b, High R.2, XF40 PCGS. Manley Die State 4, with a linear die defect slanting toward the bridge of the nose from the right branch of the Y in LIBERTY. This lightly circulated type coin displays smooth medium brown surfaces with complete border dentils on each side and bold interior devices. There is a linear mark in the field below the T in LIBERTY, and a small rim tick appears at 5 o'clock on the reverse, but the surfaces are otherwise problem-free. Our EAC grade VF20. NGC ID# 2223, PCGS# 35024 Base PCGS# 35015

PROOF BRAIDED HAIR HALF CENT

1857 Half Cent, B-2, PR64 Brown
Razor-Sharp, Tied for Finest at PCGS

- 3614** 1857 PR65+ Brown PCGS. B-2, R.4. Reverse doubling on CENT and on the ribbon is most easily seen at the right upright and base of T. B-2 is one of two die marriages for the 1857 issue, here with the Small Berries reverse typical of restrike proofs. Gleaming, richly toned chocolate-brown surfaces display reflective fields with shades of blue, violet, forest-green, and golden-rose that contrast with sharply struck central motifs. A virtually unimprovable high-end proof example tied for finest at PCGS with one other coin by virtue of the Plus designation. Our EAC grade PR62. Population: 6 in 65 (2 in 65+) Brown, 0 finer (1/17). NGC ID# 26ZY, PCGS# 1332

LARGE CENTS

1793 Wreath Cent, XF Details
Sheldon-9, Vine and Bars Edge

- 3615** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Corroded — NCS. XF Details. This Wreath cent is sharply struck on a well-centered planchet with complete borders. Little wear is evident on the design, as the chief surface characteristic is uniformly granular corrosion over each side. Some scrapes on the reverse rim at 12 o'clock are observed with a loupe. The coin has deep auburn-brown color. Despite the environmental impairment, the design is bold, and thus eye appeal remains. Our EAC grade Fine 15. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

1822 Cent, N-2, MS64 Brown
Sharp and Appealing

- 3616** 1822 N-2, R.3, MS64 Brown PCGS. Although type collectors generally prefer the 1816 to 1820 dates from the Randall Hoard, or the later dates in the 1830s, specialists understand the importance and rarity of Mint State large cents dated from 1821 to 1833. There are no common dates in that range in higher grades. This piece has excellent definition with satin luster and attractive dark brown surfaces. Both sides have considerable bluish patina, and traces of original mint red remain on the obverse. Our EAC grade AU55. Ex: ANA Signature (Heritage, 7-8/2008), lot 1047. NGC ID# 2259, PCGS# 36715 Base PCGS# 1624

1840 Large Date Cent, MS66 Brown
N-11, Lapped Die State c

- 3617** 1840 Large Date, N-10, N-11, R.2, MS66 Brown PCGS. CAC. Grellman Die State c. A smooth and well struck olive-brown example. Brick-red clings to the letters, wreath, and stars. The sole imperfection is a faint line above the NE in ONE. Howard Rounds Newcomb assigned two varieties to this single marriage, since the look of the obverse die changed after it was lapped. Die States a and b precede the lapping, and are Newcomb-10. Die States c and d followed, and are Newcomb-11. Our EAC grade MS62. NGC ID# 2266, PCGS# 395846 Base PCGS# 1820

1857 Large Cent, MS65 Red and Brown
Final-Year N-1, Large Date Type

- 3618** 1857 Large Date, N-1, R.1, MS65 Red and Brown PCGS. CAC. Flashes of fiery orange color emerge from surfaces that show primarily light golden-brown patina with accents of blue-gray. The lower obverse and corresponding area on the reverse display moderate incompleteness, while the remaining motifs are well-detailed. Excellent eye appeal is appreciable throughout this final-year Gem Large cent. Our EAC grade MS63. Population: 5 in 65 Red and Brown, 0 finer. CAC: 8 in 65, 0 finer (1/17). NGC ID# 226P, PCGS# 389635 Base PCGS# 1929

PROOF LARGE CENT

1850 N-11 Cent, PR64 Brown
Only Eight Known Proofs

- 3619** 1850 PR64 Brown PCGS. N-11, R.7 as a Proof. Grellman Die State a, as are all proof 1850 N-11 cents. Denis Loring's proof large cent census indicates that only eight proof 1850 N-11 cents are known. In addition, a single possible proof example of 1850 N-9 is known. As usual for these proofs, this example has reflective fields but lacks the deeply mirrored surfaces of most proof coins. The strike is sharp with blue-green patina on the obverse, and similar reverse toning accompanying original mint red. A small corrosion spot is located at the top of the 85 in the date. Our EAC grade PR55. Ex: Stack's (9/2005), lot 598. NGC ID# 272S, PCGS# 1979

FLYING EAGLE CENT

1857 Flying Eagle Cent, MS66
Unsurpassed Technical Quality

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, Snow-9, PR53
Attractive, Original Patina

3620 1857 MS66 PCGS. The Act of February 21, 1857 abolished the half cent, repealed the legal tender status of foreign fractional silver coins, and altered the weight, diameter, and composition of the cent. It read:

“... the standard weight of the cent coined at the mint shall be seventy-two grains, or three twentieths of one ounce troy, with no greater deviation than four grains in each piece; and said cent shall be composed of eighty-eight per centum of copper and twelve per centum of nickel, of such shape and device as may be fixed by the director of the mint...”

New devices included Longacre's Flying Eagle on the obverse and a wreath of corn, wheat, cotton, and tobacco on the reverse. The 1857 was the first regular-issue small cent, struck to the extent of 17.4 million coins. Incredibly, the technical preservation of this tan-gold Premium Gem is unsurpassed. Each side is completely void of mentionable distractions. Strike softness occurs peripherally, as usual. Population: 17 in 66, 0 finer (1/17). NGC ID# 2276, PCGS# 2016

3621 1856 Snow-9 PR53 PCGS. Designated a proof by PCGS but showing light circulation wear, as is often seen with the Snow-9 variety. This is an attractive representative of the first-year key to the Flying Eagle cent series. Both sides have toned in pleasing honey-brown and olive shades. The proof surface is no longer evident (indeed, the coin looks like a business strike), but the devices, although lightly rubbed, are boldly defined throughout. This is a remarkably distraction-free coin for the grade, ideal for the collector seeking a problem-free circulated example of this sought-after issue.

Ex: Santa Clara Signature (Heritage, 11/2001), lot 5161. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

1856 Flying Eagle Cent, Snow-9, PR64
Sharp and Appealing

3622 1856 Snow-9 PR64 PCGS. Most 1856 cents fall under the Snow-3 business strike variety or the Snow-9 proofs. This Snow-9 proof example displays the faint, diagnostic die line above I in UNITED to the edge and a similar, but lengthier, dieline in the adjacent eagle's wing. While the Mint made the 1856 cents to demonstrate the new design and smaller diameter cent, collectors were not satisfied until more were struck in the form of proof restrikes.

As such, the issue was technically a pattern. It is nevertheless collected along with the regular issues and the 1856 is the certainly rarest date of the entire small cent denomination. This gleaming proof example displays peach-gold and copper-red color across Choice, sharply struck surfaces. The fields are reflective with only a few delicate lines and tiny marks. Eye appeal is strong for the issue. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

1856 Flying Eagle Cent, Snow-9, PR64
A Sharp, Satiny Example

3623 1856 Snow-9 PR64 NGC. Snow-9 is plentiful in the context of 1856 Flying Eagle cent varieties. Rick Snow writes that the reverse die was among the original 1856 tail dies, but that the obverse die was likely prepared sometime in 1857. He writes: "These were probably struck during a long period starting in late 1857 and continuing until 1860."

The present Choice proof displays a full strike and satiny surfaces. Deep chocolate-brown patina blankets each side, and any grade-limiting marks are well-hidden. Hints of bronze-gold color shine through when rotated beneath a light. An excellent opportunity to acquire a sharp example of this first-year small cent key date. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

INDIAN CENTS

1862 Indian Cent, MS67 Among the Finest Certified Examples

- 3624 1862 MS67 PCGS.** A spectacular Superb Gem representative of this popular wartime issue, with sharply detailed design elements and vibrant mint luster throughout. The original red surfaces are impeccably preserved, with a few hints of crimson in selected areas. The technical quality is unsurpassed and eye appeal is terrific. Population: 14 in 67, 0 finer (1/17). NGC ID# 227H, PCGS# 2064

1891 Cent, MS66 Red Among the Finest Certified

- 3625 1891 MS66 Red PCGS.** Although plentiful in lower grades, the 1891 Indian cent is rare in Premium Gem condition. No Brown or Red and Brown coins are certified this numerically high at PCGS, and no Red coins are finer. This frosty copper-pink example shows a near-absence of carbon spotting and has only a few light marks on the cheek. Strike softness occurs on the top three headdress feathers as normal. Population: 19 in 66 (3 in 66+) Red, 0 finer (1/17). NGC ID# 228K, PCGS# 2180

1899 Indian Cent, MS67 Red Incomparable Visual Allure

- 3626 1899 MS67 Red PCGS.** The penultimate year of the 19th century yields an exceptional Superb Gem cent that is second to none in eye appeal or natural, impeccably preserved coloration. The glistening, finely grained fields coruscate with lustrous peach-gold and flame-orange hues. The strike is needle-sharp with a nearly complete absence of marks or carbon. Few pieces are its equal, and fewer still are graded any finer. Population: 24 in 67 (3 in 67+) Red, 2 finer (1/17). NGC ID# 228U, PCGS# 2204

1908-S Cent, Coruscating MS66 Red First Cent Branch-Mint Issue

- 3627 1908-S MS66 Red PCGS.** A small mintage of 1.1 million coins explains this branch mint issue's status as a semikey in the Indian Head cent series. Red Premium Gems are deceptively rare, and only a single MS67 is reported at the two leading certification services combined. This tan-gold example has coruscating frost that heightens its appeal. The design elements show strong strike definition. Carbon spots appear on the shield and the E in ONE, while two small ticks near the tip of the bust are undoubtedly the sole barriers to an even loftier grade. Population: 52 in 66 (3 in 66+) Red, 1 finer (1/17). NGC ID# 2296, PCGS# 2234

PROOF INDIAN CENTS

1869 Full Red Cent, Sharp PR66 Red Cameo Deep Mirrors, None Finer at PCGS

- 3628 1869 PR66 Red Cameo PCGS.** The 1869 is a testing acquisition in high Mint state grades and equally so in Proof Cameo format. Bright, flame-orange color yields to lime-green highlights throughout the mirrored fields, while the frosted devices retain contrast despite similar coloration. The strike is wicked-sharp. Population: 6 in 66 Cameo, 0 finer (1/17). NGC ID# 4ZW5, PCGS# 82296

1875 Cent, PR65 Red Cameo Among the Three Finest at NGC

- 3629 1875 PR65 Red Cameo NGC.** The 1875 is a moderately challenging date in high grades, with collectors often opting instead for a pleasing proof representative. This Gem Cameo proof, however, is a major rarity. Specimens are extremely rare this fine with such contrast, and only a single Cameo proof is graded higher at both services combined. Each side is fire-orange with considerable reflectivity in the fields. Minor carbon is noted on the obverse. Census: 3 in 65 Cameo, 0 finer (1/17). NGC ID# 229U, PCGS# 82314

**1877 Indian Cent, PR65 Red and Brown
Bold Coloration, Great Eye Appeal**

- 3630 1877 PR65 Red and Brown NGC.** As the key circulation strike of the series, the 1877 Indian cent proofs enjoy a “coattail effect” similar to low-mintage issues across other denominations, where the proof production is more or less normal but the issue itself is rare overall. Often, high-grade proofs are used to fill out business strike sets, increasing demand in both formats. The actual proof mintage of 1877 cents is a subject of debate, with the 2017 *Guide Book* reporting 1,250 to 1,500 pieces struck. Indian cent authority Rick Snow suggests some of the proofs were possibly destroyed as unsold or released into circulation. In any case, the fortunate bidder for this Red and Brown Gem proof will acquire a splendid example — needle-sharp and resplendently toned — with blaze-red color at the mirrored margins, accented by purple/blue central patina. Census: 68 in 65 Red and Brown, 19 finer (1/17). NGC ID# 229W, PCGS# 2319

**1909-S VDB Cent, MS66 Brown
Surprising Degree of Red Color**

- 3632 1909-S VDB MS66 Brown PCGS.** The color category suggests this key date Lincoln cent might have an overly dark or subdued appearance, but quite the opposite is true. Instead, a surprising amount of mint-red color is present near the peripheries and design recesses, ceding to lovely shades of blue and brown toward the centers. Adding to this Premium Gem's appeal is a full strike and a near-lack of surface marks. Population: 10 in 66 Brown, 1 finer (1/17). NGC ID# BYKW, PCGS# 2426

LINCOLN CENTS

**1909 VDB Cent, MS66 Red
Doubled Die Obverse, FS-1101**

- 3631 1909 VDB Doubled Die Obverse, FS-1101, MS66 Red PCGS. CAC.** Doubling is evident on the date digits and RTY in LIBERTY. This variety is moderately available overall but rarely offered in MS66 Red. Each side exhibits a strong impression and eye-catching amber-gold coloration. The surfaces radiate uninhibited frost and display minimal marks for the lofty assessment. Population: 16 in 66 (2 in 66+) Red, 1 finer. CAC: 12 in 66, 1 finer (1/17). NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425

Victor David Brenner

1909-S VDB Cent, MS67 Red Collector's Dream Coin

3633 1909-S VDB MS67 Red PCGS Secure. The present Superb Gem Red PCGS 1909-S VDB cent would represent the pinnacle of collecting for even many well-heeled collectors, as these coins in such a grade represent the few finest ever certified of this most-in-demand Lincoln cent issue. As of this writing, PCGS reports only 15 submissions in this grade — and we highly doubt that all of those are separate coins.

The accompanying photo, as well as the PCGS TrueView for this coin, shows off the admirable virtues of this piece. Crisp, rolling luster is the foremost attribute, at least the one that catches our eye first — far more powerful than usually seen, as befits an extraordinary example. The color varies, strictly within the Red parameter, from light gold to orange to brownish-orange, but there are only a few microscopic flecks, and merely a few areas of darker or lighter toning. The strike is close to full throughout, with no identifiable problem areas. And the preservation is just marvelous. It is seldom indeed that one sees an example of this key date so free of even the smallest reportable ticks.

The acquisition of a nice Gem Red 1909-S VDB — or, for that matter, a well-circulated but problem-free specimen — has been the dream of innumerable collectors of Lincoln cents for several generations. For those who really want to collect “one of everything,” it bears reminding that there are four different positions known for the S mintmark; while that is a useful tool for authentication, we know of few collectors who have systematically sought out one of each position.

A recent example of this date that we offered in the exact grade and service was lot 5260 our in FUN Signature (Heritage, 1/2016), which brought \$94,000. This is, indeed, a collector's dream coin. Population: 15 in 67 Red, 0 finer (12/16). NGC ID# 22B2, PCGS# 2428

1910-S Cent, MS66+ Red
Rarely Seen Finer, CAC-Endorsed

- 3634** 1910-S MS66+ Red NGC. CAC. The finely textured surfaces of this high-end Premium Gem cent are remarkable. Sharply struck, the coin displays nearly flawless red luster that beams across problem-free surfaces. A glass reveals no marks to mention anywhere on the coin beyond a few microscopic, light-gray flecks that are wholly unimportant. Peach and true-orange patina epitomize the Full Red designation. Few examples of the 1910-S are finer, while CAC confirms the quality with its green label endorsement. Census: 44 in 66 (2 in 66+) Red, 5 finer. CAC: 29 in 66, 0 finer (1/17). NGC ID# 22B6, PCGS# 2440

1912 Cent, Splendid MS67 Red
None Certified Finer

- 3635** 1912 MS67 Red PCGS. This is a Registry-quality Superb Gem worthy of serious consideration. Astonishing surfaces display rich orange color and just few brighter hues around the margins. The piece is sharply struck, and each side is virtually abrasion-free and carbon-free. A very pleasing example of this "common" early date in uncommonly fine condition. Population: 11 in 67 Red, 0 finer (1/17). NGC ID# 22BA, PCGS# 2452

1915-S Cent, MS65 Red
Pleasing for the Grade

- 3636** 1915-S MS65 Red PCGS. A satiny coin that is moderately well-struck considering the evidence of die wear in the fields. Greenish hues intrude upon golden luster, while each side is devoid of mentionable abrasions. A few tiny specks on the obverse do not detract. The 1915-S is a scarce date in MS65 Red and is rarely offered finer. Population: 35 in 65 (2 in 65+) Red, 5 finer (1/17). NGC ID# 22BM, PCGS# 2485

1922-D Cent, MS66 Red
Attractive Original Surfaces

- 3637** 1922-D MS66 Red PCGS. An early strike from fresh dies that shows razor-sharp detail and rich luster with original copper-orange and rose-red hues. The surfaces are largely untouched, and a few faint flecks in the right obverse field are not distracting. The 1922-D is rare this fine and unknown in higher grades. Population: 13 in 66 (1 in 66+) Red, 0 finer (1/17). NGC ID# 22C8, PCGS# 2539

1922 No D Cent, Unc Details
Sought-After Strong Reverse Variety

- 3638** 1922 No D, Strong Reverse, FS-401 — Polished — Genuine PCGS. Unc Details. Die Pair 2. The obverse has the usual worn-die strike, while the sharp reverse denotes the most desirable of the three No D die pairs. This piece displays satiny luster and olive-tinted orange-gold coloration. The surfaces have a slight sheen, indicated by the Details grade from PCGS, but the overall appeal is better than expected. An acceptable alternative to a scarce and costly Mint State coin.

1922 Lincoln Cent, MS63 Red and Brown
No D, Weak Reverse

- 3639** 1922 No D Weak Reverse MS63 Red and Brown PCGS. CAC. Die Pair 3. The second 2 is weaker than the first 2, and the reverse is rotated 30° counterclockwise. WE is quite soft. This is one of the Weak D die pairs. The faint remnants of a D still appear on the obverse, which is lustrous golden-orange, while the reverse shows waves of orange, lilac, and deep brownish-purple. CAC-endorsement, one of the few Select Mint State examples to be so honored. Population: 22 in 63 Red and Brown, 10 finer. CAC: 4 in 63, 3 finer (1/17). NGC ID# 2U6G, PCGS# 2541 Base PCGS# 2538

1951-S Cent, MS67+ Red
Frosty and Original
Tied With One Other for Finest Known

- 3640** 1951-S MS67+ Red PCGS. CAC. A CoinFacts plate coin, this high-end Superb Gem is tied with one other Plus-graded MS67 Red PCGS example as the finest known of the issue (1/17). The strike is bold, and luster glistens from each side. Rich tangerine-orange interiors cede to lighter golden peripheral hues, giving this top-grade 1951-S cent commanding eye appeal. Population: 100 in 67 (2 in 67+) Red, 0 finer. CAC: 19 in 67, 0 finer (1/17). NGC ID# 22F5, PCGS# 2794

1972 Lincoln Cent, MS67 Red
Doubled Die Obverse, FS-101

- 3641** 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS. This spectacular Superb Gem shows strong doubling on the date, LIBERTY and IN GOD WE TRUST, and a small die gouge above the D in UNITED identifying the extremely popular FS-101 variety. The design elements are sharply detailed and the well-preserved original red surfaces radiate vibrant mint luster. Eye appeal is terrific. Population: 46 in 67 Red, 1 finer (1/17). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

PROOF LINCOLN CENTS

1913 Cent, PR67 Red
Conditionally Rare

- 3642** 1913 PR67 Red PCGS. Remarkably few matte proof Lincolns have achieved a Superb Gem grade, across all issues and color categories. The 1913 shows a PCGS population of just seven coins in PR67 Red, with none finer (1/17). Surprisingly, this paltry survival rate is among the higher for the grade in the matte proof series. The present coin is truly superb. Full definition appears on all design elements and the rims are broad and squared. Bronze-gold hues dominate the matte surfaces but yield to overtones of violet-red, lilac, and olive. A few faint carbon specks are present, but there are no contact marks. NGC ID# 22KW, PCGS# 3317

1915 Cent, PR66 Red and Brown
Luminous Red and Burgundy Surfaces

- 3643** 1915 PR66 Red and Brown PCGS. CAC. The 1915 matte proof is scarce in Premium Gem condition regardless of the shade of its luster, as only 1,150 pieces were ever struck. This luminous Red and Brown specimen displays rich burgundy overtones throughout coppery-red surfaces, with full design definition. A few tiny specks do not detract. Population: 24 in 66 (4 in 66+) Red and Brown, 1 finer. CAC: 18 in 66, 2 finer (1/17). NGC ID# 22KY, PCGS# 3322

1953 Cent, PR67 Red Deep Cameo
Top-Level PCGS Registry Coin

- 3644** 1953 PR67 Red Deep Cameo PCGS. This is a dramatically contrasted copper-orange Deep Cameo proof, showing a full strike and sharp design elements. Deep Cameos are extremely rare this fine, and none are numerically finer at PCGS. This piece is essential for a high-ranking Registry Set. Population: 9 in 67 (1 in 67+) Red Deep Cameo, 0 finer (1/17). NGC ID# 22LD, PCGS# 93368

1990 No S Cent, PR69 Red Deep Cameo
Among the 100 Greatest Modern U.S. Coins

- 3645** 1990 No S, FS-101, PR69 Red Deep Cameo PCGS. The 1992 No S Lincoln cent proofs were the last such specimens in a string of rare No S proofs that began with the 1968 dimes. About 250 pieces are estimated to have been struck, and this issue ranks among the 100 Greatest Modern U.S. Coins. This near-flawless PR69 Red Deep Cameo example offers profoundly reflective mirrors and stark field-device contrast. Population: 43 in 69 Deep Cameo, 0 finer (1/17). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

TWO CENT PIECES

1865 Two Cent, MS66+ Red
Radiant Peach-Gold Surfaces

- 3646** 1865 Plain 5 MS66+ Red PCGS. CAC. The short two-cent series is eminently collectible but challenging in the finest grades with full Red color. This Plus-graded Premium Gem suits even the most advanced sets. CAC endorsed, the peach-gold surfaces radiate copper-orange accents and bright mint luster. Free of die clashing and showing only a few inconsequential carbon flecks, the frosted fields are nearly mark-free and the strike is razor-sharp. Not surprisingly, there are just four finer pieces reported in Red format by PCGS and NGC combined. Population (all varieties): 53 in 66 (4 in 66+) Red, 2 finer. CAC: 15 in 66, 0 finer (1/17). PCGS# 38249 Base PCGS# 3584

1872 Two Cent, Red and Brown Gem
Final Business-Strike Issue

- 3647** 1872 MS65 Red and Brown PCGS. CAC. The odd-denomination two cent piece was long out of favor by 1872, and only 65,000 pieces were minted. This tiny issue would be the last business-strike coinage for the denomination, which was struck in proof format the following year and discontinued. The present example is an impressive Gem with sharply detailed design elements and reflective prooflike fields. Fine definition is observed on many leaf veins and the ribbon bow, while the surfaces show intermingled areas of copper-gold and light brown. Population: 17 in 65 (2 in 65+) Red and Brown, 3 finer. CAC: 14 in 65, 2 finer (1/17). Ex: Long Beach Signature (Heritage, 6/2011), lot 3161; Central States Signature (Heritage, 4/2013), lot 4141. NGC ID# 22NG, PCGS# 3613

PROOF TWO CENT PIECES

1867 Two Cent Piece, PR66 Red Cameo
None Certified Finer

3648 1867 PR66 Red NGC. The 2017 *Guide Book* gives the mintage of 1867 proof two cent pieces as 625+ pieces. Apparently, 625 examples were issued with the regular proof sets, distributed from February through June, and an unknown number were included in separately sold minor proof sets (Kevin Flynn found letters in the National Archives enumerating more than 80 minor proof sets that were sold through the mail in 1867). While the 1867 can be found in lower grades with a little patience, examples in PR66 condition, with the Red designation and Cameo surfaces, are very rare.

The present coin is one of the finest-certified survivors, with sharply detailed design elements and deeply mirrored fields that contrast boldly with the frosty devices. The impeccably preserved original red surfaces are undimmed and overall eye appeal is terrific. Census: 4 in 66 Red, 0 finer (1/17). NGC ID# 274W, PCGS# 83635

1872 Two Cent Piece, PR66 Red
Exceptional Coloration

3649 1872 PR66 Red PCGS. Fiery orange-red luster adorns the Gem-quality surfaces of this proof 1872 two cent piece. The strike is sharp, and eye appeal is abundant. A few minor specks do not overly detract. Rarely encountered so fine, and almost unknown finer. Population: 13 in 66 Red, 1 finer (1/17). NGC ID# 2752, PCGS# 3650

1873 Two Cent, PR66 Red
High-End Closed 3 Coin

3650 1873 Closed 3 PR66 Red PCGS. Gleaming copper-orange fields provide a mirrored backdrop for razor-sharp, satiny devices on this Premium Gem Red Closed 3 proof. Hints of reddish-lavender appear when tilted beneath a light. There are no obvious carbon spots. The 1873 two cent piece was struck in proof format only. Varieties exist with Closed 3 (earlier) and Open 3 (later) logotypes. The Closed 3 variant is more plentiful in high grade and ideal for type purposes, although Premium Gem Red coins such as the piece offered here are still conditionally rare. Population: 15 in 66 Red, 1 finer (1/17). NGC ID# 5L57, PCGS# 3653

1873 Two Cent Piece, PR66 Red
Closed 3 Variant

- 3651** 1873 Closed 3 PR66 Red PCGS. Few Closed 3 proof 1873 two cent pieces survive in Premium Gem Red condition, and almost none are known finer. This high-end rarity displays a sharp strike and deeply reflective fields that produce subtle cameo contrast on the reverse. A couple of faint flecks are unseen without a loupe and careful inspection. Population: 15 in 66 Red, 1 finer (1/17). NGC ID# 5L57, PCGS# 3653

1873 Two Cent Piece, PR65 Red
Scarcer Open 3 Issue

- 3652** 1873 Open 3 PR65 Red PCGS. The Open 3 proof two cent piece of 1873 is scarcer in high grade than its Closed 3 counterpart. Full Red examples are seldom seen in any grade, and Gems are decidedly rare. This Gem Red coin displays a bold strike and moderately reflective fields. Both sides offer rich copper-orange color with a couple of faint flecks visible on the obverse near the right fletchings. Population: 5 in 65 Red, 6 finer (1/17). NGC ID# 2754, PCGS# 3656

THREE CENT SILVER

1854 Three Cent Silver, MS66
Practically Unobtainable Any Finer

- 3653** 1854 MS66 PCGS. The three cent silver denomination was introduced in 1851, and the design was slightly modified three years later. In 1854, lines were added around the star and olive leaves above the denomination. These first-year Type Two coins are generally seen through MS65 condition. Premium Gems are very rare, and finer coins are practically unobtainable. This is an all-brilliant, strongly detailed example with bold clash marks on each side. Population: 11 in 66, 2 finer (1/17). NGC ID# 22Z3, PCGS# 3670

1862/1 Three Cent Silver, MS67
None Numerically Finer

- 3654** 1862/1 FS-301 MS67 PCGS. CAC. The overdate is not overly scarce, yet in high grades it is significantly scarcer than the normal date 1862 issue in the highest Mint State grades. Specialists often opt for both varieties to complete a set since the 1862/1 is a *Guide Book* listing. Attractive "target" toning covers both sides of this attractively patinated Superb Gem, where steel-blue shades at the margins surround brownish-gold hues. The fields are partially reflective beneath the toning. The design elements are sharply struck, including the shield lines, the outlines to the obverse star, and the reverse star centers, although the leaves on the left part of the olive branch are weak. Population: 17 in 67 (1 in 67+), 0 finer. CAC: 6 in 67, 0 finer (1/17). PCGS# 38580 Base PCGS# 3681

1864 Three Cent Silver, MS67
Few Certified This Fine

- 3655** 1864 MS67 NGC. This satiny Superb Gem displays razor-sharp detail and warm golden toning with blue accents along part of the obverse periphery. There are no mentionable abrasions, only light clash marks as usual. Rare this fine and rarer in better condition. Census: 9 in 67 (1 in 67+★), 4 finer (1/17). NGC ID# 22ZE, PCGS# 3684

PROOF THREE CENT SILVER

1863 Silver Three Cent, PR66+
A Delightful Early Die State Proof

3656 1863 PR66+ NGC. CAC. A fully struck, reflective proof, struck from fresh dies that show no lapping. Pale mint-green and champagne pastels accent each side, while the underlying surfaces are beautifully preserved. The proof 1863 silver three cent is rare this well-preserved. Census: 14 in 66 (1 in 66+, 1 in 66 ★), 9 finer. CAC: 8 in 66, 2 finer (12/16). NGC ID# 7VZF, PCGS# 3712

1872 Silver Three Cent, PR66
Stark-Brilliant Ultra Cameo

3657 1872 PR66 Ultra Cameo NGC. There are only four Ultra/Deep Cameo 1872 proof three cent silvers certified, including two PR66s at NGC and at PCGS a PR64 and a PR66+ (1/17). This NGC coin displays full detail and brilliant, unmarked surfaces. Field-device contrast is outstanding, and eye appeal excels. A Condition Census rarity for the finest collection. PCGS# 93723

THREE CENT NICKEL

1883 Three Cent Nickel, MS66
Brilliant Condition Rarity

3658 1883 MS66 PCGS. In 1883, the output of three cent nickel coins dropped to its lowest point since the denomination was introduced in 1865. The production of merely 4,000 pieces was well-founded, for three cent nickels were abundant and unpopular among the public, and they failed to circulate. PCGS has only seen 135 submissions for the 1883, including 45 examples in Mint State. A significant majority of Uncirculated coins grade between MS62 and MS64. As one might expect, survivors of this caliber are very rare. This exceptional Premium Gem retains complete brilliant and offers a pinpoint impression, particularly on the olive leaves and denomination. A single dark spot occurs on the lower serif of the D in UNITED. Each side is smooth and unmarked. A high-end piece for the grade. Population: 6 in 66, 4 finer (1/17). NGC ID# 2765, PCGS# 3751

PROOF THREE CENT NICKELS

1867 Three Cent Nickel, PR67 Cameo
Tied for Finest at PCGS

- 3659** 1867 PR67 Cameo PCGS. Other than some mild weakness on the Roman numerals, this Superb Gem proof is nearly flawless in its production. The obverse is sharp, and both sides displays brilliant, stark cameo contrast. There are no contact marks, only a few tiny strike-throughs. This piece is among the finest Cameos at PCGS. Population: 5 in 67 Cameo, 0 finer (1/17). NGC ID# 275M, PCGS# 83763

1868 Nickel Three Cent, PR66+
Dramatic Deep Cameo Example

- 3660** 1868 PR66+ Deep Cameo PCGS. CAC. Deep Cameo examples of the 1868 proof are scarce, and this high-end Premium Gem is among the finest at PCGS and CAC. Dramatic cameo contrast is produced by thick, frost-white motifs and deeply mirrored fields. A hint of pale champagne toning is discernible on each side. The strike is sharp on the obverse and lacking only slight definition on the Roman numerals of the reverse. Population: 14 in 66 (5 in 66+) Deep Cameo, 0 finer. CAC: 15 in 66, 0 finer (1/17). NGC ID# 3L2N, PCGS# 93764

1870 Three Cent Nickel, PR66+ Deep Cameo
Strongly Mirrored Fields, Exceptional Contrast

- 3661** 1870 PR66+ Deep Cameo PCGS. CAC. A tiny, horseshoe-shaped strike-through behind Liberty's bow between OF and AMERICA is the only mark revealed by a glass on the obverse of this high-end Premium Gem proof with Deep Cameo fields. The portrait is crisp and frosted for exceptional white-on-black contrast the with glass-smooth, reflective fields. On the reverse, a tiny planchet flake between the first two numerals is the sole interruption on the equally contrasted surface.

PCGS recognizes a single Plus-graded Premium Gem (this very coin) as the sole-finest 1870 Deep Cameo proof. NGC reports no PR66 Ultra Cameo coins, but has certified a single finer piece. CAC endorsement joins the accolades for this top-end Registry quality coin. Population: 2 in 66 (1 in 66+) Deep Cameo, 0 finer. CAC: 2 in 66, 0 finer (1/17). NGC ID# 52MZ, PCGS# 93766

1876 Three Cent Nickel, PR66+ Deep Cameo
None Finer at PCGS

- 3662** 1876 PR66+ Deep Cameo PCGS. CAC. The combined awards of the PCGS Plus designation and CAC endorsement suggest this Premium Gem Deep Cameo coin ranks highly among the other PR66 candidates for finest-certified at PCGS. Stark contrast and essentially flawless surfaces provide visual confirmation of the quality. Struck in the country's Centennial year, a large mintage of 1,150 pieces did not sell out, adding to the scarcity of high-end proofs. Attractive ice-blue mirrors surround frost-white motifs for exceptional eye appeal. Population: 7 in 66 (3 in 66+) Deep Cameo, 0 finer. CAC: 6 in 66, 0 finer (1/17). NGC ID# 275W, PCGS# 93772

1887 Three Cent Nickel, PR67 Cameo
None Finer at Either PCGS or NGC

- 3663** 1887 PR67 Cameo PCGS. Unseen in finer condition, this Superb Gem Cameo proof displays strong contrast between the frosted motifs and the deeply reflective fields. There is little evidence of the 1887/6 overdate indicated on the holder. Clearly, the dies were lapped, removing such detail as well as disconnecting the ribbon ends on the reverse. A lovely pale-blue sheen accentuates the gleaming silver surfaces. Viewed at an angle, the coin conveys the strong white-on-black appearance required by high-grade proof specialists in the series. Population: 3 in 67 Cameo, 0 finer (1/17). NGC ID# 2769, PCGS# 83783

1888 Three Cent Nickel, PR67 Deep Cameo
Tied for Finest at PCGS

- 3664** 1888 PR67 Deep Cameo PCGS. CAC. Walter Breen wrote in his *Encyclopedia of United States and Colonial Proof Coins* about the 1888 proof three cent pieces, "Some of these are so dull as to be almost indistinguishable from business strikes; and conversely, some business strikes have attractive proof surfaces. The series is enough in the doldrums that nobody particularly cares." Breen must not have seen this coin.

It exhibits profoundly deep, brilliantly reflective fields. The devices display heavy frost against the pristine, smoothly reflective mirrors. Completely untuned, the Superb Gem surfaces present no spots, ticks, or other distractions to the naked eye. Even under magnification, only the most trivial minutiae are found, including a tiny luster break on the chin, a single dark fleck near the rim, and a couple of ticks on the eyebrow. On the reverse, a tiny indentation near the leftmost I appears to be a planchet flake. All are trivial and this coin is incredibly appealing — virtually unimprovable — since neither service has seen one numerically finer. Population: 3 in 67 Deep Cameo, 0 finer. CAC: 2 in 67, 0 finer (1/17). NGC ID# 276B, PCGS# 93785

PROOF SHIELD NICKEL

1878 Nickel, PR67 Cameo
Famed Proof-Only Date

- 3665 1878 PR67 Cameo PCGS. CAC.** There is no way one could possibly improve upon the eye appeal of this black-and-white Superb Gem Shield nickel proof. Fully struck, frosted motifs contrast markedly against the glassy fields that surround them. Devoid of both color and contact. The 1878 is a famous proof-only issue, claiming a total production of 2,350 specimens. Population: 7 in 67 Cameo, 0 finer. CAC: 5 in 67, 0 finer (1/17). NGC ID# 276V, PCGS# 83832

LIBERTY NICKEL

1885 Liberty Nickel, Brilliant MS65
Key to the Series

- 3666 1885 MS65 PCGS.** The 1885 is the undisputed key to the Liberty nickel series and is the stopper for any collector wishing to complete this popular series. It is seldom located in Gem or finer condition. Many collectors just give up and purchase a proof instead since those coins are reasonably available. This is a brightly lustrous, frosted example. The striking details are complete throughout, including the left ear of corn. The only mentionable mark (but not really distracting because of its location) is a short strike-through near the reverse rim between D and S. Struck from a later state of this die pairing with numerous, spindly die cracks around the margins. Population: 54 in 65 (4 in 65+), 38 finer (1/17).
Ex: Central States Signature (Heritage, 4-5/2010), lot 2038. NGC ID# 2773, PCGS# 3846

PROOF LIBERTY NICKELS

1885 Liberty Nickel, Bright PR68
Tied for Finest Certified

- 3667 1885 PR68 NGC.** This piece's business strike counterpart is far and away the key to the Liberty nickel series, creating added collector demand for proofs. This proof offers many aesthetic advantages, and a technical one as well: It has a higher numeric grade than any of the business strikes certified at either service, which include three MS67 coins at PCGS and one MS67 at NGC. This piece is tied with two other PR68 coins as the finest certified at NGC (1/17). The surfaces appear perfect, displaying pale lilac and golden color with much underlying mint brilliance. One minor lint mark appears in the center reverse. A tremendous addition to a fine Liberty nickel collection. NGC ID# 277T, PCGS# 3883

1897 Liberty Nickel, PR68 Cameo
Sharply Contrasted, Lightly Toned

- 3668 1897 PR68 Cameo NGC.** A profoundly flashy and distinctly Cameo specimen that offers a great visual balance between color and contrast. The viewer is immediately aware of the inherent field-to-device contrast, though the portrait appears more satiny than frosted at a distance. This is in part an effect of the toning over each side, which appears gold-green at the obverse borders with pale nickel-blue at the interior. The reverse offers a mix of the two colors with the former hue covering a majority of the fields on that side. Census: 3 in 68 Cameo, 1 finer (1/17).
Ex: Central States Signature (Heritage, 4/2011), lot 5049. NGC ID# 2787, PCGS# 83895

1905 Nickel, Outstanding PR68

- 3669 1905 PR68 NGC.** The 1905 is one of several proof Liberty nickel issues for which Cameo specimens are inherently rare. In the absence of Cameo coins, low-contrast but high-appeal pieces such as this PR68 survivor emerge as the most desirable representatives of the issue. Bold color is the signature aspect of this profoundly mirrored piece, which has canary-yellow, orange, and lavender-blue outer hues that fade into lighter centers, pale yellow on the obverse and a slightly deeper nickel-blue on the impressively preserved reverse. Census: 3 in 68, 0 finer (1/17).
Ex: *Central States Signature* (Heritage, 4/2011), lot 5051. NGC ID# 278F, PCGS# 3903

BUFFALO NICKELS

1914-S Buffalo Nickel, MS66 Flawless, Lustrous Surfaces

- 3670 1914-S MS66 PCGS.** Sharply detailed in most areas, this spectacular Premium Gem shows just a trace of the usual softness on the hair above the braid. The textured surfaces are impeccably preserved and display a few delicate hints of greenish-gold toning. Vibrant, satiny mint luster adds to the outstanding eye appeal. Population: 39 in 66 (6 in 66+), 2 finer (1/17). NGC ID# 22R6, PCGS# 3926

1914-S Nickel, MS66+ Fabulous Strike, Luster, and Toning

- 3671 1914-S MS66+ PCGS. CAC.** Icy-blue centers are flanked by wheat-gold toning at the margins of this fully struck and lustrous 1914-S nickel. Powerful satin luster glows across the smooth and attractive surfaces. More than 3.4 million pieces were struck — a large mintage in the early years of the series — yet few pieces are as well-produced and carefully preserved as this example. The surfaces are entirely problem-free and high-end even at the Premium Gem level.

In particular, the PCGS Plus designation and CAC endorsement are important add-ons to the MS66 grade. Just two numerically finer pieces exist at PCGS. We seldom see one finer, nor do the grading services. Population: 39 in 66 (6 in 66+), 2 finer. CAC: 18 in 66, 0 finer (1/17). NGC ID# 22R6, PCGS# 3926

1924-S Buffalo Nickel, MS65
Sharply Struck

- 3672 1924-S MS65 NGC.** Well struck for this elusive S-mint Buffalo. Most examples are softly defined over the high points, especially the bison's horn. This particular piece is almost indistinguishable from a Philadelphia coin, which is saying a lot for this issue. The satiny surfaces are bathed in delicate golden patina, and there are no mentionable abrasions on either side. Although minted in larger quantities than the '26-S, the '24-S is another rare issue in Gem condition. Currently, NGC has certified 19 examples in MS65, with three finer; while PCGS has graded 40 specimens at the Gem level, also with three finer (1/17).

Ex: *November Signature* (Heritage, 11/2003), lot 5831; *West Palm Beach Signature* (Heritage, 6/2008), lot 446; *Summer FUN Signature* (Heritage, 7/2010), lot 3331. NGC ID# 22RZ, PCGS# 3953

1927-D Nickel, Sharp MS65+
Struck From Fresh Dies

- 3673 1927-D MS65+ PCGS. CAC.** Although plentiful in MS63 and MS64, the 1927-D Buffalo nickel becomes distinctly elusive at the Gem grade level, and finer pieces are rare. This Plus-designated CAC coin displays an impressively bold strike for the period from fresh dies that lack significant erosion in the fields and recesses. Warm golden toning graces unabraded, satiny surfaces. Population: 81 in 65 (8 in 65+), 7 finer. CAC: 19 in 65, 1 finer (1/17). NGC ID# 22S9, PCGS# 3961

1937-D Three-Legged Nickel, MS65
Famous Lapped Dies Mint Error

- 3674 1937-D Three-Legged, FS-901, MS65 NGC.** The Three-Legged nickel was discovered relatively early after issue. The first mention in the *Numismatist* occurs on page 751 of the September 1939 issue. The July 12, 1939 meeting of the Heart of America Numismatic Association recorded that "Oliver M. Arnold, from Denver, sent an oddity, a three-legged Buffalo nickel." Word must have spread quickly, since a significant number were saved in lightly circulated grades. Uncirculated pieces, especially Gems, are rare relative to demand. The present lustrous golden-brown and gunmetal-blue example is nicely struck and free from discernible marks. Census: 59 in 65 (1 in 65+), 23 finer (1/17). NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKEL

1936 Buffalo Nickel, PR68
Exceptional Satin Finish Proof

- 3675** 1936 Type One — Satin Finish PR68 PCGS. The Mint resumed commercial proof set offerings in 1936, after a two-decade hiatus. The 1936 proof Buffalo nickel claims a mintage of 4,420 pieces, split between the Satin Finish examples produced early in the year, and the Brilliant Finish coins that were struck later. This magnificent PR68 specimen exhibits razor-sharp definition on all design elements, and the impeccably preserved surfaces show the strong matte luster that was characteristic of the Satin Finish coins. Eye appeal is tremendous. Population: 42 in 68 (2 in 68+), 1 finer (1/17). NGC ID# 278X, PCGS# 3994

JEFFERSON NICKEL

1942-D Nickel, MS64 Full Steps
FS-501, D Over Horizontal D

- 3676** 1942-D D Over Horizontal D, FS-501, MS64 Full Steps NGC. Full Steps examples of this popular *Guide Book* variety are rare in as fine condition as the present piece. The Choice Mint State surfaces deliver satiny luster cast in warm golden toning that deepens to lavender hues around the peripheries. A loupe reveals a few small, inconsequential marks. Suitable for Registry purposes. Census: 3 in 64 Full Steps, 1 finer (1/17). NGC ID# 22TL, PCGS# 38496 Base PCGS# 84015

PROOF JEFFERSON NICKELS

1940 Jefferson Nickel, PR69
Reverse of 1940
Sole Finest Proof Certified

- 3677** 1940 PR69 NGC. Here is an offering that should generate plenty of excitement. Although this is an example of the more-available 1940 Reverse of 1940 with strengthened steps, it is the single-finest example of the date at NGC and PCGS combined. It is the earliest certified Jefferson nickel in PR69 condition, and claims a low mintage of 14,158 coins. Simply put, this spectacular representative would make a monumental addition to any advanced set.

Rings of mauve, green, blue, rose, and gold patina encompass each side. The effect is slightly dusky on the reverse. For all intents and purposes, the surfaces of this amazing specimen are flawless. There is a single, microscopic fleck on Jefferson's chin, but that is all that stands in the way of a pristine PR70 designation. No PR69 1940 nickel has ever been offered, and one may not appear again for quite some time. This opportunity should be seized upon. Census: 1 in 69, 0 finer (1/17). NGC ID# 279Z, PCGS# 4177

1953 Nickel, PR67+ Deep Cameo
Registry-Grade Rarity

- 3678** 1953 PR67+ Deep Cameo PCGS. Deep Cameo 1953 proof Jefferson nickels are rare in any grade. This high-end Superb Gem is an important Registry Set acquisition. The strike is full throughout, and each side displays brilliant, starkly contrasted surfaces. Eye appeal is outstanding. Population: 9 in 67 (1 in 67+) Deep Cameo, 6 finer (1/17). NGC ID# BBV3, PCGS# 94185

EARLY HALF DIMES

1797 15 Stars Half Dime, VF30
Midgrade V-2, LM-1 Specimen

- 3679** 1797 15 Stars, V-2, LM-1, R.3, VF30 PCGS. The obverse fields and to a smaller extent portions of the reverse field show deep blackish-blue patina with silvery high points, the reverse adding some reddish toning on the eagle. This piece shows much desirability in terms of moderate wear and would fit nicely into a midgrade type set to represent the Small Eagle Reverse type, or for a *Guide Book* variety collection. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

1800 V-1, LM-1 Half Dime, XF45
Pewter-Gray Patina

- 3680** 1800 V-1, LM-1, R.3, XF45 NGC. Diagnostic markers include TE in STATES low above the clouds, the star close to Y, and Star 1 close to the curl. A rim cud below the date confirms the late die state. This is a well-detailed pewter-gray Draped Bust half dime with accents of lavender and steel-blue. A couple of ticks appear scattered about the obverse, while the reverse is slightly cleaner by comparison. The reported mintage for this first-year type is only 40,000 coins. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

1800 Half Dime, AU Details
Extremely Rare V-3, LM-2 Variety
Five to 12 Pieces Known, Only One Finer

- 3681** 1800 V-3, LM-2, R.7 — Cleaning — Genuine PCGS. AU Details. Here is an extremely rare offering, indeed. It is an example of the R.7 V-3, LM-2 1800 half dime, one of an estimated five to 12 pieces known. Our Permanent Auction Archives dating back to 1993 show only three prior appearances: a VF30 example in 2014, which realized \$9,987.50, a damaged PCGS Genuine coin that brought \$1,207.50 in 2011, and the bent Jules Reiver specimen with Fine Details that sold for \$7,475 in 2006. Other appearances are scant. Stack's Bowers offered the former Reiver coin again in 2011 in a Fine 12 PCGS holder. Dealer Rich Uhrich currently lists an EF Details example in his inventory. The NGC Census reports a single AU58 coin, the finest known example, while PCGS shows two additional coins in VG8 and VG10.

This AU Details representative, second on the Condition Census, is mostly brilliant with a moderately subdued appearance. The noted cleaning hardly detracts at all from an aesthetic perspective and is entirely unimportant considering the coin's absolute rarity. The strike is bold around the rims and somewhat light over the centers. Clash marks occur near stars 11 to 13. The significance of this offering cannot be overstated. It is the finest example ever offered publicly. Expect spirited bidding from advanced specialists.

BUST HALF DIMES

1833 V-6, LM-9 Half Dime, MS67
Late Obverse Die State

- 3682** 1833 V-6, LM-9, R.2, MS67 PCGS. A pivotal year in the history of the Philadelphia Mint as the government agency moved to a new physical building early in 1833, greatly expanding production capacity. The obverse die was used for seven previous die marriages, representing three other varieties, before appearing here, now with a heavy die crack along the front of the cap to the upper obverse border. This gorgeous Superb Gem exhibits frosty devices and satiny fields, with mostly brilliant surfaces at the centers, inside a frame of lovely iridescent toning. Population (all varieties included): 12 in 67 (1 in 67+), 0 finer (1/17). NGC ID# 232F, PCGS# 38700 Base PCGS# 4280

1835 Half Dime, Brilliant MS66
Large Date, V-3, LM-3

- 3683** 1835 Large Date, Large 5C, V-3, LM-3, R.1, MS66 PCGS. CAC. Lustrous and brilliant with a good strike and outstanding preservation. The die break at the C in AMERICA is perhaps the most interesting characteristic of LM-3, although it is nascent here. This piece is among the finest 1835 half dimes at PCGS. Population: 26 in 66 (1 in 66+), 0 finer. CAC: 9 in 66, 1 finer (12/16). NGC ID# 232H, PCGS# 38709 Base PCGS# 4282

1837 Half Dime, Delicately Toned MS66
Condition Census V-1, LM-5 Example

- 3684** 1837 Large 5C, V-1, LM-5, R.1, MS66 NGC. The A in AMERICA is repunched on this collectible type-coin variety. The present piece displays satin luster with a hint of champagne toning near the borders. The obverse is sharp save for the lower-left border dentils, and the reverse shows mild weakness only on the eagle's left (facing) wing. Struck from clashed dies. Regardless of variety, the 1837 half dime is rare this fine and almost unknown finer. Census (all varieties included): 5 in 66 (1 in 66 ★), 1 finer (1/17). NGC ID# 232K, PCGS# 38733 Base PCGS# 4289

PROOF BUST HALF DIME

1834 Half Dime, PR64+
V-4, LM-4, Attractively Toned

- 3685** 1834 PR64+ NGC. CAC. V-4, LM-4. Ex: "Col." E.H.R. Green; Eric P. Newman Collection. A small mintage of proof half dimes was produced in 1834. Some were presented as gifts to foreign monarchs like the King of Siam and the Sultan of Muscat in proof sets that included all denominations of U.S. coins, including the backdated Class I 1804 dollars and the Plain 4 1804 eagles. Probably no more than 15-20 examples survive today in all grades.

This coin shows the scroll ending below the center of the M in AMERICA, and star 7 points to the top of the headband, identifying the V-4, LM-4 die variety. All proof examples we have seen represent this variety. It is a high-end Choice specimen that features well-detailed design elements and deeply mirrored fields. The pleasing surfaces display vivid shades of champagne-gold and cerulean-blue toning, with outstanding eye appeal. Census: 4 in 64 (1 in 64+), 9 finer. CAC: 3 in 64, 1 finer (1/17).

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$5.00; Eric P. Newman Numismatic Education Society; ANA Signature (Heritage, 8/2014), lot 3422. NGC ID# 232L, PCGS# 4297

SEATED HALF DIMES

1841-O Seated Liberty Half Dime, MS67
None Numerically Finer at Either Service

- 3686 1841-O MS67 PCGS. CAC. V-4.** A substantial mintage of 815,000 pieces was realized for the 1841-O half dime. Yet, as can be seen from the population data, few were set aside in high grades. Both Small and Medium O varieties are known, but a Large O is unsubstantiated. The reverse of this delightful Superb Gem shows several spindly die cracks that are consistent with this Valentine variety. The surfaces are brilliant and thickly frosted, rather than the often-seen satiny finish. Die rust is abundantly evident on each side. Die clashing is seen on each side also, as indicated in Blythe (1992). The strike details are strong throughout. Population: 2 in 67 (1 in 67+), 0 finer. CAC: 3 in 67, 0 finer (1/17). NGC ID# 232Z, PCGS# 4329

1842-O Half Dime, Warmly Toned MS65
Few Seen This Fine

- 3687 1842-O MS65 PCGS.** The 1842-O is a better date in all grades but really becomes scarce in the upper circulated levels. In Mint State, this New Orleans half dime is a genuine rarity regardless of grade. A few coins reported in MS66 are the finest, but this Gem example is nonetheless firmly within the Condition Census. Observing the frosty, golden-orange surfaces under a glass fails to reveal a single notable imperfection in the preservation, although considerable strike weakness is seen on Liberty's head and the lower portion of the wreath, as usual. The coin glows beneath a light, and the overall appeal is excellent. Population: 4 in 65, 2 finer (1/17). NGC ID# 256X, PCGS# 4331

1853-O Half Dime, MS65+
Sole Finest No Arrows Example
Ex: Eliasberg

3688 1853-O No Arrows MS65+ PCGS. CAC. Ex: Eliasberg. The New Orleans Mint struck only 160,000 half dimes in 1853 before the weight was changed and arrows were added to either side of the date. Examples of this earlier issue experienced extensive circulation, and the No Arrows 1853 is widely regarded as a key date today, especially in high grades. This Plus-graded Gem representative was previously housed in the legendary Eliasberg Collection, and was described in that 1996 Bowers and Merena catalog as:

“The finest we have ever seen of this, a well known rarity in any grade, and a major rarity even in AU. This piece is absolutely unforgettable and will forever remain as one of the highlights in the present offering.”

This magnificent coin still ranks as the sole finest 1853 No Arrows half dime, even if only by the margin of the Plus designation. Delicately preserved, glowing luster illuminates lovely champagne-gray and ocean-blue toning on each side. The upper-left portion of the wreath, bowknot, and lower half of the date are weakly defined, as usual on this issue, but the strike is otherwise pleasing. A truly spectacular example of this scarce date, and a must-have for any serious Seated half dime collector.

Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 988; Central States Signature (Heritage, 4/2015), lot 4972. NGC ID# 233N, PCGS# 4352

1866 Seated Half Dime, MS67+
Only 10,000 Coins Minted, None Finer

3689 1866 MS67+ PCGS. From a production of just 10,000 coins, this issue claims the third-lowest regular-issue mintage in the entire half dime series after the 1867 and 1802. Superb Gem representatives such as this are extremely rare. Dappled russet and violet-gray interiors turn to ice-blue toning at the borders, with the pattern more pronounced on the obverse than the reverse. Liberty's head, the shield, and the wreath are fully detailed. Clash marks appear on both sides. Although this Superb Gem proof is not designated as such, there is decided cameo contrast between the frosty devices and reflective fields, generating strong eye appeal. Population: 5 in 67 (3 in 67+), 0 finer (1/17). NGC ID# 234J, PCGS# 4388

PROOF SEATED HALF DIME

1856 Half Dime, PR66+ Cameo
Vibrantly Toned Example

3690 1856 PR66+ Cameo PCGS. The year 1856 represents an expansion in proof coinage, and, even though mintage figures were not officially recorded, surviving populations suggest increased collector interest at the time. This half dime issue remains rare, however, and the grading service populations (22 coins certified by PCGS in total, 26 by NGC) are in close alignment with Breen's estimate of 30 to 40 pieces.

The present piece is the finest at PCGS by virtue of its Plus designation (1/17). Obverse fields of intense blue and gold contrast with a lighter figure of Liberty, awash in coral and silver. The brilliant reverse center is surrounded by thick shades of russet, magenta, and purple. The mirrors penetrate the toning on both sides, and the eye appeal is strong. NGC ID# 235L, PCGS# 84434 Base PCGS# 84435

EARLY DIMES

1796 JR-2 Draped Bust Dime, MS62
Heavy Clash Marks

3691 1796 JR-2, R.4, MS62 PCGS. This satiny MS62 JR-2 dime is among the finer examples of the variety that we have offered in recent years — only about 10% of all surviving 1796 dimes are from the elusive JR-2 die pair. Both sides show prominent clash marks but no evidence of die lapping. The obverse has minor rim crumbling at 10 and 2 o'clock, consistent with the late die state. An attractive example, this piece has muted silver luster and splashes of delicate gold toning. Trivial hairlines and marks are evident as expected at the grade level. The strike is generally bold, although slightly blunt at the center of the obverse and reverse where the eagle's head and breast are weak and the hair curls on Liberty's neck are poorly defined. Draped Bust 1796 dimes in general are scarce in pleasing Uncirculated condition. NGC ID# 236B, PCGS# 38743 Base PCGS# 4461

1807 JR-1 Dime, MS64
Highly Attractive for the Grade

3692 1807 JR-1, R.2, MS64 PCGS. Mint records report a mintage of 165,000 dimes in 1807, all delivered in the first two quarters of the year. Interestingly, only one die variety is known for the issue, and it is possible that about 40,000 to 50,000 of the coins delivered in the first quarter were actually dated 1805. The reverse die for the 1807 dime was previously employed for several quarter eagle coinages.

The present coin shows the usual clash marks on each side, though neither die is cracked, evidence that this piece was struck early in the production run. The central devices are boldly defined, although the left obverse and reverse borders are weak and uneven strike, as is normal for the issue. The centers exhibit pale golden-gray toning, while the margins display attractive aquamarine and olive-gold hues. The surfaces are unusually clean for the grade, giving this piece exceptional eye appeal. Population: 21 in 64 (1 in 64+), 7 finer (1/17).

Ex: Houston Money Show (Heritage, 12/2014), lot 3507. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIME

1827 JR-13 Dime, Prooflike MS64
Attractive Original Toning

3693 1827 Pointed Top 1, JR-13, R.3, MS64 NGC. Ex: Highland Collection. The 1827 Capped Bust dime is conditionally scarce in MS64 and rare finer. This JR-13 representative stands out among its peers with eye-catching prooflike fields on both sides, glimmering beneath areas of original aquamarine, lavender, and champagne toning. There are a few minor marks seen with a loupe, but none are individually significant. This is an evenly struck piece with sharp central devices. Census: 56 in 64 (1 in 64+), 33 finer (12/16). NGC ID# 2375, PCGS# 38823 Base PCGS# 4504

SEATED DIMES

1839-O/O No Drapery Dime, MS67+
Large O, F-104a, FS-501
Major Condition Rarity

3694 1839-O/O No Drapery, Large O, F-104a, FS-501, High R.4, MS67+ NGC. A Top 100 Fortin Variety. The Large O mintmark is boldly repunched southeast, and a die crack bisects the reverse, traveling through the I in UNITED, DIME, to the C in AMERICA. Star 8 is clearly repunched. The second-year 1839-O claims a mintage of 1.3 million coins and is considered relatively available, but Fortin notes that examples become decidedly scarce in EF condition. All Mint State coins are rare, while comparable Superb Gems are major rarities. Specialists will surely recognize the importance of this offering. Each side is untuned with incredibly strong detail around the borders and on Liberty's head, shield, and the olive leaves. Census: 1 in 67 (1 in 67+), 2 finer (1/17). NGC ID# 237Y, PCGS# 537685 Base PCGS# 4572

1874-CC Arrows Dime, VG10
Great Rarity in All Grades

3695 1874-CC Arrows, F-101, R.4, VG10 PCGS. The 1874-CC is a major key date in the Seated dime series, boasting a small mintage of 10,817 pieces. Survivors are rare in all grades and exist almost exclusively in low grades or with various environmental impairments. The present VG example is about the best that most collectors will have a chance to acquire, as the surfaces are smooth and free of impairments. Deep olive-gray toning encompasses each side as is typical for the issue and grade. LIBERTY is almost entirely visible, although a well-worn wreath on the reverse prevents a Fine 12 grade. Population: 5 in 10, 23 finer (1/17). PCGS# 538347 Base PCGS# 4669

1880 Dime, All-Brilliant MS68
36,000 Pieces Struck, None are Finer

3696 1880 F-102a, R.4, MS68 NGC. This is a later state of the proof dies. The second 8 is repunched, and the 0 in the date shows weakness at 6 and 11 o'clock. The letters TATES are repunched. The reverse die is heavily rusted, especially noticeable on the letters in ONE DIME. All-brilliant surfaces emit a pleasing frosty sheen over both sides. The design elements are well-struck, including Liberty's head, which is often weak on this issue. A nearly flawless Superb Gem that displays mild field-motif contrast. The 1880 Seated dime, from a mintage of 36,000 pieces, is scarce in all grades. It can be acquired through MS64 with patience and searching, but finer specimens are very rare. This piece ranks among the finest survivors. Census (all Fortin varieties): 4 in 68 (3 in 68★), 0 finer (1/17).

Ex: Atlanta Signature (Heritage, 4/2006), lot 415; Denver Signature (Heritage, 8/2006), lot 888; Bill Nagle (8/2006); Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98279. NGC ID# 23AT, PCGS# 538644 Base PCGS# 4688

1884-S F-102 Dime, MS67
Extremely Rare at This Grade Level
Former Eugene Gardner Coin

3697 1884-S F-102, R.3, MS67 PCGS. The 1884-S is one of the scarcer issues among late-date Seated dimes in Mint State. Just over half a million coins were struck, and this issue becomes conditionally rare at the Choice grade level. In MS67, the 1884-S is a premier rarity. PCGS and NGC each show a single finer submission in MS68, possibly representing the same former Pittman-Stellar coin. That coin sold in Part III of the Gardner Collection (Heritage, 5/2015). This example should generate significant interest among Registry specialists looking to assemble the finest possible set.

Frosty and brilliant at the centers with peripheral orange and magenta toning, the surfaces exhibit noticeable reflectivity and are devoid of all but the most trivial marks. A much scarcer date and one of the most impressive examples, technically and aesthetically, that we have offered. Population: 1 in 67, 1 finer (1/17).

Ex: Long Beach Signature (Heritage, 2/2002), lot 5509; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98291. PCGS# 593527 Base PCGS# 4693

PROOF SEATED DIMES

1859 Transitional Dime, PR65
Judd-233, Elusive Guide Book Variety

- 3698** 1859 Transitional, Judd-233, Pollock-280, High R.6, PR65 PCGS. CAC. The Stars Obverse design appears on regular issue dimes minted from 1838 to 1859, and the Cereal Wreath reverse design appears on regular issue dimes minted from 1860 to 1891. This variety combines the two designs into a transitional pattern that is struck in silver with a reeded edge. This stunning Choice proof dime exhibits fully mirrored fields that surround sharply defined devices beneath an overlay of gold, lavender, and blue patina. Diagonal die striations are clearly evident in the obverse and reverse fields.
Ex: Lindesmith Collection Sale (Bowers and Merena, 11/1999), lot 1145; Eugene H. Gardner Collection, Part III (Heritage, 5/2015, as PR64 PCGS with CAC approval), lot 98272; Central States Signature (Heritage, 4-5/2016), lot 4580; Dallas Signature (Heritage, 10/2016), lot 3078. NGC ID# 23CH, PCGS# 4749

1871 Dime, PR67 Cameo
Attractively Toned Top-Grade Example

- 3699** 1871 PR67 Cameo PCGS. F-102, R.4. This lovely Superb Gem proof displays rich lavender and sea-green toning over each side, the latter hue surrounding the peripheries. Appreciable cameo contrast emerges on the devices despite the patina. This Condition Census Cameo is well-struck and displays exceptionally clean surfaces. None are known finer. Population: 2 in 67 Cameo, 0 finer (1/17). NGC ID# 23CV, PCGS# 84764

1873 Arrows Dime, PR67 ★
Unparalleled Eye Appeal

- 3700** 1873 Arrows, F-102, R.4, PR67 ★ NGC. The Mint struck 500 proof dimes with the Arrows design in 1873, which was implemented to reflect a minuscule increase in silver weight. Collectors would be hard-pressed to locate an example of this two-year type with more eye appeal. A band of multicolor rainbow toning hugs the obverse borders and the lower reverse, while the remaining surfaces retain their brilliance. The strike is good and contact marks are nonexistent. Census: 4 in 67 (1 in 67+, 2 in 67★), 0 finer (1/17).
Ex: Jason Carter to Gene Gardner (5/2012); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98279; Central States Signature (Heritage, 4-5/2016), lot 4581; Summer FUN Signature (Heritage, 7/2016), lot 3809. NGC ID# 23DH, PCGS# 539033 Base PCGS# 4769

1874 Arrows Dime, PR65+ Cameo
Highly Sought-After Type Coin

- 3701** 1874 Arrows PR65+ Cameo NGC. CAC. Second year of this two-year type and a tremendously popular type coin. The fields are deeply reflective on each side and a significant amount of mint frost is seen over the devices, giving the coin its contrast. Pale golden color in the centers gradually deepens toward the margins. Census: 3 in 65 Cameo (1 in 65+), 4 finer. CAC: 1 in 65, 0 finer (1/17).
Ex: Long Beach Signature (Heritage, 9/2012), lot 3797. NGC ID# 23DJ, PCGS# 84770

BARBER DIME

1907-D Dime, Attractively Toned MS68
Unsurpassable Quality and Eye Appeal

3702 1907-D MS68 NGC. CAC. The 1907-D is much more difficult to locate than its generous production might indicate, with a mintage exceeding 4 million pieces. Indeed, PCGS and NGC combined report only about 200 examples in all levels of preservation. David Lawrence (1991) cites a 1907 account alleging that four wagonloads of dimes leaving the Denver Mint were lost in the Black Canyon (unfortunately, there are no figures on how many dimes comprise a wagonload).

Superb Gem examples such as the current offering are extremely rare. The two grading services have seen just four MS67s and two coins finer, both at NGC. Peripheral cobalt-blue, lavender, and gold-orange toning frames the soft rose-violet centers. The devices are sharply struck and both sides have been well cared for. Registry Set enthusiasts should be aware this coin, with CAC endorsement, is likely the leading candidate. Census: 2 in 68, 0 finer. CAC: 1 in 68, 0 finer (1/17). NGC ID# 23F4, PCGS# 4843

PROOF BARBER DIMES

1898 Dime, Border-Toned PR68 Cameo
Beautiful Type Coin

3703 1898 PR68 Cameo PCGS. CAC. PCGS has certified a total of six PR68 1898 dimes across all contrast categories with no coins numerically finer; of them, one non-Cameo, three Cameo, and two Deep Cameo (1/17). The obverse contrast is unmistakable, thanks to intense frost over the portrait and a decent berth of silver mirror before green-gold and orange hues take over at the margins. The border-toning is wider on the reverse with an added outermost element, cornflower-blue, but its contrast is considerable as well. This date is a popular one with type collectors across all denominations; the general consensus being that 1898 was generally the best-produced of all years for 19th century proofs. Ex: *Central States Signature* (Heritage, 4/2012), lot 5068. NGC ID# 26KV, PCGS# 84882

1908 Dime, PR67+ Cameo
Spectacular Toning

- 3704** 1908 PR67+ Cameo PCGS. Spectacular peach-gold, powder-blue, rose-red, and apple-green toning endows this fully struck and flashy Barber Gem. The eye appeal readily upholds the numerical grade. This piece is tied for the finest Cameo seen at PCGS, and it is conditionally rare as such. Population: 8 in 67 (2 in 67+) Cameo, 0 finer (1/17). NGC ID# 23GN, PCGS# 84892

MERCURY DIMES

1916-D Mercury Dime, XF40
First-Year, Low-Mintage Key

- 3705** 1916-D XF40 PCGS. A lightly worn specimen of this sought-after key, from a low first-year mintage of just 264,000 pieces. The lightly abraded surfaces retain a few traces of original mint luster under delicate shades of lavender and greenish-gold toning. All major design detail remains intact, but some blending is apparent on the wings of the cap and bands on the fasces. NGC ID# 23GY, PCGS# 4906

1921 Dime, MS66 Full Bands
Bold Obverse Peripheral Toning

- 3706** 1921 MS66 Full Bands PCGS. A highly appealing Premium Gem with ivory surfaces and frosty luster. The obverse displays deep russet and iridescent toning at the periphery, while the reverse shows hints of faint iridescence. The 1921 is a key-date in the series, although not in the same rarity category as the 1916-D issue. Nonetheless, the 1921 is extremely rare any finer than the present piece. An attractive, sharply produced example. Population: 48 in 66 (3 in 66+) Full Bands, 2 finer (1/17). NGC ID# 23HE, PCGS# 4935

1921-D Dime, MS66 Full Bands
Well-Struck, Bright Mint Luster

- 3707** 1921-D MS66 Full Bands NGC. The 1921 and 1921-D Mercury dime are popular semikey issues in the series, and yet paradoxically, a few nice pieces survive in Mint State. Those coins could possibly be the remnants of a small hoard or a couple of Brilliant Uncirculated rolls from a few decades past. This Premium Gem Full Bands coin sports silver-white surfaces that are nearly fully struck throughout, save for a couple of letter tops around the rim. The frosty luster adds to the appeal. Census: 14 in 66 Full Bands, 3 finer (1/17). NGC ID# 23HE, PCGS# 4937

1921-D Mercury Dime, MS66 Full Bands
Low-Mintage Better Date

3708 1921-D MS66 Full Bands PCGS. CAC. The 1921-D Mercury dime claims a mintage of just over 1 million pieces, the second-lowest production total of the series. As might be expected, the 1921-D is a sought-after key date, the second-rarest regular-issue Mercury dime, after the famous 1916-D. Most examples seen are softly struck on the peripheries, but this spectacular Premium Gem is sharply detailed in all areas. The bands on the fasces are fully split and rounded. The virtually pristine surfaces radiate vibrant mint luster on both sides, enhancing the terrific eye appeal. This coin should find a home in the finest collection or Registry Set. Population: 26 in 66 (7 in 66+) Full Bands, 1 finer. CAC: 10 in 66, 0 finer (1/17). NGC ID# 23HF, PCGS# 4937

1927-D Dime, MS66 Full Bands
Impressively Sharp

3709 1927-D MS66 Full Bands PCGS. CAC. The 1927-D Mercury dime is quite scarce in Mint State. The issue is also notorious for its inexplicable poor overall quality, especially the well-known weakness at the peripheries and in the central and diagonal bands (David Lange, 2005). Any coin that exceeds those expectations is a welcome contradiction indeed.

This Premium Gem displays fullness on all of the bands, and much better-than-average definition on the peripheral elements. Highly lustrous surfaces are covered in light gray and iridescent rainbow coloration on the obverse, while gray-tan patina on the reverse is sprinkled with russet. A couple of pinprick obverse marks exist but are really not worth any additional discussion. CAC endorsement confirms the quality surfaces. Population: 31 in 65 (3 in 65+) Full Bands, 13 finer (1/16). NGC ID# 23HV, PCGS# 4963

**1931-S Dime, MS67 Full Bands
Attractive Registry Set Contender**

3710 1931-S MS67 Full Bands PCGS. After low mintages of dimes at all three Mints in 1931, no more dimes were struck until 1934 — the two-year hiatus in deference to the grip of the Great Depression. Just 1.8 million pieces were struck at the San Francisco Mint, and most circulated extensively throughout the financial and social turmoil. Still, rolls could be had from the Treasury Department at face value in 1932, a luxury few could afford.

The 1931-S is scarce not only in an absolute sense, but high Uncirculated conditions, too. Production at the Mint was careless, and Full Bands examples are scarce in all Uncirculated grades. The present Superb Gem displays pale ice-blue patina with softly glowing silver luster, with occasional areas of olive-gray toning that appear intermittently on the fields and near the borders. The surfaces are satin-smooth and attractive with sharp definition not only on the fasces, but throughout all of the raised elements. No finer coins are certified with Full Bands by either service. Population: 9 in 67 Full Bands, 0 finer (1/17). NGC ID# 23J9, PCGS# 4987

**1942/1-D Overdate Dime, MS63 Full Bands
Minimally Abraded Surfaces**

3711 1942-1-D FS-101 MS63 Full Bands PCGS Secure. The surfaces of this scarce overdate are remarkably lustrous for a Denver product. Each side is brilliant and there are only the slightest abrasions scattered over each side. The underdigit is faint, unlike its P-mint counterpart, but easily discernable with a magnifier. Population: 25 in 63 Full Bands, 86 finer (1/17).

Ex: *Central States Signature* (Heritage, 4/2012), lot 4149. PCGS# 145476 Base PCGS# 5041

TWENTY CENT PIECE

**1875-S Twenty Cent Piece, MS66
Ideal Type Representative**

3712 1875-S MS66 PCGS. CAC. From a mintage of more than 1.1 million pieces, the 1875-S twenty cent piece is the ideal choice for a type representative of this short-lived denomination. This well-detailed Premium Gem is somewhat softly struck, as usual with this issue, but the well-preserved surfaces are lustrous and attractively toned in delicate shades of lavender and gold. Housed in a green label holder. Population: 66 in 66 (6 in 66+), 5 finer. CAC: 17 in 66, 0 finer (1/17). NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECE

1876 Twenty Cent, Toned PR65

3713 1876 PR65 NGC. BF-3, R.4. This Gem proof enjoys needle-sharp detail throughout the devices and deep mirroring in the fields. Field-device contrast is evident on each side, but vivid sun-orange, violet, and aquamarine toning prevents a Cameo designation from NGC. Finer 1876 proofs are rarely seen. Census: 25 in 65, 13 finer (1/17). NGC ID# 27H3, PCGS# 5304

EARLY QUARTER

1804 Quarter, B-1, Choice VF
Seldom Available Finer

3714 1804 B-1, R.3, VF35 PCGS. Tompkins Die State 3/3. The 1804 is the key issue in the Draped Bust, Large Eagle type. The date is usually seen no more often than the 1796 one-year type, and indeed the two dates have similar reported mintages: 6,146 coins for the 1796, 6,738 pieces for the 1804. Most 1804 quarters are heavily circulated, grading in the low VF or lesser levels. This Choice VF coin is conditionally scarce, and finer examples of the date are rare. Collectors seeking a significant amount of detail but without breaking the bank will want to give this piece close consideration, especially since it will fit in nicely with an otherwise XF date or type collection. It shows excellent hair and feather detail in the centers, and the rims are bold. The stars and clouds immediately above the eagle's head show the only mentionable strike weakness. Several obverse peripheral stars may have been incompletely struck, but grade-consistent wear gives them all a uniform appearance. Population: 12 in 35, 16 finer (1/17). NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

BUST QUARTER

1832 Quarter, Richly Toned MS64
B-2, Small Arrowheads

3715 1832 B-2, R.2, MS64 PCGS. Tompkins Die State 2/2. As a rule, few 1832 quarters of either the B-1 or B-2 variety exist in high Mint State. We have only offered a few pieces over the years. Coppery-orange and purplish-blue toning benefit from strong mint luster that glows from beneath the rich patina of this near-Gem Browning-2 quarter. The surfaces are remarkably free of abrasions save for two or three faint lines in the left obverse field, while the strike is bold except at the centers of stars 1 to 3 and the top fold of Liberty's cap. Population (all varieties): 15 in 64, 3 finer (1/17). NGC ID# 23RX, PCGS# 38988 Base PCGS# 5351

SEATED QUARTERS

**1843-O Large O Seated Quarter, MS63+
Finest Known, Ex: Eliasberg**

- 3716** 1843-O Large O, FS-501, MS63+ PCGS. CAC. Ex: Eliasberg. The Large O mintmark, as *Cherrypickers'* notes, was "likely intended for a half dollar." This piece is an early die state of the variety, where the high mintmark brushes up against the arrow fletchings and the olive branch. Only minor signs of die rust exist — a feature that contrasts with most examples, where the dies are heavily rusted. Both sides are blanketed in attractive shades of dove-gray, champagne-gold, and lavender toning, with soft mint luster shining through the patina. The design elements are well-detailed, and the fields show only minor signs of contact.

This is the sole finest example of the Large O 1843-O Seated quarter by a country mile, unknown in Uncirculated until the 1997 Eliasberg sale. NGC reports an MS64 example, but it is the same coin as this one. Now certified MS63+ PCGS with CAC endorsement, it is the only 1843-O Large O quarter certified in Uncirculated by either service, with its nearest competitor at PCGS grading only AU53. The finest at NGC is XF45 once the duplicate submission is removed. Population: 1 in 63+, 0 finer (1/17).

Ex: Louis Eliasberg, Sr. Collection (*Bowers and Merena*, 4/1997), lot 1434; *FUN Signature* (Heritage, 1/2013), lot 5594; Eugene H. Gardner Collection, Part III (Heritage, 5/2015 as MS64 NGC), lot 98335. NGC ID# 23SS, PCGS# 395927 Base PCGS# 5405

**1850 Quarter Dollar, MS64
Conditionally Rare**

- 3717** 1850 Misplaced Date, Briggs 1-A, FS-301, MS64 PCGS. CAC. All circulation-strike 1850 quarters seen exhibit the misplaced 1 in the dentils below the primary 1. This issue is rare in any Mint State grade, and the present CAC-endorsed near-Gem is just shy of the Condition Census. The coin displays brilliant, satiny luster with a few light marks in the fields. The eagle's left (facing) leg shows minor softness, but the obverse is boldly defined. Population: 4 in 64, 1 finer. CAC: 3 in 64, 2 finer (12/16). NGC ID# 23T4, PCGS# 395929 Base PCGS# 5415

**1852 Seated Quarter, MS65+
Sole Plus-Graded Gem at PCGS**

- 3718** 1852 MS65+ PCGS. Briggs 2-B. The 1852 Seated quarter is an elusive Philadelphia issue from the first part of the series and is rarely seen in Mint State. This high-end Gem example is sure to excite knowledgeable students of the series. Bold motifs and broad rims are accentuated by satiny luster with delicate rose-gold and lavender hues gracing each side. A lack of distracting abrasions confirms the lofty grade. Population: 4 in 65 (1 in 65+), 3 finer (1/17). NGC ID# 23T8, PCGS# 5419

1856-S Quarter, MS62
Mint State Rarity

3719 1856-S MS62 PCGS. Briggs 1-B. With merely a dozen Mint State grading events at the two services combined, there can be little argument over the conditional rarity of the 1856-S quarters. The mintage was small to begin with — just 286,000 pieces — and the coins were soon immersed in the small change-starved West Coast commerce, where most were lost to attrition.

The coin displays faint, pale-blue color with equally faint peach-gold at the borders, sprinkled with golden-gray accents. Mint luster shines through the light patina. A few minor surface abrasions are visible with a glass. The star centers, Liberty's hair strands, and the eagle's plumage confirm a tack-sharp strike. This MS62 example is one of five pieces so-graded at PCGS, with 16 examples reported in finer grades (2/16). NGC ID# 23TD, PCGS# 5440

1856-S Quarter, Toned MS63
Among the Finest Known

3720 1856-S MS63 PCGS. CAC. Briggs 1-A. The 1856-S quarter was heavily circulated in the Western regions, and only a dozen Mint State survivors are reported by PCGS and NGC combined. This Select example is within the Condition Census, with only two finer coins known. The strike is sharp, and each side displays satiny lavender-gray luster with significant olive-green and gold toning on each side. A few minor abrasions are consistent with the grade. We have handled only two other Select representatives within the last ten years, and only one of those was CAC-approved like the present coin. Population: 4 in 63, 2 finer. CAC: 2 in 63, 0 finer (1/17). NGC ID# 23TD, PCGS# 5440

**1871 Seated Liberty Quarter, MS65 Prooflike
Finest Certified at NGC**

- 3721 1871 MS65 Prooflike NGC.** This Gem 1871 quarter boasts beautifully reflective fields and frosty surfaces that are well within the context of the Prooflike designation. The strike is bold but not quite absolute, and the already-high eye appeal is furthered by the lovely ring of peach-gold toning encircling each side. The 1871 quarter issue was a low 118,200 circulation strikes — even though that was the largest production since the end of the Civil War. NGC reports four other MS65 specimens of this issue, but this is the sole Prooflike in any grade (1/17). NGC ID# 23UM, PCGS# 85478 Base PCGS# 5478

**1875-S Quarter, Premium Gem
Carefully Preserved and Colorful**

- 3722 1875-S MS66 PCGS.** A colorful San Francisco quarter, one of the few to come out of the California economy of the time in better-than-Gem condition. Dominant colors include peach and various blues with several hues in-between. Minor striking softness at the stars flanking Liberty's head is one of the few perceptible faults. Population: 3 in 66, 0 finer (1/17). NGC ID# 23UZ, PCGS# 5500

**1882 Seated Liberty Quarter, MS68
Tied for Finest Certified**

- 3723 1882 MS68 PCGS. Briggs 1-A.** Only 15,200 Seated Liberty quarters were struck in 1882, certainly a small production total in absolute terms, but about on par for Seated quarters of this time frame. The 1882 has a low survival rate however, as Larry Briggs notes the issue is “scarcer than the previous 3 years,” which all had similar mintages.

The present coin is one of the very finest survivors, with the highest available technical quality and incredible eye appeal. For some reason, most of the really high grade specimens of this issue we have seen were softly struck on the obverse. This coin shows a touch of that softness on the figure of Liberty, but the stars are unusually sharp, compared to other MS68 specimens we have offered. The virtually pristine surfaces are visited by vivid shades of golden-brown and violet toning, with vibrant, satiny mint luster underneath. This coin is a must-have specimen for the finest Registry Set. Population: 2 in 68, 0 finer (1/17). NGC ID# 23VE, PCGS# 5514

1889 Quarter, Toned MS67+
Eye-Appealing Seated Liberty Type Coin

3724 1889 MS67+ PCGS. Briggs 1-A. This late-series type-coin issue boasts an enticingly low mintage of only 12,000 pieces. Although MS67 coins are collectible for a price, finer pieces are extremely rare. This Plus-graded Superb Gem yields frosty luster and traditional sun-gold, olive-green, lavender, and blue toning. The strike is bold, and there are no bothersome abrasions. Population: 36 in 67 (10 in 67+), 2 finer (12/16). NGC ID# 23VM, PCGS# 5522

PROOF SEATED QUARTERS

1865 Seated Liberty Quarter, PR68
Tied for Finest Certified, Ex: Gardner

3725 1865 PR68 NGC. Briggs 3-B. All 1865 proof quarters are of the Briggs 3-B variety. The obverse proof die exhibits rust in the field to the left of the rock, and the base of 1 in the date is thinner than on the business strikes. This 1865 proof quarter was struck during the last year of the Civil War. It was not only the circulation-strike mintages that suffered while the conflict raged. Even proof emissions were lower — in the case of 1865, only 500 proof coins plus a meager complement of 58,800 pieces for purported circulation. This is in contrast to 1,000 proofs plus more than 800,000 business strikes for the 1860 quarters, struck the year before the war began.

Auburn toning blankets Liberty, contrasting with the surrounding charcoal surfaces. There is a partial print mark in the right field. The reverse is an even sea-green throughout, and there are no abrasions of note on either side. The strike is needle-sharp and the star centers, so often a problem in the Liberty Seated quarter series, are completely delineated. Census: 2 in 68, 0 finer (1/17).

Ex: Bill Nagle (8/2006); Eugene H. Gardner, Part III (Heritage, 5/2015), lot 98383; Houston Signature (Heritage, 12/2015), lot 3145. NGC ID# 23WT, PCGS# 5561

1867 Seated Quarter, PR67 ★ Cameo
Stark Brilliant Contrast

- 3726** 1867 PR67 ★ Cameo NGC. This stark-white Superb Gem Cameo displays dramatic contrast and unmarked surfaces. The depth of mirroring in the fields is exceptional. Slight strike weakness on the obverse stars and Liberty's temple is not unusual for the type. No Ultra/Deep Cameos are certified this fine at either service. Census: 3 in 67 Cameo (1 in 67 ★), 0 finer (1/17). NGC ID# 23WY, PCGS# 85566

BARBER QUARTERS

1896-S Barber Quarter, AU Details
Low-Mintage Key

- 3727** 1896-S — Cleaning — PCGS Genuine. AU Details. From a low mintage of 188,039 pieces, the 1896-S Barber Quarter is one of the three key dates of the series. This pleasing specimen features sharply detailed design elements that show just a trace of high-point wear, and lightly abraded surfaces that show unnatural lavender toning and subdued mint luster, due to a light cleaning long ago.

1896-S Quarter Dollar, AU55
Key San Francisco Issue

- 3728** 1896-S AU55 PCGS. The earliest of the three major keys in the Barber quarter series, the 1896-S comes from a small mintage of 188,039 coins and is scarce in the upper circulated grades. This Choice AU representative displays bold detail with only slight high-point friction. Some semiprooflike reflectivity is seen in the fields. Both sides have dusky milk-white patina with no major abrasions. Population: 7 in 55, 37 finer (1/17). NGC ID# 23Y9, PCGS# 5615

1897-O Barber Quarter, MS67+
Fantastic Rim Patina
Sole Finest Certified

- 3729** 1897-O MS67+ NGC. This 1897-O quarter would be a capstone acquisition, a prize for many a nice set of Barber quarters. It will also attract the considerable attention of Registry Set enthusiasts and others who simply appreciate its enormous aesthetics. Small areas of untuned silver in the centers are bounded by incredibly attractive rim toning on each side. The reverse palette is dominated by intense but not deep amber-gold and orange the color of a clear sunset, with small slivers of pale ice-blue at the extreme rims. The ice-blue becomes more dominant on the obverse, flattering central rose and pale violet hues. A few faint marks on the neck of Liberty are consistent with the high Superb Gem grade. The strike is close to full on the obverse, save for slight weakness on stars 7, 10, and 11. Minor strike weakness also shows on the lower reverse at the right (facing) eagle's claws and the fletchings, but this is quibbling on a coin of such exceptional quality overall. The eye appeal of this much better-date early Barber quarter issue could scarcely be bettered. Census: 3 in 67 (1 in 67+), 0 finer (1/17). NGC ID# 23YB, PCGS# 5617

1898-O Quarter Dollar, MS65 Reflective Fields

- 3730 1898-O MS65 PCGS.** The 1898-O is a better-date Barber quarter in high grade, rarely seen at the Gem level. This piece displays a bold strike and semiprooflike fields. Warm golden toning spreads over each side, although tinges of lavender and blue also appear at the borders. Population: 8 in 65, 9 finer (1/17). NGC ID# 23YE, PCGS# 5620

1898-S Quarter, MS65 Frosty and Delicately Toned

- 3731 1898-S MS65 PCGS.** The 1898-S Barber quarter claims a nominal mintage of slightly more than 1 million pieces but few examples were saved by contemporary collectors. In fact, many coins were shipped overseas, to the Philippines and other destinations after the Spanish-American War. This delightful Gem displays sharply detailed design elements and vibrant mint luster under shades of lavender-gray and golden-brown toning. Population: 8 in 65 (1 in 65+), 2 finer (1/17). NGC ID# 23YF, PCGS# 5621

1909-S Barber Quarter, MS67 Semireflective Fields

- 3732 1909-S MS67 NGC.** This is an exceptionally well-preserved example with semiprooflike fields and light iridescent toning. The eagle's right (facing) talons show the only mentionable design weakness, although faint die striations can be discerned across the high points of the central devices, not completely struck out of the planchet during production. Census: 3 in 67, 0 finer (1/17). NGC ID# 23ZK, PCGS# 5656

PROOF BARBER QUARTERS

1892 Quarter, Toned PR68 Tied for Finest, CAC-Approved First Generation PCGS Holder

- 3733 1892 PR68 PCGS. CAC.** Type Two Reverse. Among the finest certified and one of only five for the grade with CAC endorsement, this remarkable PR68 1892 Barber quarter represents the epitome of the ideal Registry coin. The obverse displays rich umber and red-gold internal hues with sea-green and olive border toning, while the reverse displays large patches of olive-green with the upper-right quadrant brilliant. Deeply mirrored fields are evident through the patina. The strike is razor-sharp, and there are no discernible marks. The 1892 is rarely seen this fine, with or without Cameo contrast. CAC-endorsed in an old "rattler" holder. Population: 5 in 68, 0 finer. CAC: 5 in 68, 0 finer (1/17). NGC ID# 2427, PCGS# 5678

1898 Quarter, Toned PR68
Stark Cameo Obverse

- 3734 1898 PR68 PCGS.** Tied for the finest non-Cameo at PCGS. The strike is needle-sharp, and the preservation is immaculate. The obverse is starkly contrasted beneath light golden toning with the faint remnant of a print on Liberty's neck. The reverse is deeply toned in lavender-gray, gold, and amber hues that preclude field-device contrast. The 1898 proof is rarely seen this fine. Population: 5 in 68, 0 finer (1/17). NGC ID# 242D, PCGS# 5684

1913 Quarter, Toned PR68
Exceptional Quality

- 3735 1913 PR68 NGC.** This gleaming Superb Gem proof displays vivid sea-green, violet, and olive-gold toning over each side, while the devices offer satiny luster that sets them off from the mirrored fields. Trivial weakness is seen on the eagle's right (facing) talons and shoulder junction. The 1913 proof is a major condition rarity in PR68 and is almost unknown finer. Census: 4 in 68, 1 finer (1/17). NGC ID# 242V, PCGS# 5699

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, MS62 Full Head
20th Century Rarity

- 3736 1916 MS62 Full Head NGC.** The 20th century in U.S. numismatics supplies collectors with several series that are decidedly on the short side, especially when compared with their 19th century predecessors. The Standing Liberty series stands alone as the shortest regular-issue subsidiary silver series of the 20th century — although it is far from an easily completed one. Elusive dates include the famous 1918/7-S, the 1923-S, and the 1927-S, but none of them challenge the 1916 as the undisputed key to the series. Only 52,500 Standing Liberty quarters were manufactured in mid-December 1916. The coins were introduced alongside 1917-dated pieces, and many went unnoticed — and unsaved — as a result. This is a bright example with shimmering mint luster. The fields show the usual granularity and there are few abrasions evident. Sharply defined throughout. NGC ID# 2AMV, PCGS# 5705

1917-S Type Two, Lightly Toned MS67
The Sole Finest Non-Full Head at PCGS

- 3737** 1917-S Type Two MS67 PCGS. CAC. This is sole finest non-Full Head 1917-S Type Two quarter at PCGS; NGC reports two pieces in this grade, also with none finer (1/17). Vibrant luster rolls over unabraded surfaces. Each side shows primarily yellow-gold toning, although the obverse has pale lavender across the upper-left margin. Liberty's head is predictably weak, but the remainder of the design is well-defined. NGC ID# 3TEN, PCGS# 5718

1918/7-S Quarter, XF45
Colorfully Toned

- 3738** 1918/7-S FS-101 XF45 PCGS. Rich shades of crimson, violet, and gold color this widely sought-after hubbing error, showing the 8 over a 7 in the date. This 1918/7-S quarter experienced a short stay in circulation, and while mild blending appears over exposed areas, the overall impression remains strong. Any Standing Liberty quarter specialist would proudly include this example in his or her set. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

1919-D Quarter, MS66 Full Head
An Extremely Rare Issue This Fine
A Registry-Grade Showpiece

3739 1919-D MS66 Full Head NGC. The 1919-D Standing Liberty quarter is one of the biggest key dates in the series in high-grade Full Head. Full Head pieces appear at auction slightly less often than those of the 1919-S, and few Gem-quality coins have been offered in recent years. At the Premium Gem level, Full Head 1919-D quarters are extremely rare. We have offered such a coin on only seven previous occasions in the past two-plus decades, only one of which has been within the last 10 years. The present coin is the first MS66 Full Head we have offered since our February 2012 Long Beach Signature sale, where a PCGS Secure coin realized \$80,500. Before that, an NGC piece garnered \$63,250 in our October 2006 Dallas Signature auction.

The rarity of this issue in high-grade Full Head is well-established. In *Standing Liberty Quarters*, fourth edition, J.H. Cline calls the 1919-D “one of the most underrated dates and mintmarks in the whole series in MS65/67, Full Head.” NGC and PCGS combined list only nine representatives at the Premium Gem Full Head level (1/17). Only one coin is finer, the MS67 Full Head piece from the Just Having Fun Collection, which realized nearly \$150,000 in that August 2012 Stack’s/Bowers auction.

The present coin is fresh to the market for this grade. Collectors familiar with the often deficient strike of the 1919-D quarter will appreciate the presence of only minor softness on the shield rivets and the leading edge of the eagle’s left (facing) wing, with no other distinct weakness. Liberty’s head shows separated leaves and a bold hairline. The date is razor-sharp, and the stars are well brought up. A loupe reveals some faint incompleteness along the left and right obverse border beads. The entire design is softly illuminated by satiny luster that shows a hint of pale champagne color, and careful scrutiny of the surfaces fails to uncover a single noteworthy abrasion. With only one finer piece reported, it is difficult to imagine a better opportunity for the advanced Registry Set collector to acquire this conditionally rare Denver issue in a showcase-worthy grade. NGC ID# 243C, PCGS# 5731

1920 Standing Quarter, MS67+
Tied for the Finest Certified

- 3740 1920 MS67+ PCGS.** An extraordinary Superb Gem, this Standing Liberty quarter has frosty and fully brilliant centers inside thick peripheral iridescent toning. Far finer than usual, the head details are virtually full, and the shield is nearly complete. Eye appeal excels. Population: 25 in 67 (4 in 67+), 0 finer (1/17). NGC ID# 243E, PCGS# 5734

1920-S Quarter Dollar, Gem Full Head
An Underrated Rarity This Fine

- 3741 1920-S MS65 Full Head PCGS.** A blush of champagne toning graces satin luster on this Gem Full Head 1920-S quarter. The shield rivets are also better defined than normal, and the central gown folds and the leading edge of the eagle's left (facing) wing are comparably well-defined. The top of the date numerals blend with the pedestal as normal. The rarity of this coin in its given grade is underappreciated by many collectors. The 1920-S is seldom offered in any Full Head grade, and Gems are a minority. Above MS65 Full Head, the 1920-S becomes extremely rare. This example is highly appealing for the grade and issue. Population: 17 in 65 (1 in 65+) Full Head, 9 finer (12/16).
Ex: *Portland Signature (Heritage, 3/2004), lot 5734.* NGC ID# 243G, PCGS# 5739

1926-D Quarter, MS64 Full Head
Series Key in Full Head

- 3742 1926-D MS64 Full Head NGC.** This is a brilliant and lustrous example with a strong strike and exceptional eye appeal for the grade. The 1926-D is, by far, one of the most challenging Standing Liberty quarters to locate with a Full Head plus good definition on the central portrait. Here, the shield rivets show only a hint of weakness and Liberty's head is bold. Gleaming icy-smooth fields alternate between reflectivity and frosty texture. The coin is untuned save for a pale hint of gold in the top-right field. Census: 20 in 64 Full Head, 10 finer (1/17). NGC ID# 243S, PCGS# 5757

1926-S Quarter, MS63 Full Head
Vibrant, Nearly Mark-Free Surfaces

- 3743 1926-S MS63 Full Head NGC. CAC.** This is the sole CAC-endorsed coin at the MS63 Full Head level, a tribute to the near-brilliant silver surfaces and the dazzling mint luster that pours over both sides of this frosted Select Uncirculated example. It is estimated only 1 in 150 coins qualify for Full Head designation for the 1926-S. This example is sharp in that regard, with only the usual weakness at the shield rivets and a pair of tiny ticks on the neck to be mentioned. The eye appeal and smooth, lustrous surfaces suggest an even finer grade. Census: 9 in 63 Full Head, 29 finer. CAC: 1 in 63, 8 finer (1/17). NGC ID# 243T, PCGS# 5759

1927-S Quarter, Frosty MS67
Among the Finest Known

3744 1927-S MS67 PCGS. There are many dates in the Standing Liberty quarter series that are rare in Mint State Full Head, but the 1927-S is one of the few issues that is also scarce in non-Full Head Uncirculated grades. The 1927-S had a small mintage of only 396,000 pieces. In perspective, this was fewer coins than there were residents of San Francisco in 1927. Any Uncirculated survivor is a prize acquisition for the series enthusiast, although Premium Gems or finer coins are especially scarce; it has been almost eight years since we last offered a Superb Gem example of this classic S-mint key.

The present coin is something special. Frosty luster illuminates the fields and unabraded surfaces. Were it not for a couple of tiny ticks on Liberty's knee, an even finer grade might have been achieved. Liberty's head and the shield rivets show typical weakness, although the overall strike is above-average for the issue. The 1927-S is extremely rare this fine and unknown numerically finer. Population: 6 in 67 (1 in 67+), 0 finer (1/17). NGC ID# 243W, PCGS# 5764

1928-S Quarter, MS67 Full Head
Exceptional Luster and Preservation
Among the Finest at PCGS

3745 1928-S MS67 Full Head PCGS. Incredible preservation is one of many exciting attributes for this Superb Gem 1928-S quarter dollar. Delicate iridescent toning embraces vibrant, frosty surfaces. Liberty's head is razor-sharp, although the shield rivets and the eagle's breast exhibit more traditional softness. Nonetheless, eye appeal excels in every respect. No Full Head coins are numerically finer at PCGS. Population: 23 in 67 (3 in 67+) Full Head, 0 finer (1/17). NGC ID# 243Z, PCGS# 5771

1929-D Quarter, MS67 Full Head
The Sole Finest Known

- 3746** 1929-D MS67 Full Head NGC. For most collectors, the 1929-D Standing Liberty quarter cannot be obtained above MS66 Full Head. The present coin is the only Superb Gem certified with Full Head detail (1/17), and it is here making its first appearance at auction. Even in MS66 Full Head, the 1929-D is conditionally rare — we have offered such a piece on only 18 occasions in more than two decades, including multiple reappearances of the same few coins. We are excited to see this finest-known representative cross the auction block, as the 1929-D has in recent years received much recognition as a semikey in high-grade Full Head. The head and shield rivets are bold, and the eagle is well-defined. The only notable weakness occurs on the bottom two obverse stars, which is only observed beneath a loupe. This piece displays frosty luster and unabraded surfaces with a delicate champagne hue over each side. NGC ID# 2443, PCGS# 5775

WASHINGTON QUARTERS

1934 Quarter, Top-Grade MS66+
Doubled Die Obverse

- 3747** 1934 Doubled Die Obverse, FS-101, MS66+ PCGS. CAC. The doubled die is most prominent on IN GOD WE TRUST and is discernible there to the unaided eye. This variety is scarce in high grade, and the current coin is tied for the finest attributed by the grading services (12/16). The design elements exhibit bold detail amid frosty, champagne-tinted luster. No distracting abrasions are seen. Population: 14 in 66 (2 in 66+), 0 finer. CAC: 6 in 66, 0 finer (12/16). NGC ID# 244A, PCGS# 5900 Base PCGS# 5795

1936-D Quarter, Rim-Toned MS67
Conditionally Elusive

- 3748** 1936-D MS67 PCGS. The 1936-D issue in the Washington quarter series, despite a healthy mintage exceeding 5.3 million coins, seems mostly to have slipped into circulation for the most part, and Superb Gem survivors are elusive, as they are for the 1934-D and 1935-D as well. This piece shows wine and cinnamon rim toning contrasting against silver, satiny untuned areas elsewhere. The profile of Washington is free from mentionable perturbances, as is the eagle on the reverse. Population: 21 in 67 (1 in 67+), 0 finer (1/17). NGC ID# 244H, PCGS# 5801

1937 Quarter, Lightly Toned MS65
Doubled Die Obverse

- 3749** 1937 Doubled Die Obverse, FS-101, MS65 PCGS. Die doubling is evident on the date and IN GOD WE TRUST. Satiny luster shows hints of champagne toning, with flecks of violet and olive near the upper obverse border. The strike is sharp, and there are no obvious abrasions. This *Guide Book* variety is rare in Mint State, and pieces grading as fine as MS65 are extremely so. Population: 3 in 65, 2 finer (1/17). PCGS# 145291 Base PCGS# 95803

1943-S Doubled Die Obverse Quarter
MS66, FS-101, *Guide Book Variety*

- 3750** 1943-S Doubled Die Obverse, FS-101, MS66 PCGS. CAC. Listed in the *Guide Book*, FS-101 exhibits strong clockwise die doubling on the central letters in IN GOD WE TRUST. The date and LIBERTY are also nicely doubled. Lightly dappled russet toning adorns the obverse of this lustrous and splendidly preserved Premium Gem. The reverse is essentially brilliant. Population: 14 in 66 (2 in 66+), 0 finer. CAC: 8 in 66, 0 finer (1/17). NGC ID# 2457, PCGS# 145154 Base PCGS# 5823

1946-D Quarter, MS67+
Beautiful Luster and Border Toning

- 3751** 1946-D MS67+ PCGS. CAC. 30th Anniversary Green Label Holder. Vivid forest-green, violet, and gold border toning appears around the obverse rim and occasionally around the reverse as well. The interiors offer warm champagne color atop softly frosted mint luster. The strike is sharp, and the preservation is unsurpassed in a PCGS holder. Among the finest endorsed by CAC. Population: 77 in 67 (3 in 67+), 0 finer. CAC: 22 in 67, 0 finer (1/17). NGC ID# 245F, PCGS# 5831

PROOF WASHINGTON QUARTERS

1950 Quarter, PR68 ★ Cameo
Registry Set Example

- 3752** 1950 PR68 ★ Cameo NGC. This is an absolutely stunning quarter with incredible white mint brilliance over the devices and bold, mirrored fields. The design motifs seem to float across the surfaces of this superlative proof. Every detail on each side is as sharp as the dies themselves. Memorable and exciting. Census: 16 in 68 Cameo (4 in 68 ★), 0 finer (12/16).
Ex: Houston Signature (*Heritage*, 11/2007), lot 60941; FUN Signature (*Heritage*, 1/2008), lot 2071; Long Beach Signature (*Heritage*, 5/2009), lot 706; Long Beach Signature (*Heritage*, 9/2009), lot 704; PNG Invitational (*Heritage*, 10/2014), lot 4749. NGC ID# 27VA, PCGS# 85982

1952 Quarter, PR68 Ultra Cameo
Stunning Contrast

- 3753** 1952 PR68 Ultra Cameo NGC. Though most early-1950s proof coins fell well short of the Cameo ideal, this coin earned its Ultra Cameo designation in convincing fashion. Glassy, minimally toned mirrors set off the frost of sharply struck devices, particularly the portrait. Brilliant throughout. Census: 5 in 68 Ultra Cameo (2 in 68 ★), 0 finer (12/16). NGC ID# 4C5K, PCGS# 95984

1973-S Quarter, PR70 Deep Cameo
Top-Grade Rarity

- 3754** 1973-S PR70 Deep Cameo PCGS. One of only eight Deep Cameos in flawless PR70 condition, all PCGS-certified (1/17). This must-have Registry coin displays a perfect strike and exceptional field-device contrast. Light golden toning adds warmth to each side. Most earlier issues in the proof Washington quarter series do not exist at PCGS in PR70. NGC ID# 27JD, PCGS# 96005

EARLY HALF DOLLARS

1794 O-101 Flowing Hair Half, VF30
Pleasing Collector-Grade Example

3755 1794 O-101, T-7, High R.3, VF30 PCGS. Tompkins Die State 1/1. The date is widely spaced with the 1 higher than the other digits. Star 1 penetrates the lower curl and star 2 points to the tip of the second curl. The O-101 is the most available of 11 die marriages required to strike a reported mintage of 23,464 pieces. Researchers still debate the exact mintage of 1794 half dollars and their delivery dates, although most of the coins were certainly struck and delivered in 1795. Whatever the mintage, the 1794-dated coins are in strong demand by collectors regardless of variety in all conditions.

A glass reveals some light adjustment marks on the obverse and the expected minor abrasions from circulation, although these factors are not readily apparent in-hand. The rims, dentils, hair strands, and date are well-defined for the VF level. Attractive slate-gray toning displays blue and rose-gold accents. The reverse is glossy and sharp with olive-gray color with few marks and smooth, light wear. Population (all varieties): 27 in 30, 46 finer (12/16). NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 Flowing Hair Half Dollar, VG10
Important First-Year Issue, O-101a, T-7

3756 1794 O-101a, T-7, High R.3, VG10 NGC. This is an evenly worn, original example of this first-year half dollar issue, showing consistent olive and gunmetal-gray toning that lightens to golden-gray over the relief elements. The borders are complete and the date is clear. Some crisscrossing adjustment marks are present on the obverse portrait. This late die state variant of O-101 is heavily cracked through the F in OF and from the rim to the left of the first S in STATES. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, Good 4
Very Scarce Overton-104

3757 1794 O-104, T-11, R.5, Good 4 PCGS Secure. Ex: Newman. The rim die break at 4 o'clock on the reverse is usual for the variety. All legends are clear except OF, which is faint but readable. A few right-side stars fade into the rim. At one time, the coin was stored in one of Eric P. Newman's brown paper envelopes where it developed a protective patina of antique gray toning. The smooth surfaces are a delight for this much abused date, type, and the assigned grade. Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$25.00; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection Part II Signature (Heritage, 11/30/13 as Good 4 NGC with CAC), lot 33528. NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

1795 Flowing Hair Half, VF35
O-108a, Two Leaves, Late Die State

3758 1795 2 Leaves, O-108a, T-17, R.4, VF35 NGC. Tompkins Die State 4/3. The surfaces are glossy beneath the bluish-gray toning. A glass reveals small marks and a few planchet pits, but they are tiny and far less visible in-hand. Struck from the late die stage with numerous peripheral die cracks on both sides. Toned-over adjustment marks are noted across the central reverse. NGC ID# 24E7, PCGS# 39226 Base PCGS# 6052

1795 Flowing Hair Half, VF35
Sharp Interiors, O-110

- 3759** 1795 2 Leaves, O-110, T-21, R.3, VF35 NGC. This attractive Choice VF Flowing Hair type coin displays faint remnants of luster in the recesses of Liberty's hair curls, complementing generally sharp-for-the-grade detail on the central devices of both sides. The borders are evenly struck with complete denticles, despite an arrangement of planchet adjustment marks around the obverse. This piece shows mainly golden-orange and champagne patina but with hints of lavender and sea-green in the margins. NGC ID# 24E7, PCGS# 39228 Base PCGS# 6052

1795 O-110a Half Dollar, VF35
Two Leaves, Flowing Hair Type Coin

- 3760** 1795 2 Leaves, O-110a, T-21, R.3, VF35 PCGS. Tompkins Die State 4/2. Stars 5 and 8 are repunched. The berries are arranged 9x8 with two leaves below each wing. The late obverse die state shows a die crack from R into the field below TY through star 11 to the edge. Each side of this Choice VF Flowing Hair half dollar features a blanket of rich gunmetal-gray toning. Crisp detail on the hair, complete dentilation, and partial feathers on the eagle's breast make this a perfect example for type representation. Certified in an old green label holder.
Ex: Allstate Coin Co. (8/1992); ANA Signature (Heritage, 8/2016), lot 4447. NGC ID# 24E7, PCGS# 39229 Base PCGS# 6052

1795 Flowing Hair Half Dollar, O-117a, VF35
Lightly Toned With Traces of Luster

- 3761** 1795 2 Leaves, O-117a, T-3, R.4, VF35 PCGS. The obverse shows the diagnostic O-117a die crack from the bust to border, between the date and star 15, with a faint branch crack to the tops of 95, confirming the Overton variety. This example is sharply defined for a Choice VF coin, with hints of luster apparent in the protected areas. The surfaces display light gray toning with splashes of ivory on the high points. A short streak of deep toning through star 1 joins numerous light abrasions and lines visible with a lens. A pleasing example of the issue, seldom found in finer grades.
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3389; Summer FUN Signature (Heritage, 7/2012), lot 3648. NGC ID# 24E7, PCGS# 39234 Base PCGS# 6052

1796 15 Stars Half Dollar, VF Details
O-101, Ex: Egolf

- 3762** 1796 15 Stars, O-101, T-1, R.5 — Repaired — PCGS Genuine. VF Details. Amato-142. Draped Bust Small Eagle half dollars elicit excitement whenever they appear at auction, regardless of grade or surface condition. This 15 Stars example is no exception. Both sides display subdued gray patina with blue/charcoal peripheral accents. Liberty's hair and drapery are well-defined, and the eagle's wings exhibit about one-half of the feather detail. The devices are well-centered on the planchet and most of the dentilation shows. The obverse is devoid of mentionable marks. A light mark on the lower-left part of the eagle's neck serves as a pedigree marker, as do rim dings above the U and N in UNITED and to the left of the last A in AMERICA. Neither side reveals adjustment marks. The PCGS disclaimer refers to seven diamond-shaped countermarks on Liberty's forehead and temple that have been professionally repaired. These are only vaguely visible except under high magnification. The disclaimer notwithstanding, this coin will be a nice fit in a mid- to high-grade type collection. Our research into this series indicates that at least 30 percent of these elusive half dollars show one or more post-strike impairments, most of which are more obvious or disfiguring than seen on the present specimen. Moreover, several others reveal mint-made "problems," such as unsightly adjustment marks or planchet defects.
Ex: Howard D. Egolf Collection (*Stack's*, 5/1961), lot 929; Robert W. Rusbar Collection (*Bowers and Merena*, 9/1990), lot 273; Scotsman Auction Co. (2/2007), lot 542; Bonhams (9/2016), lot 42. NGC ID# 24E9, PCGS# 39261 Base PCGS# 6057

1806 O-121 Half, Colorful AU58 ★
Second-Finest for the Variety, Vast Appeal

- 3763** 1806 Pointed 6, Stem, O-121, T-29, R.4, AU58 ★ NGC. Tompkins Die State 4/1. Struck from the latest die state described in the 2015 Tompkins reference, this extraordinary near-Mint early half commands immediate attention for its still-lustrous, colorful toning. Cerulean-blue and amber-gold shades combine for dramatic eye appeal, confirmed by the coveted NGC Star designation. Nearly full mint luster glows beneath the rich patina. Equally dramatic die cracks circumnavigate the obverse margin and venture radially into the fields and portrait. Multiple die clashing foreshadows the demise of the obverse die in its final use for the O-121 (T-29) variety. Light wear and scattered small marks from circulation are seen with a loupe, but this example ranks as a solid second in the Condition Census for the variety according to all of the major references. NGC ID# 24EJ, PCGS# 39327 Base PCGS# 6071

BUST HALF DOLLARS

1809 Capped Bust Half Dollar, MS62
III Edge, O-107a

- 3764** 1809 III Edge, O-107a, R.4, MS62 NGC. III Edge. An intricate network of obverse die cracks branch out from a strong radial crack near star 12 to confirm the scarce O-107a variety. The reverse shows multiple areas of die clashing, including triple embossed segments above the arrowheads and throughout AMERICA. Golden-brown, sky-blue, and reddish-gold toning adorn the peripheries of this lustrous, smooth, and sharply struck Bust half. The present coin is tied for finest listed for the variety in the Autumn, 2016 Steve Herrman census.
Ex: FUN Signature (*Heritage*, 1/2005), lot 7163; FUN Signature (*Heritage*, 1/2008), lot 1460; ANA Signature (*Heritage*, 8/2008), lot 492. NGC ID# 24ES, PCGS# 39384 Base PCGS# 6094

1810 Small 8 Bust Half, Near-Mint
O-101a, Struck 5% Off-Center

- 3765** 1810 — Off-Center, 'Partial Collar Strike' — O-101a, R.1, AU58 PCGS. This is an attractive, near-Mint State early Bust half error. The coin is struck 5% off center toward 10:30. Only partial edge lettering (some of it barely indiscernible) remains — presumably, executed prior to the strike, described by PCGS as a Partial Collar Strike although technically that is not accurate. Dentilation is absent between 9 and 1 o'clock on the obverse, and 5 and 8 o'clock on the reverse. Extensive die cracks across both borders allow prompt attribution as the O-101a variety. A mostly lustrous and pleasing piece with exceptional peripheral golden-brown and forest-green toning. NGC ID# 24ET, PCGS# 39405 Base PCGS# 6095

1811 Small 8 Half Dollar, O-105a, MS64+
Lovely High-End Example, Ex: Friend

- 3766** 1811 Small 8, O-105a, R.2, MS64+ PCGS Secure. CAC. Ex: Friend. The variety is easier to diagnose from the reverse die, where a small patch of die lumps are evident on the upper left portion of the eagle's shield. This later die state is more common than the early state and features a broad, arcing die crack that begins and ends at 5 on the lower reverse, passing through TES in STATES along the way. This is a well-struck, lustrous near-Gem example with clean, unabraded surfaces and lovely lavender-gold and blue-gray coloration. Population (all Small 8 varieties included): 37 in 64 (5 in 64+), 7 finer. CAC: 11 in 64, 10 finer (1/17). NGC ID# 24EU, PCGS# 39428 Base PCGS# 6097

**1812 Half Dollar, Attractive MS64+
Overton-103, Large 8**

- 3767** 1812 Large 8, O-103, R.1, MS64+ PCGS. CAC. Die lines in the field left of the eagle's neck aid in attribution of this collectible variety. The present coin is sharp, although metal flowlines around the borders weaken the dentilation. The fields are vibrantly lustrous, with only slight contact on the portrait preventing a full Gem grade. Sea-green, lavender, and champagne hues deliver pleasing visual appeal on each side. NGC ID# 24EW, PCGS# 39446 Base PCGS# 6100

**1814/3 O-101a Half Dollar, AU58
Usual Late Die State**

- 3768** 1814/3 O-101a, R.2, AU58 PCGS. CAC. A die crack begins at the border below the first star and joins all the stars on the left, curves through the cap, and joins all the stars on the right. A prominent crack joins the base of all digits in the date. The reverse has a crack that joins UNITED STA. The reverse is rotated counterclockwise. This pleasing AU example has considerable ivory luster and lovely blue, gold, and iridescent toning with a trace of friction on the high points. NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

**1818 Half Dollar, O-111, MS63+
Attractively Toned, Sharp Strike**

- 3769** 1818 O-111, R.1, MS63+ PCGS. CAC. Pick up points to for the variety include a small spike from Liberty's cap and the second 1 in the date that sits lower than the other digits. The MS67 we sold in 2002 represents the top of the Condition Census for the O-111 variety, yet this Select Uncirculated example holds its own in terms of strike, eye appeal, and surface quality while qualifying for the lower end of the Census. The obverse stars are razor-sharp. Peach-gold toning shines beneath mottled shades of aquamarine and coppery-tan patina. NGC ID# 24F9, PCGS# 39528 Base PCGS# 6113

**1819/8 Bust Half, MS64+
Small 9, O-101**

#1 Condition Census for the Variety

- 3770** 1819/8 Small 9, O-101, R.1, MS64+ PCGS. CAC. Golden-brown, cobalt-blue, and ruby-red toning visits both peripheries. Well-struck with nearly unmarked and frosted silver-gray interiors, this near-Gem radiates cartwheel mint luster. The Autumn 2016 Herrman revision lists the current coin at the top of the Census for O-101 by virtue of its Plus designation plus CAC endorsement. Struck from an intermediate and undesignated die state without a crack through 0 C, the arrowheads, and the ICA in AMERICA. A crack is present across UNITED ST, the leaf tips, and 50. The diagnostic Small 9 and clear underlying bottom portion of an 8 confirm the obverse overdate. NGC ID# 24FC, PCGS# 39555 Base PCGS# 6118

**1819/8 Bust Half, O-104, MS63
Exceptional Quality**

- 3771** 1819/8 Large 9, O-104, R.1, MS63 PCGS. CAC. Beautifully toned and sharply struck, this attractive, Select Uncirculated bust half is identified by a large 9 over the 8 underdigit and an easily noticed recutting of star 2. Star 4 is less obviously recut. The reverse shows missing upper left serifs of the Es to confirm the O-104 variety. Golden-gray centers reveal much soft luster and deepen to burnt-orange and electric blue peripheries. In Select Mint State, this bust half is in the Condition Census for the variety or nearly so. Ex: FUN Signature (Heritage, 1/2014), lot 4417. NGC ID# 24FC, PCGS# 39559 Base PCGS# 6119

1824/4 Bust Half, MS65
O-110, Widely Repunched 4

- 3772** 1824/4 O-110, R.2, MS65 NGC. The present satiny Gem displays dusky autumn-gold and gunmetal-gray toning. Refreshingly free from contact, and well struck except on the right-side stars and the right (facing) claw. The eagle's left wing shows minor strike doubling. O-110 is one of two 1824/4 *Guide Book* varieties, readily attributed by either the repunched 4 in the date or the pelletlike die dot on the reverse field beneath UNUM. This example is solidly within Steve Herrman's Condition Census for the O-110 variety. NGC ID# 24FK, PCGS# 39644 Base PCGS# 6140

1825 Half Dollar, O-115, Toned Gem
Rare in High Mint State

- 3773** 1825 O-115, R.3, MS65 NGC. Ex: Highland Collection. Attribution pick-up points for the O-115 variety include an extension of the hair below the R in LIBERTY and five extra lines off the center of gule 6. The third line of the fourth shield stripe extends to the second crossbar. Violet toning combines with gold and ice-blue color at the margins. The strike shows minor incompleteness around the peripheries, but the central relief elements are boldly rendered. Attractive patina well conceals the tiny grade-limiting marks found on each side. Tied for the top of both the Stephen Herrman and Donald Parsley census listings for the O-115 variety (1/17). NGC ID# 24FL, PCGS# 39662 Base PCGS# 6142

1826 Capped Bust Half, MS65
Attractively Toned O-106a Variety

- 3774** 1826 O-106a, R.3, MS65 PCGS. Lightly toned at the centers with colorful blue, rose, and gold hues at the borders, this satiny Gem Uncirculated half exudes mint luster and eye appeal. The strike is sharp for the late state of the dies, which display peripheral die cracks through the reverse legend including a diagnostic crack at RICA of AMERICA, through the arrowheads, through C, and to the rim below 50. An attractive example, this piece ranks second in the Condition Census only to the Eliasberg coin for the late die state O-106a, according to Stephen Herrman's Autumn, 2016 listing. NGC ID# 24FM, PCGS# 39674 Base PCGS# 6143

1828 O-115 Half Dollar, Colorful MS66
Square Base 2, Small 8s, Large Letters
None Certified Finer

- 3775 1828 Square Base 2, Small 8s, Large Letters, O-115, R.2, MS66 PCGS.** A razor-sharp Gem with terrific eye appeal. The O-115 is a relatively available Square Base 2 variety, confirmed by angled die defect lines in the field between the scroll at E of E PLURIBUS and the eagle's left (facing) wing. Golden luster glows from the centers of this vibrant half, deepening to rich caramel-gold shades framed by calico rim toning. Lavender and steel-blue shades blanket the reverse. The surfaces are remarkably mark-free. Ranking among the finest examples in the Condition Census for the variety according to Steve Herrman's Autumn 2016 listing, this stunning coin, in our opinion, clearly outranks all others in eye appeal. Technical quality is unsurpassed. PCGS has seen five Premium Gem 1828 Square Base 2, Small 8s, Large Letters half dollars and none finer (1/17). NGC ID# 24FR, PCGS# 39769 Base PCGS# 6151

SEATED HALF DOLLARS

1859-S Half Dollar, Frosty MS64
Above-Average Preservation

- 3776 1859-S Large S, WB-101, Die Pair 3, R.3, MS64 PCGS.** Mint State examples of the 1859-S Seated half dollar are scarce overall, and those grading finer than MS64 are genuinely rare. This Choice example displays a sharp strike and impressively well-preserved, frosty mint luster. A dusting of olive-gold toning appears over each side. An ebony-colored X appears near the eagle's head. Population: 18 in 64 (1 in 64+), 7 finer (12/16). NGC ID# 24J2, PCGS# 524237 Base PCGS# 6298

1859-S Half Dollar, Sharp MS64
Uncollectible in Better Condition

- 3777 1859-S Large S, WB-101, Die Pair 3, R.3, MS64 PCGS.** An errant 9 appears in the base above the 9 in the date, and a die lump occurs on the 1. Die cracks travel through the reverse legends. The 1859-S Seated half dollar circulated extensively on the West Coast, and CoinFacts estimates only 50 coins survive in Mint State. Each side of this near-Gem is frosty and brilliant with the faintest glints of gold here and there. Liberty's head and the eagle are fully detailed. Preservation is excellent. Population: 18 in 64 (1 in 64+), 7 finer (12/16). NGC ID# 24J2, PCGS# 524237 Base PCGS# 6298

1859-S Seated Liberty Half, Lustrous MS64+
WB-102, Ex: Highland Collection

- 3778** 1859-S Medium S, WB-102, Die Pair 6, R.3, MS64+ NGC. Ex: Highland Collection. Gem coins are rare for the 1859 San Francisco issue, making this Plus-graded near-Gem particularly attractive for the value-conscious collector. Mint luster shines boldly through a thin patina of pale almond-gold toning with an area of deeper patina near star 7. An unusual M-shaped inventory mark appears to the left of the eagle's head — one of three such examples we are aware of on 1859-S Seated halves that were part of the Highland Collection (the other pieces were marked with a 'V' and an 'X'). Census (all varieties): 13 in 64 (6 in 64+), 5 finer (1/17). NGC ID# 24J2, PCGS# 524239 Base PCGS# 6298

1862 Half Dollar, MS65
Old Album Toning

- 3779** 1862 WB-101 MS65 NGC. Golden-brown and apple-green colors grace the obverse margins and encroach upon the untoned center. The reverse features iridescent rose color framed by peach and sky-blue hues. This is an exquisitely struck 1862 half dollar with mint-made vertical striations that lend a mildly prooflike appearance. Scattered tiny marks deny a higher grade. A low mintage for a Philadelphia issue, only 253,550 pieces were produced. Census: 4 in 65, 5 finer (12/16). Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 7436. PCGS# 572151 Base PCGS# 6307

1866 Motto Seated Half, MS66+
WB-Unlisted, Misplaced Digit Beneath 8

- 3780** 1866 Motto MS66+ PCGS. WB-Unlisted. A richly frosted example, with rose-red and olive-gray accents over pearlescent-silver surfaces. The strike is sharp across each side. Abrasions and marks are limited to a few minimal occurrences, none of which are distracting. An interesting anomaly in the dentils beneath the 8 in the date is almost assuredly the top loop of a misplaced digit — most likely an 8 or a 6. This MPD is not listed in either the 1993 Wiley-Bugert reference or the most recent edition of *Cherrypicker's*. The lower reverse shows possible die doubling most visible at ALF DO of the denomination. PCGS reports just two finer examples regardless of variety. Population: 3 in 66 (1 in 66+), 2 finer (1/17). NGC ID# 2VTG, PCGS# 6319 Base PCGS# 6319

1867-S/S Half Dollar, MS64
Only One Example Finer at PCGS

- 3781** 1867-S/S WB-103, Die Pair 3, R.3, MS64 PCGS. The mintmark is lightly recut, confirming the WB-103 variety, while a diagnostic die crack through the rock support and foot to the edge identifies the die marriage. Lavender and orange hues provide the only indication of color on this otherwise brilliant Choice 1867-S half dollar. The devices are well-struck, including the eagle's claws, legs, and fletchings, although the upper stars and Liberty's head are softly detailed. A few small ticks show on Liberty's left (facing) arm, but the fields are clean overall. The 1867-S is rare in near-Gem condition regardless of the variety. Population (all varieties): 3 in 64, 1 finer (1/17). PCGS# 572181 Base PCGS# 6322

1876-S Seated Liberty Half Dollar, MS66
Vivid Multicolor Toning

- 3784** 1876-S Open Bud, Very Small S, WB-102, Die Pair 28, R.3, MS66 NGC. The 1876-S Seated Liberty half dollar claims a large mintage of 4.5 million pieces, but few were saved for numismatic purposes and examples in MS66 condition are almost unobtainable today. This spectacular Premium Gem is sharply detailed in most areas, but shows just a touch of the diagnostic weakness on the eagle's tail feathers, below the shield. A few stars exhibit a touch of flatness, as well. The well-preserved, lustrous surfaces are enhanced by vivid shades of golden-brown and cerulean-blue toning, with most of the color on the obverse. Census: 3 in 66, 1 finer (1/17). NGC ID# BNVD, PCGS# 572242 Base PCGS# 6354

1870-CC WB-101 Half Dollar, Fine 15
Elusive Key Carson City Issue

- 3782** 1870-CC WB-101, Die Pair 2, R.5, Fine 15 PCGS. A Choice Fine example of the rarest Carson City half dollar, always in demand in any grade. Walnut-brown toning displays blue accents and bits of gold around the raised devices for nice eye appeal. The surfaces are smooth and attractive for this often abused issue, with sharp definition for the assigned grade. LI and TY are clear on LIBERTY. Population: 12 in 15, 81 finer (1/17). NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

1879 Seated Half, Vibrant MS66
Exceptional Visual Appeal

- 3785** 1879 MS66 PCGS. Lustrous and nearly prooflike with pristine surfaces and a crisp strike. The reverse displays a faint blush of light, wheat-gold toning, but the coin is essentially brilliant. The advent of the Morgan dollar tied up Mint resources, and Seated half coinage was reduced to token levels until 1891. The 1879 business mintage was only 4,800 pieces, though dealers with connections to the Philadelphia Mint secured a few hundred Uncirculated examples. Population: 49 in 66 (3 in 66+), 20 finer (1/17). NGC ID# 24KS, PCGS# 6361 Base PCGS# 6361

1870-CC Seated Half, VF30
Sharp Midgrade Example

- 3783** 1870-CC WB-101, Die Pair 5, R.6, VF30 NGC. The Bugert reference estimates as few as 200 coins survive from the mintage of 54,617 pieces, making the 1870-CC the key Carson City issue as well as an absolute rarity in the Seated half series. This is a solid midgrade example with all letters of LIBERTY sharp on the shield. Silver-gray surfaces deepen at the margins. A number of small marks and digs are visible under a loupe, yet the coin is attractive in-hand and bold for the grade. Census (all varieties): 2 in 30, 28 finer (1/17). NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

1882 Half Dollar, MS67 Prooflike
Finest in Certified Prooflike Format

- 3786** 1882 WB-101, MS67 Prooflike NGC. Mirrored surfaces surround lightly frosted central elements with light, reddish-gold toning that deepens at the borders, there joined by a few steel-blue accents. The strike is sharp throughout this lustrous Superb Gem. The late-series Seated halves often require collectors to settle for a proof rather than a business strike in high grades. The low mintage of 4,400 pieces for circulation suggests several prooflike survivors may exist, but PCGS historically has not identified prooflike half dollars and NGC recognizes fewer than a dozen pieces in either Prooflike or Deep Prooflike format. Importantly, the present coin is the finest in either category (1/17). Census: 1 in 67 Prooflike, 0 finer (1/17). PCGS# 76364 Base PCGS# 6364

PROOF SEATED HALF DOLLAR

1852 Half Dollar, PR63
One of Three Certified Proofs
Rare Early Date Proof, Sole PCGS-Certified

- 3787** 1852 PR63 PCGS. WB-101. By 1852, the Gold Rush had raised the gold value of silver to the point where silver coins were worth more as bullion. Consequently, few half dollars were struck for circulation, and only a handful of proofs were manufactured. CoinFacts suggests a mintage of six 1852 proof halves, but that figure seems high given the small number of certified representatives. Probably only four of five specimens were struck, three of which survive.

Cobalt-blue peripheries cede to violet, olive, and lilac hues, leaving the centers mostly brilliant on each side of this extremely rare Select proof. The patina partially subdues the contrast between the watery fields and pinpoint-sharp motifs, but the proof reflectivity remains undiminished beneath the attractive toning. Advanced collectors should seize this important opportunity and bid appropriately. Population: 1 in 63, 0 finer (1/17). NGC ID# 3DBN, PCGS# 6397

BARBER HALF DOLLARS

1893 Half Dollar, Remarkable MS67
Sole Finest at NGC, Tied Finest Overall

3788 1893 MS67 NGC. Brilliant-white and entirely untoned, this high-luster Barber half has a fresh-from-the-Mint look, yet it is one of the favored pre-1900 series issues. The glittering, frosty surfaces coruscate with incredible eye appeal. Both obverse and reverse show no distractions and appear only a tiny tick or two away from an even higher grade. The strike is crisp as can be — including the often-troublesome areas on the reverse — which are razor-sharp as well.

There are, of course, no finer pieces listed from either service. Both PCGS and NGC record a single MS67 example and, interestingly, both are brilliant (or nearly so) coins. We believe the present coin outshines its rival, but that is for the eye of the beholder. Given the overall scarcity of 1893 halves in Gem or finer grades, it is unlikely to see a comparable or finer example going forward. Census: 1 in 67, 0 finer (1/17). NGC ID# 24LK, PCGS# 6465

1895-S Half Dollar, MS66
Low High-Grade Population

3789 1895-S MS66 PCGS. Premium Gem and finer grade examples of the 1895-S half dollar are elusive with only nine examples certified MS66 at PCGS and NGC combined, and just three finer pieces (1/17). Pale gold toning appears on the frosty white surfaces of this lovely piece that features bold design elements on both sides. Population: 4 in 66, 2 finer (1/17). NGC ID# 24LU, PCGS# 6473

1899-O Barber Half, Eye-Appealing MS66
Lustrous, Well-Preserved Surfaces

3790 1899-O MS66 NGC. CAC. Although the 1899-O Barber half is not as elusive as its predecessor (the 1898-O), it comes as no surprise because its mintage is roughly twice as large. Even so, few pieces survive at the Premium Gem level of the present coin. Eye appeal abounds on each side, and there are no mentionable signs of contact. The right shield corner on the reverse shows the seemingly unavoidable O-Mint weak strike, as do the wing nearby and the right (facing) claw, but otherwise there are no quibbles on this splendid MS66 coin. Mostly silver in the centers, coruscating luster complements a pleasing peripheral ring of amber-gold.

An MS67 entry that was formerly in the NGC population data has now been delisted, and that service currently shows only seven submissions in MS66 as the finest. PCGS shows three in MS66+ as the finest, including the Akers-Duckor example that we offered in August 2010, lot 3195, which brought \$25,300. Census: 7 in 66, 0 finer. CAC: 7 in 66, 0 finer (1/17). NGC ID# 24M7, PCGS# 6484

1900-S Half Dollar, MS66
Just a Single Coin Certified Finer at PCGS

3791 1900-S MS66 PCGS. The 1900-S Barber half is elusive in Mint State and the issue becomes a real challenge in high Uncirculated grades. It was not until the end of the 19th century that the concept of collecting by mintmark gained any traction, and it took time for collectors to embrace the idea. Some of the coins were shipped to the Philippines for circulation there, but in general the issue was simply not saved in any kind of quantity.

This Premium Gem example will appeal to a select cadre of collectors who focus on building a truly advanced set of Barber halves. The coin was obviously well-preserved at the time of its mintage. Satiny luster illuminates light-lilac and golden toning on each side. A loupe reveals some pale greenish hues near the borders, and there are a few faint luster grazes but no overt marks. The eagle's right (facing) wing junction and shield corner show brief blending, yet the talons and obverse stars are sharp. PCGS and NGC each report a single finer coin. Population: 4 in 66, 1 finer (1/17). NGC ID# 57PC, PCGS# 6488

1904-S Barber Half Dollar, MS64
Prime Condition Rarity at This Grade

3792 1904-S MS64 PCGS. CAC. From a low-mintage of 553,038 pieces, the 1904-S Barber half dollar is one of the most elusive issues in the series. Choice Mint State examples are especially difficult to locate. Probably fewer than a dozen examples survive in MS65, or better, condition, and prices go up dramatically with every grading point, making this attractive near-Gem specimen an excellent balance of quality and value.

The design elements are sharply detailed in most areas, with just a trace of the often-seen softness on the right shield corner and the eagle's talon. The well-preserved, original surfaces are lightly toned in shades of champagne-gold and lavender-gray, with vibrant mint luster underneath. Population: 13 in 64 (1 in 64+), 9 finer. CAC: 5 in 64, 5 finer (1/17). NGC ID# 24MP, PCGS# 6500

1907-O Half Dollar, MS67
Among the Finest Certified

3793 1907-O MS67 NGC. During the period from 1906 to 1909, coinage production gradually shifted from the New Orleans Mint to the new Denver Mint facility. Mintage figures of O-mint half dollars did not directly suffer, but the strike quality did, as die life was likely extended in an attempt to lower production costs. Finding sharply struck (and by extension, high-grade) half dollars from this period is a challenge for Barber half specialists. The 1907-O is no exception.

In fact, only a handful of coins buck the trend, and somehow were preserved with Superb Gem quality. The present coin is one of five pieces that reside at the top of the population reports. Vibrant, frosty mint luster shines through pale hues of green-gold, lavender, and ice-blue on each side of this MS67 example, showing overall excellent surface preservation. The design elements are exceptionally sharp for an O-mint half dollar from this period and only add to the visual appeal. NGC and PCGS report three and two in MS67, respectively, with none finer at either service. Census: 3 in 67, 0 finer (1/17). NGC ID# 24N2, PCGS# 6510

1908-O Half Dollar, MS67
Exceptional Eye Appeal and Luster

3794 1908-O MS67 PCGS. Rainbow-toned around the peripheries and exceptionally lustrous, this Superb Gem New Orleans half also offers a sharp strike for the issue that lacks only slightly on the eagle's right (facing) wing junction. The old-time "coin board" toning combines with underlying silver flash for tremendous eye appeal. Carefully preserved surfaces show a minimum of tiny, ticklike contacts, each well-hidden in the toning. Most Barber half dollar issues are extremely rare or even unknown in Superb Gem condition. The 1908-O is indeed rare so fine, but it remains one of only a handful of dates that are typically considered type coin candidates in this grade. Fewer than two dozen coins are reported in this and finer condition by both PCGS and NGC combined, including possible resubmissions. Population: 15 in 67, 1 finer (12/16). NGC ID# 24N6, PCGS# 6514

**1910-S Half Dollar, Sharply Struck MS66
Lustrous and Original**

- 3795 1910-S MS66 PCGS. CAC.** The 1910-S half dollar mintage approached 2 million pieces. Mint State examples can be located with diligent searching through near-Gem, after which this issue becomes quite challenging. Reddish-brown patination imbued with whispers of bluish-green shows slightly deeper hues on the reverse. Sharply struck design elements and nicely preserved surfaces further enhance the coin's pleasing overall eye appeal. This piece displays the "Type C" mint mark seen on most 1910-S half dollars (see Lawrence, 1991). Population: 16 in 66 (2 in 66+), 4 finer. CAC: 4 in 66, 4 finer (1/17). NGC ID# 24NC, PCGS# 6520

PROOF BARBER HALF DOLLARS

**1894 Barber Half, PR67+ Cameo
Delicately Toned**

- 3796 1894 PR67+ Cameo NGC.** This high-end Superb Gem Cameo appears virtually flawless. The strike is full throughout, and the mirrored fields deliver excellent contrast. Both sides display dusky iridescent toning that attests to the originality of the coin. Cameo proof 1894 half dollars are rarely seen this fine. Census: 15 in 67 Cameo (2 in 67+), 2 finer (1/17). NGC ID# 24NW, PCGS# 86541

**1898 Half Dollar, PR67 Cameo
Beautifully Toned Registry Coin**

- 3797 1898 PR67 Cameo PCGS.** A conditionally rare Superb Gem Cameo with incredible multicolor toning that surrounds the obverse periphery and spans the entire reverse. The obverse is dramatically contrasted, and the reverse shows contrast even through the patina. Exceptional detail characterizes the devices. Finer Cameos are extremely rare. Population: 8 in 67 (3 in 67+) Cameo, 2 finer (1/17). NGC ID# 24P2, PCGS# 86545

**1899 Half Dollar, PR66 Cameo
Dramatic Rainbow Toning**

- 3798 1899 PR66 Cameo PCGS.** Razor-sharp detail and deeply mirrored fields provide an appealing base for vivid multicolor border toning that surrounds both sides of this Premium Gem Cameo proof. The centers show warm champagne color that allows for stark cameo contrast. There are no observed imperfections. The 1899 proof half dollar is seldom offered in this grade, let alone with this kind of spectacular toning. Population: 11 in 66 (2 in 66+) Cameo, 11 finer (1/17). NGC ID# 24P3, PCGS# 86546

**1906 Half Dollar, PR67 Cameo
Condition Census**

- 3799 1906 PR67 Cameo PCGS. CAC.** Cameo examples of the 1906 proof Barber half dollar are rare in general, and the present coin is among the finest certified. It is also the sole finest Cameo at CAC. The coin displays exceptional preservation and appreciable contrast, accentuated by a delicate golden hue over each side. The upper-right shield corner shows the only discernible strike weakness. Population: 4 in 67 (1 in 67+) Cameo, 0 finer. CAC: 1 in 67, 0 finer (12/16). NGC ID# 24PA, PCGS# 86553

WALKING LIBERTY HALF DOLLARS

**1916-S Half Dollar, MS65
Eye-Appealing First-Year Representative**

- 3800 1916-S MS65 PCGS.** A full outline of Liberty's thumb is visible, suggestive of a strong overall strike. Daubs of golden color complement silvery surfaces that show a slight hint of lilac. Each side of this wonderful first-year Gem is awash in frosty S-mint luster. The excellent surface quality, eye appeal, and interesting obverse mintmark are certain to make this a popular lot. PCGS has certified 14 submissions finer (1/17). NGC ID# 24PN, PCGS# 6568

1920-D Half Dollar, MS63
Clean Fields

- 3801 1920-D MS63 PCGS.** A lustrous and nearly unabraded stone-white representative. The central strike is typically weak, and the eagle's front leg has a shallow depression, as made. No hairlines are present, although some slide marks on the high points of the figure deny a finer numeric grade. NGC ID# 24R4, PCGS# 6581

1920-D Walking Liberty Half, MS63
Elusive in High Grade

- 3802 1920-D MS63 PCGS.** The 1920-D is a better date in Uncirculated condition, with the MS63 to MS64 grade range being ideal for the budget-conscious collector seeking technical quality. This Select representative displays satiny, champagne-tinted luster and well-defined motifs. A few minor abrasions are not obvious, leaving this piece with strong eye appeal for the grade. NGC ID# 24R4, PCGS# 6581

1920-S Half Dollar, Problem-Free MS64
Elusive Any Finer

- 3803 1920-S MS64 PCGS. CAC.** Considerable strike weakness shows in the central device high points of each, including Liberty's head, branch hand, and torso on the obverse, and the eagle's right (facing) leg on the reverse. The surfaces alternate frosty and satiny texture while showing only a few minor ticks. Ivory-white color prevails but cedes to pale gray and gold. A problem-free example of this elusive early S-mint issue. The search for a Gem will be long and expensive. NGC ID# 24R5, PCGS# 6582

1928-S Walking Liberty Half Dollar, MS64+
Vibrant Luster, Delicate Toning

- 3804 1928-S MS64+ PCGS.** From a mintage of 1.9 million pieces, the 1928-S Walking Liberty half dollar is one of the scarcer issues of the series. In addition, the 1928-S is known as a strike rarity, with nearly all examples seen having weak strikes on the central obverse. This Plus-graded Choice specimen shows the typical softness on the wreath hand and head, but the eagle's leg, another trouble spot, shows some emerging detail. The well-preserved surfaces radiate vibrant mint luster, with a few hints of golden-tan toning. PCGS has graded 68 numerically finer examples (1/17). NGC ID# 24RB, PCGS# 6588

1944 Walker, Delicately Toned MS68
A Top-Grade Registry Coin

- 3805 1944 MS68 NGC.** Typically, collectors acquire the 1944 Walker in MS67 or MS67+ due to the rarity of finer examples. Here, we offer one of the finer examples. This piece is one only two in this top grade at NGC, and there is just one other MS68 at PCGS (1/17). The coin is boldly struck and frosty with delicate pastel rainbow toning that surrounds the borders. The interiors exhibit a hint of warm champagne color. NGC ID# 24SC, PCGS# 6621

PROOF WALKING LIBERTY
HALF DOLLARS

1939 Half Dollar, PR68
None Finer at PCGS

- 3806 1939 PR68 PCGS. CAC.** Plentiful in lower grades, the 1939 proof Walking Liberty half dollar is conditionally rare at the PR68 level. This CAC-endorsed coin is among the finest at PCGS. The strike is full, and the mirrored fields are unmarked. Iridescent toning complements each side. Population: 43 in 68, 0 finer. CAC: 16 in 68, 0 finer (1/17). NGC ID# 5ESU, PCGS# 6639

**1941 Half Dollar, Border-Toned PR68
Tied for Finest at PCGS and CAC**

- 3807 1941 PR68 PCGS. CAC.** This fully struck 1941 proof Walker is tied for the finest at PCGS, and its CAC endorsement makes it all the more appealing to Registry Set collectors. The coin offers deeply reflective fields and exceptional preservation. Warm lavender and gold border toning lightens as it near the centers. Population: 24 in 68, 0 finer. CAC: 23 in 68, 0 finer (1/17). NGC ID# 24SP, PCGS# 6641

FRANKLIN HALF DOLLAR

**1949-S Franklin Half, MS67 Full Bell Lines
Frosted Surfaces, Slight Border Toning**

- 3808 1949-S MS67 Full Bell Lines PCGS. CAC.** An original Superb Gem with shimmering luster, this frosty Franklin features fantastic mint brilliance, bold design motifs, and delicate peripheral iridescence. CAC endorsed for its outstanding quality. Neither PCGS nor NGC reports a numerically finer example. PCGS population: 8 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 3 in 67, 0 finer (1/17). NGC ID# 24SV, PCGS# 86655 Base PCGS# 86655

SMS KENNEDY HALF DOLLAR

**1965 SMS Kennedy Half, SP67 Deep Cameo
Tied for Finest at PCGS**

- 3809 1965 SMS SP67 Deep Cameo PCGS.** The 1965 Special Mint Set half dollar is seldom seen in any Deep Cameo grade, and this Superb Gem is among the finest at PCGS. The strike is full, and each side displays brilliant, starkly contrasted surfaces with unmarked fields. Population: 13 in 67 Deep Cameo, 0 finer (1/17). NGC ID# 34CB, PCGS# 96845

EARLY DOLLARS

1794 Dollar, Attractive VF Details
B-1, BB-1, Inimitable First-Year Issue
The Laurence H. Gardner Specimen

3810 1794 B-1, BB-1, R.4 — Rim Damage — PCGS Genuine. VF Details. Regardless of the year or the state of the coin market, it is challenging to acquire a pleasing 1794 Flowing Hair dollar in any condition — let alone one that is completely problem-free. The coin in this lot is not perfect, but it does possess a number of noteworthy and desirable features besides the incomparable 1794 date. Of obvious mention is the striking definition along the lower left obverse periphery, which is typically compromised by limitations of expertise and equipment at the early Mint in 1794. Stars 2, 3, and 4 are discernible, if not complete, but star 1 can be described as being mostly absent. All four digits in the date are partially (if not mostly) present, this despite notable softness of detail over the 1.

The reverse die was misaligned at the time of striking, with the resultant letters in STATES soft to the point of going missing at the tops of ATE. A tiny planchet flaw is noted at 7 o'clock at the dentils. All other design features are present, and there is satisfying bold definition in protected areas of the obverse portrait and reverse eagle. Both sides reveal only minor, scattered circulation marks, and none are particularly important given the amount of wear that this coin saw. Adjustment marks are noted at the base of the obverse under the date and to its left.

Most of the surfaces display attractive dove-gray coloration, although we do note a few areas of reddish color and brief iridescence around the peripheries. This last feature brings us to this coin's most significant rim characteristic: a small, semicircular piece of the planchet is missing at the top of the obverse, resembling a rim clip, but perhaps more accurately described as a planchet cut. It immediately pedigrees the piece as the Laurence H. Gardner specimen, who later bequeathed it to the Buffalo Historic Society where it resided for 60-odd years. We had the pleasure of selling this same coin as lot 822 of our April, 2006 Midwinter ANA Signature event. The piece is currently listed on page 134 of the definitive Martin A. Logies reference.

As an attractive, collector-grade survivor of America's first silver dollar and a fabled numismatic rarity with good overall definition, the coin represents a bidding opportunity that one should consider most carefully.

Ex: Samuel Hudson Chapman Collection, (Thomas L. Elder, 5/1929), lot 1266; Laurence H. Gardner; bequeathed to the Buffalo Historical Society upon his death in 1944; Buffalo and Erie County Historical Society Sale (Stack's, 3/2005), lot 69; Old Colony Collection (American Numismatic Rarities, 12/2005), lot 1185; ANA Midwinter Signature Sale (Heritage, 4/2006), lot 822.

1795 Flowing Hair Dollar, AU Details
B-7, BB-18, Three Leaves Reverse

- 3811** 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3 — Improperly Cleaned — NGC Details. AU. Bowers Die State I. A Three Leaves reverse, Head of 1794 variety, confirmed in its attribution by a couple of small die flaws near the left ribbon end. This piece is well-detailed and free of obvious adjustment marks. Satiny surfaces offer irregular gold, aquamarine, and lavender-gray toning. A loupe reveals some faint tooling marks between the stars and dentils along the right obverse periphery. Nonetheless, this is a pleasing, well-detailed Flowing Hair type coin for the collector on a budget.

1795 Flowing Hair Dollar, VF30
B-5, BB-27, Three Leaves Reverse

- 3812** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF30 NGC. CAC. Bowers Die State II. The smooth, unimpaired surfaces of this well-detailed VF example displays deep gunmetal-gray toning save for the relief elements, which show a lighter tan-gray hue. The eagle's eye is bold, and the wings exhibit excellent feather detail. There are no adjustment marks observed, and the strike is bold and even. An excellent type coin. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Draped Bust Dollar, Unc Details
Centered Bust, B-15, BB-52

- 3813** 1795 Draped Bust, Centered, B-15, BB-52, R.2 — Questionable Color — PCGS Genuine. Unc Details. Bowers-Borckardt Die State IV. The Draped Bust design was introduced partway through the year in 1795 and a modest mintage of 42,738 pieces was struck. Two die varieties are known for the date and type, with this coin representing the popular BB-52 variety, with the highest curl of Liberty's hair under E in LIBERTY. The BB-52 is seen less often than the other Draped Bust variety of the date (BB-51), especially in high grade. This was the only use of both the obverse and reverse dies.

The present coin is sharply detailed throughout and shows the interesting die break in Liberty's hair that identifies Die State IV. The surfaces show only minor signs of contact, but some faint planchet adjustment marks are evident at the reverse rim, under magnification. The surfaces are toned in aesthetically pleasing shades of gray, steel-blue, and golden-brown, but PCGS notes this patina is unnatural, and the luster is subdued.

1796 B-4, BB-61 Dollar, Choice XF
Large Letters, Small Date

- 3814** 1796 Small Date, Large Letters, B-4, BB-61, R.3, XF45 NGC. Bowers Die State III. Luster emerges from ample portions of this pleasing early dollar. Light to medium caramel-gold and cream-gray toning adorns both sides. No marks are noticeable, though we note the dentils near the L in LIBERTY have an unusual appearance, possibly as made. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1797 9x7 Stars Dollar, XF Details
Large Letters, B-1, BB-73

- 3815** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 — Cleaning — Genuine PCGS. XF Details. Bowers Die State V. Deep lavender toning embraces this well defined and minimally abraded early dollar. Glimpses of tan-brown toning are also apparent, especially at the borders. Faint adjustment marks, as coined, are located near the D in UNITED and the clouds beneath the eagle. A better grade example of the scarce *Guide Book* variety.

1798 Draped Bust Dollar, XF40
Guide Book 15 Stars Variety, B-2, BB-81

- 3816** 1798 Small Eagle, 15 Stars, B-2, BB-81, R.3, XF40 PCGS. Bowers-Borckardt Die State II. A large mintage of 327,536 Draped Bust dollars was struck in 1798, but the great majority of those coins were examples of the new Heraldic Eagle reverse design. Only two varieties of the older Small Eagle reverse type are known today, one with 13 stars on the obverse and the other with 15 stars. This coin represents the BB-81 variety, the 15 stars variant, which is slightly scarcer than the 13 star BB-82. The 15 star obverse die may have been produced in 1795, as it follows the style of 1795-1796, with the final digit in the date left off and punched in later, when the die was pressed into service in 1798. The reverse die was definitely prepared in 1795, as it was used to produce the 1795-dated BB-51 variety. This was the only use of the obverse die, but the hardy reverse was used to strike five other varieties from 1795-1798.

The present coin is a lightly worn XF40 specimen, with distinct drapery and the hair well-outlined and detailed. The lightly abraded surfaces display silver-gray and blue-steel patina, with a few hints of golden-brown. An attractive specimen of this interesting issue, which is usually seen in lower grades and which some numismatists consider a one-year type coin. Population (for the variety): 2 in 40, 5 finer (1/17). NGC ID# 24X5, PCGS# 40007 Base PCGS# 6868

1798 Small Eagle Silver Dollar, VF30
B-1, BB-82, 13 Stars

- 3817** 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, VF30 PCGS. Bowers Die State III. There are 34 confirmed die marriages of 1798 dollars, and only two (B-1 and B-2) exhibit a Small Eagle instead of its Heraldic Eagle successor. Since B-1 and B-2 have different star counts, each receives a separate listing in the *Guide Book*. The present midgrade representative has a few unobtrusive adjustment marks on the eagle's right (facing) wing, but post-strike contact is minimal, limited to four small ticks east of Liberty's ear. The cream-gray surfaces are undeniably pleasing. NGC ID# 24X5, PCGS# 40006 Base PCGS# 6867

1798 Draped Bust Dollar, MS63
 Pointed 9, Wide Date, B-23, BB-105
 Popular Guide Book Variety

3818 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, MS63 PCGS. Bowers-Borckardt Die State II. The Small Eagle reverse was retired in 1798, in favor of the Large, or Heraldic Eagle design, and the 13-star obverse was firmly standardized during the year. According to Mint records, a large mintage of 327,536 silver dollars was accomplished in 1798, including both Large and Small Eagle varieties. Q. David Bowers believes only about 235,000 coins were struck from 1798-dated dies, however, the rest being struck from dies of prior dates as an economy measure. The Mint was reluctant to discard any dies that were still usable for coinage, and the change to the 13-star obverse and Large Eagle reverse meant many earlier dies would no longer reflect the current style, so the Mint probably struck as many coins as they could with the old dies before those changes took effect. Probably no more than 35,000 1798-dated Small Eagle dollars were produced and 200,000 examples of the new Heraldic Eagle style were struck. Two die varieties are known for the Small Eagle dollars, while a whopping 31 die combinations have been identified for the Heraldic Eagle type.

The present coin represents the BB-105 variety, with a Pointed 9 in the widely spaced date and an arc-star pattern on the reverse. The obverse die was previously used to strike the BB-104 variety of this date, while the reverse die was later used to produce the BB-106 variety (this usage was noted as early as 1881 by Captain John W. Haseltine and John Colvin Randall). The BB-105 is an available variety, with an estimated surviving population of 850-1,500 examples in all grades. Most examples seen are in lower grades, however, and Mint State specimens are rare.

The coin offered here is an attractive Select example, with well-detailed design elements that show just a touch of the usual softness on the centers. Some incompleteness, due to lapping, is evident on the third cloud on the reverse and a few small die flaws are seen between the letters in STATES. The lightly marked surfaces retain much original mint luster, under attractive shades of lavender-gray and golden-brown toning. Population (all varieties): 1 in 63, 9 finer (1/17). NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

**1798 Draped Bust Dollar, AU55
B-15, BB-112, Large Eagle Reverse
A Scarce Variety This Fine**

- 3819** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, AU55 PCGS. Bowers Die State III. This Large Eagle type coin displays a sharp, even strike without planchet adjustment marks or other distractions. Slight high-point friction is discernible with a loupe, and each side displays deep, original mottled olive-green and golden-gray toning — suitable for the collector seeking an old-time look. BB-112 is a fairly plentiful Draped Bust, Large Eagle dollar variety, although pieces appearing at auction in recent years have been largely concentrated in XF and lower grades, with occasional offerings in the lower AU range. This Choice AU coin is conditionally scarce. Bowers writes of the BB-112 die pairing in his silver dollar *Encyclopedia*: “AU or finer pieces are very rare.” The scarcity of such coins appearing at auction seems to substantiate that assessment. NGC ID# 24X6, PCGS# 40029 Base PCGS# 40018

**1799 Silver Dollar, Choice AU
B-10, BB-163, 7x6 Stars**

- 3820** 1799 7x6 Stars, B-10, BB-163, R.2, AU55 NGC. Bowers Die State IV. Multiple die cracks criss-cross the reverse margin involving most the legend. A pair of strong die cracks T-bone near the center of O in OF, joined by a heavy radial crack into the right curve of O from the edge. Scarce in this late state of the dies. Light wear on the sharply struck central devices confirms the Choice About Uncirculated grade, with glimpses of mint luster across the silver-gray surfaces. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

GOBRECHT DOLLAR

**1836 Gobrecht Dollar, XF Details
Judd-60 Original, Early Die State**

- 3821** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Rim Damage — PCGS Genuine. XF Details. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State B. This is the second earliest die state known for 1836 Originals, and is characterized by tiny die chips between the dentils above the final A in AMERICA. The only earlier state is State A, lacking even these die defects. The surfaces are deep blue-gray with faint underlying iridescence. Each side is free from notable imperfections, except for the rim ding close to 9 o'clock on the reverse.

SEATED DOLLARS

1846 Silver Dollar, MS63
Semireflective Fields, Nice Appeal

- 3822 1846 MS63 PCGS. OC-1.** Osburn-Cushing Die State c/c. Semireflective, silver-gray surfaces displays reddish-gold and russet accents with bold satin luster across both sides of this attractively patinated Seated dollar. A few light lines and shallow abrasions are concentrated in the right obverse field. The strike is reasonably sharp on the obverse star centers and Liberty's upper hair strands. The 1 is narrowly repunched in the date above the top serif. Population: 20 in 63 (2 in 63+), 27 finer (1/17). NGC ID# 24YH, PCGS# 6932

1850 Seated Dollar, Toned MS62
Always Elusive in Mint State

- 3823 1850 MS62 PCGS. OC-1, R.3.** Osburn-Cushing Die State a/e. All of the 1850s-decade Seated dollar issues are more-or-less rare in Mint State grades, save for the 1859-O date (and for that matter, its sibling 1860-O). For the 1850 issue, no more than perhaps two to three dozen pieces survive today in all Mint State levels from a mintage of just 7,500 pieces. Most Uncirculated examples grade only MS60. The surfaces of this specimen are prooflike beneath intense heather, blue, and iridescent toning. A few minor contact marks keep it from the extremely rare Select grade level. This coin poses a rare opportunity for Seated dollar specialists, as series that is both challenging and rewarding in equal measure. Population: 8 in 62, 11 finer (1/17). NGC ID# 24YM, PCGS# 6937

1854 Seated Dollar, Strong AU55
Very Scarce in all Grades

- 3824 1854 AU55 PCGS. OC-1.** Dick Osburn and Brian Cushing explain in their online reference: "This is a key date in the Liberty Seated Dollar series. Most would consider 1854 dollars as rare, though by Liberty Seated Dollar standards they're only scarce. Although the date is overshadowed by its near neighbors, the 1851 and 1852, it would be a key in almost any other series." They estimate 300 circulation strikes survive from a low mintage of 33,140 coins. A dusky overlay of antique-gold patina covers reflective, strongly detailed surfaces. A few stray contact marks are noted. Population: 15 in 55, 38 finer (1/17). NGC ID# 24YT, PCGS# 6942

1862 Seated Dollar, MS62
Paltry Production of 11,540 Coins

- 3825 1862 MS62 PCGS. OC-1.** The total mintage for the 1862 Seated dollar — merely 11,540 coins — ranks among the lowest in the entire series. The issue's production numbers directly reflect the lack of circulation of specie during the Civil War years. The razor-sharp strike characteristics, squared-off rims, and semiprooflike fields are unsurprising considering how few coins were struck. Bright, untuned fields display myriad scattered marks. Population: 18 in 62 (2 in 62+), 35 finer (1/17). NGC ID# 24Z5, PCGS# 6952

PROOF SEATED DOLLARS

1860 Seated Dollar, PR64
Collectible Antebellum Proof Issue

- 3826 1860 PR64 PCGS. OC-P1.** Osburn-Cushing Die State a/a. Diagnostic die lines in the reflective recesses of the shield confirm the proof status of this near-Gem dollar, struck during one of the first years of marketing proofs to the public at a premium over face value. The Mint's estimate of how many proofs to strike was high, and many of the 1,330 proof dollars went unsold at the end of the year. The coin is untoned save for a thin haze of pale grayish-gold patina. Faint, delicate lines do little to diminish the Choice mirrored fields that surround sharply struck, lightly frosted motifs. NGC ID# 252E, PCGS# 7003

1862 Seated Dollar, PR66 Cameo
Delightful Rim Toning
Extremely Rare This Fine

- 3827 1862 PR66 Cameo NGC. OC-P1.** While the proof 1862 silver dollar is available in the absolute sense — despite a limited mintage of 550 pieces — Cameo examples are rare across all grades. When seen, Cameos typically grade no finer than PR64. At the Gem and finer Cameo levels, a trio of PR65s (two at NGC, one at PCGS), a pair of PR66 NGC pieces, and a sole PR67 NGC coin comprise the reported Condition Census. Of these, one or more may be duplicate submissions.

The present Premium Gem Cameo displays a full strike and modest contrast with deep mirroring in the fields. Vivid rainbow toning surrounds the peripheries in tight rings, while the interiors exhibit soft champagne color. A small fleck near star 2 serves as a pedigree identifier. Truly a rare coin in this lofty Cameo grade. NGC ID# 252G, PCGS# 87005

1871 Seated Dollar, PR65 Cameo
Stark Obverse Contrast
Conditionally Rare

3828 1871 PR65 Cameo PCGS. CAC. Only a few dozen Cameo 1871 proof Seated dollars are reported at PCGS, and Gem-quality examples are decidedly rare. We have previously offered only two Gem Cameos, both NGC coins. This CAC-approved PCGS example is at least as fine visually, showing a full strike, frosty motifs, and deeply reflective fields that are free of major distractions. The obverse is starkly contrasted with a champagne-tinged interior and gold, lavender, and aquamarine border toning. The reverse is more uniformly toned in mottled gold and olive-green hues with less field-device contrast. Finer examples of this late-series proof issue are extremely rare. Population: 3 in 65 (1 in 65+) Cameo, 3 finer. CAC: 2 in 65, 5 finer (1/17). NGC ID# 252T, PCGS# 87019

TRADE DOLLAR

1877-S Dollar, Original MS65
Seldom Offered So Fine

3829 1877-S MS65 NGC. Minute S, rare. The generous mintage of nearly 10 million pieces for the 1877-S Trade dollar issue and more than 4 million for the 1878-S can be viewed in hindsight as the last great gasp of this interesting silver dollar series. Comparable Gem 1877-S dollars appear far less often than expected, since many were melted after legal tender status was lost. This cream-gray and cobalt-blue example boasts a bold strike and surfaces unimpaired by any marks worthy of mention. Ideal for type purposes. Census: 27 in 65, 7 finer (1/17). NGC ID# 253E, PCGS# 7046

PROOF TRADE DOLLARS

1880 Trade Dollar, Toned PR65

3830 1880 PR65 PCGS. CAC. A sharp strike complements deeply mirrored fields on this Gem proof 1880 Trade dollar. Original olive-gold, sea-green, and lavender-gray hues encompass each side in concentric bands. There are no mentionable marks. The 1880 proof is often chosen for type purposes. Population: 62 in 65 (4 in 65+), 33 finer. CAC: 14 in 65, 22 finer (1/17). NGC ID# 27YS, PCGS# 7060

1882 Trade Dollar, PR64 Deep Cameo
Lightly Toned Proof-Only Issue

3831 1882 PR64 Deep Cameo PCGS. A stunning Choice example of this popular proof-only Trade dollar, with sharply detailed design elements and well-preserved surfaces, under subtle hints of champagne-gold toning. The deeply mirrored fields contrast profoundly with the frosty devices to create a delightful cameo effect. Population: 14 in 64 (4 in 64+) Deep Cameo, 26 finer (1/17). NGC ID# 27YU, PCGS# 97062

1883 Trade Dollar, PR65
Final Collectible Issue

- 3832 1883 PR65 PCGS.** The 1883 Trade dollar is the final collectible date of the series, from a proof-only mintage of 979 pieces. This Gem displays a vivid combination of greenish-gold, gray, and cobalt-blue toning over deeply mirrored fields and sharply detailed design elements. No mentionable distractions are evident. Population: 50 in 65, 24 finer (12/16). NGC ID# 5DP8, PCGS# 7063

MORGAN DOLLARS

1878 8TF Morgan Dollar
MS64 Deep Mirror Prooflike

- 3833 1878 8TF Lines in LIB, VAM-2, MS64 Deep Mirror Prooflike PCGS. CAC.** The eight tailfeathers reverse dollar is scarce in Deep Mirror Prooflike, and pieces grading finer than the present Choice example are rare. This coin displays a bold strike and appreciable cameo contrast. Grade-limiting abrasions are not severe. Each side exhibits delicate golden toning. Population: 48 in 64 (2 in 64+) Deep Mirror Prooflike, 5 finer. CAC: 5 in 64, 0 finer (1/17). NGC ID# 253H, PCGS# 40120 Base PCGS# 97073

1878 Morgan Dollar, MS66 Prooflike
Seven Tailfeathers, Reverse of 1878

- 3834 1878 7TF Reverse of 1878 MS66 Prooflike PCGS.** The usual type with seven tailfeathers and a flat-breasted eagle, the type commonly called the Reverse of 1878. This brilliant Premium Gem exhibits mirrored, prooflike fields that frame the frosty and fully lustrous obverse and reverse devices. Only about 10% of PCGS submissions of this type have received a Prooflike or finer designation. This issue is extremely rare in MS66 or finer grades with a prooflike designation, and none at this grade level have received the finer Deep Mirror Prooflike designation. Population: 4 in 66 Prooflike, 0 finer (1/17). NGC ID# 253K, PCGS# 7075

1879-CC Silver Dollar, MS63
First Generation 'Rattler' Holder

- 3835 1879-CC MS63 PCGS. CAC.** Large CC Normal Mintmark. Leroy Van Allen estimates about two-thirds of the 756,000-piece mintage are the Normal Mintmark variety, a mintage that is overstated due to melting of an unknown number of coins under the authority of the 1918 Pittman Act. Semireflective surfaces surround the frosted devices of this Select Uncirculated example, housed in a first generation PCGS holder with CAC endorsement. Only a few small marks are visible across the essentially brilliant fields and motifs. NGC ID# 253U, PCGS# 7086

1879-CC Silver Dollar, MS63
Normal CC Mintmark

- 3836 1879-CC MS63 NGC. CAC.** Normal CC Mintmark. The 1879-CC is one of the two key issues of the Carson City Morgan dollar series. This Select Mint State piece has exceptional eye appeal that results from rich emerald, turquoise, and gold toning on the obverse, with lavender, gold, and blue toning on the reverse. The strike is bold throughout, showing only slight weakness of the hair strands over Liberty's ear. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS64
Frosty Luster, CAC Green Label

- 3837 1879-CC MS64 PCGS. CAC.** Normal Mintmark. Vibrant, frosty luster rolls over the well-preserved surfaces of this brilliant 1879-CC Morgan dollar. The devices are sharply rendered, and grade-limiting marks are limited to a few tiny grazes on the obverse that do not detract. The 1879-CC is a better Carson City issue in high grade, seldom seen above the Choice grade level. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS62
Elusive Deep Mirror Prooflike Example

- 3838 1879-CC MS62 Deep Mirror Prooflike PCGS.** The 1879-CC Morgan dollar is a low-mintage, branch mint key and examples with Deep Mirror Prooflike surfaces are elusive in all grades. This attractive MS62 specimen offers sharply detailed, frosty design elements that contrast boldly with the deeply reflective fields. The surfaces are lightly marked for the grade and show delicate hints of pale gold toning. Population: 18 in 62 Deep Mirror Prooflike, 40 finer (1/17). NGC ID# 253T, PCGS# 97087

GSA DOLLARS

1879-CC GSA Dollar, MS62
Light Peach-Gold Toning

- 3839 1879-CC GSA MS62 NGC. VAM-4.** The 1879-CC is by far the scarcest Carson City Morgan dollar issue struck prior to the first cessation of coinage in 1885. Most of the issue was apparently released into Old West commerce, unlike the 1880-CC through 1885-CC, which were generally saved in Treasury vaults. Uncirculated GSA 1879-CC dollars are particularly in demand. This lustrous example exhibits lightly dappled peach-gold toning on the reverse. The strike is good and the fields are smooth. The grade is determined by a moderate diagonal mark on the cheek. NGC ID# 253T, PCGS# 518848 Base PCGS# 7086

1879-CC GSA Dollar, MS62+
Partly Contrasted Carson City Semikey

- 3840 1879-CC GSA MS62+ NGC.** Merely 4,123 examples of the 1879-CC were sold as part of the GSA release of the 1970s, roughly on par with 1890-CC. The two dates represent the scarcest Carson City semikeys after the famous 1889-CC. This example has a Normal Mintmark and retains complete brilliance throughout. Slight contrast is evident between the partly frosted motifs and moderately reflective fields. A lovely example of this elusive early issue. NGC ID# 253T, PCGS# 518848 Base PCGS# 7086

1879-CC GSA Dollar, MS64
Carson City Semikey

- 3841 1879-CC GSA MS64 PCGS. VAM-4.** A lightly toned and lustrous representative. The centers are incomplete, but the remainder of the strike is good. The fields are smooth, and the cheek displays the expected number of small marks. The 1879-CC and 1890-CC are the two rarest collectible Carson City GSA issues. The 1879-CC is also a semikey to the Morgan series. VAM-4 is attributable by the narrow vertical die gouge below Liberty's nose. The second C in the mintmark is doubled. A GSA box and a very scarce GSA certificate are included. Population: 11 in 64 (5 in 64+), 4 finer (12/16). NGC ID# 253T, PCGS# 518848 Base PCGS# 7086

MORGAN DOLLAR

1879-CC Morgan Dollar, MS62 Prooflike
VAM-3, Capped Die

- 3842** 1879-CC Capped Die, VAM-3, MS62 Prooflike PCGS. A Top 100 Variety. The VAM-3 “Capped Die” variety is elusive in Prooflike grades. This example not only has reflective fields, but the well-struck devices are frosty and brilliant, providing stark cameo contrast. A hint of gold toning appears around the extreme outer peripheries. Scattered abrasions limit the grade. NGC ID# 253T, PCGS# 40776 Base PCGS# 7089

GSA DOLLAR

1879-CC GSA Dollar, MS63+
VAM-3 ‘Capped Die,’ Top 100

- 3843** 1879-CC Capped Die, VAM-3, GSA, MS63+ NGC. A Top 100 Variety. In the September 1965 *Numismatic Scrapbook Magazine*, Leroy Van Allen stated the “Capped Die” variety was a Large CC over Small CC mintmark, and the myriad die chips near the mintmark were from a mint worker’s attempt to efface evidence of the initial (and wrong-sized) mintmark punch. The present lustrous example displays a trace of tan-gold toning, and exhibits minimal contact for the MS63+ grade. NGC ID# 253U, PCGS# 533225 Base PCGS# 7088

MORGAN DOLLARS

1880-CC Morgan Dollar, MS67
Rare, Among the Finest Certified

- 3844** 1880-CC MS67 PCGS. Despite more than 130,000 coins being distributed through the GSA sales of the early 1970s, the 1880-CC Morgan dollar is still a rarity in Superb Gem condition. This MS67 coin is among the finest examples known. Beautifully frosted surfaces showcase a hint of pale champagne color with no distracting abrasions. Strike weakness on the eagle’s breast and legs and the hair above Liberty’s ear is an after thought only. Carson City Morgans are prominently collected as a subset of the series, heightening demand for high-grade examples of the CC mintmark issues. We seldom have the pleasure of offering an 1880-CC in this lofty grade. NGC ID# 2542, PCGS# 7100

**1880-O Morgan Dollar, Sharp MS65
Conditionally Elusive Issue**

- 3845 1880-O MS65 PCGS.** Strike characteristics vary for the 1880-O Morgan dollar, but most of the 5.3 million coins struck exhibit average detail. A stunning Gem with exceptional eye appeal, this conditionally elusive New Orleans representative features a razor-sharp strike with nearly complete hair strands over Liberty's ear. Strong breast feathers are noted on the eagle. This impressive dollar exhibits brilliant and satiny mint surfaces that are almost completely untuned, save for delicate peripheral gold hues. Locating a finer example will prove nearly impossible Population: 42 in 65 (4 in 65+), 1 finer (1/17). NGC ID# 2543, PCGS# 7114

**1880/79-O Morgan, MS64 Deep Prooflike
VAM-4, A Top 100 Variety**

- 3846 1880/79-O VAM-4, Crossbar, MS64 Deep Prooflike NGC. CAC.** A Top 100 Variety. The small O mintmark and a strong remnant of the underlying 7 inside the upper loop of the second 8 identify this popular variety. The 1880-O in general is scarce in Choice Deep Prooflike condition, but the VAM-4 overdate is rare this fine. The present coin is among the finest endorsed by CAC. The strike is impressively sharp, and surprisingly few abrasions are observed for the grade. Deeply mirrored fields delivers stark cameo contrast on each side. Vivid golden rim toning frames brilliant interiors. Housed in a prior generation holder. Census (VAM-4): 3 in 64 Deep Prooflike, 0 finer. CAC: 3 in 64, 0 finer (12/16). NGC ID# 356J, PCGS# 41288 Base PCGS# 97117

**1880-S Silver Dollar, Brilliant MS68
A High-End Type Coin**

- 3847 1880-S MS68 PCGS. CAC.** Blazing, frosty mint luster rolls over brilliant surfaces on this high-grade 1880-S Morgan dollar. PCGS has seen only five numerically finer examples, and CAC has greenstickered only one finer coin. This piece yields a sharp strike and tremendous eye appeal. The 1880-S is a favorite type-coin issue and one of the few dates in the series obtainable in this lofty of a grade. NGC ID# 2544, PCGS# 7118

**1881-CC Dollar, MS66 Deep Mirror Prooflike
One Finer Example at PCGS**

- 3848 1881-CC MS66 Deep Mirror Prooflike PCGS.** Incredibly deep and profoundly reflective fields surround strongly struck, thickly frosted relief elements, explaining the dramatic contrast and Deep Mirror Prooflike designation. Such pieces are rarely seen so fine, and are essentially unheard of in higher grades. All-brilliant. The 1881-CC claims a small mintage of 296,000 coins. Population: 61 in 66 (4 in 66+) Deep Mirror Prooflike, 1 finer (1/17). NGC ID# 2547, PCGS# 97127

1881-CC Silver Dollar, MS66 Deep Mirror Prooflike

- 3849 1881-CC MS66 Deep Mirror Prooflike PCGS. CAC.** This impressive Premium Gem exhibits fully brilliant silver surfaces and exceptional field-to-device contrast with deeply mirrored fields and highly lustrous devices. Only one in 20 PCGS certified 1881-CC Morgan dollars have been awarded the Deep Mirror Prooflike designation, and in MS66 or finer grades, the ratio is one in 33. Population: 61 in 66 (4 in 66+) Deep Mirror Prooflike, 1 finer. CAC: 7 in 66, 0 finer (1/17). NGC ID# 2547, PCGS# 97127

1881-O Silver Dollar, MS66
Vivid Multicolor Obverse Toning

- 3850 1881-O MS66 PCGS.** The reverse is brilliant except for a blush of olive-gray patina concentrated at the upper third of the coin, while the obverse sheds the more-seedate demeanor with a riotous display of color. Vivid lemon-gold, tangerine-orange, violet, azure-blue, pink, and amazonite green shades evoke visions of rainbow toning on steroids. The vibrant coloration resonates with bright mint luster. This coin was once housed in an NGC holder, so it is important to note that both grading services have accepted the originality of the toning. A sharp O-Mint strike and the lack of any significant marks confirm the Premium Gem technical grade, which is unsurpassed at either service. PCGS population: 36 in 66 (3 in 66+), 0 finer (1/17). NGC ID# 2548, PCGS# 7128

1881-O Morgan, MS65 Deep Mirror Prooflike
Among the Finest Known

- 3851 1881-O MS65 Deep Mirror Prooflike PCGS.** Deep Mirror Prooflike 1881-O Morgan dollars are usually found no finer than MS64. This Gem is conditionally rare, and none are known finer. The strike is bold, accentuated by a hint of light golden toning. Deeply reflective fields offer modest cameo contrast. Population: 18 in 65 (1 in 65+) Deep Mirror Prooflike, 0 finer (12/16). NGC ID# 2548, PCGS# 97129

1882-S Silver Dollar, MS67+ Prooflike
Exemplary Quality, Ideal Type Coin

- 3852 1882-S MS67+ Prooflike PCGS. CAC.** The 1882-S has a well-earned reputation for quality and high-grade coins appear with frequency at auction. That said, this Plus-graded Superb Gem with CAC endorsement is the single finest prooflike example we show in our archives. Starkly brilliant and nicely contrasted, the mirrored surfaces show only a scattering of minor ticks and Liberty's cheek is incredibly clear and round. The strike is superb. Population: 8 in 67 (2 in 67+) Prooflike, 0 finer. CAC: 6 in 67, 0 finer (1/17). NGC ID# 254F, PCGS# 7141

1883-CC VAM-5B Dollar, MS67
Ex: Michael Casper Collection

- 3853 1883-CC MS67 PCGS. CAC. VAM-5B.** A sharply struck Superb Gem. Potent cartwheel luster sweeps faintly toned and virtually immaculate surfaces. An exceptional Carson City type coin that must be seen in person to be fully appreciated. Certified in an old green label holder.
Ex: Long Beach Signature (Heritage, 6/2000), lot 7989; Atlanta Signature (Heritage, 8/2001), lot 6632; Michael Casper Collection, Part Four (Heritage, 8/2006), lot 2887. NGC ID# 254J, PCGS# 7144

1884-O Dollar, MS66
Memorable Obverse Toning

- 3854 1884-O MS66 PCGS. CAC.** Given the flamboyant obverse coloration, it would be easy to gloss over the technical quality of this CAC-endorsed Premium Gem dollar, but that would be a mistake. The surfaces are nearly free of bagmarks or abrasions and the O-Mint strike is quite sharp for the issue. The brilliant reverse shows a few faint glints of gold at the rims, while the obverse is a riotous affair of fuchsia-pink, amazonite-blue, violet, flame-orange, and canary-yellow. Expect competition from all sides when this stunning dollar is called. NGC ID# 254N, PCGS# 7154

1885-CC Morgan Dollar, MS67
Popular VAM-3

- 3855** 1885-CC MS67 NGC. VAM-3. Light sun-gold toning enriches the peripheries of this thoroughly lustrous Carson City coin. The surfaces are nicely struck, and free from mentionable imperfections. In Uncirculated grades, VAM-3 is the most prevalent variety of the low-mintage 1885-CC. Although this issue can only be called very scarce in MS67, finer examples are prime condition rarities. Census: 94 in 67 (6 in 67★), 5 finer (1/17). NGC ID# 254S, PCGS# 7160

1888-O Dollar, VAM-1B3, MS62
Famous Scarface Variety

- 3856** 1888-O Scarface, VAM-1B3, MS62 PCGS. A Top 100 Variety. A die crack travels from denticles through the dot and across the field to Liberty's cheek and jaw. VAM-1B is known in several die states, but only this late state represents the true and highly collectible Scarface variety. This MS62 example is brilliant with somewhat frosty luster. The cheek and fields are expectedly marked for the grade. Slightly soft over the centers. Population: 30 in 62, 20 finer (1/17). NGC ID# 2556, PCGS# 133918 Base PCGS# 7184

1889-CC Silver Dollar, AU58
Some Luster and Reflectivity Remain

- 3857** 1889-CC AU58 ANACS. Silver dollar coinage at the Carson City Mint in 1889 was not commenced until October, with a minimal 350,000 pieces struck by the end of the calendar year. As the first silver dollars produced at the Nevada facility since 1885, many were released into circulation before the turn of the century. Occasional Mint State pieces emerged from the Treasury decades later, but no significant quantities were dispersed. Today, Uncirculated examples are scarce, and high-end AU pieces enjoy strong collector demand.

This near-Mint coin displays a bold strike with only slight high-point friction. Some semiprooflike mirroring appears in the fields. Both sides have light golden toning, and a read mark on Liberty's cheek is the only mentionable abrasion. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, MS62
Scarce Deep Mirror Prooflike Example**

3858 1889-CC MS62 Deep Mirror Prooflike PCGS. Used only as an assay office and storage facility from 1886-1888, the Carson City Mint was reactivated as a coinage facility in 1889. Unfortunately, necessary repairs to the building and machinery and replacement of key personnel prevented the start of coinage operations until October. Because of the abbreviated striking period, only 350,000 Morgan dollars were produced before the end of the year. The coins circulated heavily in the regional economy and few were saved by collectors or stored away in government vaults. When the GSA sales began in 1972, only one example of the 1889-CC was found in the government stockpile. As a result, the 1889-CC is the rarest Carson City Morgan dollar and one of the most sought-after keys to the series.

The present coin exhibits sharply detailed, frosty design elements that provide startling cameo contrast with the deeply reflective fields. The surfaces show the expected number of minor contact marks for the grade, with a few hints of pale gold toning. Population: 57 in 62 Deep Mirror Prooflike, 65 finer (1/17). NGC ID# 2559, PCGS# 97191

**1890-CC Dollar, MS64+ Deep Mirror Prooflike
Cameo Contrast, Fewer Marks Than Usual**

3859 1890-CC MS64+ Deep Mirror Prooflike PCGS. CAC. Only a handful of Plus-graded near-Gem coins with Deep Mirror Prooflike surfaces exist at PCGS, and fewer still carry the important CAC endorsement. This high-end coin is only lightly abraded for the Carson City issue. Frosted design elements contrast boldly with the silver-mirrored fields. Liberty's cheek is quite smooth and the strike is surprisingly sharp for an 1890-CC. Population: 5 in 64+ Deep Mirror Prooflike, 28 finer (1/17). NGC ID# 45YV, PCGS# 97199

**1890-O Morgan Dollar, MS65
Elusive Deep Mirror Prooflike Example**

3860 1890-O MS65 Deep Mirror Prooflike PCGS. The 1890-O Morgan dollars are far from common in Deep Mirror Prooflike format, and Gems such as this are downright rare. The design elements are sharply detailed and even through delicate gold-gray patina the coin's essential reflectivity remains intact. Light but distinct frost on the portrait completes the all-around eye appeal. Population: 21 in 65 Deep Mirror Prooflike, 1 finer (1/17). NGC ID# 255E, PCGS# 97201

**1891-O Dollar, MS64+ Prooflike
The Sole Finest Prooflike Coin at PCGS**

3861 1891-O MS64+ Prooflike PCGS. CAC. The 1891-O Morgan is scarce in any Prooflike grade. PCGS records a dozen Choice examples, but the present piece is the only Plus-graded coin in this grade, and finer representatives are unknown; NGC also reports a single MS64+ Prooflike coin with none finer (1/17). This piece offers a bold strike and brilliant luster. Mirrored fields deliver appreciable cameo contrast. Population: 12 in 64 (1 in 64+) Prooflike, 0 finer. CAC: 4 in 64, 0 finer (1/17). NGC ID# 4J6A, PCGS# 7209

1891-S Morgan Dollar, MS65**Registry Grade Deep Mirror Prooflike Specimen**

- 3862 1891-S MS65 Deep Mirror Prooflike PCGS.** The San Francisco Mint struck almost 5.3 million Morgan dollars in 1891 and the issue was considered common until relatively recent times. The Morgan dollar series enjoyed increased popularity with collectors in the 1960s and 1970s, focusing attention on the series, and revealing how elusive high-grade specimens of the 1891-S are in comparison to the number of collectors seeking an example. Fortunately, the 1891-S was a well-made issue, in general, and a surprising number of attractive prooflike specimens have surfaced over the years. The issue is definitely scarce with the Deep Mirror Prooflike designation, however.

Among Deep Mirror Prooflike examples of this issue, the present coin is tied for finest-certified honors. The frosty design elements are sharply detailed throughout and provide intense cameo contrast with the deeply reflective fields. The mostly brilliant surfaces show only a few minor signs of contact and eye appeal is terrific. Population: 4 in 65 Deep Mirror Prooflike, 0 finer (1/17). NGC ID# 3VXL, PCGS# 97211

1892 Dollar, MS65 ★**Dramatic Rings of Color**

- 3863 1892 MS65 ★ NGC. VAM-3.** Dramatic peripheral arcs of peach-gold, powder-blue, and ruby-red adorn both sides. The centers are brilliant. Well-preserved and lustrous. The reverse is die doubled, apparent on UNITED STATES, IN GOD WE TRUST, and the right-side wreath. This is the only Gem at NGC with a Star designation. That service has seen merely one finer example of the 1892 (1/17). NGC ID# 255L, PCGS# 7212

1893-CC Morgan Dollar, MS60**Always Sought-After Carson City Issue**

- 3864 1893-CC MS60 PCGS. CAC.** At 677,000 pieces struck, the 1893-CC mintage is only slightly under the combined 1893 mintages of the Philadelphia, San Francisco, and New Orleans mints (total 778,000 pieces). Nevertheless, the 1893-CC is ceaselessly popular with collectors as the final Carson City silver dollar. The present coin rightfully displays a Mint State designation, with lustrous-yet-abraded surfaces but no sign of wear. Pale-blue and gold toning accents yield to bright silver luster on both sides. Housed in a green label holder with CAC endorsement. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63**Minimally Marked Final-Year Example**

- 3865 1893-CC MS63 PCGS.** Flying under the radar with a mintage of 677,000 coins, the 1893-CC proved to be one of the scarcer Carson City issues during the Treasury release of the 1970s. Hoards of 1880s CC dollars were sold, while a single 1893-CC was released. The obverse is patinated in pale golden hues, leaving the reverse entirely brilliant. The centers are incompletely defined, but the surrounding relief elements feature bold detail. The cheek and fields showcase minor grazes, none of which are singular in nature. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, MS63+
Brilliant and Lustrous, Few Marks

- 3866** 1893-CC MS63+ PCGS. CAC. 30th Anniversary Green Label Holder. Doubled 3 at the top outside loop. This Plus-graded Select Uncirculated 1893-CC dollar with CAC endorsement approaches Choice status, with far fewer bagmarks than normally seen on the issue. Flashy cartwheel luster radiates from both sides of the brilliant, frosted surfaces. A sharply struck coin with the exception, as usual, immediately above the ear. NGC ID# 255S, PCGS# 7222

1893-CC Morgan, MS64+
Original Luster and Toning

- 3867** 1893-CC MS64+ NGC. The Treasury released quantities of the 1893-CC dollar over the course of a few decades from the 1920s to the 1960s. However, these were primarily bagmarked coins. The GSA sales of the early 1970s included only a single example of the date, making the scarcity of this issue in high grade an unchangeable road block for collectors. Today, Gems are rare, and high-end Choice coins are in demand. The present piece is one of only seven Plus-graded near-Gems at NGC, with eight finer representatives reported (12/16). The surfaces display frosty, mint-fresh luster cast in warm golden toning that deepens to lavender, amber, and blue around the peripheries. There are no severe abrasions, leaving the coin quite attractive. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS64+
Few Known Finer

- 3868** 1893-CC MS64+ PCGS. CAC. Between 120,000 and 150,000 silver dollars were struck each month at the Carson City Mint in 1893 from January through May, totaling 677,000 pieces in total. Production was ceased on May 23rd, according to Dave Bowers' *Guide Book*, fifth edition, although the Carson City Mint was not officially abolished until 1899. More than 5 million Carson City dollars — including likely many 1893 coins — were removed from storage at Carson City in late 1899 and early 1900, and transferred to the San Francisco Mint and the U.S. Treasury Building in Washington D.C. Some may have been destroyed in the Pittman Act melts of 1918, and others were distributed through traditional channels. By the time of the GSA sales of the early 1970s, government supplies of the 1893-CC Morgan had dwindled to a single coin. Today, the 1893-CC is scarce in high grade and rarely seen above the Choice grade level.

The present coin displays a bold strike and frosty, brilliant mint luster. A few light marks on the cheek limit the grade but are not severe. The Plus designation and CAC green label give this piece heightened appeal. PCGS reports 15 finer representatives (1/17). NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS60 Prooflike
Final CC-Mint Issue**

- 3869 1893-CC MS60 Prooflike PCGS. CAC.** This impressive Mint State Morgan dollar represents the last year of coinage at the famous Carson City Mint. Close inspection reveals some vertical planchet striations at the centers, which were not completely effaced when the coin was struck. The fields are deeply reflective and show scattered minor contact marks and hairlines on both sides. Housed in a green label holder. NGC ID# 255S, PCGS# 7223

**1893-O Silver Dollar, MS62
Satin Mint Luster**

- 3870 1893-O MS62 NGC.** Satiny luster appears across each side of this virtually brilliant 1893-O dollar in Mint State. The usual strike weakness occurs on the eagle's breast and the hair above Liberty's ear, but there are no major abrasions — only light handling marks limit the grade. The 1893-O is a semikey, popular in Uncirculated grades. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS63
In a First Generation Holder**

- 3871 1893-O MS63 PCGS.** Dusky champagne and powder-blue hues encompass this Select 1893-O Morgan dollar, masking the grade-limiting abrasions to the point where they are almost invisible to the unaided eye — only a loupe and careful rotation beneath a light reveals light grazes on the cheek and in the field that prevented a finer numeric assignment from PCGS. This coin is slightly weak on the hair above Liberty's ear but otherwise outstanding for the grade and issue. Housed in an old "rattler" holder. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS63
Sharp and Attractive**

- 3872 1893-O MS63 PCGS. CAC.** With the lowest mintage of any New Orleans Morgan dollar, the 1893-O is scarce in both an absolute sense as well as conditionally rare in higher Mint State grades. Thick mint frost blankets both sides of this Select Uncirculated example, where cartwheel mint luster glows softly beneath the lightly toned surfaces. Crescents of attractive sea-green, light-blue, and orange-gold toning appear on each side. Many 1893-O coins lack eye appeal, yet this piece is pleasing and sharp. PCGS reports just 95 numerically finer examples. The issue is especially coveted with a green CAC label that is often sought but seldom granted. CAC: 18 in 63, 17 finer (1/17). NGC ID# 255T, PCGS# 7224

**1893-S Morgan Dollar, VF20
Intensely Toned**

- 3873 1893-S VF20 PCGS.** Deeply toned with dove-gray surfaces and areas of silver-gray at points of wear, this collector-friendly piece is representative of the VF grade most often encountered for the key circulation-strike issue in the Morgan dollar series. The dense toning is a bit subdued, but marks are minimal. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, Choice XF
The Ideal Collector Coin

- 3874 1893-S XF45 PCGS. CAC.** The grade of the 1893-S can have a significant impact on the perceived quality of an entire Morgan dollar collection. The date is seldom available in Mint State, and such coins are usually out of reach for budget-conscious collectors. Whether assembling a circulated set or one in mostly Mint State condition, the present Choice XF representative would be an excellent acquisition. Bold detail and uniform battleship-gray color are exceptional attributes for a circulated collection, and its close proximity to the scarce AU grade level makes it a worthy inclusion for an otherwise Uncirculated date and mintmark set. The patina presents as original, and the surfaces are generally smooth and problem-free. NGC ID# 255U, PCGS# 7226

1894-O Silver Dollar, MS63
Challenging in Mint State

- 3875 1894-O MS63 PCGS.** The 1894-O Morgan dollar's limited mintage of little more than 1.7 million coins contributes to its scarcity in Uncirculated condition. This Select example balances affordability with technical quality, and eye appeal is pleasing. Brilliant surfaces offer satiny luster with light, scattered marks that determine the grade. Slight strike weakness on the central high points is typical of this issue. NGC ID# 255W, PCGS# 7230

1895-S Morgan Dollar, MS65 Prooflike
Ex: Eliasberg Collection
Rarely Seen This Fine

- 3876 1895-S MS65 Prooflike NGC.** Ex: Eliasberg. The 1895-S Morgan is a semikey date, and Prooflike examples are scarce. In Gem condition, the population of these piece declines sharply. NGC has seen nine Gem Prooflike coins (one with a Plus designation) and none finer. PCGS reports one in this grade and one finer. Only one Deep Mirror Prooflike coin surpasses the MS64 grade level at either service (1/17). This outstanding Condition Census Prooflike example is from the Eliasberg collection and previously was purchased directly from the San Francisco Mint by J.M. Clapp. The coin has stark cameo contrast and brilliant, frosty devices. The fields are reflective but with faint die striations as if struck from a fresh die pair. A few light grazes on the cheek limit the grade. The usual strike softness is seen on the eagle's breast and the hair above Liberty's ear. A great rarity in this grade.

Ex: Purchased from the San Francisco Mint by J.M. Clapp; John H. Clapp; Clapp Estate, to Louis Eliasberg, Sr. (1942); Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 2300. NGC ID# 255Z, PCGS# 7239

1896-O Silver Dollar, MS63
Seldom Offered Finer

- 3877 1896-O MS63 PCGS.** Tinges of amber-gold toning appear on each side of this satiny 1896-O Morgan in Select Uncirculated condition. The usual strike weakness appears on the eagle's breast and the hair above Liberty's ear, although the definition is better than average. Light chatter on Liberty's cheek limits the grade. PCGS has seen only 32 numerically finer submissions (12/16). NGC ID# 27ZU, PCGS# 7242

1896-S Morgan Dollar, MS64
Scarce in Finer Condition

- 3878 1896-S MS64 PCGS.** Available through MS64, the 1896-S Morgan dollar becomes suddenly scarce in Gem condition. This collectible near-Gem offers brilliant satin luster with no severe abrasions. Strike weakness on the eagle's breast and the hair above Liberty's ear is not unusual for this issue. NGC ID# 2564, PCGS# 7244

1897 Morgan Dollar, MS67
Golden-Toned Condition Rarity

- 3879 1897 MS67 PCGS.** Available in lower grades, the 1897 Morgan dollar is seldom offered in MS67 and is unknown numerically finer. This top-grade example displays a bold strike and untouched, softly frosted luster. Warm golden toning emerges from the peripheries. Eye appeal abounds. Population: 45 in 67 (1 in 67+), 0 finer (12/16). NGC ID# 27P5, PCGS# 7246

1898-S Silver Dollar, MS66+
Lustrous Devices, Reflective Fields

- 3880 1898-S MS66+ PCGS. CAC.** Premium Gem examples are scarce, and finer coins are extremely rare. This Plus-designated, CAC-endorsed 1898-S Morgan dollar displays vibrant mint luster with a hint of reflectivity in the fields. Golden-orange and amber border toning on the obverse makes the central Liberty portrait stand out, while the reverse is more traditionally cast in a light champagne hue. Liberty's cheek is clean, and eye appeal exceeds expectations for the Premium Gem grade level. NGC ID# 256A, PCGS# 7256

1900-S Morgan, MS64 Deep Prooflike
In a Prior Generation Holder

- 3881 1900-S MS64 Deep Prooflike NGC.** Reflective fields complement well-struck, satiny design elements on this Choice Deep Prooflike example. The interiors are brilliant, while hints of lavender and blue toning appear occasionally around the borders. A few light marks are as expected for the grade. The 1900-S is rarely seen in any Deep Prooflike grade. Housed in a prior generation holder. Census: 4 in 64 Deep Prooflike, 2 finer (1/17). NGC ID# 3BGD, PCGS# 97271

**1901 Silver Dollar, Satiny MS63
Seldom Offered Finer**

- 3882 1901 MS63 PCGS Secure.** The 1901 is a well-known condition key in Uncirculated grades. Moreover, the typical example in such condition is no finer than MS62, showing heavy abrasions and surface chatter. This Select PCGS Secure representative is a seldom seen opportunity to acquire an above-average example of the elusive date. Finer coins are rare and typically headline auctions when offered. This piece displays satin luster with champagne-gray toning over each side with deeper amber and silvery-blue hues around the peripheries. Slight strike weakness is noted on the eagle's breast and the hair above Liberty's ear for accuracy. PCGS reports 40 finer coins, including possible resubmissions (1/17). NGC ID# 256J, PCGS# 7272

**1903-S Morgan Dollar, MS63
Bold Design Motifs**

- 3883 1903-S MS63 PCGS.** An important example for the advanced collector, this 1903-S Morgan dollar has satiny silver luster beneath light gold and iridescent toning. The strike is excellent, with the design motifs exhibiting strong hair details over Liberty's ear, and excellent feather detail on the eagle's breast. A delightful piece for the advanced collector. NGC ID# 256T, PCGS# 7288

**1904 Morgan Dollar, Toned MS66
Among the Finest Certified**

- 3884 1904 MS66 PCGS.** Unlike the New Orleans issue of this year, the 1904 Philadelphia Morgan dollar is conditionally rare in Premium Gem condition. This golden and lavender-russet example displays satiny luster with no distracting abrasions. The deeper hues gravitate toward the rims. None are numerically finer at either service. Population: 32 in 66 (2 in 66+), 0 finer (12/16). NGC ID# 256U, PCGS# 7290

**1904-S Silver Dollar
Scarce in Near-Gem Condition**

- 3885 1904-S MS64 PCGS. CAC.** Faint traces of lemon and tan-gold toning exist mainly at the margins of this otherwise brilliant and lustrous 1904-S dollar. Sharply struck for the issue (which often shows below-average definition), only a bit of blending above the ear prevents full details on the portrait. Liberty's cheek is smooth and rounded, and there are just a few light ticks at the nose and neck truncation. CAC: 66 in 64, 24 finer (1/17). NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLARS

**1879 Morgan Dollar, PR65 Cameo
Rare High-End Coin With Contrast**

- 3886 1879 PR65 Cameo NGC.** The 1879 proof Morgan is scarce in Cameo grades, particularly at the Gem grade level. This issue was not as well-made as some later proof Morgans, and attractive coins with good contrast are elusive. The present coin is a rare find — a starkly contrasted Gem with warm golden toning that blankets each side. Daubs of lavender and blue also appear around the borders. The strike is sharp, and eye appeal is excellent. Census: 9 in 65 Cameo, 38 finer (1/17). NGC ID# 2722, PCGS# 87314

1882 Morgan Dollar, PR65 Cameo
Warmly Toned in Light Golden Hues

- 3887 1882 PR65 Cameo PCGS.** Gem-quality Cameos are rarely offered. This piece displays a full strike and deeply mirrored fields. Both sides have a blush of warm champagne toning that complements the field-device contrast on the reverse and appears more milky over the obverse. An excellent proof type coin for the grade. Population: 16 in 65 (2 in 65+) Cameo, 23 finer (12/16). NGC ID# 27Z6, PCGS# 87317

1894 Dollar, PR64
Colorful Patina

- 3888 1894 PR64 PCGS.** Proof 1894 Morgan dollars (972 specimens struck) often stand in for their circulation-strike counterparts in high grades. This Choice proof dollar is uniformly toned in violet, rose, and blue-green patina that subdues field-device contrast. The rich color also services to conceal minute contact marks that prevent a higher grade. NGC ID# 2577, PCGS# 7329

1898 Morgan Dollar, PR66 Deep Cameo
Exceptionally Well-Produced Issue

- 3889 1898 PR66 Deep Cameo PCGS.** A limited mintage of 735 proof Morgan dollars was accomplished in 1898, but quality control was excellent and Mike Fuljenz notes, "This date was probably the best made in the entire series." The coins were produced at intervals throughout the year, with the largest number struck in December, probably to serve as Christmas gifts.

The present coin is a delightful Premium Gem, with razor-sharp definition on the frosty design elements and deeply mirrored fields with dramatic cameo contrast. The impeccably preserved surfaces are blanketed in attractive shades of greenish-gold toning, with a single amber alloy spot on Liberty's cap. Population: 10 in 66 Deep Cameo, 18 finer (1/17). NGC ID# 27ZW, PCGS# 97333

PEACE DOLLARS

1921 Peace Dollar, MS66
Rarely Encountered Finer

- 3890 1921 MS66 PCGS.** The chill that just blew across the room comes from this extremely frosty Peace dollar, a sharply struck Premium Gem with snowy silver-gray surfaces and softly glowing satin luster. Marks are at a minimum and even the high points of the hair and the eagle's plumage are show strong detail. PCGS and NGC combined record just 13 numerically finer coins. NGC ID# 2U4E, PCGS# 7356

1923 Peace Dollar, Brilliant MS67
Among the Few Top-Graded Examples

- 3891 1923 MS67 PCGS.** Liberty's cheek and neck are utterly devoid of marks, and the fields are impressively smooth and unabraded. Each side is entirely brilliant without a hint of color. Frosty luster cartwheels around this outstanding Superb Gem Peace dollar, one of the few top-graded survivors from a high mintage of 30 million coins. Population: 65 in 67, 0 finer (1/17). NGC ID# AMPA, PCGS# 7360

1923-D Peace Dollar, MS66+
A CAC-Endorsed Condition Census Rarity

- 3892 1923-D MS66+ PCGS. CAC.** As a whole, and compared to the earlier and longer-produced Morgan type, the Peace dollar series is easily collectible in its entirety. The challenge comes when one attempts to assemble a Premium Gem or better collection, as most dates become scarce or even rare at this grade level. The 1923-D is an excellent example of a date that is available through MS65 but seldom offered finer. Barely more than 100 pieces are reported by PCGS in MS66 and better condition, topped by five in MS66+ and one in MS67. Collectors hoping to be saved by crossing over into the NGC-certified population will find a strikingly smaller tally from that service, which lists only 29 Premium Gems (just one of which is Plus-designated) and no MS67s. Moreover, collectors seeking a CAC-endorsed coin for Registry purposes have only 26 Premium Gems from which to choose, with none finer (12/16). Thus, the importance of the present offering becomes blatantly clear; this high-end 1923-D Peace dollar is effectively within the Condition Census and it is an extreme rarity. Aesthetic highlights include a sharp strike and frosty luster cast in mottled multicolor toning on the reverse with peripheral amber-gold on the obverse. A loupe finds Liberty's cheek and the adjacent field pleasantly devoid of serious abrasions. NGC ID# 257G, PCGS# 7361

**1925 Dollar, Lightly Toned MS67
Just a Single Finer Coin at PCGS**

- 3893 1925 MS67 PCGS. CAC.** Superb Gem examples of the 1925 Peace dollar are obtainable, but only a couple of coins are known to survive in better condition than this lovely MS67 piece. An intriguing blend of powder-blue, lavender, and gold patina covers each side. The strike is good with a touch of incompleteness over parts of the legends and extreme centers. Thickly frosted. PCGS reports a single finer submission (1/17). NGC ID# 257L, PCGS# 7365

**1927 Peace Dollar, MS65+
Rare in Finer Grades**

- 3894 1927 MS65+ PCGS. CAC.** A spectacular Plus-graded Gem representative from a low mintage of 848,000 pieces, this coin exhibits sharply detailed design elements throughout and the well-preserved surfaces display attractive shades of golden-tan toning. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 16 numerically finer examples (1/17). NGC ID# 257S, PCGS# 7370

**1927-D Peace Dollar, MS65
Rarely Encountered Finer**

- 3895 1927-D MS65 PCGS. CAC.** The 1927-D is a better date in high grade. Premium Gems are the finest known, but such coins are rarely offered at auction. This CAC-endorsed Gem is merely scarce, and its eye appeal is outstanding. The strike is sharp, and frosty luster shows soft champagne toning on each side with occasional flecks of russet. PCGS reports 13 Premium Gems finer (1/17). NGC ID# 257T, PCGS# 7371

**1927-D Dollar, MS65+
Conditionally Elusive Denver Issue**

- 3896 1927-D MS65+ PCGS Secure. CAC.** The 1927-D is one of the more conditionally challenging dates in the Peace dollar series, being scarce in Gem condition and notably rare any finer. This Plus-designated representative is light golden in tone, with vibrant underlying luster and minimally disrupted surfaces. Only 13 coins are numerically finer at PCGS, and NGC has so-graded just three examples (1/17). NGC ID# 257T, PCGS# 7371

**1928-S Peace Dollar, MS65
Extremely Rare in Finer Grades**

- 3897 1928-S MS65 NGC.** A strong strike and above-average luster confirm the Gem status of this conditionally rare San Francisco issue. Despite a moderate 1.6 million-piece mintage, the 1928-S is the scarcest Peace dollar in MS65 or finer grades — a fact that is sometimes lost because of its availability in lesser grades. Any finer, the 1928-S is nearly unavailable, with just a single coin at NGC and PCGS each, both grading MS66.

A light speckling of blue and tan-gold toning occupies the obverse border. Faint gold hues add a natural appearance to the frosted silver fields and devices. A few tiny marks are well-hidden among the raised elements. Given the few pieces that qualify for an MS65 grade, this example is sure to excite Peace dollar specialists and it is destined to fill the centerpiece role for a fine collection. Census: 42 in 65, 1 finer (1/17). NGC ID# 257W, PCGS# 7374

**1934-S Silver Dollar, MS63
Appealing for the Grade**

- 3898 1934-S MS63 NGC.** Boasting a mintage only slightly more than 1 million coins, the 1934-S Peace dollar is widely recognized as the scarcest date in the series in Mint State. This collectible Select representative displays bold detail and frosty, golden-toned luster. Light, trivial abrasions here and there determine the grade but pose little distraction. NGC ID# 257Z, PCGS# 7377

**1935-S Peace Dollar, MS66+
Rarely Encountered Finer**

- 3901 1935-S MS66+ PCGS.** This late-series issue is scarce in Premium Gem condition and extremely rare any finer. The present coin is one of only seven Plus-graded MS66 pieces at PCGS, and that service lists three finer representatives (1/17). The strike is well-executed, and each side displays frosty mint luster. A hint of light champagne toning graces the unabraded surfaces. NGC ID# 2583, PCGS# 7379

**1934-S Peace Dollar, MS64
Elusive San Francisco Issue**

- 3899 1934-S MS64 PCGS.** San Francisco Mint officials struck more than 1 million Peace dollars in 1934. The 1934-S is considered the most elusive issue in the series in grades ranging from MS60 to MS64. Speckled russet-gold patina faintly colors moderately dusky, but still-brilliant surfaces. Lightly struck at the centers, as usual. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS64
Original Champagne and Russet Toning**

- 3900 1934-S MS64 PCGS. CAC.** This Choice, CAC-endorsed 1934-S dollar resides at the top of the usually seen Mint State grades, with finer examples elusive. The coin shows a bold strike and frosty luster. Champagne toning over each side is accented by flecks of russet around the relief elements. There are no major abrasions. The 1934-S is the scarcest date in the series in Uncirculated condition. NGC ID# 257Z, PCGS# 7377

SUSAN B. ANTHONY DOLLAR

**1981-S Anthony Dollar, MS67
Beautiful Rainbow Toning
Tied for Finest Certified**

- 3902 1981-S MS67 PCGS.** Delicate champagne interiors melt into ribbons of rainbow toning around the peripheries of this remarkable 1981-S Susan B. Anthony dollar. The 1981-S is extremely rare certified this fine, and none are finer. This piece displays a bold strike and exceptionally clean surfaces — the ideal Registry coin. Population: 3 in 67, 0 finer (12/16). NGC ID# 259B, PCGS# 9580

CERTIFIED MODERN PROOF SET

1936 Five-Piece Proof Set, PR64-PR65
A Blend of Brilliance and Delicate Toning

3903 1936 Five-Piece Proof Set, PR64-PR65 NGC. The set is all NGC-certified in individual holders and includes:

Cent — Satin Finish — PR65 Red. This piece displays a full strike with modest reflectivity in the fields. Warm copper-red luster illuminates mostly carbon-free surfaces.

Nickel — Satin Finish — PR65. The Indian portrait and bison are fully defined on this beautifully preserved Gem proof, while concentric pastel toning displays shades of olive-gold, lavender, and ice-blue.

Dime PR64. Here is a largely brilliant Choice proof that displays only a few tiny flecks of russet in the obverse fields. The coin is fully struck and shows no major distractions.

Quarter PR64. A champagne-tinted near-Gem proof with no obvious distractions.

Half Dollar PR64. The flagship-coin in this set displays a needle-sharp strike and glimmering reflectivity. Both sides offer warm champagne toning. (Total: 5 coins)

GOLD DOLLARS

1849-D Gold Dollar, MS61

3904 1849-D MS61 NGC. **Variety 1-A.** Frosty, light yellow-gold surfaces emit radiant luster. A few minor obverse marks limit the grade. Typical of the issue, the central obverse hair details are incomplete. The 1849-D is collectible in most grades, but there is always a high demand from type collectors who seek first year of issue coins or those from the Southern mints.
Ex: ANA Signature (Heritage, 8/2007), lot 2788. NGC ID# 25BD, PCGS# 7507

1850-C Gold Dollar, Pleasing MS62
Scarce Charlotte Issue, Sharp Strike

3905 1850-C MS62 PCGS. **Variety 1.** Easily among the scarcest gold dollars from the Charlotte Mint, the 1850-C saw a mintage of 6,956 pieces. Only the 1859-C shows a lower mintage in the 9-issue C-Mint series (excluding the legendary 1849-C Open Wreath, which is a variety rather than a separate issue). Doug Winter estimates between 150 and 250 pieces of the 1850-C survive in all grades.

This example is undeniably sharp and attractive. Greenish-gold surfaces display semiprooflike fields and a sharp strike — including the hair near the eye, ear, and at the top of the head. The star centers are also sharp. The reverse lettering and wreath are crisply struck. Lilac accents visit the smooth fields that show angled striations from die polishing. The eye appeal is quite strong. Population: 7 in 62 (1 in 62+), 3 finer (1/17). NGC ID# 25BG, PCGS# 7510

**1853 Gold Dollar, MS66+
Exceptional Type One Type Coin**

- 3906 1853 MS66+ PCGS.** The small-diameter Longacre design proved to be difficult to produce and the miniature size was awkward in commerce, yet the denomination had a long run (albeit with significant design and size changes). It will be hard to improve on the technical quality of this example, with its razor-sharp strike and richly frosted, nearly mark-free surfaces. Vibrant mint luster radiates from both sides, unhindered by any annoying alloy spots that sometimes affect the issue. Very few pieces are finer. Population: 55 in 66 (5 in 66+), 12 finer (1/17). NGC ID# 25BU, PCGS# 7521

**Near-Mint 1854-D Gold Dollar
Minimally Abraded Surfaces**

- 3907 1854-D AU58 NGC. Variety 6-H.** The final Type One Dahlonaga gold dollar issue is extremely scarce, as suggested by its minute mintage of 2,935 pieces. This pale gold representative shows moderate softness of strike at the centers, as is common for the variety, but no abrasions are consequential, and luster fills the legends and outlines the wreath. Census: 26 in 58, 25 finer (12/16).
Ex: *Central States Signature* (Heritage, 4/2011), lot 6263; *Long Beach Signature* (Heritage, 9/2012), lot 4750. NGC ID# 25BZ, PCGS# 7526

**1855-O Gold Dollar, MS61
Lustrous and Appealing for the Grade**

- 3908 1855-O MS61 NGC. Variety 1.** The only New Orleans Mint gold dollar of the Type Two design, the 1855-O is highly popular with type collectors. This lovely piece has light green-gold luster with frosty surfaces. The strike is sharp, although the 8 is a trifle weak as usual. Here is an attractive and rare gold dollar. Census: 25 in 61, 35 finer (12/16).
Ex: *Houston Signature* (Heritage, 12/2010), lot 4256. NGC ID# 25C7, PCGS# 7535

1858 Gold Dollar, Scarce MS66

- 3909 1858 MS66 PCGS.** From a mintage of 117,995 pieces, the 1858 gold dollar is surprisingly difficult to locate in high grade. This delightful Premium Gem exhibits well-detailed design elements, with prominent "Longacre doubling" on the reverse. The virtually pristine orange-gold surfaces display vibrant mint luster throughout and eye appeal is terrific. Population: 3 in 66, 6 finer (1/17). NGC ID# 25CH, PCGS# 7548

**1871 Gold Dollar, Top Grade MS68
Unforgettable Rich, Colorful Patina**

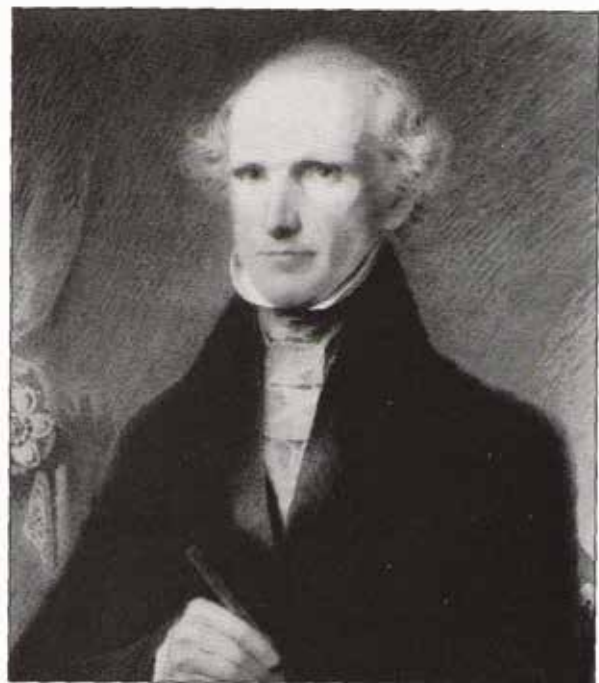

- 3910 1871 MS68 PCGS.** The mintage of just 3,930 pieces suggests the 1871 gold dollar is rare in an absolute sense, but in the astounding MS68 grade the extreme rarity is guaranteed. While the Akers/Duckor specimen is generally regarded as the finest of the fine, this outstanding example is, if possible, equally impressive. Both coins are similarly immersed in vibrant and colorful patination that separate them from the other Superb Gems that exist.

The present coin displays dazzling mint luster over its rich, orange-gold surfaces. Reddish-gold overtones deepen the intense coloration. The 1871 is often weakly struck at the centers, but this example is double-sharp — both the hair above the forehead and the word DOLLAR on the reverse are fully defined. The fields are largely prooflike, suggesting an early strike. Eye appeal is off the charts. Population: 3 in 68, 0 finer (1/17). NGC ID# 25D8, PCGS# 7571

1883 Gold Dollar, MS68
Top-Grade PCGS Coin

- 3911 1883 MS68 PCGS.** The 1883 gold dollar is a plentiful date, ideal for type purposes. But the present MS68 example is conditionally rare and among the finest at PCGS. The coin displays a bold strike and frosty wheat-gold mint luster. There are no abrasions seen beneath a loupe. Eye appeal excels. Population: 16 in 68, 0 finer (1/17). NGC ID# 25DM, PCGS# 7584

James B. Longacre, designer of the gold dollar.

PROOF GOLD DOLLARS

1885 Gold Dollar, PR65 Deep Cameo
Very Rare Proof Offering

- 3912 1885 PR65 Deep Cameo PCGS.** Of the 1,105 gold dollar proofs struck in 1885, PCGS and NGC have certified a total of 206 submissions. That figure comprises all categories and almost certainly includes duplications. There are 96 1885 proofs encapsulated in PCGS holders, but only 9% of them have received a Deep Cameo designation. Few match or exceed the quality of this outstanding Gem. The vast majority of coins known do not display any degree of Cameo contrast, highlighting the utmost rarity of this offering. A thick coating of frost covers fully struck motifs, allowing for the appreciation of the bold contrast produced against the deeply reflective, glassy mirrors. A loupe is required to bring minute contact marks into view. Opportunities to acquire a Deep Cameo example of the 1885 are extremely rare and not to be passed up. Population: 2 in 65 (1 in 65+) Deep Cameo, 5 finer (1/17). NGC ID# 25EV, PCGS# 97635

1887 Gold Dollar, PR63
Great Eye Appeal for the Grade

- 3913** 1887 PR63 PCGS. This glittering proof has exceptional eye appeal with brilliant yellow-gold surfaces that combine mirrored fields and satiny devices. Mintages of proof gold dollars exceeded 1,000 coins per year at the end of the series. However, attractive examples are still elusive since many of the pieces were purchased by jewelers for use in their trade. Population: 14 in 63, 45 finer (1/17). NGC ID# 25EX, PCGS# 7637

EARLY QUARTER EAGLES

1802/1 Quarter Eagle, BD-1, XF40 Details

- 3914** 1802/1 BD-1, R.4 — Tooled, Repaired, Cleaned — ANACS. XF40 Details. Bass-Dannreuther Die State a/b. This is an evenly struck example with bold border regions and slight weakness on the central high points. The coin presents as pale yellow-gold and smooth to the unaided eye, although a 10x loupe reveals surprisingly well-hidden tooling marks in all of the fields with light cleaning overall. The faint remnants of what appears to be a hand-scratched date (1821?) can be seen in the field to the right of the primary date, not completely effaced by the repair work. BD-1 is scarce in all grades with only 90 to 120 pieces believed known. This coin is much more appealing than the holder notations would suggest. PCGS# 45506 Base PCGS# 7650

1808 BD-1 Quarter Eagle, AU Details
One-Variety Type

- 3915** 1808 BD-1, R.4 — Repaired — PCGS Genuine. AU Details. Bass-Dannreuther Die State b, as usual, cracked through the right-hand stars. The 1808 is likely the most famous early quarter eagle issue. There is only one die variety, and this issue is the only one of the Large Bust Left design type, as no further quarter eagle coinage was accomplished until 1821, after another design change.

John Dannreuther suggests that the recorded mintage of 2,710 pieces was likely all actually struck with this one die pair, unlike in previous years when outdated dies were often carried over into the next year's coinage. However, only 125 to 150 pieces are believed extant in all grades. These are more or less evenly distributed throughout the VF to AU grade ranges, with a few surviving in Mint State. The present coin is evenly struck and well-detailed, showing weakness only on some peripheral stars and dentils. Short pin scratches in the obverse fields, along with faint evidence of tooling and enthusiastically polished, brightly reflective surfaces prevent a numeric grade.

CLASSIC QUARTER EAGLES

1839-C Quarter Eagle, AU50
In a Green Label Holder

- 3916 1839-C AU50 PCGS. Winter-2, Variety 22, R.4.** The 1839-C is one of two Classic Head Charlotte quarter eagles, both with mintmarks on the obverse above the date. This yellow-gold AU example displays bold central devices with slight weakness on the peripheral stars, as usual. The surfaces are lightly abraded as expected. Housed in a green label holder. NGC ID# 25G4, PCGS# 7699

1839-O Quarter Eagle, AU58
Inaugural New Orleans Gold

- 3917 1839-O AU58 NGC. Breen-6152, Variety 27, R.3.** High Date, Wide Fraction. Although the New Orleans Mint struck its first silver coins in 1838, gold coins were not struck until the next year, when 17,781 quarter eagles were produced. Two die pairs were used for this emission. This partly lustrous piece is nicely struck and has only a few small marks, none of which are significant. Ex: *Long Beach Signature* (Heritage, 2/2006), lot 2598. NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

1846 Two and a Half, MS61
Rare in Mint State

- 3918 1846 MS61 PCGS.** A partly lustrous and inoffensively abraded apricot-gold example. The strike is bold aside from softness on the right-side reverse dentils. An underappreciated Philadelphia issue with a scant mintage of 21,598 pieces. The date is rarely encountered in Uncirculated condition. Population: 4 in 61, 5 finer (1/17). NGC ID# 25GZ, PCGS# 7740

1849-C Quarter Eagle, MS60
Extremely Rare in Uncirculated Condition

- 3919 1849-C MS60 NGC. Variety 1.** The 1849-C is among the scarcer Charlotte issues in the quarter eagle series, coming from a mintage of 10,220 pieces. Doug Winter suggests that only 125 to 150 examples survive in all grades, and that Uncirculated pieces are extremely rare. NGC and PCGS combined report 10 Mint State submissions, with all but two in MS60 or MS61. A single MS65 NGC coin (previously MS64 PCGS) is the finest (1/17).

Recent auction appearances of Uncirculated 1849-C quarter eagles in any grade have been few and far between. This example is unworn, and the strike is unusually sharp for a Charlotte issue — only the eagle's left (facing) leg lacks complete definition. Scattered abrasions define the grade. This bright, satiny 1849-C quarter eagle is quite pleasing for the MS60 level. NGC ID# 7HRT, PCGS# 7753

1851-C Two and a Half, MS61
Rare Uncirculated Example

- 3920 1851-C MS61 NGC. Variety 1.** The 1851-C quarter eagle is a scarce issue in all grades, with likely only 160 to 210 examples known. This Mint State coin is a major condition rarity. The eagle shows slight weakness, mostly on its left (facing) leg, but the obverse is well-defined. Each side shows bright yellow-gold luster with the appropriate abrasions for the grade. Census: 8 in 61 (1 in 61+), 5 finer (1/17). NGC ID# 25HM, PCGS# 7760

1852-D Two and a Half, AU50
Seldom Offered in Any Condition

- 3921 1852-D AU50 PCGS. Variety 16-N.** Coming from a mintage of only 4,078 coins, the 1852-D quarter eagle is scarce in all grades. Doug Winter estimates that fewer than 100 pieces are extant. The present AU coin displays surprisingly smooth wheat-gold color with partial luster in the protected regions of the fields. The strike shows some typical weakness on the eagle's neck and leg feathers. Population: 11 in 50, 35 finer (1/17). NGC ID# 25HT, PCGS# 7765

1852-O Quarter Eagle, MS62
Southern Gold Condition Rarity

- 3922 1852-O MS62 PCGS. Variety 2.** Two varieties are known for the 1852-O quarter eagle (140,000 coins struck). This is the usual die pair with the O positioned further left. It is believed the mintmark was engraved by hand into the working die. The 1852-O is very rare in Mint State with fewer than a dozen coins known. Brightly lustrous with light yellow-gold coloration, this MS62 survivor features pinpoint detail on the stars and curls. Detail is marginally softer on the reverse. A lightly abraded Southern gold rarity. Population: 6 in 62, 1 finer (1/17). NGC ID# 7HX8, PCGS# 7766

1855-C Two and a Half, AU55
Scarce Charlotte Issue

- 3923 1855-C AU55 PCGS. Variety 1.** The typical strike weakness is seen on the eagle's legs and neck, although the surfaces are not as heavily abraded as is often the case. This Choice AU 1855-C quarter eagle displays medium yellow-gold coloration with areas of satiny luster remaining in the fields. Coming from a mintage of just 3,677 pieces, this issue has a surviving population estimated at only 85 to 105 pieces in all grades. Population: 20 in 55, 15 finer (12/16). NGC ID# 25J5, PCGS# 7775

1857-O Quarter Eagle, MS61
Meager 34,000-Coin Mintage

- 3924 1857-O MS61 NGC. Variety 1.** This New Orleans quarter eagle issue is very scarce with a mintage of 34,000 coins and an estimated survivorship of 275 pieces. Many examples come softly struck at the centers, but not so here. The stars display complete radials, though some are clearer than others, and Liberty's curls are boldly detailed. Feather and claw definition is as strong as one may hope to find. Bright yellow-gold surfaces are lustrous with light marks. Census: 32 in 61, 15 finer (1/17). NGC ID# 25JE, PCGS# 7784

1858 Quarter Eagle, MS64
Conditionally Rare, Underappreciated

- 3925 1858 MS64 PCGS. CAC.** The 1858 is among the more plentiful quarter eagles of this period, although Mint State coins are elusive, and Choice examples are rarely offered. This CAC-endorsed coin displays softly frosted bronze-gold luster with minimal abrasions. Slight strike weakness is seen along the left edge of the shield and at its center, but the obverse portrait and stars are well-defined. Finer representatives are extremely rare. Population: 7 in 64, 1 finer. CAC: 1 in 64, 0 finer (1/17). NGC ID# 25JG, PCGS# 7786

1858-C Quarter Eagle, MS60
Uncirculated Charlotte Type Coin

- 3926 1858-C MS60 PCGS. Variety 1.** The 1858-C is a fairly plentiful issue from this mint, suitable for the enthusiast seeking a single Charlotte type coin. The eagle's left (facing) leg is slightly soft on this piece, but the strike is otherwise pleasing. Portions of the original mint luster remain in the fields near the borders. A few parallel roller marks, as made, appear on the portrait. Population: 3 in 60, 24 finer (1/17). NGC ID# 25JH, PCGS# 7787

1859 Quarter Eagle, MS63
Old Reverse Type

- 3927 1859 Old Reverse, Type One, MS63 PCGS.** Wide arrowheads identify the Old Reverse type. This variety is scarcer in Mint State than the New Reverse counterpart, and it is genuinely rare in MS63 or better. This piece displays satiny wheat-gold luster with fewer abrasions than expected for the grade. The eagle's left (facing) leg exhibits the only mentionable strike weakness. NGC ID# 25JK, PCGS# 97788

1860-C Two and a Half, AU55
Final Charlotte Issue

- 3928 1860-C AU55 PCGS. Variety 1.** No quarter eagles were struck at the Charlotte Mint in 1861, making the scarce 1860-C the final date in the Charlotte short set. High-grade examples are rarely offered. This Choice AU coin displays bright, satiny yellow-gold luster with the usual strike weakness on the eagle's leg and Liberty's temple. Some normal planchet roughness is seen in the reverse fields. Population: 11 in 55, 7 finer (1/17). NGC ID# 25JT, PCGS# 7792

1862-S Two and a Half, AU55
Fewer Than 100 Pieces Known

- 3929 1862-S AU55 PCGS.** Fewer than 100 1862-S quarter eagles are believed known, surviving from a small mintage of only 8,000 pieces. This Choice AU representative displays tinges of deep orange-gold throughout otherwise bright yellow-gold surfaces. The eagle's left (facing) leg is slightly weak, but the strike is otherwise well-executed. Light field chatter accompanies the grade. Population: 9 in 55, 14 finer (12/16). NGC ID# 25K2, PCGS# 7798

1875-S Quarter Eagle, MS62
Challenging Date to Acquire

- 3930 1875-S MS62 PCGS. CAC.** The 1875-S quarter eagle is extremely important for date collectors as the only collectible two and a half dollar issue from that year. The Philadelphia Mint only produced 400 business strikes, while the San Francisco Mint put out what is still considered to be a low mintage of 11,600 coins. This pleasing example has brilliant, frosty luster with hints of pink over light yellow surfaces. Population: 5 in 62, 5 finer. CAC: 1 in 62, 1 finer (1/17). NGC ID# 25KT, PCGS# 7823

1876 Two and a Half, MS62
Rare in Mint State

- 3931 1876 MS62 PCGS. CAC.** The 1876 quarter eagle is scarce in all grades, coming from a mintage of only 4,176 pieces. However, Uncirculated coins are rare. This CAC-endorsed MS62 piece displays attractive rose-gold luster with only light surface chatter to limit the grade. The usual strike weakness occurs on the central high points. Population: 6 in 62, 2 finer. CAC: 3 in 62, 0 finer (12/16). NGC ID# 7JS6, PCGS# 7824

1895 Two and a Half, MS66
Few Known This Fine

- 3932 1895 MS66 NGC. A sharp, satiny Premium Gem example of this conditionally rare Philadelphia issue. Yellow-gold luster shows no unsightly abrasions, and the overall eye appeal is excellent. Finer examples of the 1895 quarter eagle are extremely rare, and even pieces in this grade are seldom offered. Census: 14 in 66 (1 in 66+), 4 finer (1/17). NGC ID# 25LK, PCGS# 7847
-

PROOF LIBERTY QUARTER EAGLES

1869 Quarter Eagle, PR66 Deep Cameo
Only 25 Proofs Struck, Perhaps 16 to 20 Survive
Finest Certified Example

3933 1869 PR66 Deep Cameo PCGS. The 1869 quarter eagle poses a major challenge in any format. Merely 4,320 circulation strikes were manufactured, plus 25 proofs to satisfy an elite group of contemporary collectors. Today, the proofs remain very rare numismatic delicacies for which only the most advanced specialists can compete.

In his 1989 *Proof Encyclopedia*, Walter Breen estimated that 12 to 15 specimens survived. CoinFacts reports a survivorship of 16 to 20 proofs. PCGS has seen 13 submissions in all, including two Cameo pieces, and three Deep Cameo coins. NGC shows another 17 proofs. These figures are almost certainly inflated by multiple resubmissions and crossovers. There are only three submissions at the PR66 grade level, all with a Deep or Ultra Cameo designation. Two are at PCGS and one is at NGC. This piece is the former NGC coin, and may very well represent both PR66 Deep Cameo examples noted by PCGS (12/16).

While the exact population figures paint a somewhat confusing picture, one thing is clear. This Premium Gem proof is one of the finest examples of this issue, if not the sole finest. It was previously offered by Stack's Bowers in their July 2008 Baltimore sale. The cataloger noted at that time: "Unfortunately, the virtual perfection of this piece and the complete lack of toning, precludes us from determining any pedigree." The history of this proof beyond its appearance more than eight years ago remains unknown.

Deeply mirrored, jet-black fields display the orange-peel texture expected of a high-end proof from this era. They contrast boldly against thickly frosted and expectedly fully struck motifs. Eye appeal is outstanding. Each side is nearly pristine, with only a couple of trivial contact marks that make attribution possible.

Ex: Samuel J. Bergard Collection / *Treasure Coins of the S.S. New York* (Stack's Bowers, 7/2008), lot 2361. NGC ID# 287P, PCGS# 97895

1903 Liberty Quarter Eagle, PR66
Gleaming, Brilliant-Mirrored Finish

3934 1903 PR66 PCGS. Switching to all-brilliant proof finishes in 1902, the Mint continued with the practice in 1903 and, in fact, through 1909 until it embarked on other experimental proof finishes. At the time, the collecting public offered little resistance to the new format and 197 proofs were struck — about a normal number for the era, of which perhaps half that number survive.

This glittering example is razor-sharp and seemingly without fault. The mirrored fields are dramatically deep with enticing, well-preserved surfaces. A hint of orange toning at the rims frames the vibrant, rich-gold coloration. We note a tiny alloy mark in the dentils beneath star 13 and a faint, whisker-thin lintmark across the bust truncation above 19 in the date — both Mint-related characteristics, of extremely minor consideration. Population: 10 in 66, 1 finer (1/17). NGC ID# 288T, PCGS# 7929

INDIAN QUARTER EAGLES

1908 Quarter Eagle, MS66
Frosty and Attractive

3935 1908 MS66 PCGS. Delicate peach and greenish hues adorn the lustrous surfaces of this Premium Gem first-year type coin. The strike is sharp, and close study with a loupe fails to reveal any mentionable abrasions. The fields are particularly clean. The 1908 Indian quarter eagle is an available type-coin issue, but Premium Gems are conditionally scarce, and anything finer is extremely rare. PCGS reports only two coins finer than the present example (1/17). NGC ID# 288Y, PCGS# 7939

1911-D Quarter Eagle, AU58
Weak D, Unchallenged Key Date

3936 1911-D Weak D AU58 NGC. No other issue in the Indian Head quarter eagle series challenges the 1911-D for status as the rarest and most sought-after emission in the set. The mintmark is admittedly difficult to detect, but it is visible without magnification. Wispy marks are scattered over light wheat-gold surfaces. The devices are well-detailed with virtually indiscernible friction. NGC ID# 2895, PCGS# 7954

1911-D Quarter Eagle, AU58+
Strong D, Sharp Detail

3937 1911-D AU58+ NGC. Strong D. This key-date issue is highly sought-after in all grades, although Mint State coins often show heavy abrasions and/or light cleaning. This Plus-graded near-Mint example is as close to Mint State as possible, and the orange-gold surfaces are original. Light field chatter is typical of the grade but does not overly detract. NGC ID# 7KR7, PCGS# 7943

1912 Indian Quarter Eagle, MS65+
Underrated Issue in High Grade

3938 1912 MS65+ PCGS. Despite the reported mintage of 616,000 pieces, the 1912 Indian quarter eagle is surprisingly difficult to locate in high grade and experts consider it one of the most underrated issues of the series. Most examples seen grade no better than MS64, with lackluster surfaces that often show excessive abrasions and occasional alloy spots.

The present coin is a spectacular Plus-graded Gem, with sharply detailed design elements and vibrant, satiny mint luster on both sides. The attractive orange and rose-gold surfaces show only insignificant signs of contact, and overall visual appeal is outstanding. Population: 80 in 65 (1 in 65+), 5 finer (1/17). NGC ID# 7KR8, PCGS# 7944

1914 Quarter Eagle, Orange-Gold MS64+ Example

3939 1914 MS64+ PCGS. CAC. One of the rarest Indian Head quarter eagles overall, the 1914 is second only to the famous 1911-D, even though its mintage was much higher, at 240,000 pieces. Most survivors are either lightly circulated or in the lower Mint State grades. This near-Gem displays the usually seen mattelike fine-grained surfaces with splendid orange-gold color and a paucity of mentionable marks. A super example for the grade, with the added CAC approval.

Ex: Houston Signature (Heritage, 11/2012), lot 4851. NGC ID# 7KRA, PCGS# 7946

THREE DOLLAR GOLD PIECES

1855 Gold Three Dollar, MS65
Condition Census Rarity

- 3940 **1855 MS65 PCGS.** With a mintage of 50,555 pieces, the 1855 three dollar gold is among the more plentiful issues in the series in Mint State. Examples can be found with little difficulty through MS63, and Choice coins are occasionally obtainable. The same cannot be said of Gems. In MS65, NGC has seen only a single coin — the present example — and that service lists one Premium Gem finer; PCGS records three MS65s and another MS66 (1/17). The only finer MS66 PCGS coin is from the Pogue Collection, and it realized \$35,250 in the D. Brent Pogue Collection, Part III (Stack's/Bowers, 2/2016), lot 3092. This MS65 representative is beautifully preserved and boldly struck, showing rich original luster in peach and orange-gold hues. Luster just shimmers in the fields when rotated beneath a light. NGC ID# 25M6, PCGS# 7972

1856 Three Dollar, Attractive MS62
Green-Gold Surfaces, Orange Accents

- 3941 **1856 MS62 PCGS.** The mintage of the third-year 1856 three dollar gold issue was a moderate 26,010 pieces, a production that would be low for most series but is generous here. More examples were apparently saved in Mint State than during the bloody Civil War years that would follow. This MS62 PCGS-graded example offers sharply struck green-gold surfaces with good luster and attractive orange highlights. A few scattered marks account for the grade, but the eye appeal is top-notch. Population: 55 in 62 (1 in 62+), 75 finer (1/17).
Ex: *New York Signature* (Heritage, 2/2014), lot 5334. NGC ID# 25M8, PCGS# 7974

1864 Gold Three Dollar, AU55
Challenging in High Grade

- 3942 **1864 AU55 NGC.** Ex: Suwannee River Collection. Coming from a mintage of only 2,630 pieces, the 1864 three dollar gold had a low survival in high grade. This Choice AU coin is conditionally scarce. Bold design definition includes the wreath bowknot, although slight high-point wear blurs the uppermost details. Luster remains in the fields, and both sides have only light, uniform chatter. NGC ID# 7HSK, PCGS# 7985

1870 Gold Three Dollar, MS61
Prooflike Fields

- 3943 **1870 MS61 PCGS.** Struck before large quantities of this denomination were set aside by collectors and dealers, the 1870 three dollar gold piece, coming from a mintage of only 3,500 coins, is scarce in any Mint State grade. The present example offers prooflike fields and bright yellow-gold color. The strike is sharp. Scattered abrasions define the grade. Population: 12 in 61, 27 finer (1/17). NGC ID# 7K8F, PCGS# 7991

EARLY HALF EAGLES

1800 BD-4 Half Eagle, AU53 Details Late Die State

- 3944** 1800 BD-4, R.4 — Cleaned — ANACS. AU53 Details. Bass-Dannreuther Die State d/c. An elusive variety in the terminal die state, showing rim cud above portions of UNITED and STATES on the reverse. The coin is boldly struck and free of adjustment marks. Scattered hairlines appear beneath a loupe amid bright yellow-gold patina, denoting the light cleaning that ANACS describes on the holder insert. NGC ID# 25NW, PCGS# 45594 Base PCGS# 8082

1800 BD-5 Half Eagle, AU Details

- 3945** 1800 BD-5, High R.3 — Improperly Cleaned — NGC Details. AU. Bass-Dannreuther Die State e/c. A well-defined straw-gold example of this challenging Heraldic Eagle date. The portrait and obverse field exhibit a number of abrasions, but the reverse is only lightly marked. Luster accompanies design elements. A late die state, but without the clash marks near LIBERTY seen on some examples.

1803/2 Half Eagle, AU53 Popular BD-1 Variety

- 3946** 1803/2 BD-1, R.4, AU53 PCGS. Bass-Dannreuther Die State b/c. An attractive AU53 specimen of this popular overdate variety, with the star nearest the beak pointing to the upper beak tip and free of the ribbon. The BD-1 has a surviving population of 150-200 examples in all grades. This well-detailed survivor is lightly worn and lightly abraded, with an extensive network of die cracks on the reverse and no sign of planchet adjustment marks. NGC ID# 25NY, PCGS# 504948 Base PCGS# 8084

1803/2 BD-1 Five Dollar, MS62 Rich Orange-Red Toning

- 3947** 1803/2 BD-1, R.4, MS62 NGC. CAC. Bass-Dannreuther Die State a/b, the initial state with two light cracks on the reverse from the die's prior use coining the 1802/1 BD-7. A beautiful peach-gold representative. The reverse is remarkably devoid of contact, and the obverse shows only wispy marks on the left field. The strike is bold save for incompleteness near the eagle's war claw. Certain to command a premium on the auction floor. Certified in a prior generation holder. All four 1803-dated die varieties are overdates. Three varieties, including BD-1, share the same obverse die, distinguished by a broken foot on the T in LIBERTY. The reverse of BD-1 is distinguished by a bold crack through the TED in UNITED. NGC ID# 25NY, PCGS# 504948 Base PCGS# 8084

1807 Bust Right Five Dollar, MS64+
BD-1, Small Reverse Stars
Only One Finer Coin at PCGS

3948 1807 Bust Right, BD-1, High R.4, MS64+ PCGS. Bass-Dannreuther Die State b/b-c. The Capped Bust Right design was retired part-way through the year in 1807, but not before a fairly substantial mintage of 32,488 half eagles of the old design was accomplished. Six different die varieties are known for the date, one with small stars on the reverse and five with larger reverse stars. This coin represents the single Small Reverse Stars variety, designated BD-1 in the Bass-Dannreuther series reference. The BD-1 is a very scarce variety, with a surviving population of 80-100 examples in all grades. The BD-1 probably accounted for 5,000-7,500 pieces of the reported mintage. The obverse die was used again to strike the BD-2 variety of this date. From the small stars and large letters in the legend, several researchers have theorized that the reverse die was an unused leftover from 1806. This was the only use of the reverse die.

The present coin is an impressive peach-gold near-Gem, with the important Plus designation from PCGS. The strike is crisp, since definition is incomplete only on the upper left border of the shield. Marks are confined to trivial obverse field chatter and a small bright area above the arrowheads. The reverse is lightly clashed, and both sides exhibit several delicate die cracks. The obverse lacks the clashes associated with Die State c, and the reverse lacks any crack at the E in UNITED. However, the "rust lump on skin of bust," as described by Bass for obverse Die State c, is present. PCGS has certified only a single 1807 Bust Right half eagle finer, another BD-1 example graded MS65+ (12/16). Indeed, even available die pairings from this early type are rare in high grade. NGC ID# CKLF, PCGS# 519898 Base PCGS# 8092

1807 Bust Right Five Dollar, AU50
Rare BD-3 Variety

- 3949 1807 Bust Right, BD-3, High R.5, AU50 NGC. Bass-Dannreuther Die State b/c. The letters LIB from LIBERTY are clashed on the reverse near the fletchings, and a vertical crack passes through the left shield corner. A butter-gold early five with luster across the legends, eagle, stars, and curls. Liberty's shoulder and cap display light wear. A thin line is noted on Liberty's forehead, but no other marks are remotely worthy of mention. An opportunity to obtain a lightly circulated example of this rare die marriage. PCGS# 519900 Base PCGS# 8092

1807 Capped Bust Right Half Eagle, AU Details
Small Obverse Stars, Large Reverse Stars, BD-4

- 3950 1807 Bust Right, BD-4, High R.4 — Cleaning — PCGS Genuine. AU Details. Bass-Dannreuther Die State c/a. The Capped Bust Right design was retired in 1807, but not before a nominal mintage of 32,488 pieces was struck, with six die varieties for the date and type. The BD-4 variety has a surviving population of 75-90 examples in all grades and probably accounted for 5,000-7,500 pieces of the reported mintage. This lightly worn and lightly abraded specimen shows a few faint adjustment marks in Liberty's hair. The luster is somewhat muted by the noted cleaning.

1807 Capped Bust Right Half Eagle, AU58
Final Bust Right Issue, BD-6

- 3951 1807 Bust Right, BD-6, High R.4, AU58 PCGS. Bass-Dannreuther Die State b/c. The Capped Bust Right design was retired partway through the year in 1807, after a mintage of 32,488 half eagles had been accomplished. Six die varieties are known for the date and type. This coin represents the final BD-6 variety, with the curl tip above the recut 1 in the date and the final A in AMERICA touching the eagle's claw on the reverse. The BD-6 is a very scarce variety, with a surviving population of 80-100 pieces in all grades, but it is still seen more often than the other 1807 Bust Right varieties. This was the only use of the obverse die, but the reverse was also used to strike the BD-4 and BD-5 varieties of this date.

The coin offered here is an attractive near-Mint specimen, with just a trace of actual wear on the well-detailed design elements. Some detail has been lost in selected areas (like the A in STATES and cloud 3), due to lapping. A long die crack is evident on the reverse, from the serif of N, through the arrows and shield, up into the stars. The lightly abraded orange-gold surfaces are lightly abraded and retain traces of original mint luster. NGC ID# CKLF, PCGS# 519905 Base PCGS# 8092

1808/7 Half Eagle, BD-1, AU58
Rare Overdate Variety

- 3952** 1808/7 Wide Date, BD-1, R.6, AU58 NGC. Ex: Hilt Collection. Bass-Dannreuther Die State c/c, terminal, with a shattered obverse die. The most significant crack bisects the obverse from the first 8 in the date, through the T in LIBERTY, to the rim above the cap. The remnants of an underlying 7 are visible to the upper and lower-left of the second 8 in the date. This variety is rare, several times rarer than the other overdate variety of this year, BD-2, which shares this reverse die, but has a different obverse. Only 20 to 30 examples of BD-1 are believed extant, making it by far the rarest variety of the 1808 issue, and nearly twice as rare as the BD-7 1807 variety, with which it is sometimes mistakenly thought to be similar in availability. This nearly Mint State example shows sharp stars and central detail, with frosty green-gold luster that yields just a brush of friction over the high points of the design and the open areas of the fields. An impressive, late die state example of this challenging die marriage. Census for both 1808/7 die pairs: 13 in 58, 27 finer (1/17). NGC ID# 25PB, PCGS# 45636 Base PCGS# 8103

1811 Half Eagle, Lustrous MS62
BD-2, Small 5

- 3953** 1811 Small 5, BD-2, R.3, MS62 PCGS. Bass-Dannreuther Die State e/b, with prominently clashed dies. Only two die varieties are known for the 1811 half eagle. The obverse die is the same for both, but the reverses are readily distinguished by the size of the 5 in the denomination. The Large 5 variety is believed moderately scarcer. Both marriages are much more elusive than the 1807 BD-8 or the 1810 Large Date, Large 5, BD-4.

This lemon-gold early half eagle has a lustrous reverse and full luster across the obverse periphery. Both sides are refreshingly devoid of singular abrasions, and the advanced obverse die state adds to the singular appeal this coin presents. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

**1818 Half Eagle, Rarely Seen MS62
BD-2, STATESOF Reverse**

- 3954 1818 STATESOF, BD-2, R.4, MS62 NGC.** Bass-Dannreuther Die State b, a rarely seen early die state without the bisecting obverse crack. BD-2 employs this obverse and reverse in their only use. A later die state shows the obverse terminally cracked, although such a failure is not documented for the tail die. BD-2 is the most plentiful of three 1818 half eagle varieties, although it is not common in the absolute sense; fewer than 125 survivors are believed known. This Uncirculated coin is conditionally rare not only for the variety but also for the date as a whole. The strike is even and well-centered, showing trivial weakness only on the left-side vertical shield stripes. Frosty yellow-gold luster illuminates the fields, while light, scattered handling marks define the grade without posing significant distraction. Census: 9 in 62, 10 finer (12/16). NGC ID# BFXV, PCGS# 519912 Base PCGS# 8121

CLASSIC HALF EAGLES

**1834 Plain 4 Half Eagle, MS63
Classic Type Coin**

- 3955 1834 Plain 4 MS63 NGC. Breen-6502, McCloskey 2-A, R.1.** A Select Uncirculated lemon-gold Classic type coin. The open fields are bright, and the device high points show only slight blending of impression. Marks are minimal for the designated grade. The 4 in the date is triple struck, and the base of the D in UNITED is also recut. Census: 36 in 63 (1 in 63+, 1 in 63★), 50 finer (1/17). NGC ID# 25RR, PCGS# 8171

**1838-D Classic Head Half Eagle, AU Details
In-Demand First-Year Issue**

- 3956 1838-D — Altered Surfaces — PCGS Genuine. AU Details. Variety 1-A.** Always in demand as a first-year type coin, the 1838-D is the only Classic Head half eagle from the Dahlonega Mint. This pleasing orange-gold specimen features strongly impressed design elements, but some detail is incomplete, due to lapping. Only light wear is evident, and the surfaces are lightly abraded, but the luster is dulled by the effects of a cleaning long ago.

LIBERTY HALF EAGLES

**1839-D Half Eagle, XF45
First-Year, Obverse Mintmark Type**

- 3957 1839-D XF45 PCGS. Variety 2-A.** The usual variety has the D placed further right over the left edge of the 9. The 1839-D enjoys strong demand from a variety of collectors as the first year of issue in the half eagle series, a single-year type with the obverse mintmark placement, and as a product of the popular Dahlonega facility. Adding to the issue's popularity and explaining its absolute scarcity is its mintage of only 18,939 coins. This reddish-gold Choice XF survivor is well-detailed with a surprisingly smooth obverse. Scattered ticks and rim nicks occur at the upper reverse. NGC ID# 25S9, PCGS# 8193

1839-D Five Dollar, AU50
Challenging Obverse Mintmark Type

- 3958** 1839-D AU50 NGC. **Variety 2-A.** The mintmark-on-obverse subtype of Southern gold enjoys remarkable popularity, not only for the elusiveness of the issues but also for the way such coins display their Charlotte, Dahlonega, or New Orleans origin when placed on ordinary display. This well-defined D-mint example has bright green-gold luster remaining through much of the fields. Lightly abraded overall with digs on the portrait and a scrape at the eagle's right (facing) wingtip.
Ex: Stamford Coinfest (Heritage, 10/2010), lot 4774. NGC ID# 25S9, PCGS# 8193

1840-D Five Dollar, AU53
First Year of the Reverse Mintmark

- 3959** 1840-D Tall D AU53 PCGS. **Variety 3-B.** A die gouge protrudes from the dentils below star 13. The mintmark was moved to the reverse of the half eagle in 1840. The Dahlonega issue of this year is known with both a tall and short mintmark, the former represented here. This AU piece displays bright yellow-gold patina and strong detail. Light surface chatter is typical for the issue but does not show any major abrasions. Doug Winter estimates that only 150 to 175 examples of this issue are known, mostly in VF and XF grades. Population: 8 in 53, 17 finer (1/17). NGC ID# 25SG, PCGS# 8198

1842-C Liberty Half Eagle, AU58
Rare Small Date Variant

- 3960** 1842-C Small Date AU58 NGC. **Variety 1.** The 1842-C Small Date half eagle is even more elusive than its Large Date counterpart. In fact, with a mintage of 4,595 pieces, the 1842-C Small Date is the rarest half eagle from the Charlotte Mint, and the second-rarest C-mint coin of any denomination, behind the famous 1849-C Open Wreath gold dollar. The Small Date coins were probably struck first, as the date size matches that on the 1841-dated half eagles from this mint. This coin may be one of the 2,555 coins struck on March 22, 1842, as it shows just the earliest vestiges of a rim cud that formed on the obverse at 12 o'clock in later die states.
The present coin is an attractive near-Mint specimen, with just a trace of wear on the high points of the well-detailed design elements. The lustrous orange-gold surfaces are lightly abraded and the overall presentation is most attractive. Census: 8 in 58, 5 finer (12/16). NGC ID# 25SV, PCGS# 8208

1843-D Half Eagle, AU55
Rare Small D Variant

- 3961 1843-D Small D AU55 NGC. Variety 9-F. All 1843-D half eagles are very scarce, but the Small D variant is much rarer than the usual Medium D variety. Size differences aside, the placement of the D over the V in FIVE aids in attribution. This green-gold Choice AU five dollar piece is remarkably sharp, including the stars and the eagle's feathers, talons, and olive leaves. Evidence of brief circulation occurs in the form of minor friction and minute scattered ticks, but some reflective field luster remains in the protected regions. NGC ID# 25T4, PCGS# 98215

1854-D Five Dollar, AU58
Medium D Variant

- 3962 1854-D Medium D AU58 PCGS. Variety 37-CC. An apricot-gold Borderline Uncirculated example. The strike is unusually sharp for a Dahlonega product, and although the surfaces display prominent clash marks, no abrasions are consequential. Glimmers of luster accompany design elements. The Medium D is shorter than its Large D counterpart, and has a squat appearance. Population: 5 in 58, 0 finer (1/17). NGC ID# 25UK, PCGS# 88258

1858-C Variety 1 Half Eagle, MS61
The Usual Variety

- 3963 1858-C MS61 NGC. Variety 1. Most survivors from the 38,856-coin mintage of Charlotte Mint half eagles in 1858 are from the die pair offered here. 47 of the top 50 examples in our Permanent Auction Archives are Variety 1. This splendid light yellow-gold half eagle has nearly full satin mint luster and bold design motifs with faint field reflectivity on both sides. This is an outstanding example for the advanced collector. Census: 7 in 61, 9 finer (1/17). NGC ID# CLAK, PCGS# 8277

1860-D Half Eagle, AU53
Rare Large D Variety

- 3964 1860-D Large D AU53 PCGS. Variety 46-FF. The penultimate production of Dahlonega half eagles was a meager mintage of 14,635 pieces. Surprisingly, three die varieties are known. Most survivors are Variety 46-GG with a Medium D mintmark. The two Large D die pairs, Variety 46-EE and 46-FF, are rarely encountered. The present apricot-gold Large D example lacks any noticeable marks, and will please the veteran specialist. The strike shows blending on the curls, fletchings, and eagle's neck, usual for the remote Southern branch facility. NGC ID# 25VH, PCGS# 98286

1863 Five Dollar, Semiprooflike AU55
Major Rarity in All Grades

3965 1863 AU55 NGC. Half eagle coinage at the Philadelphia Mint was negligible during the Civil War, as such coins were immediately hoarded by the public rather than allowed to circulate in commerce. Total production for the denomination in 1863 was only 2,442 pieces. The often-cited PCGS estimate is that only 30 to 40 examples are extant in all grades. NGC and PCGS combined report 52 submissions, but this figure likely includes some duplication. In more than two decades, we have handled only 20 examples of this date, suggesting that the PCGS survival estimate may be accurate. Just three coins have been reported in Mint State, none finer than MS61.

This Choice AU representative displays sharp design elements and lightly abraded yellow-gold surfaces. Semiprooflike mirroring remains in the protected regions of the fields. Rarely is this Philadelphia issue available, let alone in such high of a grade. Census: 4 in 55, 7 finer (12/16). NGC ID# 25VS, PCGS# 8294

1863-S Liberty Half Eagle, AU53
Low-Mintage, Heavily Exported Issue

3966 1863-S AU53 NGC. Precious-metal coinage was widely hoarded and exported during the Civil War era, leading to reduced mintages of most denominations throughout this time period. Only 17,000 Liberty half eagles were struck at the San Francisco Mint in 1863 and few high-grade examples were saved by contemporary collectors. Probably no more than 60-75 specimens survive today in all grades.

This impressive AU53 representative shows light wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded. Traces of original mint luster are evident on both sides and the overall presentation is most attractive. Census: 4 in 53, 14 finer (1/17). NGC ID# 25VT, PCGS# 8295

1864 Liberty Head Five, AU50
Rare and Underappreciated in All Grades

- 3967 1864 AU50 PCGS.** Boasting a low mintage of 4,170 pieces, the 1864 half eagle is scarce in all grades. Few examples survived melting brought about by economic uncertainties during the war. Only 60 to 75 coins are believed known today, almost all in circulated grades. This AU example displays partially lustrous fields and rich orange-gold patina. The devices are boldly detailed amid mild surface chatter. Population: 7 in 50, 16 finer (12/16). NGC ID# 25VU, PCGS# 8296

1865-S Five Dollar, AU58
Fewer Than 100 Pieces Believed Extant

- 3968 1865-S AU58 NGC.** Uncirculated 1865-S half eagles are extremely rare, although high-end AU coins are not much more common. The surviving population in all grades is far lower than a mintage of 27,612 pieces would typically produce, estimated at less than 100 coins. This rare near-Mint example displays partly lustrous bronze-gold surfaces with light chatter in the fields. The motifs are bold, showing only light high-point friction. Census: 9 in 58, 5 finer (12/16). NGC ID# 25VX, PCGS# 8299

1867 Half Eagle, CAC-Approved AU55+
Fewer Than 100 Examples Extant

- 3969 1867 AU55+ NGC. CAC.** Aside from the 1861 issue, half eagles were struck only in nominal quantities at the Philadelphia Mint throughout the 1860s. Just 6,870 P-Mint pieces were struck in 1867. This Choice About Uncirculated example is one of the few graded at the AU55 level or finer by NGC. Reddish-gold accents surround the devices of this olive-gold coin. Numerous small marks and abrasions dot the surfaces, but no deep or heavy contacts are seen. Fewer than 100 1867 half eagles are believed extant. Census: 8 in 55 (1 in 55+), 5 finer. CAC: 1 in 55, 1 finer (12/16). NGC ID# 25W3, PCGS# 8313

1871-CC Liberty Half Eagle, AU53
Elusive Early CC-Mint Five

- 3970 1871-CC AU53 PCGS. Variety 1-A.** A nominal mintage of 20,770 Liberty half eagles was accomplished at the Carson City Mint in 1872, the second year of coinage operations at the famous Western facility. The coins circulated heavily in the hard-money economy of the region, and probably none were saved by contemporary collectors, as there was little interest in mintmark varieties at the time and few numismatists were active in the Western United States until later in the 19th century. As a result, the 1871-CC is a rare issue in all grades today.

This attractive AU53 specimen exhibits well-detailed design elements, with just a trace of wear on the coronet and the hair above the eye. The lightly abraded orange-gold surfaces retain much of their original mint luster and the overall presentation is most attractive. Population: 4 in 53, 18 finer (1/17). NGC ID# 26AB, PCGS# 8323

1879-CC Liberty Half Eagle, AU58
Smooth, Lustrous Surfaces

- 3971** 1879-CC AU58 PCGS. **Variety 1-A.** A scarce and sought-after Carson City issue, the 1879-CC half eagle (only 17,281 coins struck) becomes a genuine rarity in the finer AU grades, and Mint State coins are out of reach for most enthusiasts. PCGS estimates only 250 pieces survive, with possibly as few as three distinct pieces in Uncirculated condition. The present example is well-struck and has only slight high-point friction. The surfaces are smooth, yielding luminous luster and light orange-gold color. Eye appeal exceeds expectations for the grade and issue. Population: 13 in 58, 6 finer (1/17). NGC ID# 25X8, PCGS# 8349

1880-CC Liberty Half Eagle, AU58
Seldom Seen Finer

- 3972** 1880-CC AU58 PCGS. **Variety 1-A.** The 1880-CC Liberty half eagle claims a mintage of 51,107 pieces, but the issue is more difficult to locate than that figure would suggest. This attractive near-Mint representative shows just a trace of wear on the sharply detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. Population: 36 in 58 (2 in 58+), 13 finer (1/17). NGC ID# 25XB, PCGS# 8352

1882-CC Liberty Five, AU58
Nice Branch Mint Type Coin

- 3973** 1882-CC AU58 NGC. **CAC. Variety 1-A.** With a reported mintage of 82,817 pieces, the 1882-CC Liberty half eagle is a relatively available branch mint issue, but Mint State specimens are still very scarce. This attractive near-Mint example shows just a trace of friction on the well-detailed design elements and the orange and rose-gold surfaces are lightly abraded, with traces of satiny mint luster. NGC has graded 28 numerically finer examples (1/17). NGC ID# 25XH, PCGS# 8359

1884-CC Five Dollar, AU58
Partial Mint Flash

- 3974** 1884-CC AU58 NGC. **Variety 1-A.** A straw-gold representative with plentiful glimpses of bright luster within the legends and plumage. Inoffensive abrasions are distributed across the fields and portrait. Much scarcer than the Carson City five issues struck during the early 1890s. From a mintage of just 16,402 pieces. Census: 35 in 58, 6 finer (12/16). NGC ID# 25XP, PCGS# 8365

1901/O-S Half Eagle, MS65
Conditionally Scarce Variety

- 3975** 1901/O-S FS-301 MS65 PCGS. **CAC.** Remnants of an underlying 0 can be seen at the 1 in the date on this popular *Guide Book* variety. Gem examples are scarce, and finer coins are decidedly rare. The present coin is sharply struck and frosty with rich yellow-gold mint luster. There are no major abrasions. Population: 30 in 65 (2 in 65+), 3 finer. CAC: 11 in 65, 0 finer (1/17). NGC ID# 25YX, PCGS# 145720 Base PCGS# 8403

1901-S/S Half Eagle, MS66 Recut Mintmark

- 3976** 1901-S/S FS-501 MS66 PCGS. This plentiful type-coin issue is in high demand at the Premium Gem grade level, and finer pieces are extremely rare. The present example displays a sharp strike and frosty yellow-gold luster with only a few faint grazes in the fields. The mintmark is noticeably recut. Population: 74 in 66 (8 in 66+), 3 finer (12/16). NGC ID# 25YX, PCGS# 145025 Base PCGS# 8404

INDIAN HALF EAGLES

1908-S Half Eagle, MS62 Low-Mintage Issue

- 3977** 1908-S MS62 PCGS. Although not particularly scarce in circulated condition, the 1908-S Indian half eagle is famous for its low mintage of 82,000 coins and is challenging to acquire in Mint State. This MS62 coin delivers surprisingly good eye appeal for the grade, showing satiny yellow-gold luster and relatively few abrasions. The design elements boldly struck. NGC ID# 65K3, PCGS# 8512

1909-O Half Eagle, XF45 Heralded New Orleans Key

- 3978** 1909-O XF45 PCGS. Few 20th century gold issues across all denominations are as famous as the 1909-O, the New Orleans Mint's swan song in coining operations. Only 34,200 half eagles were struck at the Louisiana facility in 1909. All examples are highly sought-after, regardless of condition but especially in the finer circulated grades. A trace of friction graces each side of this orange-gold Choice XF key date. Design detail is strong. Scattered abrasions do not detract. NGC ID# 25ZK, PCGS# 8515

1909-O Half Eagle, AU50 Only O-Mint Indian Five, Series Key Issue

- 3979** 1909-O AU50 PCGS. **Variety 1.** Always in demand not only for its low mintage, an extra measure of appeal comes from the 1909-O's status as the final gold issue from the final year of coinage at the New Orleans Mint. Branch mint type collectors and series specialists alike pursue examples with fervor.

This About Uncirculated coin retains a moderate amount of mint luster over its light-gold surfaces. Sharp definition remains on the central motifs. The mintmark is characteristically weak but readily visible. High point wear joins a few light, unobtrusive marks to define the assigned grade. A famous issue and the key to the Indian Head half eagle series, we expect keen competition for this thoroughly satisfying representative of the historic date and Mint. NGC ID# 25ZK, PCGS# 8515

1909-O Half Eagle, AU55+
Final New Orleans Key

3980 1909-O AU55+ NGC. The New Orleans Mint shuttered its doors for good in 1909. It had been closed temporarily between 1861 and 1879, but reopened that year and continued operating for another three decades. However, by the end of the 1900s decade, the Philadelphia, Denver, and San Francisco mints were producing coins at a rate that made the Southern facility obsolete. The 1909-O is the widely recognized key to the Indian Head half eagle series thanks to its paltry mintage of 34,200 coins. This well-detailed Choice AU representative is clearly high-end for the grade. Partly lustrous, yellow-gold surfaces display a couple of small marks on the cheek, those being the only impairments of note. The mintmark is evident, if a touch soft from wear. NGC ID# 25ZK, PCGS# 8515

1911-D Indian Half Eagle, MS62
Elusive, Underrated Issue

3981 1911-D MS62 PCGS. From a memorably small 20th century mintage of 72,500 pieces, the 1911-D Indian half eagle is one of the most challenging issues of the series in all grades. Outside of series specialists, the 1911-D has always been overshadowed by its more famous quarter eagle counterpart, but collectors have begun to recognize the elusive nature of this issue in recent years. Even at the MS62 grade level, the 1911-D is a very scarce coin.

The present coin is an attractive MS62 specimen, with sharply detailed design elements and lustrous yellow and orange-gold surfaces, with scattered, minor contact marks on both sides. Population: 69 in 62 (2 in 62+), 56 finer (1/17). NGC ID# 28DR, PCGS# 8521

**1911-S Indian Five, MS63+
Attractive Reddish-Gold Patina**

- 3982 1911-S MS63+ PCGS.** The 1911-S half eagle had a mintage in excess of 1.4 million coins, trailing only the 1909-D as the highest total in the series. Still, examples of this date are rarely seen finer than MS63. This piece is Plus-graded at the Select level and well-defined throughout, with deep reddish-gold color over each side that effectively draws the eye away from a few scattered abrasions. NGC ID# 25ZM, PCGS# 8522

**1913 Indian Head Five, MS65
Only One Coin Finer at PCGS**

- 3983 1913 MS65 PCGS.** The 1913 Indian five is very scarce at the Gem level and virtually unobtainable any finer, despite a mintage that exceeds 900,000 pieces. This radiant and frosted MS65 example displays vibrant medium orange-gold color and a pinpoint-sharp strike. Often downgraded for bagmarks, the issue is never entirely mark-free, yet this coin shows only a handful of tiny contacts, most of which are in the reverse fields. The eye appeal is terrific. Population: 54 in 65, 1 finer (1/17). NGC ID# 28DT, PCGS# 8525

EARLY EAGLES

**1799 Small Stars Obverse Eagle, XF Details
Very Rare BD-5 Die Pairing**

- 3984 1799 Small Obverse Stars, BD-5, R.6 — Obverse Scratched, Improperly Cleaned — NCS. XF Details.** Bass-Dannreuther Die State c/a, as always. The vast majority of 1799 gold eagles known represent the BD-7 or BD-10 die pairings. The other eight varieties are either rare or extremely rare. BD-5 survives to the extent of only 22 to 30 pieces in all grades. This is the second of three uses for the obverse die but the only use for the reverse. Variety collectors have little room to be picky about quality when it comes to acquiring an example of this rare die pairing. The present coin displays a bold, even strike with XF-level high-point wear. The surfaces are cleaned but display uniform straw-gold color. A faint vertical scratch in the left obverse field is noted on the holder insert. PCGS# 45728 Base PCGS# 98562

**1799 Eagle, BD-10, XF Details
Large Stars Obverse**

- 3985 1799 Large Obverse Stars, BD-10, R.3 — Repaired — PCGS Genuine. XF Details.** Bass-Dannreuther Die State a/a. This is the more-available Large Stars BD-10 variety, with an estimated 300 to 400 survivors in all grades. The exact area of repair is not defined by PCGS, but we suspect it may be at the rim between 1 and 3 o'clock of the obverse and at the corresponding edge of the reverse. Many other opportunities for tooling or repair accompany the myriad small marks that define the XF Details designation. Still, this scarce early eagle makes a brave visual appearance with pleasing medium-gold color and well-defined devices. There are no overt issues to the unaided eye.

1801 Ten Dollar, AU50
BD-2, Rare Perfect Die State

- 3986 1801 BD-2, R.2, AU50 PCGS.** Bass-Dannreuther Die State a/a. The rare early die state without a row of vertical die lines embedded in Liberty's cap. The die state is omitted from the standard Bass-Dannreuther reference. The usually seen die lines on the cap were caused by damage to the obverse die, similar to the 1804 "Spiked Chin" half cent. The present piece was struck before that damage occurred. This Heraldic Eagle ten dollar gold piece shows minimal friction on the curls, cap, and bust truncation. Luster emerges the protected areas, the strike is crisp, and abrasions are confined to a few light hair-thin marks on the upper right obverse field. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1801 Eagle, BD-2, AU50
Well-Detailed Type Coin

- 3987 1801 BD-2, R.2, AU50 PCGS.** Bass-Dannreuther Die State b/b. The 1801 BD-2 is the most plentiful of early eagles produced from 1797 to 1804. Star 8 has two points oriented toward Liberty's cap, and the eagle's beak nearly touches star 13 at its top. The two lowest left stars on the obverse are softly struck on this piece. This example shows still-lustrous canary-gold centers that deepen to amber-gold near the peripheries. A bit of highpoint rub is visible as a color change on the cheek and elevated strands of the hair, and a bit of light field chatter is consistent with the grade. A small dig is noted through the I in LIBERTY. An excellent choice for a type coin. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1801 Capped Bust Right Eagle, AU Details
Popular BD-2 Variety

- 3988 1801 BD-2, R.2 — Cleaning — PCGS Genuine. AU Details. Bass-Dannreuther Die State b/b. The 1801 Capped Bust Right eagle claims a mintage of 44,344 pieces, with two die varieties known for the date. This coin represents the more available BD-2 variety, with star 13 nearly touching the bust. The sharply detailed design elements show only light wear and the mysterious vertical spines in the cap are plainly visible. The surfaces are lightly abraded, but the luster is dimmed by the effects of the noted cleaning.

1801 BD-2 Eagle, MS61
Desirable Early Gold Type

- 3989 1801 BD-2, R.2, MS61 NGC. Bass-Dannreuther Die State a/a. The usual die state with several bold parallel die lines embedded in Liberty's cap. At first glance, they appear to be clash marks from the shield, but they are not, and their origin is unknown. This apricot-gold representative is boldly struck and without any mentionable marks. Luster illuminates the borders and devices. The Heraldic Eagle ten dollar was struck only between 1797 and 1804, and is a coveted early gold type. The 1801 BD-2 is among the more collectible varieties, along with the 1799 B-7 and B-10, and the 1800 BD-1. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

LIBERTY EAGLES

1839/8 Large Letters Ten, AU53
Obverse of 1838

- 3990 1839/8 Large Letters AU53 PCGS. Hints of luster remain in the protected regions of the fields on this About Uncirculated example, complementing well-detailed design elements. The surfaces are fairly smooth, and the green-gold patina is original. The Head of 1838 shows a more ornate portrait of Liberty on the obverse. This two-year design type is popular among gold eagle collectors. Population: 16 in 53, 27 finer (1/17). NGC ID# 54XF, PCGS# 8576

1839 Ten Dollar, AU50
Type of 1840, Small Letters

- 3991 1839 Type of 1840, Small Letters AU50 NGC. Likely only 50 or 60 examples of the 1839 eagle are known with the obverse of 1840, and only two are certified in Mint State. This AU coin displays pleasing detail and medium yellow-gold surfaces with the expected amount of light field chatter. A rare survivor from a mintage of only 12,447 pieces. This is an important early eagle rarity that many collections are lacking. NGC ID# 54XJ, PCGS# 8580

1846 Ten Dollar, AU53
Rare in High Grade

- 3992 1846 AU53 NGC. Coming from a limited mintage 20,095 coins, the 1846 Liberty eagle is scarce in all grades today. About Uncirculated pieces are rare, and Mint State coins are uncollectible for the majority of enthusiasts. This AU coin displays original orange-gold patina with prooflike mirroring in the protected regions of the fields. Scattered surface abrasions are typical of the issue and grade. Census: 13 in 53, 20 finer (12/16). NGC ID# 262W, PCGS# 8594

**1855-S Eagle, Amber-Gold AU53
Low-Mintage 'Sleeper' Date**

- 3993 1855-S AU53 NGC.** In the second year of its existence (the first full year), the San Francisco Mint produced only 9,000 examples of the Liberty eagle. Silver quarters and half dollars, along with gold half eagles and double eagles, were struck in far larger quantities. The 1855-S eagle's minuscule mintage goes largely unnoticed, and the issue is a bit of a "sleeper." This example shows the slanted 5s in the date (as do all) and attractive amber-gold color. Both ticks and wear are trivial for the grade, although some cuts appear on the lower reverse rim at 6 o'clock. The large S mintmark is tilted and rather curiously positioned. Census: 11 in 53, 8 finer (12/16). NGC ID# 263N, PCGS# 8618

**1858-S Liberty Eagle, AU53
Early San Francisco Mint Rarity**

- 3994 1858-S AU53 PCGS.** The young San Francisco Mint's sole purpose in its early years was to meet the needs of the Western economy by supplying a steady amount of gold and silver coinage. That is exactly what it did in 1858, when 11,800 ten dollar gold pieces were struck. No coins aside for numismatic purposes then, and the 1858-S eagles is unknown in Mint State. This About Uncirculated sun-gold and lavender example is minimally circulated with light marks. A tiny dig occurs below OF. Moderate friction does nothing to diminish its importance. Population: 2 in 53, 3 finer (1/17). NGC ID# 263Y, PCGS# 8627

**1862 Liberty Eagle, AU55
Low-Mintage Wartime Issue**

- 3995 1862 AU55 NGC.** Mintage of gold eagles declined dramatically in 1862, due to widespread hoarding and exportation of precious-metal coinage that continued throughout the Civil War era. Only 10,995 ten dollar gold coins were struck in 1862, and few were saved for numismatic purposes. This Choice AU specimen shows just a touch of light wear on the well-detailed design elements and the lightly abraded lemon-yellow surfaces retain significant traces of original mint luster. Census: 17 in 55, 15 finer (1/17). NGC ID# 2649, PCGS# 8635

**1868 Liberty Eagle, MS61
Only One Finer Coin at PCGS**

- 3996 1868 MS61 PCGS.** The 1868 Liberty eagle claims a mintage of just 10,630 pieces, a memorably small production total in absolute terms, but actually larger than most ten dollar gold mintages of the period. The issue can be located in lower circulated grades with some patience, but Mint State specimens are extremely rare. When David Hall put together his set of Liberty eagles (2005-2010), he had to settle for a nice AU58 specimen of this date, as only one single Mint State example was publicly offered during that time frame, an impressive MS60 NGC specimen in lot 1489 of the Dallas Signature (Heritage, 12/2005), that realized \$18,400. The current price realized record for the 1868 eagle is \$25,850, brought by an MS61 PCGS example in a Stack's Bowers auction in May of 2016.

The present coin is an attractive MS61 specimen, with well-detailed design elements and lightly marked orange-gold surfaces that show some scattered, minor contact marks on both sides. The worst distraction is an unobtrusive rim bruise at 9 o'clock on the obverse. Original satiny mint luster radiates from both sides, adding to the outstanding overall presentation. Population: 3 in 61, 1 finer (1/17). NGC ID# 264N, PCGS# 8653

1870 Liberty Eagle, AU55+
Attractive Color and Luster

3997 1870 AU55+ PCGS. This orange-gold Choice AU example displays substantial field luster along with bold design elements. Scattered abrasions accompany the grade. The 1870 ten is a scarce date in all grades, coming from a mintage of only 3,990 pieces. This is the only Plus-graded coin known in any grade, and finer representatives are decidedly rare with almost none existing in Mint State. Population: 12 in 55 (1 in 55+), 6 finer (1/17). NGC ID# 264T, PCGS# 8657

1871-CC Liberty Eagle, XF45
Elusive Branch Mint Issue

3998 1871-CC XF45 NGC. **Variety 2-A.** From a second-year mintage of 8,085 pieces, the 1871-CC Liberty eagle is a scarce-to-rare issue in all grades. Two die varieties are known for the date. This coin represents Variety 2-A, with the date slanting down, left to right. Both varieties employ the same reverse, which was used previously to strike the Variety 1-A of 1870.

This Choice XF specimen shows only light wear on the eagle's wing tips, neck, some stars on the obverse, and Liberty's curls on the obverse. The lightly abraded orange-gold surfaces retain a few traces of original mint luster. Census: 20 in 45, 35 finer (12/16). NGC ID# 264X, PCGS# 8661

1877-CC Liberty Ten Dollar, Fine 15
Rare With Original Surfaces, CAC Approval

3999 1877-CC Fine 15 PCGS. CAC. **Variety 1-A.** Specialists should seize the opportunity to obtain this original, crusty, reddish-gold 1877-CC eagle. Of the 3,332 coins struck, PCGS believes 60 to 75 pieces survive. All known examples are in circulated grades, the coins having served their intended purpose in the West. This well-worn representative retains clear outlines and partial feather detail. Small marks appear throughout. Extremely rare with original surfaces and CAC approval. Population: 4 in 15, 49 finer. CAC: 1 in 15, 5 finer (1/17). NGC ID# 265G, PCGS# 8678

1882-CC Liberty Eagle, AU58
Extremely Rare Any Finer

4000 1882-CC AU58 NGC. The 1882-CC ten comes from a small mintage of just 6,764 pieces, and high-grade survivors are scarce. In Mint State, only six examples are reported by the grading services. Of these, we have handled only one, offering it on two separate occasions. This near-Mint coin represents a rare opportunity to acquire what is arguably the finest possible example of the date for most collectors. The strike is sharp, and each side delivers soft green-gold luster in the fields. Light surface chatter is typical of the grade. There are no significant distractions. Census: 34 in 58, 3 finer (1/17). NGC ID# 2663, PCGS# 8696

**1888-S Liberty Ten, MS64
Unknown in a Finer Grade**

- 4001 1888-S MS64 PCGS.** It has been more than 10 years since we last offered a near-Gem 1888-S eagle, and never one finer since no numerically finer pieces exist at either service. This is an exquisite Liberty ten with frosted reddish-gold surfaces and a sharply rendered strike. Cartwheel mint luster glows beneath the attractive patina. The 1888-S is not rare as a date but it is one of the true condition rarities of the series. Population: 5 in 64, 0 finer (1/17). NGC ID# 266M, PCGS# 8714

**1891-CC Liberty Eagle, MS63
Very Rare in Finer Grades, FS-501**

- 4002 1891-CC/CC Repunched Mintmark, FS-501 MS63 PCGS. CAC. Variety 3-C.** From a large mintage of 103,732 pieces, the 1891-CC Liberty eagle is an available issue, and a favorite choice of branch mint type collectors. This well-detailed Select specimen shows an arcing die crack through the stars on the left and the remnants of an undertype C are easily seen protruding from the right side of the second C in the mintmark. The vivid orange-gold surfaces are lightly marked, with vibrant mint luster on both sides. Population (for Variety 3-C): 2 in 63, 0 finer (1/17). NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

**1907 Liberty Eagle, MS65+
Finest at Both Services**

- 4003 1907 MS65+ PCGS. CAC.** The Coronet design had graced the gold eagle since 1838, but that came to an end in 1907. The issue is a popular target for type purposes, as examples can be found with minimal effort or cost through MS64. That all changes in MS65, where the 1907 becomes very scarce. Plus-graded Gems are extremely rare, with four MS65+ submissions split evenly between PCGS and NGC. This is a gorgeous, pinpoint-sharp eagle with luminous yellow-gold surfaces. Population: 33 in 65 (2 in 65+), 0 finer. CAC: 7 in 65, 0 finer (1/17). NGC ID# 2688, PCGS# 8763

INDIAN EAGLES

**1908 Indian Head Eagle, MS64+
Inaugural Motto Issue**

- 4004 1908 Motto MS64+ PCGS.** The surfaces of this high-end MS64 are frosty and sharply struck. Vibrant canary-yellow surfaces are exceptionally well-preserved for the first-year Motto type, an essential coin for both series and type specialists. While the 1908 Motto issue is available in lesser grades, high-end Choice examples are challenging and finer coins multiply the investment by a significant factor. Population: 10 in 64+, 130 finer (1/17). NGC ID# 28GJ, PCGS# 8859

**1909-S Eagle, MS63+
Conditionally Elusive S-Mint Issue**

- 4005 1909-S MS63+ PCGS.** The 1909-S is a conditionally elusive San Francisco issue that is very scarcely found in MS63 condition, let alone in MS63+. In fact, the average certified example grades between AU55 and AU58. Marks are noted on Liberty's cheek, but the exposed fields are smooth and thickly frosted. Well-detailed with localized incompleteness on the eagle's shoulder and forecurls. NGC ID# 28GP, PCGS# 8864

**1911-D Ten Dollar, Crisp AU58
Series-Low Mintage of 30,100 Coins**

- 4006 1911-D AU58 NGC.** The obverse of this key date Saint-Gaudens ten features a razor-sharp strike with complete detail on the two lowest headdress feathers. The hair strands are similarly bold, though a touch of friction is present. The reverse is a bit softer with blending over the leading edge of the wing, but the mintmark and peripheral elements are crisp. A couple of tiny ticks on the cheek are unimportant. From a series-low mintage of 30,100 coins. NGC ID# 28GU, PCGS# 8869

1914-D Indian Eagle, MS65+
Outstanding Branch Mint Type Coin

4007 1914-D MS65+ NGC. From a substantial mintage of 343,500 pieces, the 1914-D Indian eagle is one of the more available branch mint issues of the series in absolute terms. Most of the mintage was melted after the Gold Recall of 1933, but a number of coins were sent to European destinations, before World War I shut down much of the international trade with that continent. Those coins were repatriated in later years, but most examples seen were roughly handled during shipping and storage and grade in the MS60-MS64 range today. Examples in MS65 condition are still rare.

This Plus-graded Gem exhibits well-detailed design elements and vibrant mint luster on both sides. The pleasing orange-gold surfaces have a slightly granular, matte-like texture and show no mentionable distractions. Overall eye appeal is outstanding. Census: 43 in 65 (2 in 65+), 20 finer (1/17). NGC ID# 28H3, PCGS# 8876

1932 Ten Dollar, MS66+
High-End Type Coin
Radiant Mint Luster

4008 1932 MS66+ PCGS. Widely popular as type-coin issue, the 1932 is the only With Motto Indian eagle issue that is usually available in Premium Gem condition. However, collectors seeking such a coin that excels have a limited population from which to choose — PCGS reports only 19 Plus-graded Premium Gems with a single MS67 coin finer (1/17). Radiant, frosty yellow-gold luster rolls effortlessly around the nearly pristine surfaces of this high-end Indian Head type coin. The strike is bold, despite some evidence of die erosion in portions of the fields. Eye appeal excels, and the type collector would be hard-pressed to locate a visually or technically superior example. NGC ID# 28HB, PCGS# 8884

1932 Indian Eagle, MS66+
Excellent, High-Quality Type Coin

- 4009** 1932 MS66+ PCGS. CAC. From a large, well-produced mintage of more than 4.4 million pieces, the 1932 Indian eagle is the most available issue of the series by a wide margin. The 1932 can be located in all grades up through MS66 without too much difficulty, but the population drops off precipitously at that grade level, making this Plus-graded Premium Gem a good balance of quality and value. The design elements are sharply detailed in most areas, with just the slightest touch of softness on the lowest headdress feathers. The yellow and orange-gold surfaces are impeccably preserved, with especially vibrant mint luster on both sides. Overall eye appeal is tremendous. PCGS has graded only one single coin in higher numeric grade (1/17). NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU53
Pleasing First-Year Type Coin

- 4010** 1850 AU53 NGC. The inaugural double eagle coinage at Philadelphia absorbed significant quantities of freshly mined California gold, although private San Francisco assayers still offered a faster and more convenient coining option for prospectors. Only in 1854, with the opening of the San Francisco branch mint, did private coinage enterprises in that region fade away. Examples of the 1850 Philadelphia issue are popular today as Gold Rush-era type coins. This AU piece displays lightly abraded, yellow-gold surfaces with pleasing detail on the devices. NGC ID# 268F, PCGS# 8902

1850 Twenty Dollar, AU55
Lustrous Fields

- 4011** 1850 AU55 NGC. Original straw-gold coloration adorns this partially lustrous Choice AU example, while the well-detailed design elements exhibit grade-consistent high-point wear. Light chatter appears in the fields, but there are no major abrasions. Although authorized by the same legislation that created the gold dollar in 1849, double eagle coinage was delayed until 1850. Much of the gold used to strike this issue in Philadelphia was shipped from the California gold mines. NGC ID# 268F, PCGS# 8902

1851-O Twenty Dollar, AU53
Nice New Orleans Type Coin

- 4012** 1851-O AU53 NGC. *Variety 2*. Luster brightens the legends and motifs of this sun-gold and olive-gray early double eagle. Most circulated twenties are abraded due to a large diameter and soft alloy, but the present piece is surprisingly void of blemishes and has attractive eye appeal. The advent of the U.S. Assay Office in San Francisco undoubtedly diminished the influx of gold bullion to New Orleans.
Ex: *New York Signature* (Heritage, 3/2012), lot 4185. NGC ID# 268J, PCGS# 8905

1851-O Double Eagle, AU53
Original Green-Gold Surfaces

- 4013** 1851-O AU53 NGC. CAC. **Variety 1.** The left serif of the first 1 is over a dentil, and the mintmark is slightly left of center over the N in TWENTY. New Orleans Mint officials more than doubled twenty dollar gold coin production in the denomination's second year of issue (315,000 coins). Examples are seldom seen in this grade, especially with CAC-approved surfaces. This original, medium green-gold No Motto double eagle offers a crisp impression and minimal abrasions. Partly lustrous and undeniably eye-appealing. NGC ID# 268J, PCGS# 8905

1851-O Double Eagle, Partially Prooflike
Choice About Uncirculated O-Mint Type

- 4014** 1851-O AU55 PCGS. **Variety 2.** One of the few New Orleans twenties available to the average collector with any semblance of affordability, this Choice About Uncirculated 1851-O stands out in both eye appeal and surface quality. Seemingly struck from fresh dies, the original surface quality suffered little from its brief time in circulation, allowing reminders of its prooflike surfaces and strong strike to remain.

Rich, sun-gold color benefits from a surprising amount of remaining mint luster that glows from both sides. A lens reveals the inevitable chatter from handling and transport, but there are no major marks and the smooth, golden sheen suggests an even finer grade. As always, the chance to acquire an attractive Type One double eagle from the New Orleans Mint is a formidable challenge to be met with persistence and a ready wallet — attributes that will be rewarded when this lot crosses the block. NGC ID# 268J, PCGS# 8905

New Orleans Mint

1852 Twenty Dollar, AU58
Strongly Struck

- 4015 1852 AU58 PCGS.** According to Doug Winter's doubleeaglebook.com, "The 1852 is among the better produced Type One double eagles from any mint. The obverse is usually well detailed with sharp, individually defined hair, strong stars and completely separated denticles. The reverse is also well struck." Such is the case with this nearly Uncirculated 1852 twenty. Friction is hardly apparent, while red and green-gold hues color moderately lustrous, remarkably smooth surfaces. This is a great No Motto type representative. NGC ID# 268K, PCGS# 8906

1852-O Double Eagle, AU50
Popular New Orleans Mintmark

- 4016 1852-O AU50 ANACS. Variety 1.** A luminous caramel-gold example of this low mintage issue, important as one of the few comparatively affordable New Orleans entries in the series. Crisply struck, the devices exhibit only slight highpoint rub, and although small marks are evident, none are singularly distracting.
Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 3273. NGC ID# 268L, PCGS# 8907

1852-O Liberty Twenty, Choice AU
Impressive Southern Gold Type

- 4017 1852-O AU55 NGC. Variety 1.** The 1852-O is the secondmost accessible double eagle issue from the New Orleans Mint after the 1851-O. Less than 1% of the original 190,000-coin mintage is estimated to survive, however, and Choice AU offerings like this one are scarce. Although strike characteristics vary, examples can be found sharply struck, as here, with slight softening near the wing and tailfeather ends and on the most exposed portions of the curls. Remaining luster illuminates yellow-gold surfaces that show a slight greenish cast and relatively few abrasions. Wispy marks are scattered evenly throughout, but they are of little importance. NGC ID# 268L, PCGS# 8907

1855-S S.S. Republic Double Eagle
Lustrous AU58

- 4018 1855-S AU58 NGC.** *Ex: S.S. Republic.* Small S, or Medium S. This sharp near-Mint 1855-S double eagle displays bright, frosty yellow-gold mint luster with an expected scattering of minor abrasions. Other than a trace of friction on Liberty's cheek, the coin appears Mint State. Finer examples are scarce, despite shipwreck recoveries. NGC ID# 268X, PCGS# 8916

1856 Double Eagle, MS60
Underrated P-Mint Issue

- 4019 1856 MS60 PCGS.** The 1856 double eagle issue is scarcer than generally realized, despite a mintage of more than 329,000 coins. Only a few dozen submissions have crossed the Mint State threshold at the two leading services. This example offers full mint luster on attractive apricot-gold surfaces that are well-struck. Extensive scrapes and abrasions on both sides limit the grade to basal Mint State, however. Much eye appeal is nonetheless present. Population: 3 in 60, 26 finer (1/17). NGC ID# 268Y, PCGS# 8917

1856-S Double Eagle, AU58
Original Red-Gold Surfaces

- 4020 1856-S AU58 NGC. CAC.** This still-lustrous, reddish-gold Type One twenty was among the nearly 1.2 million double eagles struck in the San Francisco Mint's third year of operation. The coins were manufactured for one purpose: to circulate in Western commerce. High-end coins are very scarce, though they are far more accessible now thanks to the recovery of 1,000 pieces from the S.S. *Central America*. Scattered marks and a crisp impression characterize each side. NGC has seen 41 finer submissions. CAC: 22 in 58, 12 finer (1/17). NGC ID# 2692, PCGS# 8919

1857-S Double Eagle, Near-Mint
Variety 20F, Ex: S.S. *Central America*

- 4021 1857-S AU58 PCGS. Variety 20F.** Ex: S.S. *Central America*. SSCA 4632. Cartwheel luster is complete except across the right reverse field. The caramel-gold surfaces are lightly abraded and display a few areas of pale gunmetal toning. The No Serif, Right S die variety, designated for its mintmark placement and an absent left serif on the U in UNITED. Researcher Robert Evans described the recovered die marriages in a July 2000 *Numismatist* article. Included with the lot is an olive-green Blanchard box, a Certificate of Authenticity, and a faux book, as originally distributed. Housed in a gold label holder. NGC ID# 2696, PCGS# 8922

1857-S Twenty Dollar, MS64
Bold S, Ex: S.S. *Central America*

- 4022 1857-S MS64 PCGS. Variety 20B.** Ex: S.S. *Central America*. SSCA 3808. Bold S. A conservatively assessed peach-gold near-Gem. Lustrous, well preserved, and crisply struck. Glimpses of struck-in grease are noted near obverse stars 7 and 11. Accompanying the lot is an olive-green Blanchard presentation box with a Certificate of Authenticity and faux *Ship of Gold* book. Housed in a gold label holder. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS65
Bold S, S.S. *Central America*

- 4023 1857-S MS65 PCGS. Variety 20B.** Ex: S.S. *Central America*. SSCA 1682. The gold label PCGS holder is designated as "20A Spiked Shield" but the die variety is the Bold S Variety 20B. The 18 in the date is lightly repunched south, a feature seldom mentioned since Robert Evan's research focused on reverse die attributes. A lustrous peach-gold Gem with unabraded fields and only delicate contact on the cheek. An unobtrusive blush of mauve toning is noted on the lower right reverse. Accompanying the lot is a certificate of authenticity signed by the presently imprisoned Tommy Thompson, an olive-green box imprinted David Hall's North American Trading, and a faux book. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS65
Outstanding Eye Appeal

- 4024 1857-S MS65 PCGS.** Vibrant luster and bold throughout. The surfaces are outstanding for a Type One double eagle, with a fresh, undiminished cheek on Liberty. The fields are also clean and show minimal signs of abrasions, although a small cluster resides near Liberty's nose. A strong strike brought up all the devices and stars to completeness.

One can be reasonably certain that the present coin was recovered from the S. S. *Central America* shipwreck. Prior to a few groups of coins being pulled from ocean floor shipwrecks, the number of Type One double eagles that qualified for Gem grades was virtually nil. In the case of the 1857-S, the dominant date and mint found in that particular wreck, coins that qualified as Uncirculated were quite rare until the cargo was brought to the ocean surface and examined. Today, several thousand 1857-S double eagles are available in various mint state grades from the S. S. *Central America*, and this is one of the finer examples recovered. The PCGS holder does not include any reference to the S. S. *Central America*.

Ex: *Long Beach Signature* (Heritage, 2/2006), lot 3243. NGC ID# 2696, PCGS# 8922

1860 Twenty Dollar, MS62
Frosty Orange-Gold Luster

4025 1860 MS62 PCGS Secure. Uncirculated examples of the 1860 double eagle are rare compared to the population of similarly graded 1861 coins. Most such pieces reside in MS60 or MS61, with the present MS62 coin being above average in quality. The strike is boldly executed, and frosty orange-gold luster delivers excellent visual appeal. A few light marks on the obverse determine the grade but are minor compared to what is often seen on lower-grade Mint State pieces. Any Type One double eagle in MS62 is a scarce coin, and finer representatives are rarely offered. Population: 12 in 62 (2 in 62+), 10 finer (1/17). NGC ID# 269D, PCGS# 8929

1861 Liberty Double Eagle, MS62
Popular Type One Issue

4026 1861 MS62 PCGS. An elusive Mint State example of this otherwise plentiful type-coin issue, showing bold design elements and softly frosted wheat-gold mint luster. Light chatter on the obverse limits the grade, but the overall eye appeal exceeds expectations for the MS62 level. Finer examples are notably scarce. Population: 96 in 62 (4 in 62+), 52 finer (1/17). NGC ID# 269G, PCGS# 8932

1863-S Twenty Dollar, AU58
Conditionally Scarce Type One Issue

4027 1863-S AU58 NGC. The 1863-S double eagle is scarce in Mint State, although this near-Mint coin displays substantial luster in the fields and sharp detail on the devices. Both sides offer warm yellow-gold color with minimal abrasions. Barely a brush of high-point friction is discernible. A challenging date this fine. NGC ID# 269R, PCGS# 8940

1863-S Twenty Dollar, Lustrous AU58
Unusually Smooth Surfaces

4028 1863-S AU58 NGC. Ex: *S.S. Republic*. The availability of the 1863-S double eagle was given a boost by recoveries from the *S.S. Republic* and *S.S. Brother Jonathan*. This near-Mint coin displays shimmering luster in the fields with remarkably smooth surfaces. The devices are boldly detailed and show no major abrasions. NGC ID# 269R, PCGS# 8940

1865 Liberty Double Eagle, AU58
Nice Color and Luster

4029 1865 AU58 NGC. Until the salvage of more than 300 high-grade 1865 double eagles from the *S.S. Republic* shipwreck, the 1865 issue was rare any finer than XF condition. It is still scarce approaching Uncirculated condition, but not nearly as challenging as before the fabulous treasure recovery. This is an attractive and frosty near-Mint example with generally smooth surfaces and substantial remaining mint luster. We note a slight rim bump near star 4 and scattered small abrasions, but no other marks of special mention. The eye appeal is excellent. NGC ID# 269U, PCGS# 8943

1865 Liberty Head Twenty, Frosty MS63
Vibrant Luster, Smooth Surfaces

4030 1865 MS63 PCGS. CAC. The 1865 Philadelphia issue remains a scarce Type One twenty in Uncirculated condition despite being one of the significant shipwreck recovery coins in the double eagle series. Virtually all of the Mint State examples trace back to the *S.S. Republic* treasure. While the exact provenance of the present Select example is unknown, the frosty and lustrous yellow-gold surfaces pleasing orange accents suggest that it, too, is most likely a recovery coin, and a stunning one at that.

The brilliant surfaces display a sharp strike and only a few light obverse abrasions that are of no concern for the given grade. The reverse appears at least a point finer and is virtually unmarked. Cartwheel luster rolls across the vibrant surfaces in waves. To this day, PCGS has graded only a few 1865 double eagles this fine, and CAC endorses the substantial eye appeal and quality surfaces. Population: 10 in 63, 5 finer. CAC: 22 in 63, 24 finer (1/17). NGC ID# 269U, PCGS# 8943

1866 Twenty Dollar, AU55
First-Year With Motto Issue

4031 1866 Motto AU55 NGC. All 1866 double eagles coined at Philadelphia were struck with the new With Motto reverse. Uncirculated examples are scarce, heightening demand for AU-level coins. This Choice About Uncirculated representative displays bold detail and partially lustrous fields. Light surface chatter is consistent with the grade. NGC ID# 269X, PCGS# 8949

1866 Liberty Twenty, MS62
Doubled Die Reverse, FS-801
First Year With Motto

4032 1866 Doubled Motto, FS-801, MS62 PCGS. This variety shows IN positioned high with a boldly repunched N. A production of 698,745 coins in 1866 represented the first batch of double eagles struck with the new motto IN GOD WE TRUST above the eagle on the reverse. The FS-801 variety was created when a small-letter hub was punched into the die over a large-letter hub. The 1866 Liberty Head twenty survives to a sizeable degree in XF to AU grades. All Uncirculated coins are rare, a nice MS62 being about the finest grade even the most well-resourced collectors can hope to obtain, as there are only two finer representatives at the leading certification services.

This frosty peach-gold twenty shows full star centers and typically defined central motifs. Scattered bagmarks appear throughout, and an alloy spot within the lower part of the shield will help identify this coin in future appearances. Population (all varieties): 6 in 62, 2 finer (12/16). NGC ID# 38JK, PCGS# 145733 Base PCGS# 8949

1866-S Motto Twenty Dollar, AU55
FS-1301, Misplaced Date Variety

4033 1866-S Motto, Misplaced Date, FS-1301, AU55 NGC. CAC. Small Squat S. The top of an errant 8 appears near the denticles just left of the 1. The San Francisco Mint received the new Type Two double eagle dies later in the year but still managed a production of 842,250 Motto twenties in 1866. This surprisingly lustrous first-year example has the look of a higher-graded piece, but minor friction over the high points limits the grade. Small ticks are peppered across peach and rose-gold surfaces. Only two marks on the cheek merit attention. NGC ID# 269Y, PCGS# 145734 Base PCGS# 8950

1867 Double Eagle, MS60
Pleasing for the Grade

4034 1867 MS60 NGC. The 251,015 double eagles struck at the Philadelphia Mint in 1867 were almost entirely for export in overseas trade. The vast majority were melted, but a small quantity of Mint State survivors have been repatriated over the years. This Uncirculated Type Two representative exhibits shallow grazes in the fields, but none of them pose as serious a distraction as one might expect for the grade. Sun-gold coloration dominates each side, accented with glimpses of rose. A strongly defined and lustrous example. NGC ID# 269Z, PCGS# 8951

1867 Double Eagle, Lustrous MS61

4035 1867 MS61 PCGS. Sun-gold shadings blend with light rose-gold hues throughout this Uncirculated 1867 double eagle. The Mint produced more than a quarter million twenty dollar gold pieces that year, but survivors are very scarce at this grade level and certainly any finer. Myriad marks are present over each side, including a linear depression in the left obverse field. The motifs are well-defined, and luster is remarkably lively. NGC ID# 269Z, PCGS# 8951

1868-S Liberty Double Eagle, MS60
Seldom Encountered in Finer Grades

4036 1868-S MS60 PCGS. The 1868-S Liberty double eagle claims a more-than-adequate mintage of 837,500 pieces. Like most Type Two twenties, the 1868-S circulated heavily in the Western economy at the time of issue. Alternatively, some coins were exported, to settle large accounts in foreign trade. In any case, few examples were saved for numismatic purposes, and the issue is rare in all Mint State grades today.

This attractive Mint State specimen exhibits well-detailed design elements, with a touch of the typical softness on Liberty's hair. The pleasing orange-gold surfaces retain much original mint luster and show the expected number of minor contact marks for the grade. Housed in a new 30th Anniversary green label holder. Population: 15 in 60, 20 finer (1/17). NGC ID# 26A4, PCGS# 8954

1872-CC Double Eagle, MS60
First So-Graded Coin at Auction in Nine Years

4037 1872-CC MS60 PCGS. Variety 1-B. In recent years, we have handled a number of 1872-CC double eagles in XF and AU condition, many with cleaning or other impairments. However, in more than two decades of record-keeping, our Auction Archives list only 11 previous appearances of a Mint State example, all grading MS60 or MS61. Of these, some were reappearances of the same few coins. This rarity is consistent with the certified population ratio of Mint State pieces, which lists combined PCGS and NGC totals of eight MS60s, nine MS61s, and 2 MS62s (one of the MS62s being Star-designated at NGC). As of this writing, the most recent Mint State coin sold in our auctions was an MS61 PCGS coin in our August 2015 ANA Signature sale, lot 4476, which realized \$94,000. Our last offering of an MS60 coin was nearly a decade ago in our May 2008 Long Beach Signature sale, lot 3629, where an NGC piece garnered \$33,350.

We expect a high degree of interest as the present coin crosses the auction block. The design elements are boldly defined, and the satiny yellow-gold fields offer vibrant luster. Scattered abrasions dictate the grade but collectively pose minimal distraction for the given numeric level. NGC ID# 26AE, PCGS# 8964

1873-CC Double Eagle, AU58
Smooth, Minimally Marked Surfaces

4038 1873-CC AU58 NGC. Variety 1-A. Although a few European hoard coins returned to collectors in the 1990s, the 1873-CC remains a scarce coin in AU58 or finer grades. Even at the low Uncirculated levels, bagmarks usually limit the eye appeal as well as the technical grade. This smooth and attractive near-Mint coin stands out among other examples of the issue. The surfaces are remarkably free of abrasions, while mint luster remains strong across both sides. Wear is limited to the high point curls and minor friction in the obverse fields.

Just 22,410 pieces were struck, less than a fifth of the more-available 1874-CC. The present coin displays appealing rich, satiny surfaces that command a premium among knowledgeable Carson City collectors regardless of the date. As an 1873-CC, it ranks among the finer AU twenties we have seen, and the coin is certain to require a strong bid to take it home. NGC ID# 26AJ, PCGS# 8968

1874-CC Double Eagle, AU53
Original Patina

4039 1874-CC AU53 NGC. Variety 4-A. Outstanding original patina yields green-gold hues with lustrous fields. Bold design elements exhibit little high-point wear. A few scattered marks are not unusual for the grade. The 1874-CC is plentiful in AU condition, but Uncirculated pieces are rarely seen. This piece will appeal to the collector who appreciates old-time patina. NGC ID# 26AP, PCGS# 8971

1874-CC Twenty Dollar, AU53
Lustrous Fields

4040 1874-CC AU53 NGC. Variety 4-A. Despite its mintage of more than 115,000 pieces, the 1874-CC double eagle is rare in Uncirculated condition. This AU example offers partially lustrous fields and excellent detail. Original green-gold patina shows a few light, scattered abrasions as usual. Eye appeal is excellent. NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, AU53
Original, Smooth Surfaces

4041 1874-CC AU53 NGC. CAC. Variety 2-A. The 1874-CC is widely collected in AU condition due to the rarity and cost of Mint State coins — which usually show unsightly bagmarks anyway. This briefly circulated piece displays original olive-gold patina over lustrous peach-gold fields. Light surface chatter accompanies the grade, but the only individually significant abrasions are a pair of reed marks hidden in the stars above the eagle's right (facing) wing. NGC ID# 26AP, PCGS# 8971

1875 Double Eagle, MS63
Extremely Rare Any Finer

- 4042 1875 MS63 NGC.** The 1875 double eagle is the only collectible gold denomination struck that year (295,720 coins). The average certified representative grades fractionally shy of MS60, while Select Uncirculated condition is essentially the highest attainable grade for most collectors. NGC and PCGS have each seen only four finer submissions (1/17). This is a thickly frosted, orange and green-gold example with bold stars and feather detail. Scattered field grazes define the grade. NGC ID# 2547, PCGS# 8973

1875 Twenty Dollar, MS63+
Only Four Finer Coins at PCGS

- 4043 1875 MS63+ PCGS.** Vibrant, frosty mint luster washes over this rose-gold twenty dollar gold piece. Although the central curls are typically soft, the eagle's neck, wing, and tailfeathers are boldly rendered. PCGS has awarded a Plus designation for quality within the grade, and it does not take much imagination to see why. The fields are minimally abraded with only trivial grazes. A single tick occurs on the neck. Population: 80 in 63 (3 in 63+), 4 finer (1/17). NGC ID# 2547, PCGS# 8973

1875-CC Twenty Dollar, AU55
Appealing for the Grade

- 4044 1875-CC AU55 NGC. Variety 4-C.** This is one of the less-often seen die varieties, showing a closely spaced mintmark positioned further right than usual. The coin is well-detailed and retains partial luster in the fields. Scattered abrasions accompany the natural green-gold patina. This is a collectible Carson City issue, suitable for type representation. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty Dollar, AU55
Attractive, Lustrous CC-Mint Type Coin

- 4045 1875-CC AU55 PCGS. Variety 3-B.** The 1875-CC is the early Carson City double eagle that can be termed available in high grade. Nonetheless, the generally unattractive, bagmarked appearance of most Mint State pieces moves numerous collectors to seek high-end AU coins as an alternative. This Choice AU representative displays bright yellow-gold color and lustrous fields. There is only light surface chatter on each side, no individually significant abrasions. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty Dollar, AU55
Marvelous Aesthetic Quality

- 4046 1875-CC AU55 NGC. CAC. Variety 2-A.** Those who appreciate unbridled originality will approve of this Choice About Uncirculated 1875-CC twenty dollar gold piece. Green-gold color dominates each side, yielding only to occasional accents of rose. Central design detail is incomplete, but the marvelous aesthetic quality more than compensates. Seldom offered with CAC approval. NGC ID# 26AT, PCGS# 8974

1875-CC Double Eagle, AU58
Lustrous, Original Patina

- 4047 1875-CC AU58 PCGS. CAC. Variety 4-B.** This CAC-approved near-Mint Carson City double eagle displays exceptional eye appeal for the grade, including original olive-gold patina and luminous flashes of luster in the fields. Light handling marks appear on each side, but there are no individually significant abrasions. Many Carson City twenties lack the originality and eye appeal of the present coin. NGC ID# 26AT, PCGS# 8974

1876-CC Twenty Dollar, AU53
Original Luster Remains

- 4048 1876-CC AU53 PCGS. **Variety 3-D.** The rarely seen Wide CC reverse, this About Uncirculated 1876-CC double eagle is also significant for its original olive-gold patina that shows tinges of orange-gold luster in the protected regions of the fields. Surface abrasions are light and uniformly dispersed, posing limited distraction. A few small ebony discolorations appear on the central reverse and along the lower reverse rim. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU55
Attractive for the Grade

- 4049 1876-CC AU55 NGC. **Variety 1-A.** Lustrous obverse fields complement remnants of semiprooflike mirroring in the reverse fields. This Choice AU 1876-CC double eagle displays natural green-gold coloration and bold design elements with the usual array of scattered abrasions. Eye appeal is pleasing for the grade. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU55
Partially Lustrous Fields

- 4050 1876-CC AU55 PCGS. **Variety 6-A.** Luster remains in the fields, and each side of this Choice AU 1876-CC double eagle displays relatively smooth straw-gold patina. The design elements show only slight high-point friction. The 1876-CC is a plentiful Carson City issue, ideal for the collector seeking a single representative from this mint. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU55
Carson City Type Coin

- 4051 1876-CC AU55 PCGS. **CAC. Variety 3-A.** The 1876-CC is a challenging date in Uncirculated condition but usually collectible in AU. This Choice AU coin displays minor high-point wear with luster remaining in the protected regions of the fields. Scattered abrasions accompany original olive-gold coloration and eye appeal. NGC ID# 26AW, PCGS# 8977

1877 Double Eagle, MS62+
Inaugural Type Three Coin

- 4052 1877 MS62+ PCGS. Uncirculated examples of the inaugural Type Three double eagle are apt to be found in MS61 or MS62. Plus-designated coins of similar quality are rare. The 1877 commands a considerable premium in MS63 and is virtually unknown in MS64. This warm, sun-gold twenty offers glistening frost and few major abrasions for the grade. Small, scattered marks are expected, and the impression is uniformly bold. PCGS shows 18 submissions graded finer (1/17). NGC ID# 2547, PCGS# 8982

1877-CC Double Eagle, AU53
Natural, Partially Lustrous Patina

- 4053 1877-CC AU53 NGC. **Variety 1-B.** This is a boldly detailed coin with partially lustrous fields and original olive-gold coloration. Minor high-point wear exists in the absence of heavy abrasions, giving this piece better-than-average eye appeal for the grade. The 1877-CC is rarely offered in Mint State, although AU coins are collectible. NGC ID# 26AZ, PCGS# 8983

1877-CC Liberty Head Twenty, AU53
Scarce in High Grade

- 4054 1877-CC AU53 PCGS. Variety 1-A.** The 1877-CC is rarer in high grade than either of the two previous double eagles from this mint. The present AU example displays original olive-gold patina with remnants of luster in the fields. Light, scattered abrasions are consistent with the grade. An ideal coin for the collector who appreciates old-time coloration. NGC ID# 26AZ, PCGS# 8983

1877-CC Twenty Dollar, AU55
Frosty, Lustrous Fields

- 4055 1877-CC AU55 NGC. Variety 1-B.** Hints of rose and peach warm the interiors, while the majority of this Choice AU coin displays frosty green-gold luster. The strike is sharp, and little high-point friction is in evidence. Scattered abrasions accompany the grade. The 1877-CC is a challenging issue in the upper AU levels, and it is rarely offered in Mint State. NGC ID# 26AZ, PCGS# 8983

1877-CC Double Eagle, AU58
First Year of the Type Three Design

- 4056 1877-CC AU58 NGC. Variety 3-A.** The introduction of the Type Three double eagle design with a slightly modified portrait and DOLLARS added to the reverse coincided with a dramatic reduction in gold output at the Carson City Mint in 1877. Twenty dollar gold coin production declined by more than 70% over the previous year to just 42,565 pieces. Comparable near-Mint examples are very scarce, while fully Uncirculated representatives of this popular Western issue prove exceedingly rare.

Overall design detail is strong with hints of inconsequential softness on the highest points of the portrait, the eagle's neck, and the tailfeathers. Frosty, shimmering luster and greenish accents generate top-notch eye appeal. Small flecks in the fields do not detract. NGC reports 24 finer submissions (1/17). NGC ID# 26AZ, PCGS# 8983

1882-CC Liberty Double Eagle, AU50
Original Patina

- 4057 1882-CC AU50 PCGS. Variety 1-A. Some 1882-CC double eagles have returned to the United States in recent decades from overseas bank hoards, making this issue collectible without breaking the bank. The present AU coin displays excellent orange-gold coloration and sharp detail. Hints of luster remain in the protected regions of the fields. NGC ID# 26BF, PCGS# 8997

1882-CC Liberty Twenty Dollar, AU55
Attractive Coloration

- 4058 1882-CC AU55 NGC. Variety 1-A. There are two known die pairs for the 1882-CC, which claims a mintage of 39,140 coins. This is the scarcer variant with the first C slightly higher than the second. A blend of khaki and peach-gold hues covers this partly lustrous and well-detailed Choice AU survivor. Myriad marks, including two noteworthy abrasions near stars 6 and 7, are scattered throughout. NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, AU55
Excellent Surfaces

- 4059 1882-CC AU55 PCGS. CAC. Variety 1-B. The 1882-CC is a collectible Type Three Carson City issue, although it is scarcer in high grade than the 1883-CC and 1884-CC. This Choice AU representative displays sharp detail and original green-gold patina. Luster glows in the fields when rotated beneath a light. The CAC endorsement is well-deserved. NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, AU58
Luminous Nevada Mint Representative

- 4060 1882-CC AU58 NGC. Variety 1-B. A vertical spike near Liberty's eye and the upward sloping mintmark confirm the variety. A meager mintage of 39,140 coins explains sustained demand for the 1882-CC. This lovely example is on the cusp of an Uncirculated assessment, devoid of obvious signs of friction. Green and orange-gold colors meld over luminous, frosted surfaces. Design detail is strong. NGC ID# 26BF, PCGS# 8997

1883-CC Double Eagle, AU50
Strongly Defined

- 4061 1883-CC AU50 PCGS. Variety 2-A. Die chips occur around stars 8 and 9, and the second C in the mintmark is partially over the D in DOLLARS. Although this Carson City double eagle saw a short stay in Western circulation, its sharp strike remains evident and a moderate degree of luster is evident within the design recesses. A reddish-gold tint colors lightly abraded surfaces, and an area of struck-in grease appears near UN. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, Choice AU
Low Mintage of 59,962 Coins

- 4062 1883-CC AU55 NGC. Variety 2-A. The second C is slightly over the D. The 1883-CC enjoys a low mintage of 59,962 coins and boasts the always-desirable Carson City pedigree. About Uncirculated examples survive in surprising numbers, but there are never enough available to fully meet collector demand. Well-detailed motifs appear on each side of this khaki-gold double eagle. Lightly marked. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, AU58
Vibrant Mint Luster

- 4063** 1883-CC AU58 NGC. Variety 1-B. Graded near-Mint by NGC, this piece appears completely unworn on the reverse and shows only slight high-point friction on the obverse portrait. The strike is bold, and vibrant straw-gold luster rolls around each side. The 1883-CC is one of the more plentiful Carson City twenties from the 1880s, suitable for type purposes. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, AU58
Marvelous, Original Representative

- 4064** 1883-CC AU58 NGC. CAC. Variety 2-A. The second C in the mintmark is partly over the D. The 1883-CC has a fairly low mintage of 59,962 coins, but it qualifies as one of the more accessible issues from that branch mint. Well-preserved near-Mint examples are scarce, while Uncirculated survivors are exceedingly elusive and out of reach for most collectors. This is a marvelous, original representative with green-gold color. Each side remains lustrous and shows remarkably few abrasions for a CC twenty. Excellent eye appeal. NGC ID# 26BH, PCGS# 8999

1883-CC Liberty Head Twenty, MS60
Frosty Original Luster

- 4065** 1883-CC MS60 NGC. Variety 2-A. Despite a limited mintage of 59,962 pieces, the 1883-CC double eagle is fairly plentiful in XF and AU condition, as many pieces were preserved by being shipped overseas during the 19th century. Foreign hoards of U.S. gold have yielded small quantities of the date, but coins worthy of a Mint State grade remain elusive and highly sought-after. This piece displays frosty, original green-gold luster and a sharp strike. Light, scattered abrasions determine the grade, although eye appeal surpasses expectations for the MS60 level. This is an excellent coin for the Carson City date collector seeking a Mint State representative. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, MS62
Minimally Marked and Pleasing

- 4066 1883-CC MS62 PCGS. Variety 2-A.** The 1883-CC double eagle has a mintage of less than 60,000 pieces, approximately 5% of the production of its San Francisco cousin. Despite the low emission, the '83-CC is regularly available in XF and AU grades, but is undeniably rare in Mint State. The present MS62 representative displays vibrant cartwheel luster across well-struck sun-gold surfaces. Marks are surprisingly minor, both on the fields and the portrait. Given the great rarity of the issue at the Select level, the present lot provides an excellent opportunity to secure a high-end MS62 example. Population: 19 in 62, 4 finer (1/17). NGC ID# 26BH, PCGS# 8999

1883-S Double Eagle, MS63
Only Collectible Issue for the Date

- 4067 1883-S MS63 PCGS.** The Philadelphia Mint abstained from circulation-strike production of double eagles in 1883, while the Carson City facility struck fewer than 60,000 twenty dollar gold pieces. That leaves the 1883-S, with its mintage of nearly 1.2 million coins, as the only collectible double eagle issue for date collectors. The impression is well-detailed, and grazes are generally shallow. A cartwheel effect is evident on each side of this rose and green-gold Select twenty. PCGS reports 14 higher grading events (1/17). NGC ID# 26BJ, PCGS# 9000

1884-CC Double Eagle, Smooth AU53
Original Coloration

- 4068 1884-CC AU53 NGC. CAC.** By 1884, the Carson City economy was on the decline. The population totaled 4,000 people, roughly half of what it had been only four years earlier. The 1884-CC double eagle was, as Rusty Goe put it, a "last hurrah, of sorts" for the facility. Examples are among the most available Carson City twenties and suitable for type purposes. CAC has recognized this piece for its original, "dirty gold" surfaces. The hair strands and feathers are crisply delineated. Luminous and surprisingly smooth. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, AU55
Luster Remains in the Fields

- 4069 1884-CC AU55 NGC. Variety 1-A.** Original olive-gold surfaces give this partially lustrous Choice AU 1884-CC double eagle excellent eye appeal for the grade. The strike is sharp, and the coin is relatively smooth compared to most other pieces in this grade. The 1884-CC is a plentiful date, suitable for the collector seeking a single coin from this mint. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, Lustrous AU58

- 4070 **1884-CC AU58 NGC. Variety 1-A.** Only one die variety is known for the 1884-CC double eagle, despite a fairly substantial mintage for the mint of 81,139 pieces. A distinctive pair of intersecting die lines appears on Liberty's neck above the designer's initials. The present coin is nearly Uncirculated, showing lustrous yellow-gold fields and sharp detail with little evidence of high-point friction. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, MS61
Popular Issue for Type Purposes

- 4071 **1884-CC MS61 NGC. CAC. Variety 1-A.** This Carson City issue is known for its excellent production quality and relative high-grade availability compared to other contemporary CC double eagles. These attributes make it an ideal option for type purposes. Mike Fuljenz explains in the most recent edition of *Type Three Double Eagles, 1877-1907*: "The overall level of eye appeal is well above average for a Carson City gold coin of any denomination, making this an especially popular issue." It is that high degree of visual quality that accounts for the green CAC approval sticker. In MS61, the 1884-CC is moderately scarce, while finer coins rarely appear at auction, perhaps once or twice a year. This typically strong and attractive rose-gold twenty is awash in frosty luster. Thin, superficial field grazes determine the grade. NGC ID# 26BK, PCGS# 9001

1884-S Liberty Twenty, MS64+
Very Rare in Finer Grades

- 4072 **1884-S MS64+ PCGS.** The 1884-S Liberty double eagle claims a substantial mintage of 916,000 pieces, but the issue circulated heavily at the time of issue and few examples were saved by contemporary numismatists. Like most double eagles of this time period, the 1884-S is easily located in average-circulated grades, but high grade specimens are very rare. The present coin is a Plus-graded Choice specimen, with sharply detailed design elements throughout. The well-preserved orange-gold surfaces radiate vibrant mint luster from both sides, adding to the outstanding overall visual appeal. This coin will be a welcome addition to a fine collection or Registry Set. Population: 26 in 64 (2 in 64+), 2 finer (1/17). NGC ID# 26BL, PCGS# 9002

1885-CC Double Eagle, AU53
Fewer Than 10,000 Coins Struck
Rarely Offered in Higher Grades

4073 1885-CC AU53 NGC. Variety 1-A. The year 1885 is notoriously challenging for double eagles, as two of the three operating mints saw highly limited production. A total of 751 coins were struck at the Philadelphia Mint and 9,450 pieces at the Nevada facility. Only the S-mint coins can be considered collectible. The 1885-CC lays claim to the smallest twenty dollar mintage from the Carson City branch mint from its inception in 1870 until 1891. An average representative of this elusive issue grades fractionally shy of AU50, while examples finer than this piece here are rarely offered.

Full centers are visible on all but stars 1 and 2, and Liberty's hair strands are similarly well-detailed. The faintest trace of friction on the cheek, hair bun, and the eagle's head and wingtips accounts for the grade. Each side is light butter-gold with considerable luster remaining throughout the reverse. Small, wispy abrasions and a few bagmarks are of little import. NGC ID# 26BN, PCGS# 9004

1889-CC Twenty Dollar, AU50
Famous Date-Mintmark Combination

4074 1889-CC AU50 NGC. CAC. Variety 1-A. The resumption of coining operations at the Nevada branch mint resulted in the production of 30,945 twenty dollar gold pieces in 1889. That year and mintmark combination is famed for the Morgan dollars that bear it, but these double eagles are actually many times scarcer. Traces of green and rose-gold provide color to this well-struck and briefly circulated representative. Partial luster and small marks appear over each side. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, AU53
Semireflective Fields

4075 1889-CC AU53 NGC. Variety 1-A. Although struck to the limited extent of only 30,945 pieces, the 1889-CC double eagle is collectible in AU condition due to a number of coins surviving via overseas hoards. Mint State examples are yet scarce. This piece displays traditional yellow-gold patina and semiprooflike fields. The sharp design elements show little evidence of wear, and the surfaces are generally smooth. NGC ID# 26BV, PCGS# 9011

1889-CC Twenty Dollar, AU53
Strong for the Grade

4076 1889-CC AU53 NGC. CAC. Variety 1-A. Housed in a previous generation holder with CAC endorsement, this still-lustrous 1889-CC displays sharp definition at the borders and remarkably few abrasions for the assigned grade — both characteristics that are often lacking for the issue. Attractive orange-gold surfaces retain much of their original luster. Just 30,945 pieces were struck in the resumption of minting operations at the Carson City Mint in 1889. CAC: 9 in 53, 42 finer (1/17). NGC ID# 26BV, PCGS# 9011

1890-CC Twenty Dollar, AU50
Lapped Reverse Die State

- 4077 1890-CC AU50 PCGS. CAC. Variety 1-A. The usual later die state, with the eagle's tailfeathers partially effaced on the right side by die lapping. This About Uncirculated 1890-CC double eagle displays an excellent strike and retains partial luster in the fields. The typically seen light chatter appears over each side amid olive-gold patina. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, Choice AU
Collectible Nevada Type

- 4078 1890-CC AU55 PCGS. Variety 1-A. Centered mintmark. Central definition is strong, while stars 11 to 13 are moderately incomplete. Orange-gold color dominates each side, yielding accents of reddish patina mainly around the reverse. Partial luster gleams from the design recesses, and myriad wispy abrasions appear throughout. The 1890-CC is a relatively collectible Carson City emission with a mintage of 91,209 coins. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU55
Undeniably Original

- 4079 1890-CC AU55 NGC. CAC. Variety 1-A, with the mintmark centered between T and D. This is a later die state with lapped tailfeathers. Khaki-gold surfaces glitter with a surprising amount of mint frost for the grade. Each side showcases well-defined devices and lightly scattered marks in accordance with the grade. A singular tick occurs on Liberty's nose. Undeniably original. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, Lustrous AU58

- 4080 1890-CC AU58 PCGS. Variety 1-A. The usual late die state, showing lapped tailfeathers on the eagle. This near-Mint 1890-CC double eagle displays sharp detail and mostly full mint luster with original green-gold coloration. Light, scattered abrasions accompany the grade. Finer 1890-CC twenties are elusive and out of reach for many collectors. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, Green-Gold AU58

- 4081 1890-CC AU58 NGC. Variety 1-A. A late die stage with lapped tailfeathers. This greenish-gold Carson City twenty dollar was among 91,209 examples struck. Definition is good with minor blending on the hair bun, stars 12 and 13, and the wingtips. A horizontal linear depression under the left (facing) wing and grease stains near the OF and the rightmost rays do not overly detract. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, AU58
Thoroughly Lustrous

- 4082 1890-CC AU58 NGC. CAC. Variety 1-A. A late die state example, showing the eagle's tailfeathers partially effaced by die lapping. This nearly Uncirculated 1890-CC double eagle displays frosty wheat-gold luster and a sharp strike. Olive-colored patina over the slightly worn high-points of the portrait attests to the originality of the surfaces. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Twenty, MS61
Excellent Type Three Example

4083 1890-CC MS61 NGC. Variety 1-A. The 1890-CC Liberty double eagle claims a mintage of 91,209 pieces, a large production total in the context of the series. Although few examples were saved for numismatic purposes, a number of coins were used to settle accounts in foreign trade and later repatriated. A significant number were found in European holdings as late as the 1990s. Its relative availability in high grade makes the 1890-CC a favorite choice of branch mint type collectors.

The present coin is an attractive Mint State specimen, with sharp definition on the obverse devices. The reverse design elements were strongly impressed, but some definition was lost in the tail feathers, due to lapping. A few short marks on Liberty's cheek and chin probably account for the grade, as the lustrous orange-gold surfaces are lightly marked in other areas. Census: 91 in 61 (1 in 61+), 59 finer (1/17). NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, MS61
Semiprooflike Fields

4084 1890-CC MS61 PCGS. Variety 1-A. This early die state shows the eagle's tailfeathers complete. Later strikings from this die pair exhibit lapping on the reverse that partially effaces the tailfeathers. This 1890-CC double eagle displays a bold, even strike with semireflective fields and bright yellow-gold patina. Scattered light marks in the fields limit the grade, but there are no individually significant abrasions as are seen on most other coins in this grade. There is no trace of rub, just light chatter on Liberty's cheek. The 1890-CC twenty is seldom seen this attractive in MS61. The date as a whole is scarce in Mint State, and coins grading finer than MS62 are very rare. NGC ID# 26BY, PCGS# 9014

1891-CC Liberty Twenty, AU55
Low-Mintage Branch Mint Issue

4085 1891-CC AU55 NGC. **Variety 1-A.** The 1891-CC Liberty double eagle claims the second-lowest mintage of the Carson City series, at a meager 5,000 pieces. Accordingly, the 1891-CC is an elusive issue, with most examples seen in the XF-lower AU grade range. In the second edition of his *Type Three Double Eagles*, Mike Fuljenz notes the 1891-CC has actually become even more difficult to locate over the last decade than it was previously.

The present coin is a pleasing Choice AU specimen, with sharply detailed central design elements that show just a trace of wear on the high points. The lustrous orange-gold surfaces exhibit the expected number of minor surface marks, with a few hints of prooflike reflectivity in sheltered areas. Altogether, a most attractive representative of this popular low-mintage issue. NGC ID# 26C3, PCGS# 9017

1892-CC Double Eagle, AU58
Reflective Fields

4086 1892-CC AU58 NGC. **Variety 1-A.** Struck from early state dies, showing semiprooflike reflectivity in the fields. Each side is brilliant yellow-gold with a vibrant cartwheel effect. High-point friction is difficult to discern, although scattered abrasions accompany the grade. Eye appeal surpasses expectations for the grade. NGC ID# 26C6, PCGS# 9020

1893-CC Twenty Dollar, AU55
Appealing Final-Year Carson City Coin

4087 1893-CC AU55 NGC. **CAC. Variety 1-A.** Luster remains in the fields beneath original green-gold patina, illuminating well-struck design elements. Light, scattered abrasions accompany trivial high-point wear. The 1893-CC is the final date in the Carson City short set. In years past, this issue was rare in high grade, although modern-day collectors benefit from foreign trade coins that have returned to the United States in recent decades. NGC ID# 26C9, PCGS# 9023

1893-CC Liberty Double Eagle, AU58
Final-Date Branch Mint Type Coin

4088 1893-CC AU58 PCGS. CAC. Variety 2-A. The 1893-CC Liberty double eagle was a well-made issue, from a small mintage of 18,402 pieces. Thankfully, the 1893-CC has a relatively high survival rate for a Carson City issue, especially in high grade. In addition to its high-grade availability, the 1893-CC was the last twenty dollar gold piece struck at the Carson City Mint, both important considerations for type purposes.

The present coin is an impressive near-Mint specimen, with well-detailed design elements that show just a trace of high-point wear. The vivid orange and rose-gold surfaces are lightly abraded, with the expected number of minor surface marks on both sides. Vibrant, frosty mint luster adds to the attractive overall presentation. NGC ID# 26C9, PCGS# 9023

1895-S Twenty Dollar, MS64+
Very Rare in Higher Grades

4089 1895-S MS64+ PCGS. CAC. Examples of the 1895-S are very scarce but accessible through MS64. Anything finer is truly rare. A pinpoint impression includes full centers and radials on the stars, crisply delineated hair strands and curls, and boldly detailed feathers. Smooth, yellow and rose-gold surfaces radiate glimmering frost. There are merely nine finer submissions at PCGS and a single coin finer with CAC approval (1/17). NGC ID# 26CE, PCGS# 9028

1896 Double Eagle, Radiant MS64+

4090 1896 MS64+ PCGS. This fantastic MS64+ double eagle is impressive for its smooth surfaces, swirling frost, and the radiant shades of orange, green, and rose-gold that adorn each side. The motifs showcase complete detail, and the sole overt imperfection is a bagmark in the field above the eagle's right (facing) wing. Very rare in better condition, with PCGS having seen merely seven finer submissions (1/17). NGC ID# 26CF, PCGS# 9029

1900 Liberty Double Eagle, MS65+

4091 1900 MS65+ PCGS. A delightful Plus-graded Gem representative of this popular turn-of-the-century date, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate especially vibrant mint luster on both sides. Overall eye appeal is outstanding. From a mintage of 1.8 million pieces, PCGS has graded only two numerically finer examples (1/17). NGC ID# 26CP, PCGS# 9037

**1901-S Twenty Dollar, MS64
Nearly Impossible to Upgrade**

- 4092 1901-S MS64 PCGS.** From a mintage that approaches 1.6 million double eagles, the 1901-S is available for a minimal premium in lower circulated grades. Select Uncirculated coins are scarce but collectible, while Choice representatives are exceedingly elusive and nearly impossible to upgrade. Well-defined, radiant orange-gold surfaces house boldly rendered design elements. Parallel die striations are more prominent on the reverse than the obverse. PCGS has only seen two finer submissions (1/17). NGC ID# 26CT, PCGS# 9040

**1901-S Twenty, MS63 Prooflike
Reflective 20th Century Type Coin**

- 4093 1901-S MS63 Prooflike NGC.** This is a boldly struck example with reflective fields and bright yellow-gold color. Abrasions are minimal for the grade and are mostly insignificant in size. NGC has graded only two dozen 1901-S double eagles as Prooflike, this piece being tied with one other for the finest (12/16). NGC ID# 26CT, PCGS# 79040

**1902 Liberty Twenty, MS62
Low Five-Figure Mintage**

- 4094 1902 MS62 PCGS. CAC.** The 1902 boasts a remarkably low mintage of only 31,140 coins, making it one of the keys to the 20th century portion of the series. This CAC-endorsed MS62 coin displays sharp detail and satiny yellow-gold mint luster. Grade-limiting abrasions are small and scattered. Finer 1902 twenties will be difficult to acquire on a budget. NGC ID# 26CU, PCGS# 9041

**1903 Double Eagle, MS65+
Three Higher-Graded Coins at PCGS**

- 4095 1903 MS65+ PCGS. CAC.** This dazzling high-end Gem is at the absolute upper limit of quality for the grade. A loupe reveals a few minuscule ticks on the cheek, but not much else. The fields are smooth, and radiant mint frost cascades over the reddish-gold surfaces. Full design detail is evident throughout. There are three finer coins at PCGS (1/17). NGC ID# 26CW, PCGS# 9043

PROOF LIBERTY DOUBLE EAGLES

1892 Double Eagle, PR65 Deep Cameo
Starkly Contrasted, Only Two Finer at PCGS

4096 1892 PR65 Deep Cameo PCGS. CAC. The 1892 double eagle is a rarity in both business-strike and proof format. Many of the Philadelphia Mint twenties from the 1880s and early 1890s were low-mintage issues, some of them fabulous rarities with memorably low production figures, such as the 1882 and 1885, at 571 and 751 business strikes, respectively. The emission of the 1892 business strikes was a meager 4,430 pieces, an effect of Treasury policy implemented in 1882 aimed at increasing the circulation of lower-denomination half eagles and eagles. The 1892 business strikes saw a complement of 93 recorded proofs, but it is a good bet that many were melted as unsold at year-end, a common Mint practice of the day. The experts at PCGS estimate that perhaps 24 to 28 coins survive today, a figure that aligns with the paucity of our auction offerings of this date, particularly with the Ultra Cameo or Deep Cameo designation.

That brings us to the present coin, an amazingly deep-contrasted proof with profoundly “black” fields and thickly frosted devices. The surfaces are fully struck throughout and demonstrate under a loupe the faint orange-peel effect often seen on proof gold of the era. The only mentionable pedigree markers are a couple of small, curved lint marks, one one to the upper right of the 2 in the date and the other below star 13. Population: 4 in 65 Deep Cameo, 2 finer. CAC: 3 in 65, 2 finer (1/17).

Ex: *Chicago Signature* (Heritage, 8/2011), lot 7671. NGC ID# 26ED, PCGS# 99108

Rare 1904 Proof Double Eagle Near-Mint Condition

- 4097 1904 PR58 PCGS.** Light chatter in the mirrored fields on both sides of this gleaming, medium-gold Liberty twenty suggest a brief time in circulation, or possibly careless handling, before the coin was quickly rescued and put aside with proper care. Only 98 proofs were struck of the 1904 double eagle, a select and tiny group compared to the large 6.2-million mintage of circulation strikes. PCGS estimates a mere 55 to 65 proofs survive in all grades. The 1904 is always desirable in proof format with strong demand regardless of the numeric grade. Population: 5 in 58, 43 finer (1/17). NGC ID# 34UF, PCGS# 9120

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Twenty, VF35 Obviously Carried Many Years as a Pocket Piece

- 4098 1907 High Relief, Wire Rim VF35 PCGS.** Only when viewing a moderately worn example of the Saint-Gaudens High Relief twenty can one appreciate the depth of the medallion design — as well as why the original dies were deemed unworkable for mass production. This VF35 representative is smoothly worn but retains its partial wire rim. Likely a pocket piece for much of its time “in circulation,” the smoothly worn surfaces have acquired the stream-polished look of an alluvial gold nugget, with glossy-gold fields and deeper orange accents in the crevices of the design. This is a seldom-seen Choice VF example, one of just 20 so-graded pieces at PCGS (12/16). NGC ID# 26F2, PCGS# 9135

1907 Wire Rim Double Eagle, Unc Details

- 4099 1907 High Relief, Wire Rim — Cleaning — Genuine PCGS. Unc Details.** Charles Barber's career was focused on mechanical efficiency in the production of U.S. coinage. Saint-Gaudens behaved as if he would live forever, sometimes taking 10 or more years on a single monumental commission. The tension between these two men and their approach toward the production of the magnificent High Relief twenties gives us the stuff of great storytelling. The High Relief twenties, as we know them today, were only possible because of the personal intervention by President Theodore Roosevelt. After the sculptor's death in early August 1907, production plans languished until the president insisted on striking the coins. The high relief that was engraved by Saint-Gaudens has endeared these coins to collectors ever since, and has established them as the most beautiful design ever struck. This example has an overall thinning of the mint luster, but shows only the slightest evidence of hairlines. Each side is remarkably free from any obvious contact marks.

1907 Roman Numerals Twenty, MS61
High Relief, Wire Rim

4100 1907 High Relief, Wire Rim MS61 PCGS. High Relief twenties were set aside by almost everyone who was fortunate enough to encounter them in 1907-1908. Very few were released into circulation. Many of the ones that grade AU or less were obviously carried as pocket pieces. However, a few were circulated, a few were handled or came into contact with other coins. This is an example of the latter. There are a few tiny abrasions scattered across each side that indicate coin-to-coin contact; otherwise, the surfaces display the usual thick mint luster and three-dimensional effect of the devices clearly separated from the surrounding fields. The wire rim (a.k.a. a "fin" in Mint parlance) is almost complete around the obverse. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty Dollar, MS61
Upper-End for the Grade With CAC Sticker

4101 1907 High Relief, Wire Rim MS61 NGC. CAC. In discussing the earlier works of Augustus Saint-Gaudens, biographer Burke Wilkinson wrote of the widespread critical success of the sculptor's first monumental work, *The Farragut*: "His bas-reliefs were in effect his short stories. Now he had written an epic." The same could be said of his earliest work on cameos in his teens, and his work decades later on the twenty dollar gold coins of 1907. Like the cameos he cut in his teens these pieces established the practice of working in a small area and in high relief, a discipline that would be necessary to produce High Relief double eagles. The three-dimensionality of the double eagles is similar to that on his cameos from the 1860s, giving each a lifelike quality. The surfaces on this piece are unusually clean for the grade (thus the CAC sticker) and the strike is boldly brought up in all areas. Each side is yellow-gold with just a hint of reddish patina. NGC ID# 26F2, PCGS# 9135

1907 High Relief Flat Rim Twenty, MS63
Bright, Satiny Mint Luster

- 4102** 1907 High Relief, Flat Rim, MS63 PCGS. The Flat Rim variant of the High Relief twenty is four or five times scarcer than its so-called Wire Rim counterpart. The Wire Rim was created by what is known by Mint personnel as “finning”; that is, extruded metal that squeezed through the separation between the die faces and collar. After being brought to Mint personnel’s attention early in the striking process — and then either being ignored or forgotten — Mint Director Leach was much more pointed in his insistence that the coins be struck in such a way as to eliminate this “flaw.” It was never completely eliminated, but finning was minimized. This particular piece shows no visible fin on the obverse, and just the slightest bit on the reverse. Otherwise, the surfaces are bright and lustrous with a rich reddish patina over the satiny mint luster that covers each side. NGC ID# 26F2, PCGS# 9136

1907 Flat Rim High Relief Twenty, MS65+
Almost Completely Devoid of ‘Finning’

- 4103** 1907 High Relief, Flat Rim, MS65+ NGC. The great Existentialist philosopher Albert Camus commented in *The Rebel* (1951) that the purpose of sculpture is to restore in three dimensions “the unity of great style to the general disorder of gestures.” He went on to explain: “What it is looking for, in its periods of greatness, is the gesture, the expression, or the empty stare which will sum up all the gestures and all the stares in the world.” This is certainly what we find in Augustus Saint-Gaudens’ figure of Liberty taken from the Sherman monument. Unlike the lifelike and highly personalized representation of General Sherman, the figure of Liberty is a combination of the features of three different models. None is dominant and no particular gesture or expression is seen on Liberty’s face. Rather, as Camus wrote, it is the “empty stare” that Saint-Gaudens has brought forth. The same empty stare was later transferred to the bust of Liberty seen on his ten dollar gold piece and the reproduction of the Sherman Liberty seen on the High Relief twenty dollar. When struck in high relief, as seen on the first production run of the Saint-Gaudens double eagles, the effect is one of startling reality. Even though Liberty has an “empty stare,” it is clear that the figure is confidently striding forward into the future. This is a magnificent Gem that displays bright, sparkling mint luster and golden-yellow surfaces that are virtually free from contact marks (certainly none are visible to the unaided eye). Adjustments were made in the Mint in late 1907 to reduce the “finning” seen on the earlier versions of the High Relief. Their efforts certainly paid off when this piece was struck as the rims are almost completely flat around the margins on each side. NGC ID# 26F2, PCGS# 9136

SAINT-GAUDENS DOUBLE EAGLES

1908-S Double Eagle, MS62
Only 22,000 Pieces Struck

- 4104 1908-S MS62 PCGS.** The scarcity of the 1908-S Saint-Gaudens double eagle stems from its low mintage of only 22,000 pieces. No double eagles were struck at the San Francisco Mint prior to the addition of IN GOD WE TRUST to the reverse, meaning that collectors will require the acquisition of a 1908-S With Motto coin. For those assembling Mint State date sets, this will be a feat. The present coin is Uncirculated, and abrasions are at a minimum for the grade. The strike is well-executed, and each side displays satiny orange-gold luster. Due to the high cost of finer examples, this piece will fit in well with most Saint-Gaudens double eagles collections. NGC ID# 26FA, PCGS# 9149

1911 Saint-Gaudens Twenty, MS64+
Scarce in Finer Grades

- 4105 1911 MS64+ NGC. CAC.** This high-end Choice example offers original wheat-gold luster that glows in the fields and appears satiny over the high points of the obverse figure. Abrasions are minimal, and eye appeal is excellent considering the scarcity of this date in finer condition. A single small speck above the date serves as a pedigree marker. NGC ID# 26FK, PCGS# 9157

1914-D Twenty Dollar, MS66
Only One Coin Finer at PCGS

- 4106 1914-D MS66 PCGS.** Frosty peach-gold patina flashes bright mint luster across both sides of this smooth and appealing Denver twenty. Scattered tiny marks are revealed with a glass, yet they are easily outranked by the considerable eye appeal of the Premium Gem surfaces. Sharply struck as expected for the issue, although the coin lacks completeness on the Capitol building and the eagle's talon. Population: 73 in 66 (2 in 66+), 1 finer (1/17). NGC ID# 26FT, PCGS# 9165

1915 Saint-Gaudens Twenty, MS64+
Fully Struck

- 4107 1915 MS64+ PCGS.** A full strike is undoubtedly the defining quality of this spectacular near-Gem twenty with straw-gold coloration. The surfaces display phenomenal preservation with the absolute minimum number of marks for the grade. Glowing luster issues from each side. A couple of tiny coppery alloy spots occur in the right obverse field. The 1915 is a rarity in finer condition. NGC ID# 26FV, PCGS# 9167

1921 Saint-Gaudens Double Eagle, MS62

Important Series Key

Seldom Seen in High Grade

4108 1921 MS62 PCGS. The 1921 Saint-Gaudens double eagle is a rare issue in all grades and it ranks as the premier condition rarity of the series. Only four business-strike examples have been certified in Gem or better condition, making the 1921 less available in high grade than such acknowledged rarities as the 1927-D and the famous Ultra High Relief. Even MS64 specimens are great rarities and MS62 through MS63 coins are seldom encountered. The 1921 is one of the few dates of the series that is actually seen more often in circulated grades than Mint State.

No double eagles were struck at any U.S. mint in 1921 until November 25. Collectors trying to obtain an example during most of the year were told that none had been struck and there were no plans to strike twenty dollar coins that year. In late-November, it was deemed necessary to strike a small mintage of 90,000 double eagles at the Philadelphia Mint to serve as currency reserves for gold certificates that the government had issued. A larger mintage was achieved in December, bringing the yearly total to a respectable 528,500 pieces. However, these coins were strictly intended to serve as currency reserves, and none were released into circulation. Only a few well-connected collectors were able to secure high-grade specimens of the 1921 near the time of issue. These were acquired in clandestine transactions with Mint personnel or Treasury officials, like Dr. Thomas Louis Compartment, the curator of the Mint Cabinet.

The situation was much different in the following years, and large mintages of double eagles were reported in most years of the 1920s. Eventually, a small number of 1921 double eagles was released into circulation because coins with other dates were available to serve their purpose as currency reserves. The bulk of the coins we know about today come from these later releases, and most show minor signs of circulation or extensive contact marks from rough handling during storage. Probably no more than 40-60 examples survive in all Uncirculated grades, with most examples grading no better than MS62. Many examples seen have lackluster surfaces, although the high-grade coins that are known have exceptional luster. The 1921 is usually sharply detailed, and the generally seen poor luster characteristics are most likely the result of mishandling over the years, rather than poor production values. In general, the 1921 was a well-produced issue, but finding an attractive specimen, without excessive surface marks, is one of the most difficult challenges in 20th century numismatics.

The present coin is an attractive MS62 specimen, with sharply detailed design elements and vibrant mint luster throughout. Some prominent die cracks extend through the letters in LIBERTY at the top of the obverse. The pleasing orange-gold surfaces show a few hints of red and display the minimum number of scattered, minor contact marks for the grade. The overall presentation is quite attractive for this classic gold rarity. Population: 22 in 62, 17 finer (1/17). NGC ID# 26G2, PCGS# 9172

1922-S Filing Lines Twenty Dollar, MS63
Only Two Pieces Currently Known

- 4109 1922-S Filing Lines MS63 NGC. VP-001.** This is only the second example of this unusual variety that we are aware of. The variety was first identified in January 2015 by Roger Burdette during a detailed research project for a pending Saint-Gaudens double eagle book. It took almost two years to locate a second specimen and have the variety certified by NGC. The variety shows deep parallel grooves across parts of the left obverse field next to the drapery. Deep file grooves are also boldly apparent above the letters RT of LIBERTY. The coin was made from a working die that evidently was partially defaced using a flat metal file. The file appears to have been harshly scraped across the obverse, leaving behind deep, parallel cuts in the working die. The balance of design relief is otherwise unaffected. Ninety pairs of dies were used for double eagles at San Francisco in 1922, resulting in an average of 29,500 good coins per pair. Thus, the number of pieces from a single die pair was very modest. Burdette searched through more than 300 individual coins in auctions and in-hand, but was only able to locate one example of this variety, by photograph-only. Thus, this is presently one of only two pieces known. This example is from a later die state with two die cracks evident in the word LIBERTY at the top of the obverse. The mint luster is softly frosted and the surfaces are orange-gold with a few grade-consistent abrasions. The strike is notably strong throughout. This is a rare opportunity to acquire one of the few varieties in the Saint-Gaudens double eagle series.
Ex: Internet Auction (Heritage, 9/2016), lot 23744. NGC ID# 26G4, PCGS# 9174

1924 Saint-Gaudens Twenty, MS67
Exceptional Type Coin

- 4110 1924 MS67 PCGS Secure.** The 1924 double eagle is, along with its 1928 cousin, the most widely available of the P-mint Saint-Gaudens issues in high Mint State grades. That is a trait that should actually make this Superb Gem more appealing to a wider audience rather than less, as it is the textbook definition of a classic type coin. Glorious luster radiates from each side of this piece, and the surfaces are every bit as unabraded as the grade promises. Areas of yellow-gold and orange-gold compete for viewer attention with small accents of deeper lilac color. Population: 98 in 67 (2 in 67+), 1 finer (1/17). NGC ID# 26G7, PCGS# 9177

1924-S Saint-Gaudens Double Eagle, MS65
Only One Numerically Finer at NGC

4111 1924-S MS65 NGC. From a large mintage of 2.9 million pieces, the 1924-S Saint-Gaudens double eagle was one of the most challenging issues of the series in the 1940s, when collecting twenty dollar gold pieces first became popular in this country. It seems that most of the mintage was held in government stockpiles until the Gold Recall of 1933, and subsequently melted and stored as gold bars at the Fort Knox Bullion Repository. Roger W. Burdette discovered about 250,000 coins were distributed to Federal Reserve Banks, but far fewer actually reached circulation in this country. Some coins were used in foreign trade, and a number have surfaced in European and Latin American holdings over the years. Most of those coins are heavily bag marked, however, and the 1924-S remains a rare issue in MS65 condition.

The present coin is a delightful Gem, with well-detailed design elements and well-preserved yellow and rose-gold surfaces that show only minor signs of contact. Vibrant mint luster radiates from both sides and eye appeal is outstanding. Census: 20 in 65 (1 in 65+), 1 finer (12/16). NGC ID# 26G9, PCGS# 9179

1925-S Double Eagle, MS62
Challenging Series Melt Rarity

4112 1925-S MS62 PCGS. Although smaller denomination coinage quickly entered West Coast commerce in the 1920s, most of the double eagle production went into storage at the Treasury only to be melted during the 1933 Gold Recall. The small number of pieces released into circulation make up the bulk of survivors, with Uncirculated pieces scarce-to-rare in all grades. This is a pleasing Mint State representative with rich-gold color and strong frosted luster. An up-and-down strike shows sharpness on the main elements, with some peripheral weakness at the Capitol dome and at UNITED on the reverse. Population: 74 in 62, 121 finer (12/16). NGC ID# 26GC, PCGS# 9182

**1926-D Saint-Gaudens Twenty, AU58
Elusive Branch Mint Issue**

- 4113 1926-D AU58 PCGS.** Despite the adequate mintage of 481,000 pieces, the 1926-D Saint-Gaudens double eagle was considered one of the rarest coins of the series in the 1940s. Most of the mintage was held in Mint or Treasury vaults as currency reserves and never released into circulation. Ultimately, the coins in government custody were melted after the Gold Recall of 1933, and stored as gold bars in the Fort Knox Bullion Repository. Fortunately, a small number of 1926-D twenties was exported to European destinations to settle accounts in foreign trade. These refugees were repatriated in later years, making the 1926-S somewhat more available than it was in the '40s. No large number of coins ever surfaced, however, and Roger W. Burdette estimates the surviving population at 600 examples in all grades today.

This attractive near-Mint specimen exhibits well-detailed design elements, with just a trace of friction on the high points of the devices. The pleasing orange-gold surfaces show only minor abrasions and retain almost all of their original mint luster. Eye appeal is outstanding. NGC ID# 26GE, PCGS# 9184

**1926-S Twenty Dollar, MS64+
Outstanding Luster and Coloration**

- 4114 1926-S MS64+ PCGS.** Glowing mint luster gives this high-end near-Gem top-quality strong visual appeal, while the lack of abrasions further contributes to its aesthetic merit. Rich yellow, peach, rose, and mint-gold hues appear over each side. The central devices are sharply struck, but the rims are not fully defined. PCGS has seen only 42 finer submissions (1/17), making this piece among the best typically within reach of the average double eagle collector. NGC ID# 26GF, PCGS# 9185

COMMEMORATIVE SILVER

**1893 Isabella Quarter, Toned PR64
Deeply Reflective Fields**

- 4115 1893 Isabella Quarter PR64 NGC.** Only 104 proofs were struck of the Isabella quarter. Unquestionable proofs, and high-grade ones especially are scarce. NGC has only certified 18 PR64 examples with 11 pieces finer. One of the features that distinguishes proof coins from prooflike strikes is the mirrored triangular field to the left of the staff on the reverse. The mirrored fields considerably brighten the medium density blue-gray patina that covers each side.
Ex: PNG New York Invitational (Heritage, 10/2014), lot 5141. NGC ID# BYMM, PCGS# 9221

**1922 With Star Grant Half Dollar
Toned Premium Gem**

- 4116 1922 Grant With Star MS66 PCGS.** This is the scarcer With Star variety, seldom seen in MS66 and rare any finer. The coin displays satiny luster that is devoid of severe abrasions. Champagne-gold toning appears over much of each side, with deeper olive and russet hues near the borders. Slight strike weakness is seen on the high point of Grant's hair, as usual. Population: 47 in 66 (7 in 66+), 5 finer (12/16). NGC ID# BYPP, PCGS# 9307

1921 Missouri Centennial Half, MS66
No Numerically Finer Examples at PCGS

- 4117** 1921 Missouri MS66 PCGS. Brimming with mint luster and sharply struck, this Premium Gem Missouri Centennial half dollar ranks high among the finest examples at PCGS. Olive-gold toning joins grayish-brown accents around the raised devices with plenty of silver flash streaming through the original patina. Seldom seen with sharply struck centers, this “plain field” variety offers a likely upgrade for even the finest classic commemorative set. Population: 54 in 66 (2 in 66+), 0 finer (12/16). NGC ID# BYH2, PCGS# 9330

1921 Missouri 2x4 Half, Lustrous MS66
Lightly Toned, Attractive Border Accents

- 4118** 1921 Missouri 2x4 MS66 PCGS. Pale-blue and gold toning accents meld into deeper shades at the outermost borders of this sharply struck and lustrous Premium Gem Missouri Centennial half. It is the somewhat scarcer 2x4 variety, although both the plain and the 2x4 pieces are equally challenging in high Uncirculated grades. Neither service reports a numerically finer example than this naturally patinated MS66. Population: 40 in 66 (1 in 66+), 0 finer (1/17). NGC ID# 2FE9, PCGS# 9331

1938 New Rochelle, New York Half Dollar, SP66+
Brilliant and Well-Preserved Specimen Strike

- 4119** 1938 New Rochelle, Specimen Finish, SP66+ PCGS. CAC. Reportedly, a total of 50 “presentation” strikes (now called Specimen strikes by both PCGS and NGC) were produced for distribution to members of the Coinage Committee, the Westchester County Coin Club, and local dignitaries. Struck on proof planchets with polished dies, the pieces resemble true proofs — usually with flashy, brilliant surfaces and mirrorlike fields. Commemorating the 250th anniversary of the French Huguenots settlement at New Rochelle, New York, the Specimen coins are rare and popular among classic commemorative collectors.

This untuned and silver-mirrored example displays the expected highly reflective surfaces and razor-sharp striking definition. A glass reveals only a few faint lines that mingle with the normal striation lines from die polishing. There are no mentionable contact marks or other distractions. Plus-graded by PCGS with CAC endorsement. Population: 1 in 66 (1 in 66+), 8 finer. CAC: 3 in 66, 8 finer (1/17). NGC ID# BYN6, PCGS# 99335 Base PCGS# 9335

**1938-PDS Oregon Trail Half Dollar Set
Identical Tab-Toned Coins in MS68 ★**

- 4120 1938 Oregon PDS Set MS68 ★ NGC.** This satiny trio is about as well-matched visually and technically as is possible for a commemorative three-piece set. It includes: **1938 MS68 ★ NGC**, a fully struck and luminous Superb Gem with distinctive tab-toning in forest-green, russet-gold, and crimson hues; **1938-D MS68 ★ NGC**, visually identical to the Philadelphia coin with regards to luster and tab toning, but this piece shows slight strike weakness on the very rear of the covered wagon; **1938-S MS68 ★ NGC**, a delightfully sharp, lustrous, and tab-toned Superb Gem every bit the equal of the other two coins in this set. (Total: 3 coins) NGC ID# BYHK, PCGS# 9351

**1915-S/S Panama-Pacific Half, MS67
Exemplary Eye Appeal**

- 4121 1915-S/S Panama-Pacific, FS-502, MS67 PCGS. CAC.** Soft electric-blue, purple, and orange toning adorns the intensely lustrous surfaces of this wonderful Superb Gem. These attributes are complemented by uniformly well-struck design elements and remarkable preservation, all of which combine to yield exemplary eye appeal. PCGS reports only three numerically finer representatives (1/17).
Ex: FUN Signature (Heritage, 1/2012), lot 7427. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

**1937 Roanoke Half Dollar, MS68
Amazing Tab-Toned Color**

- 4122 1937 Roanoke MS68 PCGS. CAC.** Originality and technical quality make this a fantastic Roanoke commemorative representative. Fire-orange, crimson-red, and forest-green iridescence color the obverse border in a tab-toned pattern, while the reverse is wholly toned in lighter shades of the same. Thick, frosty mint luster swirls over this bold Superb Gem half — an attribute not overlooked by CAC in assigning their important endorsement. Neither service reports a numerically finer grading event. Population: 20 in 68 (1 in 68+), 0 finer. CAC: 14 in 68, 0 finer (1/17). NGC ID# BYHW, PCGS# 9367

**1927 Vermont Half Dollar, MS67
Nearly Uncollectible Finer**

- 4123 1927 Vermont MS67 PCGS. CAC.** Most Vermont Sesquicentennial half dollars survive in the MS63 to MS65 grade range. This CAC-endorsed Superb Gem is conditionally scarce, and finer coins are extremely rare. The strike is sharp, and each side offers pleasant, satiny luster. Tinges of olive-gold accent otherwise silver-gray surfaces. Population: 52 in 67 (2 in 67+), 1 finer. CAC: 14 in 67, 0 finer (1/17). NGC ID# BYJR, PCGS# 9401

COMMEMORATIVE GOLD

**1903 McKinley Gold Dollar, MS67+
Just Two Finer at PCGS**

- 4124 1903 Louisiana Purchase, McKinley Gold Dollar MS67+ PCGS.** The obverse displays frosty yellow-gold luster with green highlights across gleaming, sharply struck surfaces. A tiny rim nick at 9 o'clock is the sole mark seen under a loupe. Some blending of the reverse dentils — normal for the issue — is noted, along with an interesting die crack from the edge between S and T of ST. LOUIS that branches north and west with a small retained cud. A dot of red toning at OF from the copper alloy pedigrees this attractive, high-end Superb Gem. Population: 5 in 67+, 2 finer (1/17). NGC ID# BYLE, PCGS# 7444

**1905 Lewis and Clark Gold Dollar, MS65+
Seemingly Pristine, Lemon-Gold Example**

- 4125** 1905 Lewis and Clark Gold Dollar MS65+ PCGS. CAC. The Mint distributed 10,000 Lewis and Clark gold dollars in 1905 (plus 41 coins for assaying), as it had in 1904, to commemorate the 100th anniversary of that famous expedition. The 1905 coins are scarcer than their earlier-dated counterparts in Gem condition. This frosty, lemon-gold representative offers strong strike detail, save for marginal weakness at the left border on each side. There are no marks to report. NGC ID# BYLG, PCGS# 7448

**1905 Lewis and Clark Gold Dollar, MS66+
Seldom Seen in This High Grade**

- 4126** 1905 Lewis and Clark Gold Dollar MS66+ NGC. Struck in both 1904 and 1905, the Lewis and Clark gold dollar saw only a small percentage of its authorized mintage produced, and most of those coins did not sell. Just 10,041 pieces of the 1905 issue were distributed as the scarcer of the two dates in terms of survivors. This is a high-end Premium Gem example, lustrous and immaculately preserved with a sharp strike. Some stippled die erosion at the margins does not distract from the outstanding eye appeal. Census: 4 in 66+, 1 in 66★, 3 finer (1/17). NGC ID# BYLG, PCGS# 7448

**1922 Grant No Star Gold Dollar, MS68
'High Numismatic Value'**

- 4127** 1922 Grant Gold Dollar, No Star, MS68 NGC. The Grant gold dollars and silver half dollars were issued on behalf of the Ulysses S. Grant Centenary Memorial Association, and that entity selected Laura Gardin Fraser to prepare the designs. A notice appeared in the January 24, 1922 issue of *The Cincinnati Enquirer*:

There will be minted 10,000 \$1 gold pieces and 250,000 silver half dollars, the first to sell for \$2.50 each and the second for \$1 each. This fund will assure the tri-fold purposes of the association which is interested in the construction of a memorial highway from this city to the east along the Ohio River. After the minting the dies will be destroyed, thus giving the coins a high numismatic value."

This incredible Superb Gem features flawless orange-gold luster and wispy blue overtones. The design motifs are boldly defined and the surfaces are flawless. Census: 6 in 68 (1 in 68 ★), 0 finer (9/16). NGC ID# BYLN, PCGS# 7458

1922 With Star Grant Gold Dollar Dazzling MS67+ CAC

- 4128** 1922 Grant Gold Dollar, With Star, MS67+ PCGS. CAC. The With Star Grant Memorial gold dollar is a rarity in MS67 with the Plus designation. PCGS reports only four finer coins (12/16). This CAC-endorsed Registry coin displays glistening, untouched yellow-gold luster with hints of deeper peach color on the central reverse. Grant's hair is the pickup point for an unusually sharp strike. CAC: 91 in 67, 1 finer (12/16). NGC ID# BYPS, PCGS# 7459

PROOF COMMEMORATIVE GOLD

1925 Norse-American Gold Medal, PR58 One of Only 47 Pieces Sold

- 4129** 1925 Norse Gold PR58 PCGS. James Earle Fraser was commissioned to design a medal celebrating the 100th anniversary of the arrival of Norwegians on board the *Restauration*. Merely 100 gold medals were struck, and a prohibitive \$20 price tag resulted in the sale of just 47 pieces. The rest were melted. A couple of minute ticks appear on each side, but evidence of even the slightest bit of cabinet friction is imperceptible. Population: 2 in 58, 19 finer (12/16). NGC ID# 28NU, PCGS# 9452

MODERN ISSUE

1996-P High Jump Silver Dollar PR70 Deep Cameo

- 4130** 1996-P High Jump Silver Dollar PR70 Deep Cameo PCGS. Collectors of proof Olympic commemorative silver dollars will be excited by the present offering, a flawless Deep Cameo example of the 1996-P proof High Jump silver dollar, struck for the XXVI Olympiad. PCGS has seen only seven pieces this fine, and NGC counts just four (1/17). An rare Registry Set acquisition. NGC ID# 28TZ, PCGS# 9731

MODERN BULLION COINS

1990-P Half-Ounce Gold Eagle PR70 Ultra Cameo

- 4131** 1990-P Half-Ounce Gold Eagle PR70 Ultra Cameo NGC. One of the lower-mintage proof half-ounce Gold Eagles from the Roman numeral date period, struck to the extent of 51,636 pieces. This example is perfectly preserved. The strike is full, and the starkly contrasted surfaces display exceptional eye appeal with bright yellow-gold color. NGC ID# 28YC, PCGS# 9843

1993-P Half-Ounce Gold Eagle PR70 Ultra Cameo

- 4132** 1993-P Half-Ounce Gold Eagle PR70 Ultra Cameo NGC. The 1993-P half-ounce Gold Eagle proof is scarce in flawless PR70 Deep Cameo condition. This piece yields frosty, sharp design elements that melt into the seemingly infinite depth of mirroring in the fields. Bright yellow-gold color gives the coin its mint-fresh eye appeal. NGC ID# 28YE, PCGS# 9873

1995-W Silver Eagle, PR70 Ultra Cameo Proof Series Key

- 4133** 1995-W Silver Eagle PR70 Ultra Cameo NGC. Originally produced for special 10th Anniversary Bullion Program proof sets, the 1995-W Silver Eagle is now the key rarity to the series. This flawlessly preserved example displays dramatic field-device contrast and brilliant surfaces. Eye appeal excels from every angle. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR70 Deep Cameo
Low-Mintage Series Key

4134 1995-W Silver Eagle PR70 Deep Cameo PCGS. The 10th anniversary of the United States bullion coinage program was commemorated with a five-coin set of proof bullion issues struck at the West Point Mint. The set included all four gold denominations (tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50) and a one-ounce Silver Eagle. While the gold coins could be ordered individually, the 1995-W Silver Eagle could only be obtained as part of a complete set, with an issue price of \$999. This was a prohibitively high price for most collectors, who opted for a 1995-P proof Silver Eagle, which could be purchased for \$23, instead. As a result, only 30,125 commemorative sets were sold, making the 1995-W an elusive issue from the day it was struck.

This magnificent PR70 example exhibits fully detailed design elements with a rich coat of mint frost that contrasts profoundly with the deeply mirrored fields. The brilliant surfaces are impeccably preserved and eye appeal is terrific. Technically perfect Deep Cameo specimens, like the present coin, are very scarce in PCGS holders. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR70 Deep Cameo
'King of the Silver Eagles'

4135 1995-W Silver Eagle PR70 Deep Cameo PCGS. From a series-low mintage of 30,125 pieces, the 1995-W proof Silver Eagle is the sought-after key to the series. The coins were only available as part of the five-coin 10th Anniversary Set, issued with all four proof gold bullion denominations and the one-ounce Silver Eagle, which made the purchase price too high for most collectors. Rising demand for this limited-mintage issue has resulted in steadily higher prices whenever a specimen is offered.

The present coin is a technically perfect example, with fully detailed design elements that exhibit a richly frosted texture. The frosty devices contrast dramatically with the deeply mirrored fields to create an intense cameo effect, with incredible eye appeal. The 1995-W proof Silver Eagle is listed among the *100 Greatest U.S. Modern Coins*. NGC ID# CFWX, PCGS# 9887

1999 Silver Eagle, MS70
Lowest Top-Grade Population at NGC

- 4136** 1999 Silver Eagle MS70 NGC. The creation of the Silver Eagle in 1986 coincided with the surge in third-party grading and the eventual rise of Registry Sets. Today, this is one of the most popular series to put together in top grades, but flawless MS70 coins from the 1990s can be extremely difficult to locate. The 1999 is no exception. It has the lowest population at this grade level at NGC. This technically pristine representative has satiny luster and a full strike. NGC ID# 26JX, PCGS# 9947

TERRITORIAL GOLD

C. Bechtler Gold Dollar, MS61
K-4, N Reversed

- 4137** (1837-42) C. Bechtler Dollar, N Reversed, MS61 NGC. K-4, R.4. The N in ONE is punched over a previously entered, reversed N. The A's on the reverse are inverted V's. This Mint State example is struck with a rotated reverse. The strike is good except for minor softness on the left-hand rim of both sides. Semiprooflike reflectivity illuminates attractive green-gold surfaces. Abrasions are minimal. Listed on page 388 of the 2017 *Guide Book*. NGC ID# 2B98, PCGS# 10055

1851 Humbert Fifty Dollar, VF25
In a Green Label Holder
K-7, Reeded Edge, 887 Thous.

- 4138** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. VF25 PCGS. K-7, R.4. While the Humbert fifty is a well-known and scarce issue, this particular variety is among the less often seen for the issue. It is identified by the reverse style with its smaller concentric circles and outer ribbon away from the edge. The surfaces are typically abraded for a circulated coin of this size and weight, especially near the borders. Moderate wear is likewise noted, along with pebbly central obverse surfaces from a rusted die. The green-gold surfaces show a slight degree of reddish patina near some of the obverse devices. This piece is housed in a green label PCGS holder. Listed on page 392 of the 2017 *Guide Book*. Ex: *Denver Signature* (Heritage, 8/2006), lot 5771. NGC ID# ANH9, PCGS# 10214

1852 Humbert Ten Dollar, XF45
K-10, Partial Mint Luster

- 4139** 1852 Humbert Ten Dollar XF45 ANACS. K-10, Low R.4. The U.S. Assay Office, nominally led by assayer Augustus Humbert, was only allowed to strike fifty dollar octagonal "slugs" during its first two years of operation. In 1852, permission was finally received from the Federal government to produce ten and twenty dollar pieces, which were sorely needed in the coin-deprived Gold Rush economy. K-10 is the most available of the four ten dollar die varieties made that year. This is a relatively early die state without advanced crumbling on UNITED. The green-gold surfaces are lightly abraded but show minor smoothing on the field above the eagle's head. Listed on page 393 of the 2017 *Guide Book*. NGC ID# ANGG, PCGS# 10187

1853 Assay Office Twenty, K-18, MS63
Struck Under Curtis, Perry, and Ward
Seldom Seen This Fine

- 4140** 1853 Assay Office Twenty Dollar, 900 Thous. MS63 PCGS. CAC. K-18, R.2. This double eagle predecessor was issued in large quantities under contract with the private firm Curtis, Perry, and Ward, which operated the U.S. Assay Office after the retirement of Moffat in early 1852. Nonetheless, most examples were either lost to attrition or ended up being deposited as bullion at the San Francisco Mint when it became operational in 1854. Most survivors are circulated and show heavy abrasions. Uncirculated pieces are scarce, and rarely is a coin seen finer than MS62. This Select representative displays bright, radiant cartwheel luster and remarkably clean fields. The strike is sharp, and eye appeal is proportionately strong. Finer examples of K-18 are exceedingly rare. NGC ID# ANHD, PCGS# 10013

1849 Mormon Five Dollar, AU55
Partially Lustrous K-2 Representative

- 4141** 1849 Mormon Five Dollar AU55 NGC. K-2, R.5. Struck in Salt Lake City, Utah, under the authority of the Mormon Church, the 1849 Mormon five dollar gold piece is scarce in all grades and is rarely seen above the VF level. The best examples certified grade MS61, and only a half dozen Uncirculated pieces are reported. This Choice AU example displays an even strike and good detail with pleasantly smooth surfaces. Moderate, satiny luster remains in the fields amid medium straw-gold patina. A vertical mark between the final S in HOLINESS and the T in TO is the only singular abrasion. An appealing and rare territorial gold issue. Listed on page 404 of the 2017 *Guide Book*. Census: 8 in 55, 13 finer (12/16). NGC ID# 2BCE, PCGS# 10262

1861 Clark, Gruber Ten Dollar, K-7, AU58
Colorado Territorial

- 4142** 1861 Clark, Gruber & Co. Ten Dollar AU58 NGC. K-7, R.4. Small strikes of gold in Colorado are recorded as early as 1849 — the year of the California Gold Rush — and 1850, both panned from the South Platte River mostly by gold-seekers who forged ahead to California, unimpressed by the small Colorado nuggets.

But rumors of gold persisted.

Other parties of potential gold miners, both whites and Indians, led sporadic expeditions to the Rocky Mountains area, one in what is today the Overland Park area of Denver. Another party headed by William Greeneberry Russell in 1858 struck a placer alluvial deposit in Little Dry Creek (present-day Englewood) that yielded about 20 ounces of gold, the first significant discovery recorded for the region.

And another gold rush was under way. Pike's Peak was a mountain near Denver named for Zebulon Pike, who in 1806 led a U.S. Army expedition to the eastern slopes of the Rocky Mountains to map the area, at the time subject of a territorial dispute with Spain. "Pike's Peak or Bust" became the motto for perhaps 100,000 fortune-seekers who invaded the region over the next three years.

While the 1860 Clark, Gruber ten dollar pieces depicted an absurdly unrealistic version of Pike's Peak, the 1861 ten dollar pieces appeared much like the Liberty Head federal gold coins of the era, with PIKES PEAK on the coronet.

This example appears to be a late die state, with die cracks evident in addition to those specifically described by Don Kagan in his reference. The surfaces have nearly full luster with vivid green-gold color, although the overall appearance is a bit muted. Listed on page 406 of the 2017 *Guide Book*.

Ex: Central States Signature (Heritage, 4/2006), lot 4768; ANA Signature (Heritage, 7-8/2008), lot 1840. NGC ID# ANK4, PCGS# 10141

PATTERNS

1827 Copper Quarter, PR65 Brown
Judd-48, Only Five Pieces Known

- 4143** 1827 Quarter Dollar, Judd-48, Pollock-49, High R.7, PR65 Brown PCGS. CAC. Ex: Woodin. Struck from the same dies as the restrike 1827 Capped Bust quarter with a square base 2 in the denomination. Struck in copper with a reeded edge. It is believed (as related in USPatterns.com) that these copper pieces, as well as their silver counterparts, were struck in the 1870s. The first auction appearance of a copper piece was in a Haseltine sale in February 1877. The fields are moderately reflective and the devices are sharply struck. The surfaces are undeniably copper, not silver-plated as is one of the five known examples. Of course, heavy die rust is scattered over each side.

Ex: 1914 ANS Exhibit, William Woodin, exhibitor. PCGS# 11170

1868 Five Cent Pattern in Nickel
Judd-633, PR66 Deep Cameo

- 4144** 1868 Five Cents, Judd-633, Pollock-705, R.4, PR66 Deep Cameo PCGS. CAC. The obverse is a larger variant of the three cent nickel design, while the reverse has a large V in the center surrounded by a laurel wreath and a small Maltese cross at the top. IN GOD WE TRUST is on a ribbon around the cross. Struck in nickel with a plain edge. The "high date" Pollock variant of this pattern, was an attempt by the mint to achieve design conformity among the two copper-nickel denominations. This untoned Gem is boldly struck and possesses outstanding white-on-black Deep Cameo contrast. Essentially perfect aside from a faint handling mark on the central reverse. PCGS# 960851

1868 Longacre Ten Dollar in Copper
Judd-662, PR64 Brown
Low Date Variant

- 4145** 1868 Ten Dollar, Judd-662, Pollock-735, Low R.7, PR64 Brown NGC. The obverse features a left facing bust of Liberty by James Barton Longacre. Thirteen stars are arranged around the border, and the date is below. An eagle with outstretched wings dominates the reverse design. The motto IN GOD WE TRUST is on a scroll in the upper field, the legend and the denomination are near the periphery. Struck in copper with a reeded edge. This specimen mixes die striations with wispy hairlines and is a light reddish-brown color with occasional mint-green accents. Ex: Long Beach Signature (Heritage, 6/2005), lot 7414. NGC ID# 29PH, PCGS# 60880

1870 William Barber Standard Silver Half
Judd-928, PR64+ Deep Cameo
Finest Certified

- 4146 1870 Standard Silver Half Dollar, Judd-928, Pollock-1033, High R.7, PR64+ Deep Cameo PCGS. CAC. William Barber's always-popular Seated Liberty design. The obverse has Liberty seated left, surrounded by 13 stars with the date below. Liberty supports a shield with her right hand, and holds an olive sprig with her left hand. The shield is inscribed with the banner LIBERTY. The reverse displays a wreath of cotton and corn. 50 CENTS is located high within the wreath, and STANDARD is centered above. Struck in silver with a plain edge. This is a magnificent example with strong contrast between the frosted devices and deeply mirrored fields. Almost brilliant, there is just the vaguest suggestion of light reddish patina on each side. PCGS# 800052 Base PCGS# 61173

1871 Standard Silver Quarter in Copper
Judd-1097, PR65+ Red Cameo

- 4147 1871 Standard Silver Quarter Dollar, Judd-1097, Pollock-1233, R.7, PR65+ Red Cameo PCGS. This Longacre design shows Liberty seated facing left on the obverse with the date 1871 below and 13 stars arranged around the border. The reverse depicts the denomination 25 CENTS within a wreath of cotton and corn. The word STANDARD is at the top rim. Struck in copper with a reeded edge. An estimated dozen copper pieces are known of this design. Rich copper-red luster enriches this boldly struck Gem. Essentially undisturbed by contact, although a few areas of cloudiness are seen on the reverse. NGC ID# 2A3Y, PCGS# 81356

1877 Morgan Half Dollar in Silver, PR63
Judd-1518, Unique in Silver

- 4148** 1877 Morgan Head Half Dollar, Judd-1518, Unique, PR63 NGC. The portrait of Liberty is virtually identical to the Morgan dollar, but lesser in scale and surrounded by a beaded circle. Similar to the issued Morgan Dollar, E PLURIBUS UNUM, stars, and the date fill the border. The reverse depicts an eagle with lowered wings perched atop an olive branch and an arrows bundle, superimposed over a shield. The shield is nestled within a laurel wreath, and IN GOD WE TRUST appears on a pleated scroll above. UNITED STATES OF AMERICA and HALF DOLLAR complete statutory legends. Struck in copper with a reeded edge. The piece was previously believed to be silver-plated, but it was metallurgically tested and found to be 91.8% silver, 8.1% copper, with a specific gravity of 10.24. Muted golden-brown, aqua, and slate-gray surfaces are smooth except for a few faint obverse hairlines. The pedigree of this unique piece is somewhat confused as it has been thought to be silver-plated at times and has been variously listed as Judd-1519. The following is the expanded pedigree on USPatterns.com: Sold to T. Harrison Garrett from George Cogan, 3/17/1883; Garrett II (Bowers and Ruddy, 3/1980), lot 1040; Stetson University Collection (Bowers and Merena, 5/1993), lot 2417; Rindge and Harlan Collections (Bowers and Merena, 12/2003), lot 3385; M. Hagen; Long Beach Signature (Heritage, 2/2006), lot 2495. PCGS# 61856

1879 Washlady Ten Cents, PR62
Judd-1584, Ex: Garrett

- 4149** 1879 Washlady Ten Cents, Judd-1584, Pollock-1777, Low R.6, PR62 PCGS. Barber's famous "Washlady" design, a term that has been used to describe the liberally-locked portrait since the 19th century. The head of Liberty faces left surrounded by the legend and the date is placed below. She is wearing a headband inscribed LIBERTY. The headband is ornamented with ears of wheat, cotton leaves, and cotton bolls. On the reverse, the denomination is encircled by a ring of dots that is flanked by the ornamentally framed motto E PLURIBUS UNUM and a wreath of cotton and wheat. Struck in silver with a reeded edge. The lilac, olive, and sea-green patina is attractive. The cheek has a horizontal scratch, and the strike is not fully brought up, but this piece is otherwise impressive. From W. Elliot Woodward to T. Harrison Garrett, (8/18/1883); Garrett II (Bowers and Ruddy, 3/1980), lot 1025; FUN Signature (Heritage, 1/2005), lot 10489. NGC ID# 2AGA, PCGS# 61961

WORLD

1908 Philippines Peso, PR67
Final Proof Issue

- 4150** 1908 Philippines Peso PR67 PCGS. Between 1903 and 1908, Philippine proof sets were struck at the Philadelphia Mint. The proof-only 1908 peso has a mintage of just 500 pieces. The present satiny and immaculate Superb Gem offers a sharp strike and imposing eye appeal. Light golden-brown, powder-blue, and forest-green toning endows both sides. Population: 8 in 67 (1 in 67+), 3 finer (1/17). PCGS# 90406

1911-S Philippines Peso, Elusive MS62

- 4151** 1911-S Philippines Peso MS62 PCGS. The 1911-S is among the rarer commercial Peso issues. Uncirculated examples are seldom encountered. This lustrous and sharply struck representative displays delicate freckles of chestnut-gold toning. Distributed unimportant field grazes account for the grade. Population: 5 in 62, 15 finer (1/17). NGC ID# 36VJ, PCGS# 90397

U.S. MINT MEDALS

1796-Dated Indian Peace Medal, AU Details
 Washington 'Seasons' Series, The Farmer
 Silver, Baker-171, Julian IP-53

4152 (1798) Washington "Seasons" Indian Peace Medal, The Farmer — Tooled — NGC Details. AU. Baker-171, Julian IP-53a, Musante GW-68. Silver, 48 mm. Plain edge. In October 1796, George Washington's third Secretary of War, James McHenry, ordered Seasons medals in silver and copper, as the first Indian peace medals struck for the United States. The U.S. minister to Great Britain, Rufus King, enlisted celebrated American artist John Trumbull to produce drawings for three obverse designs (known today as The Shepherd, The Farmer, and The Family) and a common reverse bearing the legend SECOND / PRESIDENCY / OF / GEO. WASHINGTON / MDCCXCVI. Trumbull is best known today for the painting *Declaration of Independence* in the U.S. Capitol Rotunda, found on the back of the two dollar bill since the U.S. Bicentennial.

King delivered Trumbull's designs to Matthew Boulton's Soho Mint in England. The dies were engraved by Boulton employee Conrad Heinrich Kuchler, and the medals were struck during 1798. By this time, Washington's former Vice President, John Adams, was President. The Seasons medals were shipped to America but remained undistributed until Adams was succeeded by his political rival, Thomas Jefferson. Jefferson's greatest accomplishment in office was the Louisiana Purchase, which nearly doubled the size of the United States. Jefferson commissioned the Lewis and Clark Expedition, where a number of Seasons medals were distributed. Dr. Francis Prucha suggests that the Seasons medals were unpopular with Native Americans, who were accustomed to medals bearing large portraits of kings. This may explain the rarity of the silver medals, which are typically seen in lower grades and in lesser numbers than their copper equivalents. The designs of the Seasons medals were "emblematic of the progressive states of man from the savage to the earliest arts of civilized life," according to their originator, Secretary of War James McHenry.

The Farmer design, also known as The Sower, is very rare in silver format. John J. Ford, Jr. had two examples (II:186 and XVI:103) described as Fine and Very Fine, and those appear to be the only ones to surface in recent years, besides the present piece. It is a well-defined pearl-gray example with hints of wheat-gold and sea-green toning in protected areas. The surfaces are glossy from a long-ago wipe, and display two clusters of unobtrusive pinscratches near the farmer. Slight edge knocks are noted at 6 o'clock on the obverse and 11 o'clock on the reverse. Such problems are customary for silver Seasons medals, which are desirable as the first Indian Peace medals of our nation.

End of Session Two

SESSION THREE

BETTS MEDALS

(1747) Guatemala Proclamation Medal Betts-345, Silver

- 4153 Betts-345. (1747) Guatemala Proclamation Piece, Silver — Holed — PCGS Genuine Fine Details.** Always or nearly always pierced, the present example ranks among the finest of only 10 or so examples known. Tan highlights are present on the olive and steel-gray surfaces of this pleasing representative. The obverse depicts Ferdinand VI facing right, while the reverse has a rider and his mount above two mountains. 33.3 mm, 12.8 grams. (Est. \$2,000-\$2,500). Ex: Wayte Raymond; John J. Ford, Jr. (*Stack's*, 1/2006), lot 626.

- 4154 Betts-42. 1666 Conquest of St. Christopher. Bronze, MS64 Brown PCGS.** Saint Kitts is an island in the West Indies that was formerly known as St. Christopher, and is located approximately 1,300 miles southeast of Miami, Florida. The French expelled English forces from St. Christopher in 1666, only to have the island returned to the English the following year. This Choice Mint State representative has slightly reflective chestnut-brown surfaces with delicate satin luster. A bold strike is evident on both sides. 41.1 mm, 27.6 grams. (Est. \$500-\$800).

- 4155 Betts-44. 1670 British Colonization. Silver. AU50 PCGS.** King Charles and Queen Catherine are depicted on the obverse of this unsigned medal that was engraved by Rottier. The reverse design is a globe showing four continents with the legend DIFFVSVS IN ORBE BRITANNVS (Britain Dispersed Over the Globe). Slight high point rub on each side prevents a higher grade to this attractively toned silver-gray medal. 41.5 mm, 32.8 grams. (Est. \$1,000-\$1,500).

- 4156 Betts-48. 1674 Victory at Martinique. Bronze. MS63 Brown PCGS.** This medal commemorates the French victory over the Dutch at the eastern Caribbean island. The obverse portrays a mature King Louis XIV engraved by Mauger. The reverse shows an Indian warrior and Dutch captive at Martinique with an ancient galley in the background below Fame flying overhead. Splendid mahogany and chestnut-brown surfaces exhibit satin luster and hints of faded mint red. 41.1 mm, 29.5 grams. (Est. \$1,000-\$1,500).

1677 Franco-Dutch War Medal, MS62 Dutch Fleet Burned at Tobago, Betts-56

- 4157 Betts-56. 1677 Franco-Dutch War, Tobago, MS62 PCGS.** The Dutch Republic regained control of Tobago in 1674 with the Second Treaty of Westminster. Fort Sterreschans was built by the Dutch, and repelled French naval attacks in February and March 1677. On December 6, 1677, a fleet led by French admiral Count d'Estrées destroyed the settlement and killed the Dutch leader, Jacob Binckes, ending Dutch attempts to settle the island. This rare silver medal commemorates the French victory. Betts translates the reverse legend as "the fleet of the Dutch burned at Tobago." Sharply struck and satiny with lightly marked silver-gray and caramel-gold surfaces. (Est. \$4,000-\$6,000).

- 4158 Betts-59. 1677 Tobago Taken by Assault. Bronze. MS63 Brown PCGS.** Signed J. MAVGER. F below bust, reverse is that of the larger unlisted medal by Meybusch with a French mortar shell exploding the Dutch powder magazine, inscribed TABAGUM EXPUGNATUM, Tobago Taken by Assault. A late die state of obverse 4 as enumerated in the John Adams offering, the letters J.M appearing to be squashed beneath the massive curl. Satiny chestnut-brown surfaces display a splash of steel toning at the lower obverse on this lovely Select Mint State medal. 41.3 mm, 38.9 grams. (Est. \$700-\$1,000).

1683 Betts-64 Dutch West India Company Groningen and Ommeland, AU58

- 4159 Betts-64. 1683 Dutch West India Company, Chamber of Groningen and Ommeland. Silver. AU58 PCGS.** Monogram of the Geotroyeerde West Indische Compagnie in a circle of the directors' family Arms. The reverse shows Elmina with Forts Santiago and Saint George on the Gold Coast of Africa, today's Ghana, that soon became a fulcrum or pivot of the ever-growing African slave trade that populated Brazil with slaves. Delicate bluish-steel toning enhances the eye appeal of this mostly lustrous light silver-gray medal. Well struck with full obverse and reverse border details. 45.9 mm, 32.3 grams. (Est. \$10,000-\$12,000).

1687 Lord Albemarle Medal, AU Details
Betts-66, Silver

- 4160 Betts-66. 1687 Christopher Lord Albemarle. Silver — Cleaning — PCGS Genuine. AU Details.** The obverse is signed GB for George Bower (or Bauer), featuring a richly clad Duke of Albermarle, the Governor General of Jamaica who was named to that position in 1687. He died in office the following year. The reverse depicts the sea god Neptune with trident, reclining on an urn, watching Sir William Phipps' salvage ships on the horizon preparing to raise treasure on Silver Shoals that will bring the duke £90,000 before his death. This example was cleaned, likely before it was deaccessioned from the Glebow Museum. Once mounted with abraded surfaces and minor rim problems. An extremely rare and highly important medal. 46.4 mm, 40.8 grams. (Est. \$8,000-\$10,000).
Ex: Royal United Services Institute Collection.

1687 Silver Shoals Treasure Medal
Betts-67, Silver, MS62

- 4161 Betts-67. 1687 Silver Shoals Treasure Recovery. Silver. MS62 PCGS.** The obverse, signed GB for George Bower, depicts busts of James II and Queen Mary, while the reverse is a close-up view of Sir William Phipps' treasure recovery vessel laying off the wreck of the Spanish treasure ship Nuestra Señora de la Concepción. She has put out a longboat which has lowered a man over the side to work the wreck, parts of whose ribs can be seen protruding from the shoaling water. The enterprise is being conducted beneath a cloudless sky. Phipps earned a knighthood and wealth from his part in this well-documented and successful treasure salvage operation. 54.7 mm, 60.9 gm. (Est. \$7,000-\$9,000).
Ex: Strathay Collection.

- 4162 Betts-86. 1697 French Victory Medal. Bronze. MS63 Brown PCGS.** The mature bust of King Louis XIV on the obverse was engraved by J. Mavger. The reverse shows an allegorical figure of Victory inscribing the names of French battle victories in North America, Flanders, and Spain. Reflective chestnut-brown obverse with satiny dark brown reverse, a few splashes of darker toning on each side. 41.3 mm, 29.0 grams. (Est. \$700-\$1,000).
Ex: Etienne Page (9/20/1966); John J. Ford, Jr. (*Stack's*, 1/2006), lot 789.

1701 Philip V Proclamation Medal
Betts-89, Cast Silver

- 4163 Betts-89. 1701 Philip V Proclamation in Mexico, Cast Silver — Repaired — PCGS Genuine. AU Details.** An armored bust of Philip V faces right on the obverse, with the arms of Mexico City on the reverse. The City of Mexico received a decree to hold proclamation ceremonies for King Philip V, and the viceroy of the city replied with a letter that the celebration would commence soon thereafter. The ceremony began on April 4, 1701 with a budget that exceeded 500,000 pesos. This cast and chased silver example is exceptional quality for its type with delicate gold toning on its light gray surfaces. We see no evidence of repair on this example. 29.0 mm, 9.3 grams. (Est. \$7,000-\$9,000).

- 4164 Betts-95. 1702 Treasure Captured at Vigo Bay XF40 NGC. Brass. AU58 PCGS.** A large and crude draped bust of Queen Anne facing right appears on the unsigned obverse. The reverse presents an aerial view of Vigo harbor. This medal is a Nuremberg counter copied from jetons by Lazarus Gottlieb Laufer. Lovely tan surfaces exhibit lines of steel toning on each side of this attractive near-Mint example. 25.4 mm, 4.4 grams. (Est. \$600-\$1,000).

- 4165 Betts-97. 1702 American Treasure Captured at Vigo Bay. Silver. MS62 PCGS.** A crowned bust of Queen Anne facing left by John Croker, a lovelock across the shoulder. The crown points to R in FRA. The reverse presents a cloud sailing gracefully above a wonderfully detailed bird's eye view of the narrow-mouth harbor with Anglo-Dutch vessels bottling up the burning Spanish and French ships in the inner port. Small ship atop the allied flotilla is covered by the tall mast of the larger ship below. The Latin legend hails the French and Spanish fleet captured or burned. Splendid original pewter-gray surfaces exhibit champagne and pale blue overtones. 37.2 mm 17.7 grams. (Est. \$1,500-\$2,000).

1702 Vigo Bay Silver Medal
Betts-101, AU58

- 4166 Betts-101. 1702 American Treasure Captured at Vigo Bay. Silver. AU58 PCGS.** An unsigned work featuring complex symbolic design. Victory places naval crown, laurel, and palm atop naval trophies, inscribed SPES ET VIRE HOSTIUM FRACTAE, HISPAN. OPES AMERIC. INTERCEPT, Hope and Strength of the Enemy Broken, Spanish Treasure Intercepted. The reverse legend celebrates the strength of the French and Dutch, displaying an aerial view of Vigo with flaming ships. Both sides of this splendid medal exhibit rich golden-brown and blue-steel toning over pleasing silver surfaces. 40.5 mm, 22.4 grams. (Est. \$3,000-\$5,000).

4167 Betts-144. 1720 Founding of Louisbourg. Bronze. MS64 Brown PCGS. Although unsigned, this French medal featuring a young Louis XV (1710-1774) was likely accomplished by DuVivier, the talented French engraver. The Nova Scotia community was founded in 1713 and named for Louis XIV (1638-1715). This satiny Choice Mint State example has mahogany surfaces with traces of original mint color that outlines a few of the obverse letters. 41.7 mm, 38.2 grams. (Est. \$1,500-\$2,000).

4168 Betts-238. 1739 Admiral Vernon, Porto Bello. Bronze. AU58 PCGS. Adams-Chao PBvi-11-P, R.6. An extraordinary Admiral Vernon medal with smooth, problem-free chestnut and walnut-brown surfaces. Only a trace of rub appears on the high points of the design. 38.4 mm, 15.2 grams. (Est. \$400-\$600).

4169 Betts-246. (1741) Vernon, Brown, and Walpole. Silvered Bronze. AU55 PCGS. Adams-Chao NLv 8-G, R-5. Considerable silvering remains on each side of this impressive piece, intermingled with attractive light brown on the high points. 37.4 mm, 11.5 grams. (Est. \$700-\$1,000).
Ex: McCormick-Goodheart Collection.

4170 Betts-323. 1741 Admiral Vernon, Cartagena. Bronze. AU55 PCGS. Adams-Chao CAVlo 1-B, R.5. Pleasing olive-brown surfaces exhibit hints of steel-blue and mahogany toning with excellent eye appeal. 38.5 mm, 15.0 grams. (Est. \$600-\$800).

1745 Lima Treasure, MS62 Brown Bronze, Betts-381

4171 Betts-381. 1745 Lima Treasure Captured. Bronze. MS62 Brown PCGS. Engraved by John Kirk (1724-76), a student of James Anthony Dassier, who died in London. The foreground on the obverse depicts a rowboat along with three ships of war, the *Lewis Erasmus*, *Prince Frederick*, and *Marquis D'Antin*, while a chase between two ships involves the *Notre Dame* and the *Duke*. The reverse illustrates two medallions being held side by side by two infant Fames. One of the medallions features a bust of Iac Talbot and the other Ioha Morecock. Below, a treasure wagon numbered 44 disappears at the left, followed by one numbered 45. The medal commemorates the battle and capture of the three Spanish ships carrying approximately \$4 million in specie off South America by English privateers Talbot in the *Prince Frederick* and Morecock in the *Duke*. An impressive example with smooth and satiny maroon surfaces that accompany bold design elements. 37.4 mm, 18.8 grams. (Est. \$5,000-\$7,000).

4172 Betts-382. 1747 Lord Anson Circumnavigation. Silver. AU58 PCGS. Obverse signed by Thomas Pingo (1714-1776), an English medalist who was employed as assistant-engraver at the Royal Mint in London from 1771 to 1776. The obverse design commemorates Anson's defeat of the French fleet led by Admiral de la Jonquière off Cape Finisterre in May 1747. Anson was promoted to Vice Admiral following his victory. The reverse celebrates his voyage around the world, from September 1740 until June 1744. Anson later built a town in North Carolina, Ansonburg, and the county of Anson is named for him. Champagne and steel toning enhance the pewter-gray surfaces of this splendid medal that shows only slight rub on the high points with slight field reflectivity. 43.3 mm, 25.9 grams. (Est. \$1,500-\$2,000).

1751 Franco American Jeton, VF30 Betts-385 Variant, American Design

4173 Betts-385 Variant. 1751 Franco American Jeton. VF30 Uncertified. The Compagnie Des Indes Occidentales was the sole survivor of John Law's schemes. This extremely important jeton features an American Indian and alligator on the reverse. Exceptional pewter surfaces with delicate gray-gold toning, especially on the reverse. The flan is 1.2 mm thick with a reeded edge. 28.4 mm, 5.6 grams. (Est. \$5,000-\$6,000).

4174 Betts-385. 1751 Franco-American Jeton; They Flourish Under All Stars. Silver. AU55 PCGS. American symbols appear in the form of an Indian princess and an alligator on the reverse of this jeton. Lightly cleaned silver surfaces exhibit splashes of delicate gold toning along the obverse and reverse borders. Trivial handling marks are seen on each side. Plain Edge. 28.9 mm, 6.9 grams. Flan 1.5 mm thick. (Est. \$1,000-\$1,500).

4175 Betts-387. 1752 West Indies Company; Louis XV Franco-American Jeton. Silver. AU55 PCGS. Rich gold and steel-blue toning grace the silver surfaces of this Choice AU jeton. Partially Reeded Edge. 28.5 mm, 7.1 grams. Flan 1.5 mm thick. (Est. \$400-\$600).

4176 Betts-390. 1755 Louis XV Franco-American Jeton. Silver. AU58 PCGS. The obverse features an armored bust right of Louis XV with script FM below. The reverse portrays the vessel of the Argonauts. Rich sea-green and iridescent toning appears on the lustrous silver surfaces of this splendid jeton. Reeded Edge. 28.8 mm, 6.1 grams. Flan 1.2 mm thick. (Est. \$2,000-\$3,000).

1755 Safety at Sea Medal Silver, Betts-392, MS62

4177 Betts-392. 1755 Safety at Sea. Silver. MS62 PCGS. A standing Mercury appears on the central obverse flanked by two ships in the distance. One bears a flag with a harp representing Ireland, while the other displays lilies on its flag, denoting France. Nuremberg engraver Peter Paul Werner included his initials at the lower obverse. The reverse is attractively designed as well, depicting an Indian warrior at left and a woman at right with a cornucopia at her feet. The legend translates as, "But he has the power to soothe troubled waves." Both sides of this pleasing piece exhibit reflective fields beneath sky-blue and light gold toning. 35.1 mm, 14.5 grams. (Est. \$3,000-\$4,000).
Ex: Abner Kreisberg (8/4/1958); John J. Ford, Jr. (*Stack's*, 5/2006), lot 111.

- 4178 Betts-394. 1757 Louis XV Franco-American Jeton. Silver. XF45 PCGS.** The obverse features a laureate bust facing right with script R. Filius below. The reverse portrays Neptune and a warrior floating on a shell. This is one of the rarer French Canadian jetons. Delicate gold toning appears on the light silver-gray surfaces with trivial circulation marks and faint hairlines. Reeded Edge. 28.5 mm, 5.9 grams. Flan 1.1 mm thick. (Est. \$1,000-\$1,500).

**1756 Kittanning Destroyed Medal, Unc Details
Betts-400, White Metal or Pewter**

- 4179 Betts-400. "1756" Kittanning Destroyed, White Metal — Edge Damaged — Unc. Details.** Edward Duffield engraved the dies, and Joseph Richardson struck these pieces. These dies were among the earliest medal dies produced in America, and this piece was struck in white metal or pewter from the original dies. This attractive example retains considerable mint luster. Once mounted at 12 o'clock with edge damage at that location. Colonel John Armstrong led seven companies of Pennsylvania militia who attacked and destroyed the Indian village at Kittanning in Western Pennsylvania following earlier action that resulted in the death of his brother, Lieutenant Edward Armstrong. 43.6 mm, 23.7 grams. (Est. \$8,000-\$10,000).
Ex: John W. Adams Collection (Stack's, 1/2009), lot 5048; possibly from the Leonard Finn Collection (12/1983).

- 4180 Betts-403. 1758 Boscawen at Louisbourg. Bath Metal, Silvered — Repaired — PCGS Genuine. VF Details.** A contemporary cast, produced from a struck Betts-403, carefully chased in the fields and around legends. The medium gray surfaces show a pearlescent gloss and light golden highlights, with fine pits present on both fields and devices where gas escaped during the casting process. Light filing visible on edge, some minor scratches, detail excellent on both sides. 40.2 mm, 12.6 grams. (Est. \$1,000-\$1,500).

- 4181 Betts-403. 1758 Boscawen at Louisbourg. Cast Silvered. AU53 PCGS.** Admiral Boscawen was associated with the siege at Louisbourg during the French and Indian War. Louisbourg, in present day Nova Scotia, was considered a strategic stronghold of the French that fell to a decisive British victory. A splendid high grade representative of this large diameter Boscawen medal that shows considerable silvering on each side. 39.4 mm, 21.2 grams. (Est. \$1,000-\$1,500).

- 4182 Betts-404. 1758 Capture of Louisbourg. Bath Metal. AU58 PCGS.** Admiral Boscawen captured the massive fortress at Louisbourg (the greatest fortress in America at the time) and gained control of the St. Lawrence River for the British. Boscawen faces right on the obverse, and a view of the siege appears on the reverse. Exceptional olive-brown surfaces exhibit rich golden-tan color that is faded from original mint color. (Est. \$1,500-\$2,500).

- 4183 Betts-406. 1758 Boscawen at Louisburg, Bath Metal — Repaired — PCGS Genuine. Fine Details.** Attractive light yellow surfaces with considerable lavender and steel toning. Both sides exhibit scattered marks and slight evidence of smoothing. Boscawen's half figure faces right on the obverse, with a scene of the fortress at Louisburg on the reverse. The siege of Louisburg, located at present-day Nova Scotia, was a pivotal event of the French and Indian War. 37.8 mm, 13.3 grams. (Est. \$600-\$900).

- 4184 Betts-409. 1758 Boscawen at Louisbourg, Bath Metal — Tooled — PCGS Genuine. VF Details.** Several faint horizontal scratches in the right obverse field led to the PCGS "Tooled" description, but this piece has otherwise smooth yellowish-brown surfaces with olive and maroon overtones. The reverse legend is spelled LOUISBOURG on this variety, while it is spelled LOUISBURG on some others. 24.1 mm, 3.7 grams. (Est. \$500-\$1,000).

**1758 Oswego Captured Medal
Betts-415, Silver, XF45**

- 4185 Betts-415. 1758 Oswego Captured. Silver. XF45 PCGS.** Oswego was the only French victory in North America that received mention on a medal; indeed, the war soon became a rather prickly situation for the undersupplied and undermanned French armies in North America. In August 1756, Montcalm and the French had the upper hand, and the destruction of Britain's Fort Oswego netted them not over 1000 prisoners, but tons of materiel, artillery, and plunder for their native allies. The French did not hold the present-day Oswego, New York location long, but this medal marks the slim moment in time when their forces controlled the conflict. Possibly cleaned at one time, now with lovely gray-gold toning over the pleasing silver surfaces exhibiting only trivial circulation marks. 30.8 mm, 11.3 grams. (Est. \$3,000-\$5,000).

**1758 British Victories Medal
Betts-416 (Variant), Silver, AU58**

- 4186 Betts-416 variant. Victories of 1758. Silver. AU58 PCGS.** Apparently unique from this variant of the obverse die, King Charles displaying a protruding hair lock over his forehead, among other differences. This piece commemorates the British victories in America, displaying intermittent steel toning on lustrous pewter-gray surfaces. This important medal was featured in the December 2013 MCA Advisory. 44.4 mm, 29.9 grams. (Est. \$6,000-\$8,000).

- 4187 Betts-416. Victories of 1758. Silver. MS62 PCGS.** Struck in 1758 to celebrate the successes of the British military in America. King George II faces left on the obverse, while the reverse identifies the various battles and the victorious British commander for each. This sharply detailed silver medal has bright surfaces with reflective fields and delicate gold toning. 44.4 mm, 40.7 grams. (Est. \$2,000-\$3,000).

**1759 Guadeloupe Surrenders Medal
Betts-417, Silver, AU58**

- 4188 Betts-417. 1759 Guadeloupe Surrenders. Silver. AU58 PCGS.** The obverse depicts Britannia helping Guadeloupe to her feet while the reverse displays Victory. These medals were struck to commemorate the fall of the Caribbean island of Guadeloupe, which was a stronghold for French privateers during the French and Indian Wars. Lightly cleaned with inconsequential hairlines, now delicately toned in peripheral gold. 39.7 mm, 22.9 grams. (Est. \$3,000-\$5,000).

**1759 British Victories Medal, AU Details
Betts-418, Silvered Brass**

- 4189 Betts-418. 1759 British Victories, Silvered Brass — Tooled — PCGS Genuine. AU Details.** Delicate champagne toning appears on the silver surfaces of this pleasing piece. Sharply struck, exhibiting intricate detail on both sides. Minor scratches at the right obverse field resulted in the PCGS description that this piece has been tooled. This important medal commemorates British victories at Quebec, Crown Point, Lagos, Minden, Guadeloupe, and Niagara. 44.4 mm, 32.1 grams. (Est. \$3,000-\$5,000).

- 4190 Betts-419. Victories of 1758 and 1759. Brass. AU55 PCGS.** This popular French and Indian War medal is a mule of the reverse dies for Betts-416 and Betts-418, and commemorates British victories in America during 1758 and 1759. Rich chocolate-brown toning appears on the obverse, with considerable yellow-brass color on the reverse. 43.5 mm, 30.4 grams. (Est. \$600-\$1,000).

**1759 Quebec Taken Medal, Betts-421
Lettered Edge, Silver, MS62**

- 4191 Betts-421. 1759 Quebec Taken. Silver. MS62 PCGS. WILLIAM PITT ADMINISTRING edge.** When Quebec fell in 1759, the British military forces were able to defeat the French in several actions across Canada to Detroit during their northern campaign, leading to an eventual conclusion of the French and Indian War. This medal by John Pingo commemorates the British victory at Quebec. Lovely gold and blue toning appears on the prooflike silver surfaces of this lovely representative. 39.9 mm, 20.8 grams. (Est. \$2,500-\$3,500)
Ex: Richard Margolis (10/25/1972); John J. Ford, Jr. (Stack's, 5/2006), lot 74.

- 4192 Betts-425. 1759 British Commanders. Brass — Environmental Damage — PCGS Genuine. AU Details.** Commemorating the 1758 and 1759 victories in America and Europe, the obverse depicts facing images of King George on the left and Frederick I of Prussia on the right. The reverse shows seven allied commanders including H. William Pitt, who was considered the “inspiring genius” of the war, Prince Ferdinand, Prince Henry, Duke Brunswick, Admiral Boscawen, Colonel Clive, and General L. Amherst. Chestnut and olive-brown surfaces exhibit light yellow on the high points, with whitish corrosion at the upper obverse and on two of the reverse figures. 46.5 mm, 26.8 gm. (Est. \$1,000-\$1,500).
Ex: John J. Ford, Jr. Collection (Stack's, 5/2006), lot 88.

- 4193 Betts-427. 1760 Triumphs Everywhere. Bronze. MS62 Brown PCGS.** The dies by Dassier are among the most detailed in the series, and among the reverse trophies may be seen a shield that includes the inscription AMERI. Boldly detailed in light golden-brown with traces of pale blue, and a small mark noted at the right side of the reverse. 41.2 grams, 32.8 mm. The PCGS holder gives the incorrect date of 1759. (Est. \$700-\$1,000).

**1760 Montreal Taken Medal
Betts-429, Silver, AU58**

- 4194 Betts-429. 1760 Montreal Taken. Silver. AU58 PCGS.** Engraved by John Kirk, this medal features a river-god being accosted by a vicious-looking beaver on the obverse and an inconsolable Canadienne at the foot of a pine tree on the reverse, evoking the Judea Capta issues of ancient Rome. Prooflike light silver surfaces exhibit faint blue and gold peripheral toning. 40.7 mm, 30.8 grams. (Est. \$6,000-\$8,000).

**1762 Defense of Morro Castle, XF45
Betts-443, Silver Variant**

- 4195 Betts-443 Variant.** (1762) Capture of the Morro Castle Medal, Silver XF45 PCGS. This silver variant of a medal normally seen in bronze commemorates the Spanish defense of Morro Castle, in present-day Havana, Cuba. Morro Castle is a fortress guarding the entrance to Havana Bay, which during the 17th and 18th century made Havana the most fortified city in Spanish America. Juan Bautista Antonelli, who also built the forts at Chagre and Porto Bello, constructed the fort in 1584. The obverse shows conjoined busts right of Luis de Velasco and Vincenzo Gonzalez, commanders of Morro Castle, who are named in the legend. The reverse shows the exploding powder magazine that terminated the conflict. Following the British victory, the 1763 Treaty of Paris returned Cuba to Spanish authority. A few scattered marks and trivial rim bruises are noted on this extremely rare silver medal. The light gray surfaces exhibit natural champagne and pale gold toning. 49.6 mm, 66.8 gm. (Est. \$2,500-\$3,500).

- 4196 Betts-446.** 1763 Messenger of Peace. Silver. MS63 NGC. Ex: Damon Collection. Johann Leonhard Oexlein signed the obverse of this medal that features the legend NUNCIA PACIS, translating to "The Messenger of Peace." A representation of Peace with trumpets flies above the Stadt House. A standing figure on the reverse represents Germany, with a legend that translates to "Now She Dares Return, Germany at Peace." This impressive pewter-gray example has lovely original toning with gold and blue highlights. (Est. \$800-\$1,200).

**1760 Guadalajara Proclamation Medal, AU Details
Betts-456, Bronze**

- 4197 Betts-456.** 1760 Charles III, Guadalajara, Bronze — Scratch — PCGS Genuine. AU Details. A lovely bronze medal with chestnut-brown surfaces and a few splashes of steel toning. Both sides exhibit trivial marks and rim nicks, with slight scratches in the right obverse field. The obverse depicts Charles III facing right and the reverse displays the arms of the Bishop and Diocese of Guadalajara. 38.7 mm, 27.8 grams. (Est. \$2,000-\$3,000).
- 4198 Betts-469.** 1760 Charles III American Proclamation Medal. Silver. AU53 PCGS. A bust of King Charles III facing right appears on the obverse, while a double-headed eagle appears at center on the reverse. Also present are the columns of Hercules. The legend translates as, "Publicly we swear allegiance to the best Prince." Natural pewter-gray surfaces host delicate blue toning near the borders. 37.2 mm, 22.7 grams. (Est. \$700-\$1,000).

- 4199 Betts-473.** 1760 Charles III Proclamation of Mexico. Gilt Bronze. AU58 PCGS. This extremely rare medal portrays Charles III facing right, and depicts the Arms of Mexico City on the reverse. A bright yellow example made of gilded bronze, this piece exhibits bold design definition with prooflike fields. 43.2 mm, 35.8 grams. (Est. \$1,800-\$2,400).

- 4200 Betts-478.** (1761) Charles III Proclamation of Mexico. Silver. AU58 PCGS. Medina (*Medallas de Proclamaciones y Juras de los Reyes de Espana en America*, page 80) transcribes a letter by the Rector of the University, Manuel Ignacio Beye de Cisneros dated September 25, 1761, as follows:

"The loyal chests of the vassals academicians of your Majesty filled with joyful feelings by their exaltation to the Spanish Throne have endeavored to show them through the enclosed (medal) piece and (other) medals bearing your Majesty's bust that we have commissioned to celebrate this joyous day."

A trace of high-point rub is noted on the light gray surfaces that display delicate blue and steel toning. A lovely example. 42.5 mm, 36.3 grams. (Est. \$1,500-\$1,800).

- 4201 Betts-479.** 1760 Charles III Proclamation of Mexico City. Bronze. AU58 PCGS. Charles III faces right on the obverse, with the Arms of the Archbishop on the reverse of this important proclamation piece issued for Mexico City. This pleasing light brown example shows a few minor rim bruises, mostly on the reverse. 41.2 mm, 34.4 grams. (Est. \$700-\$1,000).

- 4202 Betts-482.** 1760 Charles III Proclamation of the Mexican Consulate. Silver. XF40 PCGS. An armored and draped Charles III faces three-quarters right on the obverse, while the reverse shows the arms of the Mexican consulate. Light silver highpoints accompany the rich champagne and steel toning in the fields. 39.3 mm, 28.3 grams. (Est. \$1,500-\$2,000).

**1761 San Miguel Proclamation Medal
Betts-490, Silver, AU55**

- 4203 Betts-490.** 1761 Charles III Proclamation of San Miguel. Silver. AU55 PCGS. This impressive silver proclamation medal exhibits natural light to medium gray surfaces with traces of peripheral gold toning. The seven-line inscription on the reverse refers to the proclamation of San Miguel. 45.2 mm 28.3 grams. (Est. \$3,000-\$4,000).

- 4204 Betts-506.** 1760 Charles III Vera Cruz Proclamation Medal, Cast Silver — Holed — PCGS Genuine. VF Details. We are only aware of two examples of this extremely rare proclamation medal. An armored bust of Charles III faces right, with the arms of Vera Cruz on the reverse. Light silver surfaces have been cleaned with faint scratches. Holed at 12 o'clock. 33.8 mm, 12.0 grams. (Est. \$1,500-\$2,000).

Ex: Ponterio & Associates (6/1984), lot 1034; Ponterio & Associates (12/1998); John Adams Collection; Stack's-Bowers (1/2015), lot 1035.

- 4205 Betts-533.** (1775) Tristram Coffin Medal. Bronze — Environmental Damage — PCGS Genuine. XF Details. The Tristram Coffin family settled in Nantucket after escaping the English Civil War in 1642. Coffin established himself as a political leader among his fellow settlers. This yellowish chestnut-brown example has slight surface roughness while retaining good overall eye appeal. The reverse has a small rim bruise at 6 o'clock. 53.1 mm, 81.3 gm. (Est. \$800-\$1,200).

- 4206 Betts-572. 1780 Treaty of Armed Neutrality. Silver. MS63 PCGS.** Reverse signed by Adriaan Van Baerll, an engraver in Holland. The text on the obverse translates as, "Armed Neutrality." Various designs represent Russia, Great Britain, Sweden, Denmark, and Holland. According to Betts, the reverse text means, "Jehovah, the Avenger of Treaties, confirms Catharine's Treaty of assistance, so that the commerce of the neutral powers remains intact for the benefit of their people." An all-seeing eye with rays appears. Areas of luster remain on this piece displaying rich toning in hues of golden-copper, blue-green, red, and turquoise. The toning on the obverse is particularly appealing. 31.6 mm, 12.2 grams. (Est. \$1,000-\$1,500). Ex: John J. Ford, Jr. (*Stack's*, 5/2006), lot 229. Possibly from the Medina Collection.

WASHINGTONIA

- 4207 Important Offering of 18 Washington Pieces:** Musante GW-142, silver, XF; GW-146, silver, AU; GW-163, silver, Fine; GW-163, copper, plain edge, VF holed; GW-445, silver, Fine; GW-445, silver, MS; GW-448, silver, Unc; GW-448, bronze (later striking), MS; GW-476, bronze, AU; GW-476, bronze (later striking), AU; GW-672, silver, Fine; GW-672, silver, MS; GW-993, white metal, XF; GW-1082, white metal, AU; GW-1134, white metal, MS; Rulau B-1825, silver (matte), AU; B-1825, bronze, XF; B-52R, bronze, XF. (Est. \$2,000-\$3,000)
Ex: Eric P. Newman Numismatic Education Society. (Total: 18 coins)
- 4208 (1808) Sansom Medal MS63 Brown NGC. Betts-617, Julian CM-5b, Baker-58A, Greenslet-82, Musante GW-92.** Bronze, 40 mm. John Reich was the engraver for this splendidly executed U.S. Mint medal. The obverse presents conjoined shoulder-length busts of Washington and Franklin. The reverse displays a powerful eagle delivering peace to the United States. A fully struck and impressive chocolate-brown example. (Est. \$1,500-\$2,000).
- 4209 (1790s) Twigg Medal MS63 NGC. Baker-65, Musante GW-38.** White metal, 35.7 mm, plain edge. Charles Twigg was one of several Birmingham toy and/or button manufacturers who entered the token and medal business during the late 18th century. This well struck pearl-gray medal is nearly void of marks, although a small obverse edge knock is noted at 6 o'clock. (Est. \$700-\$1,000).
- 4210 1797 George Washington Halliday Medal AU58 PCGS. Baker-70C, Musante GW-57.** Bronze, 54 mm, plain edge. Thomas Halliday, the talented young English engraver of this medal, signed the obverse die on the base of the shoulder. An attractive chestnut-brown example, this piece exhibits small maroon toning spots on the obverse with splashes of bluish-steel patina on the reverse. Scattered marks on each side are inconsequential. 54.4 mm, 73.2 grams. (Est. \$1,000-\$1,500).
- 4211 (circa-1800) Westwood Medal MS64 PCGS. Baker-81B, Musante GW-82.** Fire-gilt bronze, 41mm, plain edge. After the 1792 death of his father, Obadiah Westwood continued in the Birmingham token and medal business, associated with his brother, John Westwood, Jr., and father-and-son engravers John Gregory Hancock. A sharply struck and unabraded example with uniform lemon-gold gilt. The middle front of the holder exhibits scratches without impact on the stellar preservation of the present piece. Incorrectly designated by PCGS as Baker-80B. (Est. \$1,500-\$2,000).

1803 Washington Fame Medal, AU Details Baker-84, Bronze

- 4212 1803 Washington Fame Medal, Wisdom, Virtue & Patriotism — Environmental Damage — PCGS Genuine. AU Details. Baker-84, Musante GW-87.** Bronze, 39mm, plain edge. Rich mahogany and blue-steel surfaces exhibit splashes of chestnut toning with evidence of ancient corrosion on each side. A highly attractive example of this important funeral medal. Neil Musante suggests that the engraver may have been John Henning as this medal is punch-linked to the Death of Lafayette medal by Henning. Musante's two-volume *Medallic Washington* that Spink published last year is a must-have reference for the serious Washingtonia collector. 38.6 mm, 29.3 grams. (Est. \$1,000-\$1,500).
- 4213 (1805) Eccleston Medal MS63 NGC. Baker-85.** Issued in the memory of General Washington, this medal was issued by Daniel Eccleston, a Lancaster, England Quaker who commissioned Thomas Web to engrave the dies. Rich walnut-brown and steel surfaces display excellent design definition. (Est. \$1,000-\$1,500).
- 4214 1808 Washington Benevolent Society XF40 NGC. Baker-327, Julian RF-23a, Musante GW-94.** Silver, 42 mm. A small hole is present near 12 o'clock, as issued. Rich ocean-blue centers are bounded by light peripheral golden-brown toning. A moderately circulated example of this scarce Washington medal. The New York chapter of the Washington Benevolent Society was established in 1808, and served as a political club for the Federalist Party. (Est. \$800-\$1,200).
- 4215 1876 Washington Danish Medal, International Exhibition, Gilt Bronze, Baker-426C, Musante GW-932, MS63 NGC.** Issued for the International Exhibition at Philadelphia in 1876, this Danish medal honors the memory of George Washington. A splendid gilt-bronze example, this piece exhibits bright yellow surfaces with reflective fields and bold design motifs. PCGS# 661020 (Est. \$500-\$800).

**1889 U.S. Constitution Centennial
Case of Washington Medals**

- 4216 1889 U.S. Constitution Centennial Case of Medals.** The fragile original case has a tan leather exterior. The interior is red velvet with insets for 18 items, which include 15 Washington medals, a copper 21 mm Benjamin Harrison campaign medal (DeWitt-BH-1888-25), a steel pinback eagle hanger, and a steel axe with a stars-and-bars blade and the inscription Apr. 30, 1889 on the handle. The Washington medals include: cast 60 mm lead copy of Baker-112; Baker-287F Variety, Musante GW-944B; Baker-651 Variety, Musante GW-927; Douglas-7A, Musante GW-1087A; Douglas-9, Musante GW-1086; Douglas-10, Musante GW-1088; Douglas-13, Musante GW-1104; Douglas-14, Musante GW-1105; Douglas-28, Musante GW-1101; Douglas-35A, DeWitt BH-1888-8, Musante GW-1118; Douglas-36, Musante GW-1110; Douglas-39, Musante GW-1116; Douglas-47, Musante GW-1082; Douglas-48, Musante GW-1134; Douglas-49, Musante GW-1130. Most of the pieces are holed for suspension, as issued. (Est. \$2,000-\$3,000). (Total: 18 pieces)

LINCOLN

- 4217 Small Selection of Lincoln Historical Pieces:** 1864 Lincoln Campaign token, DeWitt AL 1864-67, Cunningham 5-940C, copper, XF; 1865 Lincoln Death token, C. 7-140C, copper, XF, holed; 1865 Lincoln Memorial medal, type of C. 9-600Bg, bronze, gilt, 24x21 mm, Unc (3); Lord's Prayer token, C. 9-860Cg, bronze, gilt, Unc; (1909) Lincoln Railsplitter medal, C. 10-470B, brass, AU; 1909 Lincoln Birth Centennial, C. 11-470Cs, bronze, silvered, AU; 1909 Lincoln Birth Centennial, C. 11-480C, bronze, AU (2); 1909 Lincoln Birth Centennial, C. 11-910S, silver, VF; (1909) Lincoln medalet, C. 11-920B, without ribbon or badge, bronze, gilt, AU; 1944 Chicago Coin Club, C. 14-1070S, silver, Unc; 1929 Jackson, MI Centennial, C. 30-1570Bz, bronze, XF, cleaned (2); Undated copper token, 18 mm., Lincoln right in a plain field, rev. broken column flanked by flags, scroll in front, XF. Total: 16 pieces. (Est. \$1,500-\$2,500)
Ex: Eric P. Newman Numismatic Education Society. (Total: 16 coins)

U.S. PRESIDENTS & STATESMEN

- 4218 Selection of 17 Bryan-Related Items:** Bryan Money, One Dime, similar to S-326, but poorly made in bronze, Fine; 1896 Satirical Dollar, S-814, Unc; 1896 Satirical Dollar, S-842, XF; Pro-McKinley Mechanical brass medal, S-908 (2), XF and AU; Honest Money lapel pin, S-915, brass, XF, light corrosion; 1896 silver & Gold 16/1, white metal, blank back (pinback removed), 33.0 mm. VF; Bryan token, 16 to 1 Free silver, blank back (pinback removed), silver, 19.6 mm, VF; (1896) Prosperity token, silver, 16.6 mm, AU; 16 to 1 Clock lapel pin, white metal, blue enamel face, 21.9 mm, XF; Pair of 16 to ONE lapel pins (or set of cufflinks), brass, VF; Five William J. Bryan postcards, each circa 1908. (Est. \$800-\$1,200)
Ex: Eric P. Newman Numismatic Education Society. (Total: 17 coins)

- 4219 Important Selection of Presidential-Related Medals and Tokens:** (1840) William Henry Harrison Non-Contemporary Silver Medal, DeWitt WHH-G (3), silver, proof, one of just three struck according to W. Elliot Woodward; 1840 Harrison Log Cabin medal, white metal, 44 mm, AU; 1845 Andrew Jackson Memorial, white metal, XF holed; 1852 Henry Clay Memorial by Merriam, copper, Unc; (1863-dated) Grant commemorative medalet, white metal, Unc; 1865 Andrew Johnson, 17th President, white metal, AU (2); 1868 Grant Campaign by Key, DeWitt USG 1868-27, white metal, Unc; 1868 Grant Campaign by Ellis, DeWitt USG 1868-30, brass, XF holed; 1870 Grant, Passage of 15th Amendment, white metal, XF; 1877 Grant Visits London, brass, Unc; 1877 Grant Visits Scotland, copper, Unc; 1879 Grant Parade Mint Medal, bronze, AU (2); 1881 Garfield Memorial, white metal, XF; 1885 Grant Memorial, white metal, XF, holed (2); 1893 Cleveland visits Columbian Exposition, Eglit-1, bronze, Unc; another, VF, environmental damage; 1896 McKinley-Hobart Campaign, copper, AU; 1897 Grant's Tomb Dedication, white metal, Unc, bent; 1900 McKinley-Roosevelt Campaign, brass, XF; another, similar, brass, AU; 1900 McKinley Campaign, white metal, AU; 1901 McKinley-Roosevelt Inauguration, copper, Unc; another, brass, Unc, holed; 1901 McKinley-Roosevelt Inauguration, white metal, Unc; 1901 McKinley Memorial, Santa Clara, CA, bronze, VF; 1901 McKinley Memorial, bronze, Unc; 1903 Thomas Jefferson Memorial Association, bronze, Unc; 1922 Grant Birth Centennial, bronze, AU-Unc (7). (Est. \$1,500-\$2,500).
Ex: Eric P. Newman Numismatic Education Society. (Total: 37 coins)

- 4220 Important Collection of 60 Different Campaign Tokens and Medals representing 21 Candidates from 1824 to 1892.** Each is attributed to the Dewitt-Sullivan reference: **Andrew Jackson:** 1824-4 brass Fine; **Martin Van Buren:** 1840-1 white metal VG holed, damaged; 1840-9 copper VF holed, environmental damage; **William Henry Harrison:** 1840-9 white metal VF holed, damaged; 1840-24 brass VG holed; 1840-25 copper VF holed; 1840-28 brass VF holed; 1840-30 gilt copper VF holed; 1840-34 brass VF holed; 1840-35 brass VF holed; 1840-42 brass VF holed; 1840-43 brass VG holed, environmental damage; 1840-46 brass Fine holed; 1840-49 brass XF holed; 1840-50 brass XF holed; 1840-52 brass AU holed; 1840-53 brass VF holed; 1840-54 brass VF holed; 1840-56 brass XF holed, environmental damage; **Henry Clay:** 1844-32 brass VF holed; 1844-35 brass VF holed; 1848-1 brass Fine holed; **Zachary Taylor:** 1848-21 brass XF; **Franklin Pierce:** 1852-4 brass Fine holed; **Winfield Scott:** 1852-11 brass XF; 1852-13 brass MS holed; **Millard Fillmore:** 1856-5 brass XF; **John Fremont:** 1856-4 white metal MS; 1856-10 brass VF holed; 1856-11/9 brass Fine; 1856-14 brass VF; **James Buchanan:** 1856-9 brass VF holed, environmental damage; **Stephen Douglas:** 1860-11 brass Fine; **Abraham Lincoln:** 1860-43 brass Fine; 1864-37 brass VF holed; **George McClellan:** 1864-6 copper AU; 1864-9 copper XF; 1864-11 white metal VF; 1864-18 copper Fine; 1864-22 white metal AU holed; 1864-25 brass XF; **Horatio Seymour:** 1868-7 brass XF holed; **Ulysses Grant:** 1868-31 brass XF holed; **Horace Greeley:** 1872-11 brass XF holed; **Rutherford Hayes:** 1876-1 bronze XF holed; **Winfield Hancock:** 1880-3 brass XF holed, environmental damage; 1880-4 brass Choice MS holed; **James Blaine:** 1884-10 brass AU holed; 1884-12 brass MS prooflike; 1884-15 white metal MS holed with eagle pin back; 1884-16 copper MS; 1884-21 silvered bronze XF holed; **Grover Cleveland:** 1884-15 bronze AU; 1884-16 brass MS holed; 1892-5 variant white metal MS prooflike; **Benjamin Harrison:** 1888-18 brass VF holed; 1888-19 white metal XF holed; 1888-23 white metal AU holed; 1888-24 silvered bronze AU holed; 1892-12 brass VF holed. (Est. \$1,200-\$1,800)
Ex: Eric P. Newman Numismatic Education Society. (Total: 60 coins)

- 4221 Duplicate Campaign Tokens Including 44 Pieces from Eight Candidates.** Each is attributed to the DeWitt-Sullivan reference: **Martin Van Buren:** 1840-9 brass VG holed; 1840-9 brass VF holed, environmental damage; **William Henry Harrison:** 1840-9 white metal Fine holed, environmental damage; 1840-25 copper VF holed, scratched; 1840-25 copper Fine holed, environmental damage; 1840-25 copper XF corroded; 1840-25 brass VG holed; 1840-25 brass Fine holed; 1840-28 brass VF holed; 1840-34 brass VG holed; 1840-42 brass VF holed; 1840-46 brass Fine holed; 1840-46 brass VG holed; 1840-49 brass Fine holed; 1840-49 brass VG holed; 1840-49 brass VF holed; 1840-49 brass XF holed; 1840-49 brass XF holed, crudely plugged; 1840-49 brass XF holed; 1840-50 brass VF holed; 1840-50 brass XF holed; 1840-50 brass Fine holed; 1840-50 brass Good holed; 1840-50 brass VG holed; 1840-50 brass Fine holed, scratched; 1840-52 brass XF holed; 1840-52 brass VF holed; 1840-52 brass XF holed, environmental damage; 1840-54 brass VF holed; **Zachary Taylor** 1848-21 brass VF; 1848-21 brass Fine; **Winfield Scott** 1852-11 brass Fine; 1852-11 brass VF holed; 1852-11 brass Good; 1852-13 brass VF holed; 1852-13 brass XF holed; 1852-13 brass XF holed; **Millard Fillmore** 1856-5 brass VF; **John Fremont** 1856-11/9 brass XF holed; 1856-11/9 brass XF holed; 1856-14 brass XF holed; **George McClellan** 1864-22 white metal XF holed; 1864-22 white metal AU holed, rim damage; **Rutherford Hayes** 1876-1 brass VF holed. (Est. \$700-\$1,000)
Ex: Eric P. Newman Numismatic Education Society. (Total: 44 coins)

U.S. MINT MEDALS

- 4222 "1824" Franklin Institute Silver Award Medal, Julian-AM-17, Greenslet-91, PR63 Uncertified.** The Franklin Institute medal was designed by Christian Gobrecht, and this example was awarded in 1853 to the firm of Kurlbaum & Schwartz of Philadelphia for their Porcelain Ware. Charles Kurlbaum was a chemist per the 1853 McElroy's *Philadelphia City Directory*. John T. Schwartz also appeared as a chemist in the same directory. (Est. \$700-\$1,000).
Ex: Eric P. Newman Numismatic Education Society.
- 4223 1817 James Monroe Indian Peace Medal, Second Reverse, Julian-IP-9, Bronzed Copper, SP62 PCGS.** Satiny mahogany-brown surfaces exhibit dark toning spots on the obverse with a pristine reverse. Slight high-point rubbing prevents a higher grade. 62.6 mm, 120.6 gm. (Est. \$400-\$600).
- 4224 1781-Dated Gen. Daniel Morgan, Battle of Cowpens, Julian MI-7, Bronzed Copper, MS64 Brown NGC. Betts-593.** Barre copy dies. Examples of Betts-593, struck from the original Augustin Dupré dies, are very rare. In 1839, the U.S. Mint commissioned copy dies from French engraver Jean-Jacques Barre. Most pieces seen today are Philadelphia Mint strikings (Julian MI-7) from the Barre-engraved dies. The present intricately struck and unblemished medal displays deep and consistent mahogany-brown toning. 56 mm. (Est. \$1,500-\$2,000).
- 4225 "1781" Lieutenant Colonel John Egar Howard Military Medal, Betts-595, Julian MI-9, MS64 Brown Uncertified.** The original Cowpens medal was struck at the Paris Mint, and they also produced restrikes. Later U.S. Mint strikes have textured fields from "Gunmetal Dies" that were hubbed from a Paris Mint example of the medal. However, this medal was struck before replacement dies were created at the Philadelphia Mint in 1881. No die cracks are evident on this early U.S. Mint production. This splendid example exhibits lovely walnut-brown surfaces with traces of faded mint red and delicate blue overtones. 45 mm, 57.4 grams. (Est. \$1,000-\$1,500).
- 4226 "1813" Major General William Henry Harrison, Julian-MI-14, Bronzed Copper, SP64 PCGS.** From dies by Moritz Furst, depicting Major General William Henry Harrison on the obverse. The reverse commemorates Fort Meigs in Ohio, and the Battle of the Thames in Canada. An attractive chestnut-brown representative with a few small reverse spots. 65.1 mm, 135.0 gm. (Est. \$500-\$700).

**Zachary Taylor Mint Medal, MS63 Brown
J-MI-24, Battle of Buena Vista
90 mm, Bronze**

- 4227 (1849) Maj. Gen. Zachary Taylor, Julian MI-24, Bronzed Copper, MS63 Brown NGC.** Major General Zachary Taylor was victorious in the Mexican-American War, and the U.S. Congress voted to award him medals for the battles of Palo Alto, Monterey, and Buena Vista. The first two medals (Julian-MI-22 and 23) were criticized for their lack of a battle scene, and for a unsuitably downcast portrait of Taylor. Taylor was elected President in 1848, and New York engraver Charles Cushing Wright was commissioned to engrave the dies for the large (90 mm) Buena Vista medal, based on appropriately heroic designs by Salathiel Ellis and Frederic Augustus Smith. The present walnut-brown example is unabraded, and is well struck aside from slight blending on the hair above the ear. A pair of unobtrusive spots are noted on the upper reverse. 90 mm. (Est. \$1,500-\$2,000).
- 4228 1863-Dated Major General U.S. Grant Bronze Mint Medal, Julian MI-29, MS64 Brown NGC.** 102 mm. This massive bronze medal honors Major General Ulysses S. Grant for actions in the Civil War. The medal was a masterwork of Anthony Paquet. This extraordinary example has sharp details with splendid mahogany surfaces. (Est. \$1,500-\$2,000).
- 4229 1836 First Steam Coinage, Feb. 22, Julian MT-20, Bronzed Copper — Environmental Damage — PCGS Genuine. Unc. Details.** Julian writes, "The original ceremony for the first steam coinage had been scheduled for Washington's birthday, February 22 ... Dies were prepared well in advanced and samples struck but some mechanical problems forced postponement until March 23." The reverse die was modified to the Mar. 23 date, and that variety (Julian MT-21) is merely scarce. But medals bearing the Feb. 22 date are very rare. An olive-brown example with minor pitting and a few hair-thin marks on the reverse. 27 mm. (Est. \$1,000-\$1,500).

**(1779) John Paul Jones Naval Medal, SP65
Julian NA-1, Important Early Strike**

- 4230 Betts-568. (1779) Captain John Paul Jones, Julian NA-1, Bronzed Copper, SP65 PCGS.** Struck by the Paris Mint from the original Augustin Dupré dies. The portion of the edge visible within the holder is plain, without a hallmark. A fully struck and glossy chocolate-brown Gem. Carbon is essentially absent. The right obverse field shows a couple of insignificant ticks. 57 mm. (Est. \$10,000-\$12,000).

SO-CALLED DOLLARS

- 4231 Impressive Selection of So-Called Dollars:** 1876 Centennial HK-20 silver VF (1); 1893 Columbian Exposition Treasury Medal HK-154 brass VF-XF (3); 1893 Columbian Exposition Treasury Medal HK-155 brass XF-Unc, one is harshly cleaned (7); 1894 California Midwinter Exposition HK-245a brass XF (1); 1895 Cotton States Exposition HK-268 brass AU (1); 1897 Tennessee Centennial Exposition HK-274 brass VF (1); 1898 Trans-Mississippi Exposition HK-283 brass VG-AU (6); 1904 Louisiana Purchase Exposition HK-299 silver VG-XF (3); 1904 Louisiana Purchase Exposition HK-301 to HK-304 copper, bronze, or Gilt VG-AU (25); 1903-4 St. Louis Good Luck Dollar HK-310 brass VF-XF (2); 1905 Lewis & Clark Exposition HK 325 silver XF (1); 1905 Lewis & Clark Exposition HK-327 bronze XF (1); 1905 Lewis & Clark Exposition HK-328 silvered bronze XF-AU (3); 1905 Lewis & Clark Exposition HK-331 bronze RE AU (1); 1907 Jamestown Exposition HK-344 silver AU cleaned (1); 1907 Jamestown Exposition HK-346 or HK-347 bronze or Gilt VF-Unc (9); 1909 Alaska-Yukon Exposition HK-355 bronze AU (1); 1909 Alaska-Yukon Exposition HK-364a brass XF (1); 1909 Alaska-Yukon Exposition HK-366a brass AU (1); 1909 Hudson-Fulton Exposition HK-384 bronze F-VF (2); 1910 Ohio Valley Exposition HK-395 bronze Fine (1); 1915 Panama-Pacific Exposition HK-400 copper or bronze VG-AU (9); 1915 Panama-Pacific Exposition/Oregon Building HK-411 bronze AU cleaned (1); 1915 Panama-Pacific Exposition HK-416a copper XF (1); 1926 Sesquicentennial HK-452 copper or bronze AU (1). (Est. \$1,000-\$1,500)
Ex: Eric P. Newman Numismatic Education Society. (Total: 84 coins)
- 4232 1876 Centennial Medal Quartet in Original Cases:** HK-20, Julian CM-10, silver, 38 mm., Choice proof; HK-21, Julian CM-10, bronze, 38 mm., Choice proof; Julian CM-11, bronze, 58 mm., proof; Julian CM-11, gilt bronze, 58 mm., proof. All four cases are in excellent condition. (Est. \$1,000-\$1,500).
Ex: Eric P. Newman Numismatic Education Society.
- 4233 1903 Valley Forge Evacuation, 125th Anniversary, MS64 Deep Prooflike NGC. HK-132, Baker L-195.** White metal, plain edge, 38 mm. A popular so-called dollar variety noted for imposing white-on-black cameo contrast. The glassy fields are well preserved, and the strike is full except for slight incompleteness on Washington's nose. (Est. \$600-\$900).
- 4234 1920 Manila Mint Opening, Wilson Dollar, Silver, MS65 PCGS. HK-449.** The Manila Mint was the only U.S. branch mint that operated outside the continental United States. The facility opened on July 16, 1920, and commemorative medals were issued in silver, copper, and gold. The silver medals are often called Wilson dollars, since they were struck on 38 mm planchets. The Wilson portrait was taken from the 1919 Assay Office medal. The reverse design is adapted from the 1882 Assay Office medal. A lustrous Gem with an aquamarine obverse center. The borders display golden-brown and rose-red. Listed on page 425 of the 2017 *Guide Book*. (Est. \$1,500-\$2,000).
- 4235 1896 Bryan Dollar, Tiffany & Co., Original, AU50 PCGS. Zerbe-1, HK-777, Schornstein-1.** Silver, 49 mm, plain edge. The very first Bryan money variety listed in the Schornstein standard reference. S-1 is part of the educational series. The uniface design consists of legends that compare the bullion value of a Federal gold dollar with its much larger silver equivalent. Rare originals made in 1896 exhibit TIFFANY & CO in 7 1/2 mm letters on the edge near 6 o'clock. Scarce 1910 restrikes, made by the same firm, show a similar edge marking with 8 mm letters. A third variety, S-2, exists with 13 1/2 mm letters for the edge marking, and is considered rare. The present S-1 example exhibits lightly abraded silver-gray and wheat-gold surfaces. (Est. \$700-\$1,000).

1901 Leshner Dollar, HK-796, AU53

Boyd Park #560

- 4236 1901 Leshner Dollar — Imprint Type, Boyd Park, #560 — AU53 PCGS. Zerbe-10, HK-796, R.6.** Boyd Park, the Denver merchant, reportedly issued about 150 of these Leshner dollars with his imprint. The 1900 Denver City Directory identifies Park as a watchmaker and jeweler whose office was in the Opera House located at the corner of 16th and Curtis at the present site of the Federal Reserve Bank building. Some records suggest that Park operated his business in Denver while living in Salt Lake City. Pleasing pale gold and iridescent toning appears on the still lustrous surfaces of this attractive example. (Est. \$800-\$1,200).

- 4237 1933 Montana Dollar MS66 NGC. HK-820.** Silver, 40 mm, R.5. During the trough of the Great Depression, the Montana Silver Association issued well-made one-ounce silver medals in 1933 to fund its lobbying activities. This well struck and unmarked Premium Gem is mostly white but displays glimpses of peripheral peach-gold patina. (Est. \$800-\$1,200).

- 4238 1915 Panama-Pacific Exposition Thomas Elder Gold Dollar MS64 NGC. HK-1030.** 19 mm, plain edge. Although unlisted by DeLorey, the second edition of Hibler-Kappen ascribes this variety to early 20th century numismatic auctioneer Thomas Elder. Research by Western souvenir gold expert Mike Locke indicates that New York City jeweler H. Kroll struck the issue for Elder. The variety is very rare: Burnie (1955) knew of three pieces; Art Kagin later estimated 5 to 6 survivors. None have appeared in a Heritage auction since lot 6609 in our 2000 Central States Signature. This is a well struck and lovely apricot-gold example. (Est. \$2,500-\$3,500).

EXPOSITIONS AND FAIRS

- 4239 Quintette of 1893 Columbian Exposition Pieces in Aluminum, MS63 Uncertified:** Each of the five 35 mm. pieces exhibits a draped Christopher Columbus on the obverse, and a building at the exposition on the reverse. This lot includes: Eglit-119, HK-202, Manufactures and Liberal Arts Building; Eglit-120, HK-191, Machinery Building; Eglit-122; HK-197, Agricultural Building; Eglit-127, HK-195, Fisheries Building; and Eglit-128, HK-181, Forestry and Transportation Buildings. (Total: 5 coins) (Est. \$1,000-\$1,500).

COUNTERSTAMPS

- 4240 Interesting Selection of 11 Counterstamped Pieces for Research:** 1810 large cent counterstamped BOSTON, Brunk B-895, Good host; 1817 large cent counterstamped HOBBS, AG host; 1827 large cent marked GOOD FOR 50 with the reverse divided into quarters with "50" stamped in two of the quadrants, Good host; 1828 large cent counterstamped HD, VG host; 1833 large cent counterstamped RD CRUIT (possibly Richard Cruit), VG host; 1838 large cent counterstamped O+K, Brunk O-6, Fine host; 1845 large cent counterstamped L. FATE, Brunk F-81, Good host; 1854 large cent counterstamped C. ORTH, Brunk O-118, Fine host; 1865 three cent nickel counterstamped EXCELSIOR in a bar punch, Fine host; Unidentified Liberty Seated dime counterstamped I.B.B. ST. LOUIS MO; 1819 Capped Bust half dollar counterstamped S. MARSH (Samuel Marsh was a Hartford, CT silversmith born in 1766, VF host, Ex: "Col." E.H.R. Green. Total: 11 pieces. (Est. \$600-\$800)
Ex: Eric P. Newman Numismatic Education Society. (Total: 11 coins)

HARD TIMES TOKENS

- 4241** (1834) Andrew Jackson MS63 PCGS. Low-4, HT-6, DeWitt-CE-1834-27. President Jackson is portrayed as a victorious Roman emperor on this evenly struck and satiny green-gold Hard Times token. Refreshingly free from marks or spots. Brass, 27 mm. Listed on page 413 of the 2017 *Guide Book*. (Est. \$800-\$1,200).
- 4242** 1838 Am I Not a Woman and a Sister MS65 Red and Brown PCGS. Low-54, DeWitt-CE-1838-19, HT-81. Copper, 28 mm, plain edge. Among the best known American antislavery tokens, along with DeWitt-SL-1859-1. The obverse design is derived from Conder token D&H-1037. Blundered reverse with retrograde N in UNITED. A nicely struck example with deep brown fields and devices. Orange-red outlines portions of the legends. Listed on page 413 of the 2017 *Guide Book*. (Est. \$700-\$1,000).
- 4243** Group of Eight NGC-Certified Hard Times and Civil War Tokens: 1840 Lakewood, New Jersey, Bergen Iron Works, HT-206 - Environmental Damage - Good Details; 1834 Providence, Rhode Island, W.A. Handy, HT-427 - Environmental Damage - AU Details; 1833 Providence, Rhode Island, Ephraim A. Hathaway, HT-428, AU58; 1863 Plainfield, Indiana, Fuld 770A-4a, Johnson & Oursler, MS63 Red and Brown; 1863 New York, New York, Fuld 630BU-3a, S. Steinfeld, MS63 Red and Brown; 1863 New York, New York, Fuld 630CH-1a, Thomas White, MS63 Brown; 1863 New York, New York, Fuld 630CH-3a, Thomas White, MS63 Brown; (1861-65) Cincinnati, Ohio, Fuld 165 FN-1a1, N. Mendal Shafer, MS63 Brown. (Est. \$700-\$1,000).
Ex: Eric P. Newman Numismatic Education Society. (Total: 8 coins)
- 4244** Impressive Offering of 19th Century New York Trade Tokens: **Buffalo:** HT-212A Patterson Bros., copper VG; HT-213 W.P. Thomson, copper VG; HT-214 W.P. Thomson, copper Fine; **New York:** NY E-41 Park Theater, copper VF; NY E-921A Tredwell, Kissam, copper Fine; NY E-957 C. & I.D. Wolfe, brass Fine; NY E-960 C. Wolfe, Spies, Clark, copper Electrottype; NY 61 S.H. Black, Electrottype Fine; NY 64 S.H. Black, Electrottype Fine; NY 67 S.H. Black, Electrottype VF; NY 151 Chesebrough Stearns, brass Unc; NY 155A Chesebrough Stearns, copper Unc; NY 175 John K. Curtis, silver Unc, Prooflike; NY 180 John K. Curtis, copper Unc; NY 210 Philip A. Dougherty, copper VF; NY 302 Havens, Hatter, German silver XF; NY 396 Professor Johnson, copper XF; NY 396 Professor Johnson, copper AU; NY 507 E. Lyon, brass AU; NY 508 E. Lyon, brass XF; NY 509 E. Lyon, brass XF; NY 599 Moss Hotel, brass XF; NY 602 Moss Hotel, brass XF; NY 616 W.J. Mullen, copper XF; NY 656 Stephen Richardson, brass XF; NY 657 Wm. H. Richardson, brass Unc; NY 658 Wm. H. Richardson, brass XF; NY 833 Lewis L. Squire & Sons, brass XF; NY 835 Lewis L. Squire & Sons, brass XF; NY 945 Uriah Welch, copper Unc; NY 948 H.B. West, copper Unc; NY 949 H.B. West, brass Unc; NY 970 Woodgate & Co., brass Unc; NY 987 Woodgate & Co., copper Unc; NY 998 Woodgate & Co., brass Unc; NY 630AV-1a John Matthews, copper VF; NY 50A (1880) City of New York Air Ship, White metal Unc; **Rochester:** NY 1018 Olcott & Brother, brass XF; NY 1019 Olcott & Brother, brass Unc; **Windsor:** NY 1068 C.A.M. Smith, copper XF. (Est. \$1,000-\$1,500)
Ex: Eric P. Newman Numismatic Education Society. (Total: 40 coins)
- 4245** (1844) L.G. Irving, New York, NY, & J.S. Pease, St. Louis, MO, VF30 NGC. HT-A282. Ex: John J. Ford, Jr. Brass, R.8. A very rare variant of the usually encountered L.G. Irving store card, with VAIN instead of RUIN in the peripheral legend. This midgrade example displays occasional small marks and a small area of granularity on the lower obverse. (Est. \$1,000-\$1,500).
Ex: John J. Ford, Jr. Collection, Part 23, (*Stack's-Bowers*, 8/2013), lot 22268, which realized \$882.50.
- 4246** 1837 R.E. Russell, 12 1/2 C., AU58 NGC. Low-128, HT-309, R.5. Dr. Feuchtwanger presumably struck this one-bit token variety on behalf of New York merchant R.E. Russell, since the alloy is German silver, and the obverse die is common to Breen-6 HT-268 Feuchtwanger cents. While the Feuchtwanger cents are fairly common, the R.E. Russell token is seldom encountered. A smooth stone-gray example with light wear on the snake and eagle's breast. (Est. \$1,000-\$1,500).

1837 S.S.B. Token, Choice AU Rare Hard Times Maverick

- 4247** 1837 S.S.B. AU55 NGC. Low-139, HT-464. Brass, 2.5 gms, 19.6mm. An elusive R.6 maverick Hard Times-era token. The Rulau reference notes, "It has been suggested, without evidence, that S.S.B. could stand for 'Scovill's Superfine Buttons.' The die work and size seem to clearly indicate some connection with the button-making industry." The date 1837 is quite bold on this example, with a large 8 and the 7 with a prominent cross-stroke. The brass planchet is well-struck and problem-free, and all details are well brought up, even at the interesting, decorative feathered-floral peripheries and in the unusual, intentionally textured background on each side that calls to mind the surface of a modern thimble. (Est. \$1,500-\$2,000).

Ex: Troy Wiseman Collection (*Heritage*, 9/2006), lot 5974, which realized \$2,185.

U.S. MERCHANT TOKENS (1845-1860)

- 4248** Small Selection of Important 19th Century Trade Tokens: San Francisco Calif 6 Joseph Brothers, copper Fine; Delaware Del 1 J. Randel, Jr., copper Fine; Indianapolis Ind 2 Parry Mfg. Co., copper Fine; Baltimore MD 76 Benjamin Jury, German silver XF; Massachusetts Mass 6 Apollo Gardens, silvered brass XF; Detroit Mich 2 J. Dimmick, copper Unc; Detroit Mich 3 J. Cragin, White metal AU. (Est. \$800-\$1,200).
Ex: Eric P. Newman Numismatic Education Society. (Total: 37 coins)

4250 "1792" William Idler, Coin Dealer, Philadelphia, PA, MS64 Red and Brown NGC. Baker-544A, Miller-Pa-211, W-15920, Musante GW-28. Copper, 32 mm, plain edge. The obverse imitates the Baker-25 Washington President pattern by Peter Getz. The reverse is a storecard for Philadelphia numismatist William Idler. A high grade example with orange-red fields and olive-brown high points. Marks are absent and carbon is minimal. (Est. \$400-\$600).

CIVIL WAR MERCHANTS

4251 Substantial offering of 88 Civil War Store Card Tokens. (Est. \$1,500-\$2,500)
Ex: Eric P. Newman Numismatic Education Society. (Total: 88 coins)

4252 1864 Drovers Hotel, St. Louis, MO, MS63 Red NGC. Fuld-MO910A-5a, R.9. Reeded edge. An unabraded orange-red Select example. A fingerprint fragment is near the D in DROVERS, and a retained lamination affects the 4 in the address. Drovers Hotel was one of only five issuers of Missouri Civil War tokens. The present piece was likely struck after the Civil War, given the several narrow cancellation marks (as made) on the headdress. (Est. \$2,000-\$2,500).

1864 Feuchtwanger Three Cent Token, MS64 Rare Fuld-NY630X-1j, HT-267

4253 1864 Feuchtwanger Three Cent, Eagle, MS64 PCGS. Low-179A, Fuld-NY630X-1j, HT-267. German silver, 25 mm, reeded edge. Dr. Lewis Feuchtwanger unsuccessfully lobbied for the U.S. Mint to adopt his German silver alloy for Federal coinage. He was the first to propose a three-cent denomination, eventually struck by the Mint in 1851. His tokens were chiefly struck during the Hard Times era, though backdated Feuchtwanger cent tokens were likely struck during the Civil War, as was the present rare variety. The eagle-and-snake motif, also seen on his cent tokens, originated on Mexican silver coinage. A sharply struck and unmarked almond-gold near-Gem. Listed on page 415 of the 2017 *Guide Book*. (Est. \$7,000-\$10,000).

4254 (1861-1865) Stoner & Shroyer, Adamsville, OH, MS65 NGC. DeWitt-USG-1868-39A, Fuld-NC-OH-AA-5b. Ex: John J. Ford, Jr. Brass, 18 mm, R.9. Dry good merchants L.D. Stoner and Solomon Shroyer were the only issuers of Civil War tokens in the small town of Adamsville, Ohio. The merchant die survived the war and was eventually muled with dies made by Key & Co. of Philadelphia, such as an 1868 U.S. Grant campaign medal. This die pair was listed in the first two editions of Fuld as Fuld-OH5A-5b but is now acknowledged as a post-Civil War variety. A mark-free example with a wheat-gold obverse and a dusky peach-gold reverse. (Est. \$900-\$1,000).
Ex: John J. Ford, Jr. Collection, Part 23, (*Stack's-Bowers*, 8/2013), lot 21580, which realized \$881.25.

CIVIL WAR PATRIOTICS

4255 Large Selection of Patriotic Civil War Tokens, including 100 different varieties: Fuld-1/229a VF; 1/391b AU; 1/436a VF; 5/288a XF; 5/288b AU; 6/268a AU; 6B/308a VF; 6D/310a MS; 7/315a AU; 7A/316a AU; 8A/317a AU; 8A/317a XF; 8b/309a XF; 9/405a Fine; 9/431a VF; 10/298a MS; 11/298a MS (2); 11/312a AU; 13/297a MS; 14/297a MS; 14/297a XF; 15/319a MS; 16/300a AU; 17/388a XF; 18/300a XF; 18/337a VF; 18/353a VF; 19/396a MS; 19/396b VF; 20/303a Fine; 20/384a Fine; 22/418a AU; 22/442a VF; 23/271a VG; 23/306a MS; 24/246a XF; 26/418a VF; 27/365a AU; 28/303b VF; 29/303a VF; 32/275a VF; 34/277a XF; 35/265a XF; 35/274a Fine; 35/277a XF; 36/271a XF; 36/340a MS; 37/255a MS; 37/256a MS; 37/434a MS; 37/434b MS; 41/337a XF; 42/336a XF; 43/388a AU; 45/332a MS; 45/350a VF; 46/335a MS; 46/339a XF; 47/332a AU; 48/299a AU; 49/343a XF; 50/335a MS; 51/334a MS; 51/342a XF; 53/336a XF; 54/179a Fine; 54/342a AU; 54/430a AU; 55/162a XF; 56/161a XF; 59/385a VF; 61/198a XF; 61/355a VF; 62/367a Fine; 63/366a AU; 63/443a XF; 64/362a XF; 66/370a XF; 68/198a VF; 68/355a VF; 69/369a MS; 80/351a AU; 81/351a XF; 82/351a MS; 82/352a XF; 83/264a VF; 87/356a VF; 88/361a Good; 90/364a MS; 90/364a VF; 117/420a XF; 118/418b AU; 135/441a Fine; 143/261a XF; 189/399a AU; 189/399a MS; 191/443a MS; 219/320a AU; 255/393a AU; 256/433a MS; 257/311a MS; 258/446a MS; 259/445a MS; 299/350a MS; 337/350a XF; 390/434a AU; 450/471a MS. (Est. \$1,500-\$2,500)
Ex: Eric P. Newman Numismatic Education Society. (Total: 108 coins)

Ex: Eric P. Newman Numismatic Education Society. (Total: 100 coins)

U.S. TRADE TOKENS (1866-1889)

4257 Offering of Nine Different Shell Cards: Hartford Live Stock Insurance Company, CT-250 pink XF; Cheap John, Crawfordsville, Indiana MS; C.A. Richards, Boston, Massachusetts, Rulau-544 blue AU; C.A. Richards, Boston, Massachusetts, Rulau-545 beige MS; Brokaw Brothers, New York, New York ivory AU; Munn & Co. Scientific American AU; H.A. Stone, Troy, New York salmon XF light corrosion; Udolpho Wolfe, New York MS; Grant & Colfax No Repudiation MS. (Est. \$2,000-\$3,000)
Ex: Eric P. Newman Numismatic Education Society. (Total: 9 coins)

ALASKA TOKENS

4258 Small but Important Offering of Alaska Good For Tokens: A.R.R.C., aluminum, 10C MS, Gould-Bressett 9; Gambell, St. Lawrence Island, Reindeer Commercial Co., set of eight, aluminum, brass, 1C - \$10 VF-XF, Gould-Bressett 20 to 25; Kivalina, Kivalina Reindeer & Trading Co., aluminum, 5C MS; Nome, New Lincoln Bar, brass, 50C VF env. damage; Nome, Polet Stores, fibre, 25C XF; Shishmaref, Shishmaref Native Store, set of five, aluminum, 5C - \$1 XF-AU. Total: 17 pieces. (Est. \$400-\$600)
Ex: Eric P. Newman Numismatic Education Society. (Total: 17 coins)

4259 (1907-1917) Valdez, Alaska, Copper Block Buffet, Gold Nugget, AU58 PCGS. Gould-Bressett 46, Benice 4C-II. Copper-nickel, 38 mm, with a thumb-shaped gold nugget at the obverse center, as usual for this famous Alaska token variety. A one-bit token with a mining scene is also known for this Gold Rush-era issuer, but it is the one dollar token bearing the nugget that commands bourse attention. A smooth olive-gold example with minor field hairlines below the nugget. (Est. \$800-\$1,200).

20TH CENTURY TOKENS AND MEDALS

4260 Hiatt & Co., Osage Agency, Indian Territory, Oklahoma, XF45 NGC. Brass, 25 mm. Plain edge. Listed at TokenCatalog.org under #59191. Obverse: horse and rider, armed with spear. Reverse: ONE DOLLAR / PAYABLE / IN GOODS / AT / HIATT & CO.'S STORE. A rare Rulau-unlisted Oklahoma territory token from the early 20th century. A compelling Western design, and a minimally marked walnut-brown example. (Est. \$700-\$1,000).
Ex: (Paul Koppenhaver, 2/1979), lot 220; John J. Ford, Jr. Collection; (Stephen Album, 8/2013), lot 1723.

4261 1927 New Monte Cristo Mining Company, C.C. Julian, MS63 NGC. Ex: Weber Collection. Sterling silver, octagonal, 42 mm. ALLEN on edge, per NGC holder. C.C. Julian, a con artist active during the 1920s, issued this medal to commemorate the opening of the New Monte Cristo Mine near Wickenburg, Arizona. Julian was majority shareholder of the Julian Petroleum Company, shares of which were extensively promoted in print media by Julian. To fend off California regulators, Julian purchased existing mines, including the New Monte Cristo, but its operations were soon shut down by the California State Corporation Commission. This satiny example displays even steel-gray toning. The high points display minor blending, and the fields show only minor contact. (Est. \$1,000-\$1,500).

4262 Collection of 82 Mostly Different Missouri Numismatic Items: State of Missouri: Plastic sales tax tokens (7) Unc.; **Carthage:** Union Trust Co. one quart strawberry token, aluminum. (Est. \$400-\$600)
Ex: Eric P. Newman Numismatic Education Society. (Total: 33 coins)

WORLD MEDALS

1946 Nobel Committee Medal, MS63 Gold Medallion for Physics

- 4264 1946 Nobel Committee 23K Gold Medal, MS63 NGC.** 27 mm. 20 grams. The five members of the Nobel committees are tasked with the identification of a worthy laureate for the Nobel Prize in the various classes. With just five committee members, these medals were struck in minuscule quantities and are extremely rare today. Issued to committee members for Physics, this medal exhibits inconsequential contact field marks, with fully brilliant and lustrous yellow-gold surfaces. Nobel's portrait on the obverse, and the arms of the Academy of Sciences on the reverse are bold well-struck.

Percy Williams Bridgman made discoveries in the field of high-pressure physics, earning the 1946 Nobel Prize for Physics. The Harvard University scientist invented an apparatus to produce extremely high pressures, leading to the study of material properties under non-ordinary circumstances. (Est. \$4,000-\$5,000).

MILITARY MEDALS

- 4265 Substantial Collection of Militaria:** Circa 1800 U.S. Army button, First Regiment Artillery, brass, VG; 1802 Peace of Amiens, Lord Cornwallis, bronze, Fine; 1843 Bunker Hill Monument, bronze, VF holed; Circa 1861 Ferrottype of Ellsworth the Martyr and Brownell the Avenger, VF holed; 1862 Civil War Battle between Iron Clads, bronze, Unc, red and brown; 1863 Pennsylvania Volunteers, bronze, with ribbon, Unc; 1863 Stonewall Jackson Memorial, white metal, Unc; 1866 Lt. - 4269 Assorted Large Format Medals:** 1860 Washington Cabinet of Medals, yellow bronze (20th century strike), Baker-326B, AU; 1885 U.S. Grant Death Medal, white metal, Unc, light corrosion; 1892 Massachusetts Mechanic Association Award Medal, silver, Unc; 1893 Chicago World's Fair, Eglit-98, white metal, Unc; another, XF; another, bronze, XF; 1904 Louisiana Purchase Exposition "Silver Medal" struck in bronze, Hendershot 30-50, 67 x 67 mm, Unc; 1904 Louisiana Purchase Exposition "Bronze Medal," 64 mm, Unc; another, AU; 1934 Maryland Tercentenary Medal, yellow bronze, AU; 1953 Dwight David Eisenhower Inaugural Medal, bronze, Unc; 1957 Eisenhower-Nixon Inaugural Medal, silver, 6 ounces, Unc; 1965 Lyndon B. Johnson Inaugural Medal, silver, 5 ounces, Unc; 1969 Richard Nixon Inaugural Medal, silver, 5 ounces, Unc; 1977 Jimmy Carter Inaugural Medal, silver, 6.48 ounces, proof (2). (Est. \$1,000-\$1,500).
Ex: Eric P. Newman Numismatic Education Society. (Total: 16 tokens)
- 4270 Large Lot of Historical Tokens and Medals:** This extensive group of tokens and medals spans the years from 1865 to 1939, and includes official medals, souvenirs, elongates, and smaller tokens. Several extremely important pieces are included. (\$600-\$800)
Ex: Eric P. Newman Numismatic Education Society. (Total: 46 coins)

- 4271 Assorted Historical Medals:** 1890 Allegheny City, PA Semi-Centennial Medal, white metal, with ribbon and hanger, XF; 1893 Columbian Exposition half dollar, with ribbon and hanger reading MANHATTAN, silver, XF; 1897 Grand Army of the Republic Medal, with hanger, bronze, Unc; 1907 Holland Society Half Moon Medal, silvered bronze, with loop, AU; 1907 Jamestown Exposition Scutiform Medal, silvered bronze, with loop, XF; 1907 Jamestown Exposition Uniface Medal, brass, with loop, Unc; 1908 Washington, D.C. International Congress on Tuberculosis, bronze, with loop, Unc; 1909 Hudson-Fulton Exhibition Committee Medal (HK-379), silver, with ribbon, hanger, and pin, XF; 1912 New York Mayor's Reception Committee Badge, gilt, with ribbon and hanger, XF; 1915 Panama Pacific Exposition Guard's Service Medal, bronze, with ribbon, AU; 1916 New York Medal for Mexican Border Service, bronze, with ribbon, XF; 1922 Grant Birth Centennial Medal, bronze, with ribbon, Unc; 1925 Connecticut Service Medal, with ribbon, bronze, Unc; 1933 Chicago Century of Progress Aviation Medal, bronze, Unc. (Est. \$400-\$600)
Ex: Eric P. Newman Numismatic Education Society. (Total: 14 coins)
- 4272 Half-Dozen Large Medals in Original Boxes:** 1932 Lake Placid Winter Games, bronze, 46 x 59 mm, by the Robbins Company, Attleboro, Massachusetts, Unc; another, similar, 55 mm. diameter, Unc; 1965 Lyndon B. Johnson Inaugural Medal, silver 5 ounces, Unc; 1976 National Bicentennial Medal, silver, 76 mm, Unc; 1984 Bank of New York Bicentennial Medal, bronze, Fugio cent design, 76 mm, Unc; 1986 American Numismatic Society, Statue of Liberty, bronze oval, 103 mm x 80 mm, Unc, green patina. (Est. \$600-\$800).
Ex: Eric P. Newman Numismatic Education Society. (Total: 6 coins)
- 4273 Unusual Collection of Sales Tax Tokens:** A collection of 15 "Milk Bottle" tokens issued in Missouri in 1935 and 1936 is housed in a home-made glass display holder; a second, similar home-made display holder holds 31 tokens from various states including Colorado, Illinois, Kentucky, Missouri, New Mexico, Oklahoma, and Washington; also included is an uncut strip of five Washington Sales Tax coupons of Buchmann Hardware, Inc. (Est. \$600-\$800).
Ex: Eric P. Newman Numismatic Education Society. (Total: 47 coins)
- 4274 Assorted Good For and Related Tokens:** This delightful lot includes various good for tokens, sales tax tokens, coal company scrip, and similar pieces from various states. Several 19th century Western tokens are included, highlighted by a 37 mm. brass G.W. FELT token from South Dakota. (Est. \$600-\$800).
Ex: Eric P. Newman Numismatic Education Society. (Total: 57 coins)

End of Session Three

SESSION FOUR

EARLY HALF DOLLARS

- 4275** 1795 2 Leaves, O-110, T-21, R.3 — Improperly Cleaned — NGC Details. **Fine.** An early die state without cracks across the upper right obverse. This steel-gray Flowing Hair half dollar is nicely defined and minimally abraded. The portrait displays faint vertical hairlines, but many collectors would be pleased to possess this scarce introductory silver type coin.

1795 Half Dollar, O-110a, VF20
No Adjustment Marks, Smooth Wear

- 4276** 1795 2 Leaves, O-110a, T-21, R.3, VF20 PCGS. Tompkins Die State 4/2. A pair of curved, parallel die cracks on the obverse between RTY of LIBERTY and stars 10 and 11 are the most recognizable features of the O-110a variety. The 9 in the date is repunched on the left side of the upper loop. The reverse displays 9 berries left, 8 right, with two berries on the inside of the branch beneath each wing. This is a warm-gray example that has smooth wear on both sides but only light abrasions and marks. An uneven strike shows weak dentilation at the lower right-obverse, and at the corresponding upper-right reverse. The central elements are well-defined for the grade. NGC ID# 24E7, PCGS# 39229 Base PCGS# 6052

- 4277** 1795 2 Leaves, A Over E in STATES, O-113, T-14, R.3, VG8 PCGS. A powder-blue and tan-brown Flowing Hair type representative. Marks are surprisingly few. Sharper than anticipated for the grade, since all legends and dentils are bold. The only die marriage with the A over E blunder in STATES. NGC ID# 24E7, PCGS# 39253 Base PCGS# 39252

1795 O-113a Half Dollar, VF20
A Over E in STATES

- 4278** 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, VF20 PCGS. Tompkins Die State 3/1. A lumplike die crack between the date and star 15 on the obverse joins the famous A over E in STATES on the reverse to confirm the die marriage, while a faint crack at the top of LIBERTY signifies the later die state of O-113a. Pleasing stone-gray toning with slate-gray overtones represent the original surfaces, which are surrounded by high rims and full dentils. The date and all other motifs are sharply defined for the VF20 grade. NGC ID# 24E7, PCGS# 39254 Base PCGS# 39252

- 4279** 1803 Large 3, Small Reverse Stars, O-102a, T-2, High R.3, XF45 PCGS. Tompkins Die State 3/4. The late clashed and cracked die state. Rich gunmetal-gray toning blankets this well-defined Choice XF representative. The obverse center displays faint parallel roller marks, but post-strike contact is inconsequential. NGC ID# 24EJ, PCGS# 39272 Base PCGS# 6066

- 4280** 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3 — Improperly Cleaned — NGC Details. **AU.** Tompkins Die State 1/2. A pearl-gray example with hints of gunmetal toning on the lower reverse. Sharply struck, unabraded, and partly lustrous. Lightly cleaned, but undoubtedly pleasing to many collectors.

- 4281** 1805/4 O-102, T-5, R.3, VG8 PCGS. The early die state variant of this popular *Guide Book* overdate variety, this piece showing even wear with complete rims and partial central detail. Both sides exhibit deep olive-gray toning and smooth underlying surfaces. NGC ID# 24EH, PCGS# 39292 Base PCGS# 6070

- 4282** 1805 O-109, T-14, R.4, XF40 PCGS **Secure.** Tompkins Die State 2/2. A relatively early die state, without the heavy cracks that cut short the life of the reverse die. This example displays peripheral tobacco-brown toning, and is minimally marked aside from a faint hair-thin horizontal line below the scroll. NGC ID# 24EG, PCGS# 39282 Base PCGS# 6069

1805 O-112 Half Dollar, AU50
Pinpoint Strike Detail

- 4283** 1805 O-112, T-2, R.2, AU50 NGC. Tompkins Die Stage 1/1. This is the most frequently encountered variety for the 1805 half dollar, but this piece survives in an uncommonly fine state of preservation. In fact, it just makes the low end of Tompkins' Condition Census. Deep cobalt-blue, olive, and gold patina clings to the upper obverse border. The color on Liberty's face lightens somewhat, where slight friction is present. Strike detail remains razor-sharp on the curls, feathers, and shield. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069

1806 Knob 6, Small Stars Half, AU55
O-106, Luster Remains

- 4284** 1806 Knob 6, Small Stars, O-106, T-4, R.4, AU55 NGC. Tompkins Die Stage 2/1. The 1 of the date nearly touches the hair curl, the 6 is high and slender, and the AME of AMERICA is solidly joined at the base. Sharply defined and well-centered, with flashes of cobalt-blue, gold-brown, and lavender patination. Traces of luster are apparent in the recesses, and the surfaces are devoid of significant marks. NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

- 4285** 1806 Pointed 6, Stem, O-114, T-16, R.5, XF40 PCGS **Secure.** Tompkins Die State 1/3. The bisecting reverse crack through the E in AMERICA is present but not yet dramatic. A richly detailed example with glimmers of luster within Liberty's curls. Wheat-gold and cream-gray toning grace lightly marked surfaces. NGC ID# 24EJ, PCGS# 39315 Base PCGS# 6071

4286 1806 Pointed 6, Stem, O-115a, T-17, R.2, VF35 PCGS Secure. Tompkins Die State 5/3. Designated as O-115 by PCGS, but this is the late die state with chips near star 2 and a die crack atop STATES. Deep lavender toning encompasses minimally marked and nicely defined surfaces. NGC ID# 24EJ, PCGS# 39318 Base PCGS# 6071

4287 1806 Pointed 6, Stem, O-116, T-20, R.3, XF45 PCGS. CAC. Tompkins Die State 3/4. Aquamarine toning embraces the obverse field. Rose-red and tan-brown patina is also pervasive. This moderately circulated Draped Bust half is minimally abraded and will please the specialist. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

4288 1806 Pointed 6, Stem, O-119, T-27, R.3, XF40 NGC. A middle die state, clashed but without the later reverse peripheral crack. A minimally abraded gunmetal-gray half dollar that shows moderate inexactness of strike near the hair ribbon and opposite on the left (facing) wing. NGC ID# 24EJ, PCGS# 39323 Base PCGS# 6071

**1806 Draped Bust Half Dollar, AU53
Scarce Pointed 6, Stem, O-123 Variety**

4289 1806 Pointed 6, Stem, O-123, T-23, Low R.5, AU53 NGC. The 1 in the date touches the curl and the 6 touches the bust, and two small tines extend from the shield points, identifying the scarce O-123 variety. This attractive AU53 example is well-detailed, with a touch of the always seen softness on the central reverse. Shades of greenish-gold and bluish-gray toning blanket the lightly abraded surfaces, with much original mint luster underneath. NGC ID# 24EJ, PCGS# 39329 Base PCGS# 6071

BUST HALF DOLLARS

4290 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU50 PCGS. CAC. Both bottom serifs are present on the 1 of the date to confirm the O-112 variety, which features the 50 over 20 denomination and Large Stars on the obverse. Iridescent toning retains glimpses of mint luster at the margins with only slight wear on the chin, neck, and bust line. The surfaces are smooth with one or two tiny ticks and light die clashing on each side. A popular *Guide Book* variety of the First Style Capped Bust design with CAC endorsement. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

4291 1807 Capped Bust, Small Stars, O-113, R.2, XF40 PCGS. Rich stone-gray toning embraces this moderately circulated first-year Capped Bust half dollar. The shield lines are sharp, and marks are trivial except for a brief, subtle, and shallow scrape above the eagle's head. NGC ID# 24EN, PCGS# 39359 Base PCGS# 6087

4292 1809 XXX Edge, O-110, High R.4, XF45 NGC. A very scarce die marriage often encountered with problems. The present problem-free example offers minimally marked cream-gray surfaces. Luster peers from protected regions. Diagnostics for the variety are obvious, such as the heavy die crack through star 4 and the repunched U in UNITED. NGC ID# 4DN7, PCGS# 39382 Base PCGS# 6093

**1809 Half Dollar, O-111a, AU58
Pleasant Border Toning**

4293 1809 III Edge, O-111a, R.2, AU58 PCGS. A die mark on Liberty's shoulder above the 0 in the date identifies this collectible variety. This piece represents the late die state with a cracked reverse. The coin is boldly struck with no significant wear. Brilliant centers cede to golden and olive-green peripheries, giving the coin pleasant visual appeal. There are no distracting abrasions. NGC ID# 24ES, PCGS# 39389 Base PCGS# 6094

4294 1811/10 O-101, R.1, AU53 NGC. The 1811/10 is a popular overdate variety listed in the *Guide Book*. This lovely AU example has an original antique finish replete with olive-green, cobalt-blue, and golden-gray tones. Well-detailed with elegant eye appeal. Census for the variety: 3 in 53, 16 finer (1/17). NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

4295 1812/1 Small 8, O-102a, R.2, AU50 PCGS. Rich blue-green, butter-gold, and lavender-red toning embraces this lightly circulated overdated half dollar. Refreshingly unabraded aside from a small obverse rim nick at 12 o'clock. NGC ID# 24EY, PCGS# 39444 Base PCGS# 6101

**1814/3 O-101a Half Dollar, AU55
Attractive *Guide Book* Overdate**

4296 1814/3 O-101a, R.2, AU55 PCGS. CAC. Multiple obverse and reverse die clashing and a diagnostic collection of die cracks on both sides identify the late die state of this popular overdated half. Faint almond-gold toning at the margins adds natural appeal to the stone-gray surfaces, while substantial silver luster remains among the stars and reverse legend to confirm the Choice About Uncirculated grade. A few light abrasions are unseen without a lens, and — with the exception of the left (facing) wing feathers — all of the motifs remain sharply defined. Population: 35 in 55, 23 finer. CAC: 9 in 55, 8 finer (1/17). NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

4297 1814 Single Leaf, O-105a, R.4, XF45 PCGS. The Single Leaf variety is a die lapping error, similar to the FS-401 1922 No D cent, and the FS-901 1937-D Three-Legged nickel. The dies clashed heavily, apparent by the "bars" near Liberty's ear. The reverse was removed from service, lapped, and returned to service. The lapping removed one of the two uppermost leaves. This unmarked example displays light to moderate wear, along with consistent gunmetal-gray toning. NGC ID# 24F3, PCGS# 39481 Base PCGS# 6105

4298 1814 O-107, R.2, AU55 PCGS. The pick-up point for Overton-107 is a die chip above the diagonal of the N in UNITED. This is a late die state example without dentils on the reverse or the upper obverse. The fields show multiple sets of clash marks, but no abrasions merit mention. Light tan toning visits partly lustrous cream-gray surfaces. NGC ID# 24F3, PCGS# 39484 Base PCGS# 6105

4299 1819/8 Large 9, O-102, R.2, AU58 PCGS. CAC. Incorrectly designated as a Small 9 by PCGS. Vibrant luster fills the borders, eagle, and curls. Sea-green, powder-blue, and steel-gray toning visits well-struck surfaces. The cheek and nearby field display moderate marks. NGC ID# 24FC, PCGS# 39556 Base PCGS# 6119

4300 1820 Square Base 2, Large Date, No Knob, O-108, R.2, AU58 PCGS. Dusky peach-gold and lavender toning encompasses this Borderline Uncirculated half dollar. Navy-blue toning accompanies the arrowheads. No marks are consequential across the sharply struck and semiprooflike surfaces. NGC ID# 24FD, PCGS# 39570 Base PCGS# 6123

1823 O-107 Half Dollar, MS63 Brilliant and Boldly Rendered

4301 1823 O-107, R.2, MS63 PCGS. This variety is attributed by the joined bases of ME and a die line through the eagle's right talon. Extensive die cracks encircle the reverse, and a series of clash marks appear in the field below UNUM. This razor-sharp Capped Bust half dollar offers complete brilliance, bright luster, and minimal marks. Liberty's portrait exhibits dramatic doubling, as often seen. NGC ID# 47HY, PCGS# 39611 Base PCGS# 6131

4302 1825 O-113, R.1, MS63 PCGS. A lustrous and practically brilliant Select Bust half. The strike is bold except on the stars. A strike-through (as coined) is below UNUM, and one hair-thin line is noted through the upper leaves. NGC ID# 24FL, PCGS# 39660 Base PCGS# 6142

4303 1825 O-114, R.1, MS62 PCGS. CAC. The left side of the 1 in the date is recut on this obverse. A frosty Mint State piece, this lustrous example has delicate mint-green and gold toning on its silver-gray surfaces. NGC ID# 24FL, PCGS# 39661 Base PCGS# 6142

1825 O-114 Half Dollar, MS63 Attractive Peripheral Golden Patina

4304 1825 O-114, R.1, MS63 PCGS. Light autumn-gold toning visits the borders of this lustrous and crisply struck Select representative. A strong loupe reveals a few delicate hair-thin marks on the portrait, but the eye appeal is nonetheless imposing. The lower left border of the shield is recut; Dr. Glenn Peterson's pick-up point for Overton-114. NGC ID# 24FL, PCGS# 39661 Base PCGS# 6142

4305 1827 Square Base 2, O-114, R.3, MS62 PCGS. Dusky autumn-brown, navy-blue, and dove-gray toning embrace this coruscating and nearly unabraded half dollar. The right-side stars are soft, but the major devices are well struck. Overton-114 is the "Line in Y" variety, with the line apparent on the left diagonal of the Y in LIBERTY. NGC ID# 24FN, PCGS# 39709 Base PCGS# 6144

4306 1828 Curl Base 2, Knob, O-107, R.2, MS63 PCGS. Ex: Link. A pleasing Select example with medium chestnut-gold and steel-gray toning. The coruscating surfaces are smooth, and every star is sharply impressed. A repunched U in UNITED is an identifier for O-107, along with a tiny hair curl below the I in LIBERTY. NGC ID# 24FR, PCGS# 39760 Base PCGS# 6149

1829/7 Bust Half, AU58 O-102a, Scarce Late Die State Example

4307 1829/7 O-102a, R.5, AU58 PCGS. The PCGS holder says O-102, but a heavy die crack through the 9 in the date to the clasp confirms it is the much-scarcer O-102a variety, listed as R.5 in Overton. Stephen Herrman's Autumn, 2016 listing also indicates R.5 and shows just one finer example, with the present coin tied with one other AU58 (conceivably, it is the same coin). At first glance this piece has the appearance of a considerably higher grade. Only upon close inspection does one notice the light high-point rub that accounts for the near-Mint grade. Brilliant and frosty mint luster remains over the ivory surfaces with splashes of delicate gold toning. An important coin for Bust half Overton variety specialists, seldom offered so fine. NGC ID# 24FT, PCGS# 39809 Base PCGS# 6155

4308 1830 Small 0, O-101, R.1, MS61 PCGS. Medium caramel-gold toning is glows evenly across the frosty surfaces with a blush of golden-brown on the lower reverse and a dab of steel-blue near the eagle's left (facing) wing. Smooth and lustrous, with a few tiny marks consistent with the assigned grade. A late die state example with the stars and UNITED drawn toward the rims. NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

4309 1830 Small 0, O-113, R.2, MS63 PCGS. Faint gold toning graces this lustrous and well struck Select half dollar. Refreshingly unabraded and highly attractive. Dr. Glenn Peterson attributes Overton-113 by a diagonal die line from the eagle's left (facing) shoulder. NGC ID# 24FU, PCGS# 39825 Base PCGS# 6156

4310 1830 Large Letters, Small 0, O-114, R.5, PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been cleaned. An evenly worn but subdued pearl-gray example of this scarce R.5 variety, with a few faded marks but no significant abrasions. The words UNITED and STATES are crowded close together to confirm the O-114 reverse, while a filled area at the top of the 3 in the date is diagnostic of the obverse. The O-114 is the only Large Letters variety for the date.

4311 1830 Large Letters, Small 0, O-114, R.5 — Tooled, Cleaned — ANACS. AU Details, Net VF30. 1830 Overton-114 is the only Large Letters variety for the date, and since it is extremely scarce, it commands a separate *Guide Book* listing and an enormous premium. Certified in a small-sized holder. Upon first glance, the present example appears to be an attractive and well-defined pearl-gray piece with peripheral orange-gold toning. Close inspection reveals hairlines and subtle smoothing on the obverse field. NGC ID# 24FU, PCGS# 39836 Base PCGS# 39835

- 4312 1830 Large O, O-123, R.1, MS63 PCGS.** A splendid Bust half dollar with vibrant cartwheel luster and dusky chestnut-gold toning. The strike is bold, and no marks are noticeable. A late die state with a crack through stars 4 to 6. The outer star points are drawn toward the edge. NGC ID# 24FU, PCGS# 39834 Base PCGS# 6157

**1832 Capped Bust Half Dollar, MS64
Small Letters, O-111 Variety**

- 4313 1832 Small Letters, O-111, R.1, MS64 NGC.** A short diagonal die line in the hair, below TY in LIBERTY, identifies the popular O-111 variety. Sharply detailed on the central design elements, this attractive Choice specimen shows just a touch of the usual softness on some star centers. The well-preserved surfaces show intense shades of bluish-gray toning, with highlights of pale gold at the peripheries. NGC ID# 9KXV, PCGS# 39869 Base PCGS# 6160

**1832 Half Dollar, MS64
Small Letters, O-112**

- 4314 1832 Small Letters, O-112, R.2, MS64 PCGS Secure.** A dash to the left of the 1 in the date eases attribution. This lustrous near-Gem features light golden toning that deepens slightly near the rims. A few stars are lightly impressed, but the overall strike is good and the surfaces are void of relevant marks. A desirable Capped Bust type coin.
Ex: *Long Beach Signature* (Heritage, 9/2011), lot 3989. NGC ID# 24FW, PCGS# 39870 Base PCGS# 6160

- 4315 1832 Small Letters, O-113, R.2, MS63 PCGS. CAC.** Close to O-113a with the stars drawn toward the rim, but dentils are apparent on the reverse near 3, 7, and 12 o'clock. A Condition Census example of this distinctive Overton variety. The arrowheads are very crude, and the A in STATES is entered northeast of its proper position. The dove-gray surfaces are smooth aside from delicate contact on Liberty's neck. NGC ID# 24FW, PCGS# 39871 Base PCGS# 6160

- 4316 1833 O-106, R.2, MS62 NGC.** Light butter-gold and powder-blue toning visits this lustrous Bust type coin. Marks are limited to from faint clusters near Liberty's neck and below the eagle's beak. The centers are well struck, although the borders show incompleteness. A late die state with the stars and peripheral letters drawn toward the rim. NGC ID# 24FX, PCGS# 39894 Base PCGS# 6163

- 4317 1834 Large Date, Small Letters, O-104, R.2, MS62 PCGS.** Light to medium wheat-gold toning enriches this coruscating Capped Bust half. Marks are chiefly limited to a faint curly line on the left obverse field. The strike is good aside from blending on the star centers. NGC ID# 24FY, PCGS# 39908 Base PCGS# 6165

REEDDED EDGE HALF DOLLARS

**1836 Reeded Edge Half, GR-1, XF45
Sharp Design Elements**

- 4318 1836 Reeded Edge, GR-1, R.2, XF45 PCGS.** This is a sharp example of the elusive first-year Reeded Edge issue, showing nearly AU-level detail that is only toned in deep olive-gray patina that reduces the PCGS assessment. The surfaces are smooth, and the strike is bold. An outstanding coin for the grade in every respect. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

**1836 Reeded Edge Half, AU Sharpness
GR-1, Early Steam Press Issue**

- 4319 1836 Reeded Edge, GR-1, R.2 — Cleaning — PCGS Genuine. AU50 Details.** Always in demand for its status as the first half dollar struck on the Mint's new steam press, the 1836 reeded edge issue has a reported mintage of just 1,200 pieces (although that quantity is likely understated given the number of circulated survivors). This example shows greenish-gray coloration along with a few light abrasions and hairlines, but the cleaning was subtle and solid AU details remain. Traces of mint luster add to the appeal despite the lack of a numeric grade.

**1837 Reeded Edge Half, MS63
GR-14, Lustrous Late Die State Example**

- 4320 1837 GR-14, R.1, MS63 PCGS.** Delicate tan-gold toning graces the borders of this coruscating and crisply struck example. The coin is refreshingly free from distracting abrasions. A prominent die crack descends across the obverse border from 10 to 5 o'clock and runs downward across Liberty's drapery and through the date — diagnostic of GR-14. Slight recutting on the 7 is visible at the inner upright and at the top of the flag. Extensive die cracks on the reverse traverse through the legends and into the eagle's left wing confirm the terminal die state. Despite the multiple die cracks, the central motifs retain a sharp strike. NGC ID# 24G4, PCGS# 531060 Base PCGS# 6176

- 4321 1838 GR-6, R.3, MS62 NGC.** A lustrous and lovely type representative. Golden-brown toning visits the obverse and enriches most of the left reverse. Refreshingly unabraded. The strike is bold at the centers and somewhat soft throughout the margins.
Ex: Houston Signature (Heritage, 12/2008), lot 723. PCGS# 531087 Base PCGS# 6177
- 4322 1838 GR-14, R.3, MS61 NGC.** A rim die break near star 13 allows ready attribution. Steel-gray and lavender toning envelops this satiny and unmarked reeded edge half dollar. The strike is bold, and the originality is undeniable.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 1528, which realized \$805. PCGS# 531095 Base PCGS# 6177
- 4323 1839 Large Letters, GR-7, R.1, AU58 PCGS. CAC.** Rich dove-gray and walnut-brown toning embraces this satiny near-Mint final-year Capped Bust half. The fields are smooth, and the portrait shows only minor contact. The borders show occasional incompleteness, usual for GR-7. NGC ID# 24G6, PCGS# 531104 Base PCGS# 6179

**1839-O GR-1 Half Dollar, AU53
Popular Obverse Mintmark**

- 4324 1839-O GR-1, R.1, AU53 PCGS.** The obverse mintmark, an ever-popular feature of this New Orleans issue, shows recutting at the base, confirming the usual die pair. Both the obverse and reverse are in very late states with extensive die cracks. A thin veil of antique patina covers this lightly circulated example. Design definition remains strong. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

**1839-O Half Dollar, AU53
GR-1, Rich Violet Patina**

- 4325 1839-O GR-1, R.1, AU53 PCGS.** This is the usually seen variety with recutting on the mintmark. The dies are in a late state. Two factors account for the popularity of the 1839-O: the obverse mintmark placement, and the unavailability of the only other New Orleans issue in the series. Blue-gray and peach-orange hues drape each side. Well-struck with minimal high-point friction. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181
- 4326 1839-O GR-5, High R.4, XF45 NGC.** Concerning GR-5, Dick Graham writes, "A very scarce variety, which is unknown at this time in Mint State. Finding an original, no problem coin in any grade will be a very difficult task, and will demand both perseverance and patience on the part of a collector." This well-defined cream-gray example displays ample pockets of luster. The sole mentionable mark is above the eagle's left (facing) shoulder. PCGS# 531110 Base PCGS# 6181

SEATED HALF DOLLARS

- 4327 1839 With Drapery, WB-102, MS62 PCGS.** A satiny forest-green and walnut-brown first-year Seated half dollar. Both sides are surprisingly void of marks. The strike is good, although incomplete on the eagle's left (facing) ankle. A minor vertical lamination (as produced) is noted near the O in OF. NGC ID# 24GL, PCGS# 572001 Base PCGS# 6232

**1840 Seated Half, Pleasing MS64
Reverse of 1839, Small Letters**

- 4328 1840 Small Letters, WB-101, MS64 PCGS.** Taupe-gray and gunmetal-blue toning blanket both sides of this Choice Uncirculated Small Letters half, with enough silver luster peeking though the patina for strong eye appeal. The fields are smooth and semireflective beneath the pleasing, original color. The strike is sharp but not full, with the star centers all present but not fully crisp. Only tiny marks are widely separated and random in their appearance, justifying the near-Gem grade. Any early Seated half in MS64 is notably scarce-to-rare. Population: 15 in 64 (1 in 64+), 14 finer (1/17). NGC ID# 24GM, PCGS# 572002 Base PCGS# 6234
- 4329 1840 Small Letters, Repunched Date, WB-103, MS63 NGC.** The 0 in the date is moderately repunched southeast. Golden-brown, sea-green, lavender, and powder-blue patina graces this satiny and minimally marked half dollar. Well struck aside from the eagle's left (facing) claw. PCGS# 505690 Base PCGS# 6234
- 4330 1846 Medium Date, WB-101, MS63 NGC.** Although the reverse is brilliant, the obverse displays russet-gold toning along the border. Crisply struck and nearly unabraded with good luster and minor mint-made roller marks on the left obverse field. Interesting rim die breaks are noted at 2:30 on the obverse and at 2 and 11 o'clock on the reverse. NGC ID# 24H6, PCGS# 572041 Base PCGS# 6251
- 4331 1846 6 Over Horizontal 6, WB-104, FS-301, XF45 PCGS. CAC.** One of the great blundered date varieties. The 6 in the date was initially entered at a 90 degree angle, then corrected. No attempt seems to have been made to efface the "lazy" 6 from the die. This Choice XF example offers dusky dove-gray and forest-green toning. A few thin marks are noted near star 2. The reverse has a retained die break over UNIT. NGC ID# 24H6, PCGS# 409888 Base PCGS# 6254

**1847/(6) Half Dollar, XF45
WB-102, FS-301, Late Die State**

4332 1847/(6) WB-102, FS-301, Late Die State, XF45 PCGS. While the late die state of the 1847/(6) is not as challenging as the early die state with remnants of an underlying 6 in the date, several interesting characteristics remain in the later die stages that intrigue Seated half specialists. Die doubling in LIBERTY and the scroll is strongest at TY, as well as on the upper shield stripes and shield border. This Choice XF example is sharply defined with stone-gray toning and bluish-gray overtones. Traces of orange-gold luster remain in sheltered areas. PCGS# 537379 Base PCGS# 6258

4333 1849 WB-101 MS63 PCGS. CAC. Powder-blue, wheat-gold, and olive-green toning encompasses this satiny and minimally marked Select representative. The strike is sharp except on the right-side stars. Scarcer than suggested by the mintage, likely due to melting during the 1850s. NGC ID# 24HE, PCGS# 572069 Base PCGS# 6262

4334 1849 Repunched Date, WB-103, MS62 PCGS. One of several interesting RPD varieties for this Philadelphia No Motto issue. A satiny, minimally marked, and fully struck representative bathed in dusky lavender-red and autumn-gold toning. PCGS# 572070 Base PCGS# 6262

**1852 Seated Half Dollar, MS63
Low-Mintage Philly Issue**

4335 1852 WB-101 MS63 PCGS. A splendid example with light to medium olive-gold and plum-mauve toning. Lustrous and minimally marked with softness noted on Liberty's hair and nearby stars. The 1852 has a mintage of only 77,130 pieces, and at least a portion of the issue was likely melted by speculators, since the bullion value exceeded face due to the California Gold Rush. Population: 21 in 63, 10 finer (1/17). NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

4336 1852-O WB-101, Die Pair 1, R.4, AU55 ANACS. Apricot-gold fields and devices are bounded by peripheral forest-green. A partly lustrous and nicely struck Choice AU example. Marks are minor, and limited to lines on the field near the left corner of Liberty's rock. Certified in a small-sized holder. PCGS# 572084 Base PCGS# 6269

4337 1852-O WB-101, Die Pair 1, R.4, AU55 PCGS. Only 144,000 half dollars were minted in New Orleans in 1852, at a time when demand was low since the silver value was greater than the face value. This sharply struck example has reflective fields and lustrous silver surfaces with delicate peripheral gold toning. Population: 11 in 55, 13 finer (1/17). PCGS# 572084 Base PCGS# 6269

**1855/54 Arrows Half Dollar, MS62
WB-102, FS-301, Sought-After Variety**

4338 1855/54 Arrows, WB-102, FS-301, MS62 PCGS. The 1855/54 Arrows half dollar is a collectible *Guide Book* variety in circulated condition, but it becomes very rare in Mint State. This piece has minimally toned interiors surrounded by violet, mauve, and blue patina around the edges. Softly lustrous and well-struck over the central design elements. Faint marks define the grade. Population: 4 in 62, 9 finer (1/17). NGC ID# 24JN, PCGS# 413720 Base PCGS# 6282

4339 1856-S WB-101, Die Pair 6, R.5, AU53 PCGS. This richly toned example exhibits substantial luster and sharp design definition, all beneath golden-brown and iridescent toning. Population: 8 in 53, 20 finer (1/17). PCGS# 572098 Base PCGS# 6289

**1861-O WB-101 Seated Half, MS63
Sharp and Lustrous Louisiana Issue**

4340 1861-O WB-101, Die Pair 6, R.3, MS63 PCGS. The obverse die was used by both the State of Louisiana and the Confederacy. The present example is struck from the first use of the obverse die showing strong dentils, paired with a reverse that displays a small defect on the upright of the R in AMERICA. Later uses of the obverse develop weak dentils beneath the date and a die crack from stars 9 to 13. Richly toned in umber-gray and sea-green shades with reddish-gold highlights, the attractive surfaces are smooth and lustrous with only a few minor marks. The strike is quite sharp on both sides, benefiting from the fresh dies. NGC ID# 24J8, PCGS# 572146 Base PCGS# 6303

**1861-O Seated Half, MS64
WB-101, Attractive New Orleans Issue**

- 4341** 1861-O WB-101, Die Pair 6, R.3, MS64 PCGS. Struck from an early state of the dies while the New Orleans Mint was under the authority of the State of Louisiana, this lustrous and attractive half dollar has claims to an even higher grade. The Choice fields are exceptionally free of abrasions on both sides and the strike is sharp throughout. Marks are limited to a few small ticks on Liberty's left (facing) arm and a nick on the pole. Golden-gray toning displays blue accents that are especially vibrant within the eagle's plumage and at the reverse legend. A sparkling near-Gem, scarce this nice. Population: 33 in 64 (1 in 64+), 14 finer (1/17). NGC ID# 24J8, PCGS# 572146 Base PCGS# 6303

**1861-O WB-102 Half Dollar, XF45
Confederate Obverse, FS-401**

- 4342** 1861-O CSA Obverse, WB-102, Die Pair 11, R.3, FS-401, XF45 PCGS. After a brief period of operations in 1861 under Union authority, the New Orleans Mint transitioned to control by the State of Louisiana, and eventually operated under the authority of the Confederacy. Most of the 1861-O half dollars were struck under either Louisiana or Confederate authority. Seven varieties are considered CSA half dollars, but only the current variety (W-11) utilizes the same obverse that was later paired with the famous Confederate reverse (W-12). The iconic die crack from the edge to the right of star 7 to the bridge of Liberty's nose, chin, and shoulder is the most notable feature of the obverse die, as well as a date that slants sharply upward. This Choice XF example displays a strong die crack and appealing dappled-gray toning. Traces of silver luster remain at the margins. NGC ID# 24J8, PCGS# 390906 Base PCGS# 39968

- 4343** 1861-O C.S.A. Issue, WB-103/104, Bisected Date, Speared Olive Bud, Die Pair 14, R-4 — Shipwreck Effect (B) — NGC Details. Unc. Ex: S.S. Republic. The salvage and conservation efforts were well-rewarded by this example, struck from a scarce C.S.A. die pair. The distinctive variety was struck at the New Orleans Mint while it was operated by the Confederacy. The "Bisected Date" refers to a vertical crack through the left border of the 6. The "Speared Olive Bud" shows parallel die lines through the upper olive bud on the reverse. Brilliant with a few areas of white cloudiness, this softly lustrous shipwreck survivor shows the expected finely granular surfaces with Uncirculated definition and a remarkably sharp strike. PCGS# 516984 Base PCGS# 6303

**1861-O Seated Half, MS63
WB-104, Speared Olive Bud Reverse**

- 4344** 1861-O Speared Olive, WB-104, Die Pair 15, R.2, MS63 PCGS. The reverse of this Select Uncirculated half dollar — struck under Confederate authority at the New Orleans Mint — is highly sought by specialists for the Speared Olive Bud variety, where two parallel die lines pierce the uppermost olive bud. The obverse die is of special interest, too, since it is the only 1861 half dollar obverse employed by all three authorities as the mint changed hands, first under U.S. (Union) control, then by the State of Louisiana, and finally for the Confederacy. This example displays rich tones of olive-gold and blue, with a sharp strike and nearly mark-free surfaces that glow with satin luster. We are aware of only one finer example of the popular Speared Bud Confederate die marriage. PCGS# 572148 Base PCGS# 6303

- 4345** 1866-S No Motto, Small Thin S, WB-101, Die Pair 1, R.5, VF35 PCGS. A rare die variety with the No Motto reverse and the mintmark positioned further right than normal. The coin displays excellent detail, including a full LIBERTY on the scroll. Each side has light golden patina with hints of blue, violet, and honey-gold near the borders. Population (all varieties included): 14 in 35, 56 finer (1/17). NGC ID# 5V4T, PCGS# 572170 Base PCGS# 6315

**1867-S Half Dollar, MS63
Major Rarity in Mint State**

- 4346** 1867-S WB-101, Die Pair 1, R.4, MS63 PCGS. Attribution markers for this die pair include a small die chip on the rock above the 8 and a horizontal die line from the left part of the shield through the eagle's feathers. Interesting cracks confirm the late state of the dies. Of the 1.2 million half dollars struck in San Francisco in 1867, PCGS estimates 35 pieces survive in Mint State. Liberty's head features strong definition, while the stars and reverse motifs are similarly well-detailed. Frosted surfaces are lightly toned, and marks are scant for the grade. Population: 8 in 63, 4 finer (1/17). PCGS# 572179 Base PCGS# 6322

- 4347** 1869 WB-101 MS64 PCGS. Light wheat-gold and apple-green toning adorns well struck, lustrous, and lightly marked surfaces. This Choice half dollar is clashed and exhibits peripheral die cracks. Rare in the present exemplary quality. Population: 12 in 64, 8 finer (1/17). NGC ID# 6463, PCGS# 572185 Base PCGS# 6325

- 4348** 1876-CC Repunched Medium CC Mintmark, WB-102, Die Pair 14, R.3, MS63 PCGS. The date is furthest left of all the 1876-CC die marriages, and the mintmark is noticeably repunched (most visible at the top serifs). Deep, gunmetal-blue edge toning at the top and bottom of both sides cedes to reddish-brown shades, with semireflective silver surfaces between the bands of original patina. This is a sharply struck and lustrous Select Uncirculated example, scarce and popular. Population (all varieties): 27 in 63, 36 finer (12/16). NGC ID# 645S, PCGS# 572239 Base PCGS# 6353

1879 Half Dollar, Attractively Toned MS65

- 4349 1879 Closed Bud, WB-102, MS65 NGC.** A marvelous blend of cobalt-blue, gray-tan, and lavender patination takes on slightly deeper hues on the reverse of this attractive Gem. Sharply struck throughout. Partially prooflike fields offer some contrast with the motifs. Some obverse marks likely preclude an even higher grade. Census: 37 in 65, 46 finer (1/17).

Ex: *Long Beach Signature (Heritage, 5/2008)*, lot 712. NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

- 4350 1880 Closed Bud, WB-102, MS64 PCGS.** The fields are semiprooflike, contrasting sharply with richly frosted motifs on each side of this Choice half. Brilliant-white except for a thin band of gold around the borders, the coin is razor-sharp and only a some light obverse ticks are of note. Gleaming mint luster streams from both sides of this near-Gem example, one of only 8,400 circulation strikes produced. Population: 20 in 64, 45 finer (1/17). NGC ID# 24KT, PCGS# 572262 Base PCGS# 6362

- 4351 1883 WB-101 MS61 PCGS.** Both sides of this brilliant Mint State 1883 half dollar exhibit fully mirrored fields and satiny devices, with no evidence of toning. The fields show light hairlines that are consistent with the grade. Population: 11 in 61, 87 finer (1/17). PCGS# 572267 Base PCGS# 6365

PROOF SEATED HALF DOLLARS

- 4352 1865 PR64 NGC.** A richly toned near-Gem proof, fully struck and with few distractions of any kind. The mirrored fields and frosted devices are equally and comprehensively toned in shades of cobalt-blue, violet, and gleaming gold. A few light lines are hidden in the toning above the eagle's right wing, but overall the reflective surfaces are Choice and appealing. Census: 54 in 64 (2 in 64+), 39 finer (1/17). NGC ID# 27TS, PCGS# 6419

1867 Half Dollar, Colorful PR65 Boldly Detailed, Richly Toned

- 4353 1867 PR65 PCGS.** Strong reflectivity emerges beneath the rich patina covering both sides of this Gem specimen. The colors include hues of teal, copper, cobalt-blue, violet, and deep pink. The design elements exhibit a bold level of detail, further adding to the exceptional appearance of the coin. A few delicate hairlines are present but are lost in the toning, and are entirely nondistracting. This survivor is from a low mintage of 625 coins. NGC ID# 27U2, PCGS# 6425

- 4354 1868 PR64 Cameo PCGS.** Beautiful cobalt-blue and violet toning mingles with light golden hues on each side, while the mirrored fields contrast dramatically with the satiny devices. Slight weakness on the eagle's left (facing) talons is seen with a loupe, but the obverse is sharp. Population: 16 in 64 (1 in 64+) Cameo, 11 finer (1/17). NGC ID# 27U3, PCGS# 86426

1871 Half Dollar, PR64+ Cameo White-on-Black Example

- 4355 1871 PR64+ Cameo PCGS.** Frosty devices contrast with glassy fields. A brilliant and splendid near-Gem. A "Chin Whiskers" variety with an unfinished surface below Liberty's jaw. The unusual (but mint-made) appearance of the central reverse is due to a lapped die. Population: 13 in 64 (2 in 64+) Cameo, 4 finer (1/17). NGC ID# 27U6, PCGS# 86429

- 4356 1874 Arrows PR63 Cameo NGC.** An impressive Select proof specimen of this popular, short-lived design, with sharply detailed design elements and deeply reflective fields that contrast boldly with the frosty devices. A few scattered hairlines and minor contact marks are mostly hidden by pleasing shades of greenish-gold toning. Census: 2 in 63 Cameo, 18 finer (1/17). NGC ID# 27UV, PCGS# 86435

- 4357 1879 PR64 PCGS.** This is a boldly struck near-Gem proof with reflective fields and frosty design elements. Lavender-gray toning blankets the interiors, ceding to olive-gold and light blue near the borders. Finer proofs are elusive. NGC ID# 27UE, PCGS# 6440

- 4358 1882 PR63 PCGS. CAC.** Lovely cobalt-blue, lavender, and golden-gray toning forms concentric bands around each side of this Select proof 1882 Seated half dollar. The strike is sharp, and any grade-limiting lines the fields are well-masked by the rich patina. A tiny lump of metal appears just to the left of the base of the 1 in the date. NGC ID# 27UH, PCGS# 6443

- 4359 1885 PR64 PCGS.** Flashes of brilliance mingle with dappled cobalt-blue, rose, crimson, and gold patina on this well-preserved near-Gem proof. Like its contemporaries, the 1885 enjoys added date pressure because of the issue's low total mintage. The Mint satisfied collector demand by striking 930 proofs in 1885, plus 5,200 circulation strikes. NGC ID# 27UL, PCGS# 6446

1886 Half Dollar, Attractive PR65 Only 886 Proofs Struck

- 4360 1886 PR65 PCGS.** A thin ribbon of sea-green toning at the rims surrounds the glassy-mirrored, champagne-gold fields on the obverse, while the reverse is colorfully toned in blue, magenta, and gold shades. The central devices are fully struck and lightly frosted for pleasing contrast despite the all-encompassing toning. A few fine lines in the right obverse field are noted, although they are of little distraction on this lovely Gem proof. Population: 23 in 65, 20 finer (1/17). NGC ID# 27UM, PCGS# 6447

4361 1887 PR64 PCGS. This deeply toned proof has thick heather, sea-green, and steel-blue toning over fully mirrored fields. The devices are frosted, and the coin must have displayed intense cameo contrast once. Population: 57 in 64, 38 finer (1/17).
Ex: FUN Signature (Heritage, 1/2007), lot 4544; Long Beach Signature (Heritage, 9/2007), lot 1622; Central States Signature (Heritage, 4/2012), lot 4551. NGC ID# 27UN, PCGS# 6448

4362 1888 PR63 Cameo PCGS Secure. Hints of greenish-gold and cerulean-blue toning enhance the outstanding eye appeal of this attractive Select example, with sharply detailed frosty design elements that contrast boldly with the reflective fields. Population: 9 in 63 (1 in 63+) Cameo, 38 finer (1/17). NGC ID# 5H74, PCGS# 86449

BARBER HALF DOLLARS

4363 1892-O MS64 PCGS. A satiny cream-gray example of this low-mintage first-year New Orleans issue. The fletchings and right shield corner shows some softness, but the portrait and stars are bold. Population: 42 in 64 (2 in 64+), 23 finer (1/17).
Ex: ANA Signature (Heritage, 8/2007), lot 871. NGC ID# 27UW, PCGS# 6462

1893 Barber Half, High-Luster MS65+ Silver-White, Condition Rarity

4364 1893 MS65+ PCGS. CAC. As the only Plus-graded representative of the MS65 grade at PCGS, this brilliant and supremely lustrous Barber half commands attention not only for its high-end grad, but for its stunning silver-white surfaces as well. The strike is sharp and the eye appeal is unsurpassed for a pre-1900 Barber half. CAC endorsement simply adds to the accolades. Population: 17 in 65 (1 in 65+), 14 finer. CAC: 8 in 65, 9 finer (1/17). NGC ID# 24LK, PCGS# 6465

1893 Half Dollar, Toned MS66

4365 1893 MS66 PCGS. Splashes of electric-blue, lavender, and purple toning are slightly more evident on the reverse of this Premium Gem Barber half. All design elements exhibit strong definition except for the usual weakness in the upper-right shield corner. Very difficult to locate at this level of preservation. Population: 13 in 66 (2 in 66+), 1 finer (1/17). NGC ID# 24LK, PCGS# 6465

4366 1893-S AU50 PCGS. Delicate gold and iridescent toning graces the satiny silver surfaces of this pleasing piece. A matched set of Barber half dollars at this grade would pose quite a challenge for the far-sighted collector. NGC ID# 24LM, PCGS# 6467

1894 Barber Half Dollar, MS66 Vivid Multicolor Toning

4367 1894 MS66 NGC. Richly toned in shades of turquoise, gray, and golden-brown, this impressive Premium Gem displays needle-sharp definition on all design elements, with satiny mint luster and well-preserved surfaces under the patina. From a mintage of 1.1 million pieces. Census: 8 in 66, 1 finer (1/17). NGC ID# 24LN, PCGS# 6468

1894 Barber Half Dollar, MS66 Attractive Multicolor Border Toning

4368 1894 MS66 PCGS. The silver-gray centers are surrounded by deep reddish-russet and cobalt-blue toning at the rims. Fully struck and a superb coin with a look of unquestioned originality. Even though 1.14 million pieces were struck of the 1894-P, it is a most uncommon "common" date in higher Mint State grades. Population: 12 in 66 (2 in 66+), 3 finer (1/17). NGC ID# 24LN, PCGS# 6468

4369 1897 MS62 PCGS. A splendid example, this lovely Mint State Barber half dollar exhibits frosty silver luster and brilliant surfaces that display subliminal champagne toning. Both sides exhibits scattered grade-consistent marks that are only visible with a loupe. NGC ID# 24LY, PCGS# 6477

1898-S Half Dollar, MS63 Underrated S-Mint Issue

4370 1898-S MS63 PCGS. Sharply detailed in most areas, this attractive Select Uncirculated specimen shows just a touch of the usual softness on the shield point and adjacent area on the eagle's wing. The lustrous surfaces are lightly marked for the grade and display pleasing shades of lavender-gray and greenish-gold toning. All pre-1900 mintmarked Barber halves are scarce in Mint State, a condition compounded for the 1898-S by the export of some of the mintage to the Philippines. Population: 8 in 63, 28 finer (1/17). NGC ID# 24M5, PCGS# 6482

- 4371 1899 MS64 PCGS.** This is a boldly struck late 19th century issue, showing frosty luster and light golden toning. No major abrasions are present. Hints of olive coloration appear near the lower obverse border. The 1899 Barber half dollar is seldom offered finer. Population: 51 in 64 (1 in 64+), 39 finer (1/17). NGC ID# 24M6, PCGS# 6483
- 4372 1902 MS65 PCGS.** Satiny mint luster shines through attractive shades of golden-brown, silver-gray, and magenta toning on this impressive Gem. The design elements are well-detailed and the surfaces are well-preserved throughout. Population: 31 in 65 (5 in 65+), 6 finer (12/16). NGC ID# 24ME, PCGS# 6492
- 4373 1903-O MS64 PCGS. CAC.** This Choice Mint State CAC coin displays brilliant, frosty luster that glows in the fields, highlighting unusually well-struck devices. A few light marks on Liberty's cheek are all that limit the grade. Population: 48 in 64 (3 in 64+), 14 finer. CAC: 8 in 64, 4 finer (12/16). NGC ID# 24MK, PCGS# 6496
- 4374 1908-D MS65 NGC.** Frosty luster rolls around original surfaces on this Gem 1908-D half dollar beneath attractive aqua-green, gold, and amber toning. A few tiny ticks are not out of line for the grade, and the strike is above average for the issue — only the fletchings and the eagle's right (facing) wing junction exhibit any discernible weakness on the reverse, and the obverse lacks definition only on star 3. Census: 19 in 65, 7 finer (1/17). NGC ID# 24N5, PCGS# 6513
- 4375 1908-S MS64 PCGS. CAC.** Out of the mintage of 1.6 million pieces only a few dozen higher-grade examples have survived. This representative displays light rose-gold toning that deepens noticeably around the margins. Both sides are enlivened by the bright mint luster, a characteristic of San Francisco products. Population: 19 in 64 (1 in 64+), 17 finer. CAC: 3 in 64, 7 finer (1/17).
Ex: Long Beach Signature (Heritage, 5-6/2012), lot 3881; ANA Signature (Heritage, 8/2016), lot 4804. NGC ID# 24N7, PCGS# 6515
- 4376 1909-O MS62 PCGS.** This important Barber half dollar was struck at the New Orleans Mint in its final year of coinage production. Both sides are brilliant and highly lustrous, showing sharp design definition and delicate champagne and steel toning on the obverse. Population: 5 in 62, 56 finer (1/17). NGC ID# 24N9, PCGS# 6517
- 4377 1913-D MS64 NGC.** The golden-brown, lavender, and stone-gray surfaces are lustrous. The strike shows the usual blending on the right shield corner. One hair-thin line near the A in DOLLAR. A later but lower mintage issue. Housed in a prior generation holder. Census: 49 in 64, 25 finer (1/17). NGC ID# 24NL, PCGS# 6528
- 4378 1913-S MS63 PCGS.** A pleasing Select Mint State example of a scarce issue, this Barber half dollar exhibits satiny silver luster and well-executed design details with a trivial identifying spot at the bottom of the shield on the reverse. Population: 25 in 63, 49 finer (1/17). NGC ID# 24NM, PCGS# 6529
- 4379 1915 MS63 PCGS.** Shimmering luster illuminates pale gold toning over each side, with a few deeper olive accents also seen in the peripheral recesses. The strike is well-executed and there are no individually bothersome abrasions. Population: 22 in 63, 51 finer (1/17). NGC ID# 24NR, PCGS# 6532

PROOF BARBER HALF DOLLARS

1893 Barber Half Dollar, PR66 Rare Cameo Example

- 4380 1893 PR66 Cameo NGC.** Razor-sharp definition is evident on all design elements of this spectacular Premium Gem, and the deeply reflective fields contrast boldly with the frosty devices to create a dramatic cameo effect. A few subtle highlights of greenish-gold and lavender toning visit the well-preserved surfaces, adding to the outstanding eye appeal. Census: 18 in 66 Cameo, 15 finer (1/17). NGC ID# 24NV, PCGS# 86540

1898 Half Dollar, PR65 Undesignated Contrast

- 4381 1898 PR65 NGC.** A faint hint of gold patina delicately graces the fields of this boldly contrasted proof, although the cameo effect is unrecognized with a formal designation. The relief elements exhibit a thick layer of frost and complete detail, the latter being expected of a proof. The 1898 was struck to the extent of 735 pieces. NGC ID# 24P2, PCGS# 6545

1899 Barber Half Dollar, PR66 Cameo

- 4382 1899 PR66 Cameo NGC.** A stunning Premium Gem representative of this popular close-of-the-century date, with deeply mirrored fields that contrast boldly with the sharply detailed, frosty design elements. The surfaces are impeccably preserved and display subtle highlights of pale gold toning. Eye appeal is outstanding. From a mintage of 846 pieces. Census: 8 in 66 Cameo, 19 finer (1/17). NGC ID# 24P3, PCGS# 86546
- 4383 1900 PR64 Cameo PCGS.** The sharply detailed design elements of this impressive Choice specimen have a frosty texture that contrasts boldly with the deeply mirrored fields to create a stunning cameo effect. The surfaces are well-preserved and overall eye appeal is terrific. NGC ID# 24P4, PCGS# 86547

4384 1908 PR65 PCGS. This deeply reflective Gem proof displays delicate champagne, lavender, and ice-blue toning over each side, with satiny devices and no distracting marks. Some strike weakness appears on the eagle's right (facing) wing junction and talons, as often seen on this type. Population: 30 in 65, 28 finer (1/17). NGC ID# 24PC, PCGS# 6555

4385 1909 PR64 PCGS. This sharply detailed Choice proof features frosty design elements and deeply mirrored fields with noticeable, but undesignated, cameo contrast. The surfaces are well-preserved, with a few hints of greenish-gold toning. Population: 64 in 64, 65 finer (1/17). NGC ID# 24PD, PCGS# 6556

1910 Half Dollar, PR65 Iridescent Patina

4386 1910 PR65 NGC. CAC. The entirety of this Gem proof exhibits a rich layer of iridescent blue, rose-violet, and peach-orange patina that inhibits contrast but produces spectacular visual appeal. The surfaces are clearly high-end for the assigned grade, with tiny contact marks barely perceptible beneath the colorful overlay. Only 551 Barber half dollar proofs were struck in 1910. Housed in a former generation holder with a green CAC approval sticker. NGC ID# 26A4, PCGS# 6557

4387 1912 PR64 PCGS. Dappled shades of bluish-gray and sea-green toning visit the well-preserved surfaces of this impressive Choice specimen, from a small proof mintage of just 700 pieces. The design elements are sharply detailed and deeply mirrored fields shine through the patina. Population: 64 in 64, 48 finer (1/17). NGC ID# 24PG, PCGS# 6559

1915 Half Dollar, PR66 Final-Year Issue

4388 1915 PR66 PCGS. The 1915 half dollar boasts the second-lowest proof mintage of the series (450 pieces), bested only by the 1914 (380 pieces), and Gem or finer survivors are elusive. This piece exhibits a razor-sharp strike, with virtually unblemished surfaces. A dusky olive-gray veneer blankets deeply mirrored fields on each side, with vivid violet-orange and amber-gold underlying hues that boldly shine through when the coin is tilted beneath a light. Population: 20 in 66, 11 finer (1/17). NGC ID# 24PK, PCGS# 6562

WALKING LIBERTY HALF DOLLARS

4389 1916 MS65 PCGS. Among Philadelphia Walking Liberty issues, only the 1921 has a lower mintage than the 1916. This well-struck Gem exhibits vibrant luster and shows only a wisp of golden patina. Marks are uncommonly absent, and the eye appeal is undeniable. NGC ID# 24PL, PCGS# 6566

1916-D Walking Liberty Half Dollar, MS65 First-Year Branch Mint Type Coin

4390 1916-D MS65 PCGS. CAC. An attractive branch mint issue from the first year of the Walking Liberty design, this impressive Gem exhibits well-detailed design elements that show a touch of the usual softness on the head and wreath hand. The well-preserved surfaces display satiny mint luster under shades of lavender-gray and greenish-gold toning. The 1916-D is very scarce in finer grades. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

1916-D Walker Half Dollar, MS65 Splendid Color, Obverse Mintmark

4391 1916-D MS65 PCGS. CAC. Reddish-gold and steel-blue tones around the edges of this Gem first-year half dollar encircle primarily untuned interiors. The unquestionable originality and lovely eye appeal explain the CAC approval sticker. The obverse mintmark is razor-sharp, and few marks of any kind are seen. Seldom found finer. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

4392 1917-D Obverse MS64 PCGS. Each side maintains its brilliance, the effect enhanced by frosty luster. Liberty's branch hand shows full thumb separation, just one indication of a crisp strike. Minor reeding marks around the obverse are the only blemishes throughout this well-preserved near-Gem half dollar. Very scarce any finer. NGC ID# 24PR, PCGS# 6570

4393 1917-D Obverse MS64 PCGS. Razor-sharp detail characterizes the near-Gem surfaces of this 1917-D Obverse Mintmark Walker. Warm golden toning blankets the satiny surfaces, accentuated by hints of russet and sea-green near the borders. Finer examples are scarce. NGC ID# 24PR, PCGS# 6570

4394 1917-D Reverse MS63 PCGS. Warm golden toning accents satin luster on this Select Reverse Mintmark coin. The strike is above average for the issue, and grade-limiting abrasions are minimal. Eye appeal excels for the grade. NGC ID# 24PS, PCGS# 6571

**1917-D Walking Liberty Half Dollar, MS64
Reverse Mintmark**

- 4395 1917-D Reverse MS64 NGC.** The 1917-D Walking Liberty half dollar is an elusive issue at the MS64 grade level, and finer coins are very scarce. This attractive Choice example displays well-detailed design elements, with just a touch of the typical softness on the wreath hand and eagle's leg. The lightly marked surfaces display vibrant mint luster, under delicate shades of golden-brown toning. NGC has graded 29 numerically finer examples (12/16). NGC ID# 24PS, PCGS# 6571

**1917-D Walking Liberty Half, MS64
Reverse Mintmark Variant**

- 4396 1917-D Reverse MS64 PCGS.** The mintmark was moved to the reverse of the Walking Liberty half dollar part-way through the year in 1917 and more than 1.9 million coins were struck with the new mintmark placement. This impressive Choice example displays well-detailed design elements and well-preserved lustrous surfaces, with highlights of golden-brown toning. NGC ID# 24PS, PCGS# 6571

- 4397 1918 MS64 PCGS.** This Choice 1918 half dollar displays sharp head detail and strong thumb separation, along with above-average definition on the eagle's trailing leg. A trace of light golden toning graces satin luster and clean fields. Appealing for the grade. NGC ID# 24PV, PCGS# 6574

**1918-S Half Dollar, MS64
Good Value at This Grade Level**

- 4398 1918-S MS64 PCGS.** This is a lustrous example with attractive light gold toning over satiny surfaces. The strike shows typical weakness in the centers, along the high points of the obverse, and corresponding area on the reverse. Given the rarity of Gems, this Choice Mint State example is a nice alternative at a substantially reduced price.
Ex: Long Beach Signature (Heritage, 6/2005), lot 6430; Central States Signature (Heritage, 4/2011), lot 4421. NGC ID# 24PX, PCGS# 6576

- 4399 1920 MS64 PCGS.** This impressive Walking Liberty half dollar exhibits sharply detailed design elements and well-preserved, lustrous surfaces, under attractive shades of golden-brown and lavender toning. Eye appeal is quite strong. NGC ID# 24R3, PCGS# 6580

- 4400 1923-S AU55 PCGS.** Thoroughly lustrous fields accent traces of light golden toning on each side of this Choice AU 1923-S Walker. The strike is a trifle soft on Liberty's branch hand and the eagle's trailing leg, as usual, but wear is minimal. An excellent coin for the grade. NGC ID# 24R9, PCGS# 6586

**1927-S Walking Liberty Half, MS64+
Seldom Seen Any Finer**

- 4401 1927-S MS64+ PCGS. CAC.** Despite a mintage of nearly 2.4 million pieces, the 1927-S Walking Liberty half dollar is very scarce in grades above MS64. The 1927-S is known as a strike rarity, and this Plus-graded Choice example shows just a touch of the usual softness on the wreath hand and eagle's leg, but the strike is better-than-average in other areas. The lustrous, well-preserved surfaces display subtle hints of golden-tan toning. NGC ID# 24RA, PCGS# 6587

**1929-D Half Dollar, Delicately Toned MS66
Strong Luster, Seldom Seen Finer**

- 4402 1929-D MS66 PCGS.** Intense silver luster dominates a faint presence of pale almond-gold toning on this conditionally rare Denver half. Few pieces exceed the Gem grade. While the flashy, smooth and frosty surfaces provide most of the visual impact, a sharp strike is immediately apparent and the boldness of Liberty's central portrait and the eagle's trailing leg impress as well. Only a few tiny marks exist, visible with a lens. Population: 76 in 66 (3 in 66+), 1 finer (1/17). NGC ID# 24RC, PCGS# 6589

**1929-D Walking Liberty Half, MS66
Exceptional Preservation**

- 4403 1929-D MS66 NGC.** A little more than 1 million 1929-D half dollars were originally produced, a somewhat limited mintage, yet the 1929-D is among the more readily obtainable branch mint halves from the 1920s in lesser Mint State grades. That said, the issue's dwindling certified population as one progresses up the grading scale confirms the condition rarity of this attractive Premium Gem. The overall sharp strike is apparent (despite some scratches on the previous generation holder) especially on Liberty's head and the eagle's leg plumage, as are the richly frosted and virtually abrasion-free surfaces. Delicate golden iridescence on both sides rounds out this coin's list of positive attributes. Take note: Just a single numerically finer coin exists at NGC and PCGS combined. NGC Census: 14 in 66, 0 finer (1/17).

Ex: *Long Beach Signature* (Heritage, 6/2005), lot 6452. NGC ID# 24RC, PCGS# 6589

- 4404 1929-S MS64 PCGS. CAC.** The 1929-S Walking Liberty half dollar is an elusive issue in high grade, from a mintage of 1.9 million pieces. This attractive Choice example is well-preserved and lustrous, under highlights of lavender-gray toning. The design elements are well-detailed, with just a touch of softness on the wreath hand. NGC ID# 24RD, PCGS# 6590

- 4405 1933-S MS63 NGC.** This attractive Select specimen exhibits well-detailed design elements, with some separation between Liberty's thumb and fingers on the wreath hand, but a touch of flatness on the head. The lightly marked surfaces show mottled highlights of lavender toning. NGC ID# 24RE, PCGS# 6591

- 4406 1934 MS67 PCGS.** A conditionally scarce Superb Gem example of this better Philadelphia issue, showing a remarkable full strike and unabraded fields. Warm golden toning adds character to frosty mint luster on each side. PCGS reports only eight numerically finer representatives (1/17). NGC ID# 24RF, PCGS# 6592

**1934-S Half Dollar, Toned MS65
Sought-After Branch Mint Issue**

- 4407 1934-S MS65 PCGS. CAC.** A dramatic display of dappled autumn-gold, russet, heather, and olive-gray toning covers both sides of this Gem 1934-S half. The bright and lustrous underlying silver surface beams through the toning for extraordinary eye appeal. The strike is sharp on Liberty's head and branch hand, as well as the eagle's plumage, although the rich patina obscures some of the definition. A remarkable MS65 example for the connoisseur of sumptuously toned coins. CAC endorsed for its quality. NGC ID# 24RH, PCGS# 6594

- 4408 1935 MS66+ PCGS. CAC.** Frosty, brilliant luster is the hallmark of this high-end Premium Gem, and a lack of distracting abrasions further heightens the eye appeal. The strike is well-executed, although Liberty's branch hand is only partially defined. The CAC endorsement is a strong addition to the appeal of this coin. Finer pieces are scarce. NGC ID# 24RJ, PCGS# 6595

1935 Half Dollar, Original MS67

- 4409 1935 MS67 PCGS. CAC.** Aside from the occasional splash of tan or blue patina, this superlative Walker half dollar is entirely brilliant with glittering mint luster. Strongly struck devices and the near-absence of surface abrasions further the appeal. More than 9.1 million coins were struck, yet this Superb Gem is matched by few peers. Population: 55 in 67 (5 in 67+), 1 finer. CAC: 29 in 67, 1 finer (1/17). NGC ID# 24RJ, PCGS# 6595

**1935 Half Dollar, MS67
Brilliant and Untoned**

- 4410 1935 MS67 PCGS. CAC.** Only about one in a hundred 1935 half dollar submissions to PCGS are certified MS67. With the emphasis on submitting higher grade coins, that is quite a low number of Superb Gems. This example is frosty with brilliant silver luster and no evidence of toning. Both sides of this beauty are sharply defined. Population: 55 in 67 (5 in 67+), 1 finer. CAC: 29 in 67, 1 finer (1/17). NGC ID# 24RJ, PCGS# 6595

- 4411 1935-D MS66 PCGS.** The 1935-D is a better date in high grade, scarce in MS66 and almost unknown finer. This Premium Gem example is among the finest at PCGS (1/17). The strike is weak on Liberty's head and branch hand, as usual, but well-executed elsewhere. Both sides display dusky light golden toning with only trivial marks. NGC ID# 24RK, PCGS# 6596

- 4412 1935-S MS65 PCGS.** A well-struck Gem with better surface preservation than expected even for the high grade. Delicate champagne toning graces frosty mint luster on each side. Finer 1935-S half dollars are scarce. NGC ID# 24RL, PCGS# 6597

1935-S Half Dollar, MS66

Elusive S-Mint Issue

- 4413 1935-S MS66 PCGS.** The strike is about 70% complete on the head, branch hand, and eagle's leg, yet there are few marks or abrasions on either side of this attractive Premium Gem 1935-S half. Silver luster beams from beneath a thin coating of powder-gray patina with glimpses of pale-gold at the borders. As a date, this San Francisco half is among the scarcest of the middle-date series. PCGS has seen just three numerically finer pieces (1/17). NGC ID# 24RL, PCGS# 6597

1935-S Walker, MS66 Pristine and Conditionally Scarce

- 4414 1935-S MS66 PCGS.** The pristine surfaces are untuned save for a dash of orange-gold color in the center of the reverse; otherwise each side shows a chalk-white, satiny finish that is most appealing. While not fully detailed, the devices exhibit far stronger definition than is normally expected of the issue.

Ex: New York Signature (Heritage, 7/2002), lot 8540; ANA Signature (Heritage, 8/2004), lot 6532. NGC ID# 24RL, PCGS# 6597

- 4415 1936-S MS66 PCGS. CAC.** The frosty luster of this Premium Gem 1936-S is original, and it glistens beneath a 10x loupe. Liberty's branch hand is softly struck as usual, but head detail is bold; the eagle's trailing leg shows typical incompleteness. There are no abrasions that catch the eye. PCGS lists only 11 numerically finer representatives. CAC: 77 in 66, 4 finer (1/17). NGC ID# 24RP, PCGS# 6600

- 4416 1936-S MS66+ PCGS. CAC.** A high-end Premium Gem representative of this popular mid-series date, with well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces are patinated in attractive shades of golden-brown and amber. PCGS has graded only eleven numerically finer examples (1/17). NGC ID# 24RP, PCGS# 6600

- 4417 1937 MS67+ PCGS. CAC.** Liberty's branch hand and head, and the eagle's trailing leg, show sharp definition on this high-end Superb Gem. Warm golden toning graces the frosty surfaces, and there are no bothersome abrasions. PCGS has seen only five finer 1937 Walking Liberty half dollars. CAC: 76 in 67, 3 finer (1/17). NGC ID# 256A, PCGS# 6601

- 4418 1938 MS67 PCGS.** The surfaces of this Superb Gem retain near complete mint brilliance, save for splashes of golden-amber patina on each side. Well-detailed with clear thumb separation. The Mint struck more than 4.1 million Walking Liberty halves in 1938, but there is only a single coin reported finer at PCGS (1/17). NGC ID# 24RU, PCGS# 6604

- 4419 1938 MS67 PCGS.** The 1938 Walking Liberty half dollar was a well-produced issue, with a reported mintage of 4.1 million pieces. This spectacular Premium Gem exhibits sharply detailed design elements, with clear separation between Liberty's thumb and finger on the wreath hand. The impeccably preserved surfaces radiate vibrant mint luster, with subtle hints of champagne-gold toning. PCGS has graded only one numerically finer example (1/17). NGC ID# 24RU, PCGS# 6604

1938 Walker Half Dollar, MS67 Thin Veil of Golden Patina

- 4420 1938 MS67 PCGS. CAC.** The branch hand and skirt lines are fully detailed, while Liberty's head and the eagle's feathers are similarly strong. Softly frosted and readily appealing, this Superb Gem Walking Liberty half dollar offers a thin veil of golden patina. Practically mark-free with only one coin finer at PCGS. CAC: 28 in 67, 0 finer (1/17). NGC ID# 24RU, PCGS# 6604

- 4421 1939-S MS67 PCGS. CAC.** This is a mint-fresh Superb Gem Walking Liberty half dollar with completely brilliant, fully frosted surfaces. The resulting CAC affirmation comes as little surprise. The devices exhibit strong definition, and the fields are virtually mark-free. PCGS has yet to see a finer example in MS68 (12/16). NGC ID# 24RY, PCGS# 6608

- 4422 1939-S MS67 PCGS. CAC.** Although usually available in MS67, the 1939-S Walker is almost unknown finer, and is unknown finer at PCGS (1/17). This CAC-endorsed Superb Gem displays a bold strike and glowing, champagne-toned luster with no distracting abrasions. NGC ID# 24RY, PCGS# 6608

- 4423 1939-S MS67 PCGS. CAC.** This Superb Gem displays tremendous eye appeal, with brilliant, untuned surfaces and rich, gleaming luster. Liberty's branch hand displays incompleteness of strike. A thin vertical die crack extends from the middle of the right wing down through the body. PCGS has graded no coins in numerically finer grades (1/17). NGC ID# 24RY, PCGS# 6608

- 4424 1939-S MS67 PCGS. CAC. CONECA DDO-001.** IN GOD WE TRUST is nicely die doubled, as is Liberty's profile and the foliage near the R in LIBERTY. The elusive variety is undesignated on the insert. Lustrous and beautifully preserved with medium butter-gold toning.

Ex: FUN Signature (Heritage, 7/2013), lot 4121, which realized \$1,762.50. NGC ID# 24RY, PCGS# 6608

**1939-S Walking Liberty Half, MS67+
Outstanding Registry Set Contender**

4425 1939-S MS67+ PCGS. CAC. The 1939-S Walking Liberty half dollar claims a smallish mintage of 2.5 million pieces and few survivors can match the high technical quality and eye appeal of this Plus-graded Superb Gem. The design elements are sharply detailed throughout and vibrant mint luster radiates from both sides. The virtually pristine surfaces display a few hints of jade-gold toning, with incredible visual appeal. PCGS has graded no coins in higher grades (1/17). NGC ID# 24RY, PCGS# 6608

4426 1940-S MS66+ PCGS. CAC. This must be one of the best-struck examples of the worst-struck issue in the Walking Liberty half dollar set. Liberty's thumb is clear. Each side is near-pristine and essentially brilliant with a few blushes of pale gold color. There are 13 finer submissions at PCGS (1/17). NGC ID# 24S2, PCGS# 6610

4427 1941-S MS66+ PCGS. This Plus-graded Premium Gem exhibits sharply detailed design elements in most areas, but a touch of the typical softness shows on the wreath hand and eagle's leg. The virtually pristine surfaces radiate vibrant mint luster on both sides. PCGS has graded nine numerically finer examples (12/16). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

4428 1941-S MS66+ PCGS. CAC. This high-end Premium Gem is as strongly defined as a 1941-S Walking Liberty half dollar can be. The issue is a notorious strike rarity. Pale blushes of golden-orange adorn otherwise brilliant surfaces. Radiant luster cascades over each seemingly pristine side. There are merely nine finer submissions at PCGS (12/16). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

**1942 Walking Liberty Half, MS67
End-of-the-Roll Toning**

4429 1942 MS67 PCGS. CAC. This is an outstanding type coin with a story to tell. The mint luster is radiant and the strike is complete, as one would expect from a 1942. What sets this piece apart is the obverse toning paired with the brilliant reverse. The toning pattern suggests this was an end-of-the-roll coin for many years, accruing rich multicolored toning around the wide margins with a spot of brilliance in the center. NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

4430 1942-S MS66+ PCGS. Small S. Brilliant centers are framed by tobacco-brown and forest-green borders. Lustrous and splendidly smooth. The reverse is practically pristine. The branch hand is indistinct, as usually seen on San Francisco wartime Walkers. NGC ID# 24S8, PCGS# 6617

4431 1942-S MS66+ PCGS. CAC. Trumpet tail S. Pastel straw-gold and ice-blue toning graces this nearly pristine half dollar. Since the 1942-S is extremely rare at the MS67 level, even advanced collectors must settle for one of the 68 examples (as of 1/17) graded by PCGS as MS66+.

Ex: Rosemont Signature (Heritage, 8/2013), lot 4115, which realized \$2,350. NGC ID# 24S8, PCGS# 6617

4432 1944 MS67 PCGS. CAC. A short-set Superb Gem with occasional hints of sky-blue against a light silver base. Delicately textured surfaces are close to mark-free, though the centers show a degree of the usual striking softness. PCGS has graded only one numerically finer example (1/17). NGC ID# 24SC, PCGS# 6621

4433 1944-S MS66+ PCGS. CAC. Large S. A beautiful butter-gold and powder-blue Premium Gem. Lustrous and well preserved with exceptional eye appeal. Liberty's head is sharp, and the skirt lines show above average definition. NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

**1945 Walking Liberty Half, MS67+
Among the Finest Certified**

4434 1945 MS67+ PCGS. CAC. A large mintage of 31.5 million Walking Liberty half dollars was struck at the Philadelphia Mint in 1947, but few survivors can match the quality and eye appeal of this Plus-graded Superb Gem. The design elements are sharply detailed and the impeccably preserved lustrous surfaces show vivid highlights of greenish-gold toning on the obverse. PCGS has graded no coins in higher numeric grades (12/16). NGC ID# BYKU, PCGS# 6624 Base PCGS# 6624

4435 1946 Doubled Die Reverse, FS-801, MS65 PCGS. E PLURIBUS UNUM, the feathertips, the sapling, and selected other reverse design elements are prominently die doubled. The only *Cherry-pickers'* variety for the series to secure a *Guide Book* listing. This lustrous and brilliant Gem is nicely struck and well preserved. Minor carbon is noted above the W in WE. NGC ID# 24SJ, PCGS# 145152 Base PCGS# 6632

4436 1946-S MS67 PCGS. Trumpet tail S. A virtually pristine Superb Gem. Freckles of golden-brown and forest-green grace the peripheries, but the fields and devices are close to brilliant. The strike is sharp on the skirt lines, though the branch hand is incomplete, as always. NGC ID# 24SL, PCGS# 6629

PROOF WALKING LIBERTY HALF DOLLARS

1936 Walking Liberty Half Dollar, PR65 First Proof in the Series

- 4437 1936 PR65 PCGS. CAC.** The 1936 is the first, and rarest, proof Walking Liberty half dollar. The present coin is a brilliant Gem specimen, with brightly mirrored fields and just a touch of gold toning. All details of the design are sharply rendered, and the eye appeal is fantastic. Housed in a green label holder.
Ex: ANA Signature (Heritage, 8/2010), lot 4220. NGC ID# 27V4, PCGS# 6636

1937 Walker, Golden PR67+ Few Certified Finer

- 4438 1937 PR67+ PCGS. CAC.** Medium caramel-gold and lime-green toning drapes this satiny and immaculate Superb Gem. Tiny russet freckles emerge when the piece is rotated at obscure angles. The second-lowest mintage of the proof series at 5,728 coins. PCGS has certified just 10 pieces as PR68 and none better (1/17).
Ex: Long Beach Signature (Heritage, 5/2012), lot 4167; Orlando Signature (Heritage, 7/2013), lot 4141; FUN Signature (Heritage, 1/2016), lot 5811. NGC ID# 5ESS, PCGS# 6637

1939 Half Dollar, PR68 Delicate Natural Patina

- 4439 1939 PR68 PCGS.** The 1939 half dollar is a bit more challenging than some other issues in the readily collectible proof series. This fully struck Superb Gem is tied for finest at PCGS, one of a mere 43 examples that qualify for top Registry Set consideration. A beautiful and naturally patinated proof, this gleaming PR68 displays chromelike silver centers and scant blue, russet, and opaque white hues toward the upper obverse border. The reverse is brilliant and with a faint translucent golden sheen near the edges. Population: 43 in 68, 0 finer (1/17). NGC ID# 5ESU, PCGS# 6639

- 4440 1940 PR68 NGC.** A conditionally scarce proof Walker and among the finest certified at either service. This high-end Superb Gem proof 1940 half dollar displays a bold strike and satiny devices set against deeply reflective fields. Delicate golden toning shows hints of pale iridescence when tilted beneath a light. Census: 58 in 68 (4 in 68 ★), 0 finer (1/17). NGC ID# 27V8, PCGS# 6640

- 4441 1942 PR68 NGC.** A razor-sharp, brilliant proof with modest cameo contrast on the obverse. This high-end Superb Gem is conditionally scarce, and NGC reports only eight numerically finer representatives (1/17). NGC ID# 282G, PCGS# 6642

- 4442 1942 PR68 NGC.** A fully struck, gleaming Superb Gem proof with a hint of pale champagne toning over each side. There are no contact marks or other distractions. NGC has seen eight numerically finer examples, and PCGS reports only one (1/17). NGC ID# 282G, PCGS# 6642

FRANKLIN HALF DOLLARS

- 4443 1949-D MS66 Full Bell Lines PCGS. CAC.** This attractive Premium Gem exhibits well-detailed design elements, with Full Bell Lines definition on the Liberty Bell. The lustrous satiny surfaces are enhanced by shades of lavender-gray and champagne-gold toning. Population: 83 in 66 (8 in 66+) Full Bell Lines, 0 finer. CAC: 21 in 66, 0 finer (1/17). NGC ID# 5HWE, PCGS# 86654

- 4444 1952-S MS67 PCGS.** Frosty and vibrantly lustrous, this Superb Gem offers champagne-gray toning on the obverse surrounded by deeper olive-gold and amber border hues. The reverse is ice-blue over the interior with crimson, gold, and forest-green peripheral toning. The bell lines are slightly weak at the crack, preventing a Full Bell Lines designation. Population: 24 in 67 (3 in 67+), 0 finer (1/17). NGC ID# 24T5, PCGS# 6663

- 4445 1955 MS66+ Full Bell Lines PCGS.** This Plus-graded Premium Gem exhibits sharply detailed design elements throughout, with Full Bell Lines definition. The impeccably preserved surfaces radiate vibrant mint luster, under shades of golden-brown and magenta toning. PCGS has graded only four numerically finer examples (12/16). NGC ID# 24TC, PCGS# 86670

- 4446 1957 MS67 Full Bell Lines PCGS. CAC.** The impeccably preserved surfaces of this impressive Superb Gem are blanketed in vivid shades of golden-brown and magenta toning, with vibrant mint luster underneath. The design elements are sharply detailed, with full definition on the bell lines. Population: 27 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 12 in 67, 0 finer (1/17). NGC ID# 24TW, PCGS# 86672

1957-D Half Dollar, Toned MS67 Tied for Finest Certified

- 4447 1957-D MS67 PCGS. CAC.** Pastel iridescence colors the rims, while the centers display a pale overlay of olive-gold patina mixed with areas of brilliance. The underlying surfaces fail to show any imperfections without the aid of a high-powered lens. Population: 5 in 67, 0 finer. CAC: 4 in 67, 0 finer (1/17). NGC ID# 2YDD, PCGS# 6673

- 4448 1957-D MS67 Full Bell Lines PCGS.** Vivid crescents of ruby-red, jade-green, and peach-gold dominate the borders. A conditional rarity, with none certified finer at either service. This Superb Gem 1957-D Franklin half dollar displays a bold strike and vibrant cartwheel luster. Population: 19 in 67 Full Bell Lines, 0 finer (12/16). NGC ID# 24TF, PCGS# 86673

4449 1959-D MS66+ Full Bell Lines PCGS. CAC. Much of each side displays dusky olive-amber toning, although tinges of pine-green and rose-red appear near the borders on each side. The bell lines are sharply defined. PCGS has certified only two finer Full Bell Lines examples (1/17). NGC ID# 24TK, PCGS# 86677

4450 1962 MS65+ Full Bell Lines PCGS. Scarce in this grade and rarely seen finer. The coin displays brilliant satin luster and a sharp strike. A few minor abrasions are not out of line for the grade. Population: 14 in 65+ Full Bell Lines, 15 finer (1/17). NGC ID# 24TR, PCGS# 86682

1962 Half Dollar, MS66 Full Bell Lines None Finer at Either Service

4451 1962 MS66 Full Bell Lines PCGS. The 1962 Franklin half is a rare coin in certified MS66 regardless of the grading service, and it is extremely rare when it possesses Full Bell Lines such as this outstanding Premium Gem. Brief glimpses of ephemeral almond-gold toning at the margins are barely visible on the otherwise stark, silver-white surfaces. Only a few microscopic marks are seen under magnification. Population: 15 in 66 Full Bell Lines, 0 finer (1/17). NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

4452 1950 PR67 PCGS. The design elements of this impressive Superb Gem are sharply detailed and the fields are brightly reflective, but field/device contrast is minimal. The surfaces are virtually flawless and eye appeal is exceptional. Population: 81 in 67 (2 in 67+), 1 finer (1/17). NGC ID# 27VA, PCGS# 6691

4453 1950 PR67 PCGS. A spectacular Superb Gem example of the first proof Franklin half dollar issue, with fully detailed, frosty design elements and deeply mirrored fields that provide bold cameo contrast. Population: 81 in 67 (2 in 67+), 1 finer (1/17). NGC ID# 27VA, PCGS# 6691

4454 1950 PR67 PCGS. CAC. A fully struck proof with delicate champagne toning over deeply mirrored fields. The devices are satiny, rather than deeply frosted, precluding a Cameo designation. Population: 81 in 67 (2 in 67+), 1 finer. CAC: 37 in 67, 1 finer (1/17). NGC ID# 27VA, PCGS# 6691

1950 Franklin Half Dollar, PR66 Cameo First Franklin Proof Issue

4455 1950 PR66 Cameo PCGS. The design elements of this delightful Premium Gem exhibit razor-sharp definition throughout, and the frosty texture of the devices contrasts boldly with the deeply mirrored fields to create a dramatic cameo effect. The brilliant surfaces are impeccably preserved and eye appeal is terrific. Population: 64 in 66 (5 in 66+) Cameo, 21 finer (1/17). NGC ID# 27VA, PCGS# 86691

1950 Half Dollar, PR66 Cameo Brilliant and Starkly Contrasted

4456 1950 PR66 Cameo PCGS. The debut proof Franklin half dollar issue is challenging in Cameo above PR65. This starkly contrasted Premium Gem proof has few superiors. The design elements are fully brought up above glimmering, blacked-out fields that are devoid of mentionable flaws. Eye appeal is abundant. Population: 64 in 66 (5 in 66+) Cameo, 21 finer (1/17). NGC ID# 27VA, PCGS# 86691

4457 1951 PR67 PCGS. A delightful Superb Gem, from a mintage of 57,500 pieces, this coin offers sharply detailed design elements and deeply mirrored fields throughout. The impeccably preserved surfaces show a few traces of sea-green and violet toning at the peripheries. PCGS has graded four numerically finer examples (12/16). NGC ID# 27VB, PCGS# 6692

1951 Franklin Half Dollar Immaculate PR67 Cameo

4458 1951 PR67 Cameo PCGS. The finest proof 1951 half dollars that PCGS has certified include 22 submissions that have received the PR67 Cameo grade, while NGC has certified 27 specimens at this level, with one finer (1/17). For the collector who seeks a top-notch example, the present piece is available now, with uncertain availability of other similarly graded pieces. Both sides have unending mirrors around satiny white devices with no evidence of toning. NGC ID# 27VB, PCGS# 86692

1951 Franklin Half Dollar, PR67 Rare Cameo Example

4459 1951 PR67 Cameo PCGS. CAC. The design elements of this delightful Superb Gem exhibit needle-sharp definition throughout and the deeply mirrored fields contrast boldly with the frosty devices to create an intense cameo effect. A few hints of pale gold toning enhance the well-preserved surfaces. Population: 23 in 67 (1 in 67+) Cameo, 0 finer. CAC: 10 in 67, 0 finer (1/17). NGC ID# 27VB, PCGS# 86692

- 4460 1952 PR67 Cameo PCGS.** Delicate shades of pale gold toning envelope both sides of this spectacular Superb Gem, with sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. The impeccably preserved surfaces add to the outstanding eye appeal. Population: 68 in 67 (4 in 67+) Cameo, 5 finer (1/17). NGC ID# 27VC, PCGS# 86693
- 4461 1952 PR67 Cameo PCGS. CAC.** This spectacular Superb Gem displays sharply detailed, richly frosted design elements that contrast boldly with the deeply mirrored fields. The impeccably preserved surfaces are visited by delicate hints of pale gold toning. Population: 68 in 67 (4 in 67+) Cameo, 5 finer. CAC: 47 in 67, 5 finer (1/17). NGC ID# 27VC, PCGS# 86693
- 4462 1953 PR66 Deep Cameo PCGS.** A needle-sharp strike complements thick, frosty luster on the devices of this brilliant Deep Cameo proof. The fields are beautifully mirrored and preserved, providing stark contrast. Deep Cameos are rarely seen finer. Population: 24 in 66 (1 in 66+) Deep Cameo, 15 finer (1/17). PCGS# 96694

**1955 Half Dollar, PR68 Deep Cameo
None Finer at PCGS**

- 4463 1955 PR68 Deep Cameo PCGS.** Deep Cameo 1955 proof Franklins are scarce in high grade, and this PR68 coin is among the finest at PCGS (1/17). The strike is full, and both sides display brilliant color with stark field-device contrast. Eye appeal is exceptional. Population: 35 in 68 (1 in 68+) Deep Cameo, 0 finer (1/17). NGC ID# 27VE, PCGS# 96696

**1956 Half Dollar, PR69 Deep Cameo
Type Two Reverse**

- 4464 1956 Type Two PR69 Deep Cameo PCGS.** The more plentiful Type Two Reverse, ideal for date collectors. This remarkably well-preserved coin is among the finest certified, and it is scarce in a PCGS holder. The strike is full, and each side displays brilliant surfaces and stark field-device contrast. Population: 70 in 69 Deep Cameo, 0 finer (1/17). NGC ID# 24TW, PCGS# 96697
- 4465 1957 PR68 Deep Cameo PCGS.** A magnificent PR68 Franklin proof, with Deep Cameo contrast between the sharply detailed, frosty design elements and the deeply mirrored fields. Population: 83 in 68 Deep Cameo, 4 finer (1/17).
Ex: ANA Signature (Heritage, 10/2012), lot 3801. NGC ID# 24TX, PCGS# 96698
- 4466 1957 PR68 Deep Cameo PCGS. CAC.** The deeply mirrored fields of this delightful PR68 specimen contrast dramatically with the sharply detailed frosty design elements, and the virtually flawless surfaces show a few subtle hints of pale gold toning. Population: 83 in 68 Deep Cameo, 4 finer. CAC: 24 in 68, 0 finer (1/17). NGC ID# 24TX, PCGS# 96698

- 4467 1959 PR68 Cameo PCGS. CAC.** A stunning Superb Gem Cameo proof, this Franklin half dollar exhibits deeply mirrored silver surfaces with cameo contrast on both sides. Population: 47 in 68 Cameo, 0 finer. CAC: 20 in 68, 0 finer (1/17). NGC ID# 27VJ, PCGS# 86700
- 4468 1960 PR68 Ultra Cameo NGC.** A gorgeous white-on-black coin with exceptionally heavy cameo contrast, struck from matched dies with deep, watery fields and thickly frosted devices. Rarely seen finer. Census: 72 in 68 Ultra Cameo (1 in 68 ★), 6 finer (1/17).
Ex: Denver Signature (Heritage, 8/2006), lot 3601. NGC ID# 24TY, PCGS# 96701
- 4469 1961 PR68 Deep Cameo PCGS.** The design elements of this incredible PR68 specimen are fully detailed and the devices have a rich coat of mint frost that creates a stunning cameo effect against the deeply mirrored fields. The impeccably preserved surfaces show a few hints of pale gold toning. Population: 97 in 68 (2 in 68+) Deep Cameo, 1 finer (1/17). NGC ID# 24TZ, PCGS# 96702

KENNEDY HALF DOLLARS

**1967 Kennedy Half Dollar, MS67
Top-Grade Registry Coin**

- 4470 1967 MS67 PCGS.** The regular-issue 1967 Kennedy half dollar is rare in Superb Gem condition, and none are known numerically finer than the present MS67 coin. This PCGS Registry candidate displays sharp definition and satiny, brilliant mint luster. Die polishing lines in the fields suggest an early die state. Population: 21 in 67 (1 in 67+), 0 finer (1/17). NGC ID# 24WJ, PCGS# 6710
- 4471 1968-D MS67 PCGS.** This is an exceptionally well-preserved example of the conditionally elusive 1968-D Kennedy half dollar, ideal for Registry Set collectors. The strike is sharp, and each side offers brilliant, satiny mint luster. None are finer at either service. Population: 38 in 67, 0 finer (1/17). NGC ID# 24U7, PCGS# 6711
- 4472 1969-D MS67 PCGS.** 30th Anniversary Green Label Holder. Rich russet-red and aquamarine toning embraces most of the obverse border. The remainder of this lustrous Superb Gem is predominantly stone-white. Surprisingly rare in the present quality. Population: 12 in 67 (1 in 67+), 0 finer (1/17). NGC ID# 24U8, PCGS# 6712
- 4473 1974 MS67 PCGS.** 30th Anniversary Green Label Holder. Light to medium olive-gray patina adorns this lustrous, boldly struck, and virtually pristine Superb Gem. A desirable representative of this high mintage date. Population: 15 in 67 (2 in 67+), 0 finer (1/17). NGC ID# 24UG, PCGS# 6722
- 4474 1976 Clad MS67 PCGS.** 30th Anniversary Green Label Holder. Olive-green and apricot-gold toning embraces the obverse. The reverse displays wheat-gold throughout. A sharply struck and highly lustrous Superb Gem, ideal for the Registry Set collector. Population: 19 in 67 (1 in 67+), 0 finer (1/17). NGC ID# B769, PCGS# 6726
- 4475 1979-D MS67+ PCGS.** This Plus-graded Superb Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces are blanketed in attractive shades of golden-tan toning. Population: 42 in 67 (1 in 67+), 0 finer (12/16). NGC ID# 24UT, PCGS# 6736

**1982-D Half Dollar, MS67+
Tied for Finest Known**

4476 1982-D MS67+ PCGS. A major condition rarity, this Registry-grade 1982-D Kennedy half dollar ranks as one of the finest certified. The coin is fully struck and displays exceptionally well-preserved satin luster. Most of each side offers delicate champagne toning, although ice-blue appears near the upper obverse and lower reverse peripheries. Population: 30 in 67 (3 in 67+), 0 finer (1/17). NGC ID# 24UZ, PCGS# 6742

4477 2006-D MS68 PCGS. Razor-sharp definition is evident on all design elements of this incredible Kennedy half dollar and the impeccably preserved brilliant surfaces radiate vibrant mint luster on both sides. Eye appeal is tremendous. Population: 2 in 68, 0 finer (12/16). NGC ID# 27VY, PCGS# 6791

SMS KENNEDY HALF DOLLARS

4478 1965 SMS MS68 Cameo NGC. Of the three Special Mint Set Kennedy half dollar issues of the 1960s, the 1965 is the most difficult to locate with cameo surfaces. This magnificent MS68 specimen exhibits sharply detailed, frosty devices that create intense cameo contrast with the deeply reflective fields. Census: 40 in 68 Cameo (2 in 68★), 1 finer (1/17). NGC ID# 27WJ, PCGS# 86845

4479 1965 SMS MS68 Cameo NGC. This piece from the first official year of Special Mint Set production has moderate mirrors and contrast under a delicate layer of patina which takes on green-gold attributes close to the rims. Carefully preserved and attractive. Census: 40 in 68 Cameo (2 in 68★), 1 finer (1/17). NGC ID# 27WJ, PCGS# 86845

PROOF KENNEDY HALF DOLLARS

**1964 Accented Hair Half, PR68 Cameo
Doubled Die Obverse**

4480 1964 Accented Hair, Doubled Die Obverse, FS-103, PR68 Cameo PCGS. This Accented Hair variety shows moderate doubling on the motto, LIBERTY, the date, and upper hair. The Accented Hair is scarce itself, and this is essentially a variety of a variety; therefore, quite scarce. To date (1/17), this is the finest example certified as a Cameo by either service. Each side is completely brilliant and noticeably contrasted. Exceptional quality. PCGS# 391380 Base PCGS# 86801

4481 1964 Accented Hair, FS-401, PR68 Cameo NGC. Type One Reverse. The frosty portrait contrasts with the mirrored obverse field. Cameo contrast is also apparent on the reverse. A brilliant and undisturbed example of the briefly struck introductory proof subtype. A slight, narrow lamination (as coined) is between the BE in LIBERTY.

Ex: Cornerstone Collection (Heritage, 10/2012), lot 9286, which realized \$1,527.50. NGC ID# 4EA9, PCGS# 145626 Base PCGS# 86801

4482 1964 Accented Hair, FS-401, PR68 Cameo PCGS. An impressive Superb Gem Cameo proof, this 1964 Kennedy half dollar features the accented hair from new hubs. This brilliant piece exhibits black-and-white contrast with no toning on either side. PCGS has only certified nine finer Cameo proofs (1/17). NGC ID# 4EA9, PCGS# 145626 Base PCGS# 86801

4483 1964 Accented Hair, FS-401, PR66 Deep Cameo PCGS Secure. Type One Reverse. Enhanced lines within the hair above the ear identify the scarce "Accented Hair" proof subtype. Examples of this variety can also be attributed by a weak lower left serif on the I in LIBERTY. The present intricately struck half dollar is brilliant aside from a fleck near the U in UNITED. A tiny strike-through after the F in OF is of mint origin. PCGS# 145627 Base PCGS# 96801

4484 1981-S Type Two, FS-501, PR70 Ultra Cameo NGC. This is a flawlessly preserved example with seemingly infinite depth of mirroring in the fields and contrasting stark-white luster on the devices. The strike is full, and there are no distractions. Eye appeal is incredible. PCGS# 147192 Base PCGS# 96822

EARLY DOLLARS

4485 1795 Flowing Hair, Two Leaves, B-9, BB-13, R.4 — Planchet Flaw, Cleaned — NGC Details. VF. Bowers Die State II. The obverse is heavily clashed. This variety features a rounded bust and berries arranged 9x8. Noted planchet flaws occur around Liberty's lower curls and below the first S in STATES. Each side is bright from cleaning, but detail is good. A collectible example of the Flowing Hair type.

**1795 Flowing Hair Dollar, VG10
Three Leaves, B-5, BB-27**

4486 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VG10 PCGS. The B-5, BB-27 die pair is one of 29 1795-dated Flowing Hair varieties, yet it surprisingly accounts for about one-third of the year's survivors. This smoothly worn example is glossy with olive-gray surfaces and blue overtones. Sharply defined for the grade, the surfaces show only scattered shallow marks. Two or three small rim bumps appear as lighter flat spots on the well-defined edges amid the toning. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 Flowing Hair Dollar, Fine 12
Three Leaves, B-5, BB-27**

4487 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 12 PCGS. A pearl-gray representative of the briefly coined, introductory, and crown-sized Flowing Hair type. The "bar" in the field behind Liberty's highest neck curl allows immediate attribution as BB-27. We note only a thin mark on the eagle's belly, wispy hairlines on the portrait, and a slight rim ding near the 5 in the date. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

4488 1796 Small Date, Large Letters, B-4, BB-61, R.3, VG10 NGC. Bowers Die State I. B-4 is the only collectible Large Letters 1796 variety. This charming representative displays stone-white highpoints with faint chestnut-gold toning across the open fields. Protected areas are charcoal-gray. Relevant marks are confined to a single thin line in Liberty's hair. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

4489 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Plugged, Tooled — NGC Details. XF. Formerly holed near the ER in LIBERTY, but skillfully plugged and repaired. The fields show signs of smoothing. The gunmetal-gray surfaces are nicely defined, and glimmers of luster accompany the eagle's wings.

4490 1798 Large Eagle, Knob 9, 5 Vertical Lines, B-4, BB-92, R.4, Fine 12 PCGS. Bowers Die State II. The scarce BB-92 and the rare BB-91 are the only 1798 die marriages with 13 arrows, a knob 9, and five vertical lines in the shield. This is a problem-free steel-gray Fine example that retains portions of the planchet texture near the F in OF. NGC ID# CAUX, PCGS# 40010 Base PCGS# 40008

**1798 B-29, BB-119 Dollar, XF45
Large Eagle, Pointed 9, Scarce Die Pair**

4491 1798 Large Eagle, Pointed 9, Close Date, B-29, BB-119, R.4, XF45 PCGS. Ex: Miller. Bowers Die State II. Brief glimpses of mint luster remain on this Choice XF example of the scarce BB-119 die pair. Following numerous uses, the obverse die was retired after striking the variety, while the reverse die was used again to strike BB-120. As one might imagine, the obverse is softly struck from the worn and cracked die (as are all examples of the variety). Silver-gray surfaces show a speckling of powder-gray patina on both sides, but no heavy abrasions or adjustment marks. NGC ID# 24X6, PCGS# 40036 Base PCGS# 40018

4492 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, VF30 PCGS. Bowers Die State V. Traces of golden mint luster remain at the borders of this lightly toned, silver-gray early dollar. Pale blue overtones add to the eye appeal. Sharply defined despite 30 points of wear, the coin is a textbook example of the middle state of the dies. A dull vertical die crack along the inside of the left-hand stars is only slightly biplanar, a condition that increases in severity until star 7 and the L in LIBERTY weaken to obscurity. NGC ID# 24X6, PCGS# 40039 Base PCGS# 40018

**1799/8 Draped Bust Dollar, XF Details
15 Stars Reverse, B-3, BB-141**

4493 1799/8 15 Stars Reverse, B-3, BB-141, R.3 — Improperly Cleaned — NGC Details. XF. Bowers-Borckardt Die State III. The remnants of an undertype 8 show beneath the final digit in the date and the clouds on both ends have been enlarged to cover up the extra stars on the reverse, with just a couple of points still protruding, identifying the popular BB-141 overdate. Lightly worn and lightly abraded, the lavender-gray surfaces of this still-attractive specimen show an unnatural dullness, the effects of a light cleaning long ago.

4494 1799 Irregular Date, 13 Stars Reverse, B-15, BB-152, R.3, VG10 PCGS. Bowers Die State IV. Die cracks travel through stars 4 to 7 and LIBERTY. This is a collectible, well-circulated Early dollar with remaining detail on the lower curls, Liberty's visage, and the shield. The peripheral elements are visible. Even light-gray patina covers each side. NGC ID# 24X7, PCGS# 40045 Base PCGS# 6880

4495 1799 Irregular Date, 15 Stars Reverse, B-4, BB-153, R.4, VG10 PCGS. Bowers Die State II. B-4 is a scarce Guide Book variety. The blundered 15 stars reverse, with enlarged clouds nearly concealing two stars, is paired with the Irregular Date obverse. The engraver entered the first 9 as if the date should be curved, but added the second 9 in line with the first two digits. This battleship-gray example shows the several die cracks associated with B-4, and is pleasing for the VG10 level despite wispy marks near the arrows. NGC ID# 24X7, PCGS# 40062 Base PCGS# 6879

**1799 B-4, BB-153 Dollar, VF35
Irregular Date, 15 Stars Reverse**

4496 1799 Irregular Date, 15 Stars Reverse, B-4, BB-153, R.4, VF35 PCGS. Bowers Die State II, with clashed denticles near stars 1 to 6. This Irregular Date variety is of medium scarcity, usually found in VF to XF condition. No Mint State examples are known, according to the most up-to-date versions of Bowers' *Silver Dollar Encyclopedia*. Varying shades of light and dark gray mix with daubs of olive-gold patina. Light blending occurs on cheek and upper hair curls, and the eagle's feathers and shield. Population: 5 in 35, 8 finer (1/17). NGC ID# 24X7, PCGS# 40062 Base PCGS# 6879

4497 1799 7x6 Stars, B-5, BB-157, R.2 — Obverse Repaired — NGC Details. XF. Bowers Die State III. The right obverse field is tooled and hairlined, and a few thin marks are closely spaced on the cleavage. The obverse is stone-white save for glimpses of tan patina and an area of navy-blue near the date. The partly lustrous reverse is golden-brown except for peripheral cobalt-blue toning.

4498 1799 8x5 Stars, B-23, BB-159, R.3, VF25 PCGS. Bowers Die State III. Deep forest-green and stone-gray toning blankets this original Heraldic Eagle dollar. The only consequential mark is a field line above the hair ribbon. The sole 8x5 Stars die marriage. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

**1799 7x6 Stars Dollar, XF45
Scarce B-6, BB-162 Die Pair**

4499 1799 7x6 Stars, B-6, BB-162, R.4, XF45 NGC. Bowers Die State III. Die cracks travel from the rim through cloud 7, from the R in AMERICA the olive leaves, and from the F in OF through the wing. BB-162 is a scarce die marriage, with Bowers writing: "Most specimens are in circulated grades through VF, with an occasional EF and even more occasional AU appearing on the market." This Choice XF early dollar has charcoal and olive-gray patina with bold design detail for the grade. Lightly marked and undoubtedly approaching the next highest level of preservation. NGC ID# 24X7, PCGS# 40053 Base PCGS# 6878

**1799 Dollar, B-9, BB-166, XF40
7x6 Stars, Collectible Early Type**

4500 1799 7x6 Stars, B-9, BB-166, R.1, XF40 ANACS. Die State V. A die crack connects the 1 to the rim, other cracks appear near stars 10 to 12, and a die break occurs after the final S in STATES. BB-166 is the most available variety among 1799 dollars, making this a collectible example for an early dollar type set. Deep charcoal-gray patina colors the recesses and peripheral areas, lightening over exposed motifs that retain pleasing detail. A small dig on the shield is noted for accuracy. Housed in a small-sized holder. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

**1800 Draped Bust Dollar, VF35
Rare B-3, BB-183 Variety**

4501 1800 B-3, BB-183, R.5, VF35 NGC. Bowers-Borckardt Die State I. The R in LIBERTY is doubled and the leaf touches the lower stand of I in AMERICA, identifying the rare BB-183 variety. The BB-183 has a surviving population of 40-70 examples in all grades and was considered one of the rarest varieties of the Draped Bust series by early numismatists. A few more coins surfaced over the years, as attributing early dollar varieties became more popular. This Choice VF specimen offers pleasing lavender-gray surfaces, with slate-gray highlights. Most interior detail on the devices remains intact. NGC ID# 24X9, PCGS# 40069 Base PCGS# 6887

4502 1800 B-16, BB-187, R.2 — Improperly Cleaned — NGC Details. VF. Bowers Die State III. A moderately circulated early dollar with deep lavender and cream-gray toning. The fields have a slightly cloudy appearance, but no abrasions are readily apparent. Ex: Perry Creek Collection (Heritage, 8/2010), lot 5114, which realized \$1,495.

**1800 B-19, BB-192 Dollar, XF45
AMERICA! Guide Book Variety**

4503 1800 AMERICA!, B-19, BB-192, R.2, XF45 NGC. Bowers Die State IV. Golden-tinted luster illuminates the legends and stars on this Guide Book variety silver dollar. The final "I" in AMERICA! is actually a mint-made die scratch. The breast feathers show wear, but marks are inconsequential, and we note a rim nick on the reverse at 4:30 strictly as an identifier. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

4504 1801 B-4, BB-214, R.4, VF20 PCGS. Bowers Die State III. A charming cream-gray and caramel-gold example of this better Bolender variety. Close inspection reveals a few faint hair-thin marks near the ear, but the wings are well defined, and all letters in E PLURIBUS UNUM are clear. NGC ID# 24XA, PCGS# 40086 Base PCGS# 6893

4505 1802 Wide Date, B-5, BB-242, R.5 — Improperly Cleaned — NGC Details. VF. Bowers Die State I. A stone-white high points contrast with dove-gray fields. This slightly glossy Heraldic Eagle dollar has been wiped, but no marks are noticeable and substantial design detail remains. Along with B-9, B-5 is regarded among the scarcest 1802 die marriages, excluding the novodel proof.

**1803 Large 3 Dollar, VF35
B-6, BB-255**

- 4506 1803 Large 3, B-6, BB-255, R.2, VF35 PCGS.** Incorrectly identified by PCGS as a Small 3, the upper left serif of the digit 3 being absent on the true Small 3 variety. The obverse of this example has medium heather and blue toning, with light gold luster throughout the stars, date, and LIBERTY. Likewise, the reverse has considerable peripheral luster with golden-brown color, tending toward olive. The surfaces are lightly abraded as usual, although the toning tends to mask these marks.
Ex: Long Beach Signature (Heritage, 9/2005), lot 3698. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

SEATED DOLLARS

- 4507 1840 AU55 NGC. OC-2, High R.4.** Osburn and Cushing designate OC-2 as a Top 30 Variety, due to doubling on the upper obverse stars. It is much scarcer than OC-1, the usual 1840 commercial die marriage. Dusky-brown and ocean-blue toning accompany this moderately marked and semiprooflike first-year Seated dollar. NGC ID# 24YA, PCGS# 6926
- 4508 1842 AU58 PCGS. OC-2, R.1.** Osburn/Cushing Die State b/a. Light tan-gold toning visits the borders of this moderately marked near-Mint No Motto Seated type coin. Luster is prevalent throughout the legends and motifs. NGC ID# 24YC, PCGS# 6928

**1842 Dollar, Brilliant MS62
No Motto Type Representative**

- 4509 1842 MS62 PCGS. OC-2.** The 1842 Seated dollar was struck to the extent of 184,618 coins. Examples are scarcely seen in mint condition, but they are obtainable with a little patience through MS63. This brilliant MS62 dollar is well-struck with good detail on the stars and head. The eagle's wingtips and left (facing) leg feathers are incomplete. Brightly frosted with minor scattered marks. A nice Uncirculated No Motto type coin. NGC ID# 24YC, PCGS# 6928
- 4510 1847 MS62 PCGS. OC-2.** Osburn-Cushing Die State d/b. Housed in an old green label holder. Attractive swaths of bluish-gray toning join silver-gray patina over softly reflective and lustrous fields. A few light bagmarks are visible under a loupe, but they do not diminish the pleasing, original eye appeal. The strike is typical for the issue with slight blending on the hair and star centers. The 1847 is one of the more available No Motto Seated dollars, yet it is moderately scarce in all Uncirculated grades. Population: 16 in 62 (1 in 62+), 39 finer (12/16). NGC ID# 24YJ, PCGS# 6934

- 4511 1850 XF45 PCGS. OC-1, R.3.** The 1850 has a low business mintage of 7,500 pieces, struck from a single die pair. This is a glossy and moderately abraded example with glossy golden brown and powder-blue surfaces. NGC ID# 24YM, PCGS# 6937

**1856 Seated Dollar, AU53
Scarce in All Grades.**

- 4512 1856 AU53 PCGS. OC-1, R.2.** The 1856 is scarce in all grades and especially challenging in mint condition. This AU53 example shows slight evidence of die polishing in the fields, common to most Seated dollars. The centers are pale gray and the margins lightly toned reddish-russet. An attractive, problem-free AU Seated dollar. Population: 11 in 53, 56 finer (1/17). NGC ID# 24YV, PCGS# 6944
- 4513 1859-O MS60 ANACS. OC-2.** The mintmark is entered low and leans left. This flashy and faintly toned representative has a decent strike and no singularly obtrusive abrasions. Among the more available No Motto Seated dollar issues. Housed in a small-sized holder.
Ex: Portland, Oregon Bullet Sale (Heritage, 3/2004), lot 791, which realized \$747.50. NGC ID# 24YY, PCGS# 6947
- 4514 1859-O MS61 PCGS. OC-1.** The many peripheral reverse die cracks attribute OC-1. This coruscating example has brilliant fields and devices, though the rims exhibits tobacco-brown and forest-green toning. The surfaces display marks consistent with the grade. NGC ID# 24YY, PCGS# 6947
- 4515 1860-O MS60 PCGS. OC-5.** Light straw-gold toning visits this lustrous and well struck New Orleans type coin. A strike-through (as made) is on the right obverse field, but abrasions are minor for the MS60 level. Certified in a green label holder. NGC ID# 24Z3, PCGS# 6950
- 4516 1860-O MS61 PCGS. OC-1.** An OC-unlisted late die state with many die cracks across the borders of both sides. A well-struck New Orleans Seated type coin. Brilliant and lustrous with the expected number of small to moderate field abrasions. Most Uncirculated O-mint dollars likely emerged from the same indifferently transported bag. NGC ID# 24Z3, PCGS# 6950

**1871 Silver Dollar, MS62
Smooth and Lightly Toned**

- 4517 1871 MS62 PCGS. OC-7, R.2.** Light caramel-gold toning drapes this coruscating and minimally marked example. The strike is fairly sharp, and the eye appeal is significant. One small alloy spot is west of the eagle's shield. The 1871 is one of just two issues with a mintage above 1,000,000 pieces, but attractive coins are always in demand as representatives of the Seated Motto type.
Ex: Rosemont Signature (Heritage, 8/2013), lot 4244. NGC ID# 5DNV, PCGS# 6966

PROOF SEATED DOLLAR

1873 Seated Dollar, Toned PR63 Final Year of the Seated Dollar Series

- 4518 1873 PR63 PCGS. OC-P1.** Osburn-Cushing Die State a/a. Only 600 proofs were struck of this final year of the type, but numerous pieces were preserved — perhaps because they were then thought to be the “end of an era” (for silver dollars). This Select proof retains its original reflectivity that shines brightly through the pinkish-gray toning with areas of deep, reddish-brown patina seen over each side. Only a few delicate field lines determine the numeric grade. Population: 53 in 63, 51 finer (1/17). NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

- 4519 Collection of Nine Different Chopmarked Trade Dollars:** 1873 AU50; 1874 XF45; 1874-S XF45 bent; 1875-S Type I Reverse AU50 bent; 1876 Type I/II XF40; 1876-S Type II/II AU55; 1877 XF40; 1877-S AU55; 1878-S AU50.
Ex: Eric P. Newman Numismatic Education Society. (Total: 9 coins)
- 4520 1873 MS62 PCGS.** Satiny luster shines through dusty tan-gold toning on this Mint State first-year Trade dollar. The strike is soft on the eagle's right (facing) leg but bold elsewhere. Grade-limiting abrasions are light and scattered. NGC ID# 252W, PCGS# 7031
- 4521 1873 MS62 PCGS.** The lightly marked surfaces of this MS62 Trade dollar are blanketed in rich shades of slate-gray and greenish-gold toning, with satiny mint luster underneath. The design elements are well-detailed, with a touch of flatness on the stars and Liberty's head. NGC ID# 252W, PCGS# 7031
- 4522 1874 MS63 PCGS.** Period after FINE. A satiny cream-gray representative void of bagmarks, though careful rotation reveals minor field hairlines. The strike is incomplete on Liberty's hair and the eagle's right (facing) claw. Population: 30 in 63 (1 in 63+), 38 finer (1/17). NGC ID# 252Z, PCGS# 7034
- 4523 1874-CC AU58 NGC.** Micro CC. No period after FINE. This partially lustrous Carson City example is mostly brilliant but displays peach freckles on the reverse legends. Smooth except for faint horizontal hairlines on the left obverse field. NGC ID# 2532, PCGS# 7035
- 4524 1874-S MS63 PCGS. Breen-5785.** Large S. No period after FINE. A satiny and virtually brilliant example with surprisingly unabraded surfaces. The strike shows blending on Liberty's head and the eagle's right (facing) claw. Scarcer at the Select level than implied by its mintage. NGC ID# 2533, PCGS# 7036
- 4525 1875-CC Chop Mark, Type One Reverse, MS62 PCGS.** Period after FINE. A chop mark is present near Liberty's right (facing) elbow. The reverse shows a chop mark near the left border of the left wing. This lustrous and moderately wavy Carson City example displays a few obverse russet freckles and has a thin mark near star 10. PCGS# 517129 Base PCGS# 7038
- 4526 1875-CC Type One Reverse AU58 PCGS.** Period after FINE. A lightly circulated stone-white Carson City type coin. The obverse displays minor hairlines but neither side shows any consequential abrasions. The strike is usual for the issue on the right (facing) claw and the crest of the left wing. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

1875-CC Trade Dollar, MS62 White and Lustrous

- 4527 1875-CC Type One Reverse MS62 PCGS.** Period after FINE. A practically brilliant example that boasts booming luster and an above-average strike. A number of narrow die gouges (as made) are located near the eagle's head, and may be of interest to the specialist. Small to moderate field marks correlate with the MS62 grade. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038
- 4528 1875-S Type One Reverse MS64 PCGS.** Large S. By the end of 1875, the San Francisco Mint had struck more than 4.4 million Trade dollars, the majority of which were sent across the Pacific to East Asia. Many were also released into domestic circulation. This lustrous and well preserved near-Gem displays peripheral golden-brown toning. The strike definition is bold, aside from incompleteness on Liberty's head and nearby stars. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039
- 4529 1875-S/CC FS-501 AU53 PCGS.** Peach-gold toning visits protected areas of this lightly circulated overmintmarked Trade dollar. The open fields are silver-gray. Relatively unabraded, although a small strike-through is noted near the stem of Liberty's branch. A late die state example with advanced cracks through AMERICA. NGC ID# 2536, PCGS# 145813 Base PCGS# 7040
- 4530 1876 Type One Obverse, Type Two Reverse, MS62 PCGS.** A fully struck and prooflike pearl-white example. Lightly abraded overall for the MS62 level, though a small tick on the cheek is mentioned as an identifier. This Centennial-year issue has a much lower mintage than its San Francisco cousin. NGC ID# 2539, PCGS# 40111 Base PCGS# 7041
- 4531 1876 Type One Obverse, Type Two Reverse, MS63 PCGS.** A lustrous and lightly toned Centennial-year Trade dollar. The strike shows only slight blending on Liberty's hair and the eagle's claws. Marks are confined to the lower left obverse field. NGC ID# 2539, PCGS# 40111 Base PCGS# 7041
- 4532 1876 Type One Obverse, Type Two Reverse, MS63+ PCGS.** Dynamic cartwheel luster sweeps brilliant surfaces. A well struck Select Trade dollar with only a hint of tan toning. Field marks are moderate but few. Both sides display several peripheral die cracks. NGC ID# 2539, PCGS# 40111 Base PCGS# 7041
- 4533 1876-S Type One Obverse, Type One Reverse, MS62 PCGS.** Large S. Only a trace of golden toning accompanies this coruscating and crisply struck Trade dollar. The fields display the expected number of small to moderate abrasions. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043
- 4534 1877 MS63 NGC.** Peach-gold toning endows this nicely struck and lustrous Select Trade dollar. Bagmarks are practically absent, but a few delicate obverse field hairlines account for the grade. Certified in a pre-hologram holder. NGC ID# 253C, PCGS# 7044
- 4535 1877 MS64 PCGS.** The central devices of this attractive Choice example are sharply detailed, but a touch of softness shows on some stars. A delicate die crack travels through the top leaves of the branch, stars 5 and 6, to Liberty's coronet. The lustrous surfaces show no mentionable distractions. Population: 87 in 64 (8 in 64+), 13 finer (1/17). NGC ID# 253C, PCGS# 7044

- 4536 1877-S MS63 PCGS.** Large S. 420 GRAINS and TRADE are lightly die doubled toward the rim. One of several unlisted doubled die varieties known for this type issue. This lustrous Select example is minimally marked and displays light silver-gray toning. The quality is exceptional for the third-party grade. NGC ID# 253E, PCGS# 7046

PROOF TRADE DOLLARS

1875 Trade Dollar, Faintly Toned PR63 Type Two Reverse, Nice Mirrors

- 4537 1875 PR63 PCGS.** Type Two Reverse. Historically, the Type Two Reverse (no berry beneath claw) is considered significantly more available than the Type One Reverse, but a study of our archives suggests the difference is only moderate at most. The *Guide Book* mintage of 700 proofs provides an alternative to the low circulation strike population of the 1875 in finer grades. This Select proof displays glassy mirrors and nearly untuned silver surfaces that yield to slightly foggy bluish-gray accents at the margins. Aside from typical blending at Liberty's top hair strands, the strike is quite sharp on the rest of the elements. A few light hairlines are of little notice. Housed in an early two-piece green label holder (without "PCGS" on the label at top center). Population: 61 in 63, 77 finer (1/17). NGC ID# 27YL, PCGS# 7055

- 4538 1879 PR62 PCGS.** This is a boldly struck, brilliant proof with deeply reflective fields and a hint of cameo contrast on each side. Scattered light marks determine the grade. NGC ID# 27YR, PCGS# 7059

MORGAN DOLLARS

- 4539 1878 8TF Lines in LIB, VAM-2, MS65 PCGS.** 30th Anniversary Green Label Holder. Dynamic luster sweeps this nicely struck and nearly brilliant Gem. Delicate marks on the cheek are all that preclude an even finer grade. VAM-2 shows strong die doubling on the left side of the wreath. NGC ID# 253H, PCGS# 133785 Base PCGS# 7072

1878 8TF VAM-2 Silver Dollar MS64 Deep Mirror Prooflike

- 4540 1878 8TF Lines in LIB, VAM-2, MS64 Deep Mirror Prooflike PCGS.** The remarkably reflective fields contrast with the frosty devices. A brilliant example of this popular and briefly issued subtype. The left obverse exhibits scattered minor contact, and the remainder of the coin is well preserved. Both sides exhibit die doubling, usual for 8TF Morgans. NGC ID# 253H, PCGS# 40120 Base PCGS# 97073

- 4541 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** A readily available variety, with LIBERTY doubled and slight doubling visible on the stars. A diagonal die chip in the lower loop of the 8 is diagnostic. The obverse is radiantly toned in luminescent shades of pink, orange, blue, and violet, while the reverse is two-toned in brilliant white and tangerine-orange. An overall sharp strike reveals a clean cheek and neck on Liberty and only a few inconsequential field marks for the assigned Gem grade. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

1878 Eight Tailfeathers Morgan Dollar Deep Prooflike Near-Gem VAM-19

- 4542 1878 8TF Doubled Date, VAM-19, MS64 NGC Deep Prooflike.** Housed in a previous generation, pre-barcode NGC holder, this near-Gem Deep Prooflike dollar displays pleasing pale-violet toning at the borders surrounding brilliant-mirrored fields and frost-white devices. Liberty's cheek is clear of all but the most minor contact, while the Choice fields show only incidental chatter. Struck from the VAM-19 dies, with a sharply doubled date, tripled eyelid, doubled LIBERTY, as well as doubled stars and arrowheads. Rare in Deep Prooflike format. NGC ID# 253H, PCGS# 40196 Base PCGS# 97073

- 4543 1878 7/8TF Strong, VAM-38, MS65 PCGS.** Ex: Shapiro. Beautiful fire-red, apple-green, autumn-brown, and olive-gold patina endows the borders of this lustrous, crisply struck, and carefully preserved Gem. VAM-38 shows five tailfeather fragments beneath the prominent eight tailfeathers. NGC ID# 2TXZ, PCGS# 134035 Base PCGS# 7078

1878 7/8TF Dollar, MS65+ Prooflike VAM-38, Brilliant and Flashy

- 4544 1878 7/8TF Strong, VAM-38, MS65+ Prooflike PCGS.** A 7/5 tailfeather variety, VAM-38 is attributed by a partially lapped tail and a broadly doubled LIBERTY. The various 1878 "doubled tailfeather" varieties were created by using both 8TF and 7TF tailfeather hubs to create reverse dies. This flashy Gem shows only a trace of peripheral golden patina. The strike is crisp and marks are minor. NGC ID# 4DL5, PCGS# 40219 Base PCGS# 7079

**1878 Morgan Dollar, MS65 Prooflike
Strong 7/8TF, VAM-38**

4545 1878 7/8TF Strong, VAM-38, MS65 Prooflike PCGS. CAC. The remnants of five feathers are clearly visible below the primary tail feathers, and the area between the wing and tail is overpolished, identifying the popular VAM-38 variety. The obverse shows some doubling on the legend and date, as well. This delightful Gem is sharply detailed, aside from some incompleteness on the eagle caused by the noted die polishing. The fields are deeply reflective and only the most insignificant signs of contact are evident. Population: 12 in 65 Prooflike, 0 finer. CAC: 3 in 65, 0 finer (12/16). NGC ID# 4DL5, PCGS# 40219 Base PCGS# 7079

4546 1878 7/8TF 7/7 Strong, VAM-41, MS63 Deep Mirror Prooflike PCGS. A Top 100 Variety. VAMworld.com lists many doubled tailfeather varieties (VAM-32 through VAM-45), but VAM-41 shows more of the initial eight tailfeathers than any other VAM, the reason why Fey and Oxman selected it for their Top 100 reference. A sharply struck, brilliant, and flashy example with few marks for the designated grade. Population: 6 in 63 Deep Mirror Prooflike, 3 finer (12/16). NGC ID# 4DLC, PCGS# 40226 Base PCGS# 97079

4547 1878 7/8TF 7/4 Weak, VAM-41A, MS64 Deep Mirror Prooflike NGC. Lovely arcs of cherry-red, orange-gold, and electric-blue toning invigorate the borders of this otherwise brilliant near-Gem. Flashy fields contrast with lightly frosted motifs. A sharply struck doubled tailfeathers dollar. Housed in a prior generation holder. NGC ID# 2TY3, PCGS# 40212 Base PCGS# 97075

**1878 Morgan Dollar, MS66
7TF, Reverse of 1878**

4548 1878 7TF Reverse of 1878 MS66 PCGS. The seven feathers in the eagle's tail, combined with the parallel top arrow feather, identifies the popular Reverse of 1878. This well-detailed Premium Gem shows the effects of die polishing on the eagle's wings and some crumbling on the talons. The impeccably preserved surfaces show vibrant mint luster, with vivid greenish-gold toning on the obverse. Population: 48 in 66 (7 in 66+), 0 finer (12/16). NGC ID# 2TY3, PCGS# 7074

**1878 Morgan Dollar, MS66
Reverse of 1878
VAM-100-1, Top 100**

4549 1878 7TF Reverse of 1878, Type One Obverse, VAM-100-1, MS66 PCGS. A Top 100 Variety. The VAM is undesignated on the holder, but it meets all the requirements, such as a die doubled E PLURIBUS, a die line within the A in DOLLAR, a series of rim cuds near the date, and two die lines within the cap fold. A thoroughly lustrous Premium Gem with exemplary surfaces. The obverse border displays sea-green, the central obverse is dappled lavender and stone-gray, and the reverse shows slightly dusky chestnut-gold patina. NGC ID# 253K, PCGS# 133832 Base PCGS# 7074

4550 1878 7TF Reverse of 1878, Triple Star, VAM-141, MS65 Prooflike PCGS. CAC. A Top 100 Variety. An obverse star near 5 o'clock is strongly die tripled. LIBERTY and the P in PLURIBUS are die doubled. The VAM variety is undesignated on the holder. Brilliant, flashy fields and a well preserved obverse confirm the quality of this nicely struck Gem. NGC ID# 253K, PCGS# 40302 Base PCGS# 7075

4551 1878 7TF Reverse of 1879 MS65 PCGS. The slanted top arrow feather identifies the Reverse of 1879. This attractive Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces, under subtle shades of golden-tan and lavender-gray patina. PCGS has graded 25 numerically finer examples (1/17). NGC ID# 253L, PCGS# 7076

4552 1878 7TF Reverse of 1879 MS65 PCGS. A hint of light golden toning graces softly frosted surfaces on this Gem Reverse of 1879 first-year Morgan. The strike is a trifle soft on the eagle's breast and the hair above Liberty's ear, but not significantly so. A few tiny marks are consistent with the grade. Few finer examples are certified. NGC ID# 253L, PCGS# 7076

4553 1878 7TF Reverse of 1879 MS65+ PCGS. A crisply struck Gem that boasts dynamic luster and remarkably smooth surfaces. Brilliant and beautiful. First-year Morgan dollars are often collected by VAM variety, but the present piece lacks identifying characteristics aside from delicate peripheral die cracks. NGC ID# 253L, PCGS# 7076

4554 1878-CC MS65 PCGS. Flashy electric-blue toning appears on each side of this Gem 1878-CC Morgan dollar, accentuating otherwise lavender-gray surfaces. Vibrant cartwheel luster dazzles the eye as it rotates beneath the patina. Both sides are well-preserved and boldly struck. A hidden reed mark on the eagle's breast is the only mentionable abrasion. NGC ID# 253M, PCGS# 7080

4555 1878-CC MS65+ PCGS. CAC. VAM-22. Peach-gold and jade-green toning adorns the margins of this lustrous first-year Carson City Gem. Well struck and desirable. The dies are rotated approximately 45 degrees clockwise, unusual for the series. NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66
Few Known Finer

- 4556 1878-CC MS66 PCGS.** Vibrant luster delivers pleasing visual appeal on this well-preserved, first-year Carson City Morgan dollar. The strike is bold, and each side displays a subtle hint of light golden toning. The 1878-CC is occasionally available in this grade, but finer pieces are very rare. PCGS reports only six numerically finer submissions (1/17). NGC ID# 253M, PCGS# 7080

1878-CC VAM-22 Dollar, MS66
Brilliant and Lustrous

- 4557 1878-CC MS66 PCGS. VAM-22.** Dynamic cartwheel luster sweeps fields. The strike is precise, and only a single hair-thin diagonal line on the cheek precludes a finer grade. Brilliant save for glimpses of sun-gold toning on the upper obverse margin. The first year 1878-CC is often collected by die variety. VAM-22 displays diagnostic die lines in the cap and left (facing) wing. NGC ID# 253M, PCGS# 7080

- 4558 1878-S MS66+ PCGS.** This Plus-graded Premium Gem is sharply detailed in most areas, with just a trace of blending on the hair strands above Liberty's ear. The impeccably preserved, creamy surfaces radiate vibrant mint luster, with terrific eye appeal. PCGS has graded 36 numerically finer examples (1/17). NGC ID# 253R, PCGS# 7082

- 4559 1878-S MS66+ PCGS. CAC.** A Plus-graded Premium Gem Morgan dollar that becomes very scarce in grades above MS66, this coin offers sharply detailed design elements and vibrant mint luster throughout. The virtually pristine surfaces show a few subtle hints of golden-tan toning. PCGS has graded 36 numerically finer examples (1/17). NGC ID# 253R, PCGS# 7082

- 4560 1878-S MS66+ PCGS. CAC.** This is a sharply struck first-year San Francisco Morgan with frosty, brilliant mint luster. A few light grazes on the obverse do not prevent a CAC endorsement. PCGS reports only 36 finer representatives (12/16). NGC ID# 253R, PCGS# 7082

1878-S Dollar, MS65 Deep Mirror Prooflike
Scarce in Gem Condition, Full Strike

- 4561 1878-S MS65 Deep Mirror Prooflike NGC.** Bits of almond-gold toning cling to the borders near the rims, framing glassy-mirrored fields and lightly frosted motifs. Flashy silver luster occupies the centers and accentuates the reflectivity. A razor-sharp strike covers both sides. A few small bagmarks exist, but they are non-distracting and this coin clearly belongs in the ranks of very scarce Gem Deep Prooflike 1878-S dollars. Housed in a previous generation, pre-barcode NGC holder. Census: 26 in 65 Deep Mirror Prooflike, 3 finer (1/17). NGC ID# 56ZC, PCGS# 97083

1879 Silver Dollar, Toned MS66+
Only 10 Finer Examples Certified

- 4562 1879 MS66+ PCGS. CAC.** This lustrous and satiny high-end Premium Gem Morgan is as distinctive as it is delightful. Imbued with a swath of iridescent toning at the lower right quadrant of the obverse, shades of sun-gold meld into lavender and tangerine-orange hues, while the balance of the coin (both front and back) is brilliant and silver-white. There are virtually no marks of any consequence on the coin for the assigned grade. The sharpness of the strike is unmistakable. Population: 43 in 66+, 5 finer. CAC: 50 in 66, 0 finer (1/17). NGC ID# 253S, PCGS# 7084

- 4563 1879 MS65 Prooflike PCGS.** Prooflike 1879 Morgans are rarely seen in Gem or finer condition. This piece displays reflective fields and softly frosted devices. A hint of light golden toning resides on each side, and there are no major abrasions. Population: 25 in 65 (1 in 65+) Prooflike, 2 finer (1/17). NGC ID# 253S, PCGS# 7085

- 4564 1879-O MS65 NGC.** From the *Guide Book of Morgan Silver Dollars*: "The 1879-O is plentiful in lower Mint State levels from 60 through 63. MS-64 coins are scarce, and in proportion to the demand for them, MS-65 pieces are rare."

This is a well-struck, brilliant example with a dynamic cartwheel sheen across the carefully preserved surfaces. A few wispy marks and shallow luster grazes keep the piece from an even finer grade assessment. NGC has graded eight numerically finer examples (12/16). NGC ID# 253X, PCGS# 7090

**Peripherally Toned 1879-O Dollar
MS64 Deep Prooflike**

4565 1879-O MS64 Deep Prooflike NGC. Cherry-red and navy-blue toning endows the peripheries of this flashy and crisply struck Choice New Orleans dollar. The obverse is refreshingly unabraded, while the reverse field displays a few scattered small marks. Scarce in DMPL format despite a fairly generous mintage. Encapsulated in a former generation holder. NGC ID# 253V, PCGS# 97091

4566 1879-S Reverse of 1878, VAM-9, MS64 PCGS. CAC. A Top 100 Variety. 30th Anniversary Green Label Holder. Lightly toned and crisply struck with potent luster and a well-preserved reverse. The cheek displays delicate grazes. Although the Third Reverse 1879-S is common, its Second Reverse counterpart is considerably scarcer. NGC ID# 253W, PCGS# 133858 Base PCGS# 7094

4567 1879-S Reverse of 1878, VAM-39, MS64 NGC. A Top 100 Variety. The 1879-S Third Reverse is a common issue, but the 1879-S with an obsolete Second Reverse is scarce in Uncirculated grades. Aquamarine, almond-gold, and lilac-red toning adorn this well preserved and coruscating near-Gem. The reverse shows only light autumn-gold toning across the border. NGC ID# 253W, PCGS# 133862 Base PCGS# 7094

4568 1879-S MS67+ PCGS. CAC. The 1879-S Morgan dollar is a popular branch mint type coin, from a mintage of 9.1 million pieces. The virtually pristine surfaces of this Plus-graded Superb Gem display a mix of vibrant mint luster and prooflike reflectivity, with sharply detailed, frosty design elements and incredible eye appeal. NGC ID# 253X, PCGS# 7092

4569 1879-S MS67+ PCGS. CAC. Razor-sharp definition is evident on all design elements of this Plus-Graded Superb Gem and the virtually pristine surfaces radiate vibrant mint luster on both sides. A few delicate traces of pale gold and lavender patina enhance the mostly brilliant surfaces. NGC ID# 253X, PCGS# 7092

**1880-CC Silver Dollar, MS65+
Second Reverse, VAM-7**

4570 1880-CC 8/7, Reverse of 1878, VAM-7, MS65+ NGC. A Hit List 40 Variety. Howard Rounds Newcomb was first to report the Small CC, Reverse of 1878 and Large CC, Reverse of 1879 varieties of 1880-CC dollars, on page 77 of the February 1913 *Numismatist*. This is a lustrous and well struck Gem with exemplary preservation and only a hint of chestnut-gold toning. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

4571 1880-CC MS64 PCGS. VAM-8. A short dash below the second 8 identifies this popular variety. This Choice Mint State example displays brilliant silver surfaces and frosty white luster. The PCGS grade is based on the obverse, while the reverse is at least one point finer. Population: 14 in 64 (2 in 64+), 15 finer (1/17). NGC ID# 2542, PCGS# 7100

4572 1880-CC MS65+ NGC. VAM-8. The die anomalies for this variety include a line through M in AMERICA. Potent luster sweeps this faintly toned and splendidly preserved Gem. The reverse is virtually immaculate. The strike is good, though the centers are slightly incomplete. NGC ID# 2542, PCGS# 7100

4573 1880-CC MS66 PCGS. VAM-10. Dazzling luster and a practically pristine reverse are the most impressive attributes of this lightly toned Carson City dollar. The obverse displays only delicate grazes. The strike shows the usual minor inexactness at the centers. NGC ID# 2542, PCGS# 7100

4574 1880-CC MS66+ PCGS. VAM-3A. A Super CD Variety. The clashed die state of VAM-3, noted for its die rust near the mintmark. A thoroughly lustrous and well preserved Carson City dollar. Only a trace of tan toning is apparent. The strike is crisp except on the hair above the ear. NGC ID# 2542, PCGS# 7100

4575 1880-CC MS66+ PCGS. VAM-3A. A Super CD Variety, as designated by Dr. Mark Kimpton. A lustrous and lightly toned Premium Gem. Practically pristine aside from moderate contact on the field above the eagle's head. The central strike shows minor incompleteness. NGC ID# 2542, PCGS# 7100

**1880-CC Dollar, MS66+
Daubs of Peripheral Color**

4576 1880-CC MS66+ PCGS. CAC. Daubs of rainbow patina around the borders include elements of blue, violet, and gold. The centers on both sides retain complete mint brilliance but are softly impressed. Vibrant frost radiates from the exceptionally preserved surfaces of this Carson City dollar, fully deserving of the Premium Gem assessment and the added recognition for quality within the grade. Only 36 submissions are graded higher at PCGS and six at CAC (1/17). NGC ID# 2542, PCGS# 7100

4577 1880-CC MS65 Prooflike PCGS. VAM-3. A flashy and essentially brilliant Gem. The fields are nearly pristine aside from a solitary reed mark above the eagle's branch. The portrait displays only delicate grazes. Die rust near the mintmark is the pick-up point for VAM-3. NGC ID# 2542, PCGS# 7101

4578 1880-CC MS65 Prooflike PCGS. VAM-3. A brilliant Gem that boasts dazzling field reflectivity. The strike is good, though the hair above the ear is incomplete. The cheek is well preserved, and the grade is limited solely by thin field marks near the shoulder curl and STATES. NGC ID# 2542, PCGS# 7101

4579 1880-O MS64 PCGS. Oval O. Lovely peach-gold patina graces the borders of this lustrous New Orleans near-Gem. Sharply struck and carefully preserved. Although Gems are out of reach for most Morgan dollar collectors, the present piece provides similar eye appeal at a much lower cost. NGC ID# 2543, PCGS# 7114

4580 1880-O MS64 NGC. Micro O. Peach-gold toning adorns the margins, but the fields and devices are brilliant. Lustrous with a good strike and a smooth reverse. Minor obverse grazes determine the third-party grade. NGC ID# 2543, PCGS# 7114

- 4581 1880-S MS67+ PCGS. CAC.** Medium S. An outstanding Morgan dollar type coin. Brilliant and highly lustrous. The strike is intricate, and both sides show only the most inconsequential imperfections. One wonders how so many 1880-S dollars survived in high grade, given the coin-to-coin contact expected during minting, storage, and transportation. NGC ID# 2544, PCGS# 7118
- 4582 1880-S MS67+ PCGS. CAC.** Medium S. A spectacular Superb Gem. Brilliant except for an arc of golden-brown and jade-green along the upper left obverse. The lustrous and well struck surfaces are virtually pristine save for contact on the final A in AMERICA. The flag and left base of the 1 in the date are lightly repunched north. NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68
Ideal Morgan Type Coin**

- 4583 1880-S MS68 PCGS. CAC.** The CAC endorsement confirms the exceptional preservation and eye appeal of this high-end Superb Gem Morgan type coin. The strike is sharp, and both sides yield virtually brilliant, dazzling mint luster. Subtle reflectivity is discernible in the fields when tilted beneath a light. There are only five numerically finer coins at PCGS (1/17). NGC ID# 2544, PCGS# 7118

- 4584 1880-S MS67 Prooflike PCGS.** Large S. A Superb Gem silver type coin with dazzling luster, a bold strike, and smooth, brilliant surfaces. Moderate cameo contrast is apparent, particularly on the reverse. A prevalent but popular issue. NGC ID# 2544, PCGS# 7119

- 4585 1880-S MS66 Deep Mirror Prooflike PCGS.** Medium S. This brilliant Morgan dollar type coin has icy motifs and prominently reflective fields. The strike is good and the eye appeal is substantial. The '80-S is available in nice Mint State, but only a tiny percentage of the issue attains DMPL status. NGC ID# 2544, PCGS# 97119

- 4586 1880-S Checkmark, VAM-12, MS66 Deep Mirror Prooflike PCGS.** A Hit List 40 Variety. Medium S. The variety is undesignated on the PCGS holder, but all diagnostics are present. This well struck and brilliant Premium Gem is smooth aside from a slender field mark near the chin. As of (1/17), PCGS has certified 11 examples as both Deep Mirror Prooflike and VAM-12, with the two finest graded MS65. NGC ID# 36TS, PCGS# 41326 Base PCGS# 97119

- 4587 1881-CC MS66 PCGS.** A sharply struck, frosty Premium Gem example with largely unabraded surfaces. Both sides show mainly brilliant luster, but the obverse has a wide crescent of multicolor toning along the right-hand border. NGC ID# 2549, PCGS# 7126

- 4588 1881-CC MS66 PCGS.** Vivid shades of lavender-gray, sea-green, and amber toning blanket the well-preserved surfaces of this impressive Premium Gem, with well-detailed design elements and vibrant mint luster underneath. Overall eye appeal is outstanding. NGC ID# 2549, PCGS# 7126

- 4589 1881-CC MS66+ NGC. VAM-2.** Dappled orange toning embraces most of the obverse, though the lower margin is ocean-blue. The reverse of this lustrous and sharply struck Carson City dollar shows only light golden patina. The reverse field is essentially pristine, and the portrait shows only trivial contact. NGC ID# 2549, PCGS# 7126

- 4590 1881-CC MS66+ PCGS. CAC.** This spectacular Plus-graded Premium Gem exhibits sharply detailed design elements and impeccably preserved creamy surfaces, with vibrant, frosty mint luster on both sides. From a small mintage of 296,000 pieces. NGC ID# 2549, PCGS# 7126

- 4591 1881-O MS65 NGC. CAC.** An outstanding coin for the grade and one that might have garnered a Premium Gem designation were it not for a few faint grazes in the obverse fields. This Gem 1881-O Morgan is well-struck and displays frosty, brilliant mint luster. NGC has seen only nine numerically finer representatives (1/17). NGC ID# 2548, PCGS# 7128

- 4592 1881-O So-Called O/S, VAM-5, MS65 PCGS.** A Hit List 40 Variety. A broad diagonal line within the upper half of the opening of the mintmark suggests an S undermintmark, similar in appearance to the well-known 1882-O/S VAMs. VAMworld.com refers to the variety as an O/O. A lustrous and essentially brilliant Gem with a sharp strike and an exceptionally smooth cheek. Population: 4 in 65, 0 finer (1/17). NGC ID# 8B3L, PCGS# 134050 Base PCGS# 7128

- 4593 1881-S MS67+ PCGS. CAC.** The obverse is fully prooflike with cameo contrast, although the reverse is slightly more satiny in appearance. Both sides are devoid of abrasions and showcase brilliant, radiant luster. An exceptional type coin. NGC ID# 2549, PCGS# 7130

- 4594 1881-S MS67+ PCGS. CAC.** A spectacular Plus-graded Superb Gem, with razor-sharp definition on all design elements and radiant frosty mint luster throughout. The impeccably preserved, mostly brilliant surfaces show a few hints of greenish-gold toning. Eye appeal is terrific. NGC ID# 2549, PCGS# 7130

**1881-S Morgan Dollar, MS67+
Beautiful Obverse Toning**

- 4595 1881-S MS67+ PCGS. CAC.** A beautiful Superb Gem type coin with vivid rainbow toning on the obverse and delicate champagne color over the reverse. The strike is sharp, and Liberty's cheek is clean. The Plus designation and CAC green label, combined with the exceptional toning, make this coin what many collectors would consider the epitome of the perfect type representative. NGC ID# 2549, PCGS# 7130

**1881-S Dollar, MS68
Exceptional Eye Appeal**

- 4596 1881-S MS68 NGC.** Exceptionally attractive toning covers the obverse in tangerine-gold, lemon-yellow, violet, cherry-red, and pale blue shades while the reverse is brilliant-white. Semireflective fields surround frosted devices for pleasing contrast. A tiny surface flaw, as struck, above TE of STATES is the only mark to mention on this supremely attractive, Superb Gem 1881-S dollar. The strike, surfaces, and visual appeal are virtually unimprovable. NGC ID# 2549, PCGS# 7130

1881-S Dollar, Amazing MS68

- 4597 1881-S MS68 PCGS. CAC.** For the type collector for whom a "mere" MS67 would not do, this MS68 survivor is impressively lustrous with only a hint of silver-gray patina on each side and a glimpse of champagne on the reverse. Aside from a handful of trifling grazes, the surfaces are virtually untouched.
Ex: Baltimore Signature (Heritage, 3/2009), lot 1281. NGC ID# 2549, PCGS# 7130

- 4598 1881-S MS65+ Deep Mirror Prooflike PCGS.** Delicate gold toning is limited to the outer rims of this impressive Gem. Both sides are otherwise brilliant and untuned with black-and-white contrast between the deeply mirrored fields and the satiny silver devices. NGC ID# 2549, PCGS# 97131

- 4599 1882-CC MS65 Deep Mirror Prooflike PCGS. CAC.** The 1882-CC Morgan dollar is seldom encountered in grades above MS65, with Deep Mirror Prooflike surfaces. This impressive Gem exhibits sharply detailed, frosty design elements that contrast boldly with the deeply reflective fields. The surfaces are well-preserved, with a few hints of golden-tan toning. NGC ID# 254B, PCGS# 97135

- 4600 1882-CC Misplaced Date, Clashed Die, VAM-2A1, MS66 PCGS.** A Hit List 40 Variety. The N from IN is clashed in front of Liberty's neck, and a fragment of the flag of a 1 is misplaced below the first 8 in the date. Lustrous, sharply struck, and lightly toned. Smooth aside from a small bright area beneath the left (facing) wing. PCGS# 413025 Base PCGS# 7134

- 4601 11-Piece Lot of 1882-S Morgan Dollars MS65 PCGS. 2 Gold CAC, 9 CAC.** An 11-piece lot of 1882-S Morgan dollars, all graded MS65 PCGS and all housed in old "rattler" green label holders. Two coins have Gold CAC stickers, the other nine have regular CAC certifications. All coins are lustrous and sharply struck and most have delicate pale gold toning. A few have darker shades of sea-green, violet, and gray patina. (Total: 11 coins) NGC ID# 254F, PCGS# 7140

- 4602 1882-S MS67+ PCGS. CAC.** The mostly brilliant surfaces of this Plus-graded Superb Gem are free of mentionable distractions and radiate vibrant mint luster from both sides, with a few delicate highlights of pale gold toning. The design elements are sharply detailed and eye appeal is tremendous. NGC ID# 254F, PCGS# 7140

- 4603 1882-S MS67+ PCGS. CAC.** Arcs of vivid lime-green and violet toning visit the impeccably preserved surfaces of this Plus-graded Superb Gem. The design elements exhibit razor-sharp definition throughout and vibrant mint luster completes the terrific visual appeal. NGC ID# 254F, PCGS# 7140

- 4604 1883 MS67 PCGS.** A boldly struck and exceptionally well-preserved Superb Gem with warm golden toning over frosty surfaces. Liberty's cheek is free of abrasions but shows light die rust as is occasionally seen on this issue. PCGS has certified only four numerically finer coins (1/17). NGC ID# 254G, PCGS# 7142

- 4605 1883 MS66 Prooflike PCGS.** This remarkable Premium Gem exhibits sharply detailed design elements, with a frosty texture that contrasts boldly with the deeply reflective fields. The virtually pristine brilliant surfaces add to the outstanding eye appeal. Population: 10 in 66 (2 in 66+) Prooflike, 0 finer (1/17). NGC ID# 254G, PCGS# 7143

- 4606 1883-CC MS66 Prooflike PCGS. CAC. VAM-5** A fully brilliant Carson City type coin that boasts flashy fields and pleasing preservation. The strike is good and the eye appeal is imposing. VAM-5 has a die gouge in the eagle's beak and an unfinished area below the 18 in the date. NGC ID# 254H, PCGS# 7145

- 4607 1883-CC MS66+ Prooflike PCGS. CAC. VAM-5B.** This brilliant high-end Premium Gem exhibits sharply detailed devices and highly lustrous fields. The visual appeal is tremendous. One of only 19 pieces certified as MS66+ by PCGS. CAC: 36 in 66, 4 finer (1/17).
Ex: Rosemont Central States Signature (Heritage, 4/2011), lot 5676, which realized \$2,185. NGC ID# 254H, PCGS# 7145

- 4608 1883-CC MS65+ Deep Mirror Prooflike PCGS.** A well-preserved example with only a few minor abrasions. This high-end Gem displays brilliant surfaces and strong field-device contrast. The mirrored fields are deeply reflective. Finer Deep Mirror Prooflike coins are elusive. NGC ID# 254H, PCGS# 97145

**1883-O Morgan Dollar, MS66+
Vivid Obverse Toning**

- 4609 1883-O MS66+ PCGS. CAC.** The obverse of this Plus-graded Premium Gem displays vivid shades of violet, sea-green, and lavender toning, while the reverse remains mostly brilliant. The design elements are sharply detailed throughout, somewhat unusual for a New Orleans issue of this era, and vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 61 numerically finer examples (1/17). NGC ID# 254J, PCGS# 7146

- 4610 1883-O MS67 PCGS.** Crescents of lime-green and magenta toning enhance the impeccably preserved obverse surface of this incredible Superb Gem, while the reverse remains essentially brilliant. The design elements are sharply rendered and eye appeal is outstanding. Population: 61 in 67 (2 in 67+), 0 finer (1/17). NGC ID# 254J, PCGS# 7146

4611 1883-O MS67 PCGS. Light golden toning graces frosty, radiant luster on this Superb Gem example, while the design elements display sharp detail. The quality and eye appeal of this coin are seldom seen on the 1883-O, which is unknown finer than the current numeric grade. Population: 61 in 67 (2 in 67+), 0 finer (1/17). NGC ID# 254J, PCGS# 7146

4612 1883-S MS62 PCGS Secure. An attractive MS62 Morgan dollar, with sharply detailed design elements and vibrant mint luster on both sides. The surfaces are lightly marked for the grade, which was probably assigned due to some minor chatter on Liberty's cheek. NGC ID# 254K, PCGS# 7148

4613 1883-S MS62 PCGS. CAC. The brilliant luster of this undeniably Mint State 1883-S dollar dazzles the eye from a distance. The strike is sharp, and the reverse is nearly pristine. Scattered abrasions on the obverse limit the grade but are visually absorbed by the radiant luster. NGC ID# 254K, PCGS# 7148

4614 1883-S MS63 NGC. A mostly unabraded example with semiprooflike fields and warm champagne toning. A loupe reveals a few faint lines on each side that limit the grade, although this coin appears finer than MS63 to the unaided eye. NGC ID# 254K, PCGS# 7148

1883-S Morgan Dollar, Toned MS64 Notable Rarity in High Grade

4615 1883-S MS64 PCGS. Lavender, rose, and blue shadings shroud the reflective obverse surfaces. The reverse is largely brilliant, lustrous, and frosty. This is a strongly defined near-Gem with frosty S-mint luster that percolates through the patina. The 1883-S is a notable condition rarity, and PCGS has only seen 22 higher grading events (12/16). NGC ID# 254K, PCGS# 7148

4616 1884 MS66+ PCGS. CAC. 30th Anniversary Green Label Holder. Light golden-brown toning adorns the margins, but this lustrous and nicely struck type coin is principally brilliant. The fields are refreshingly smooth, and the cheek shows only delicate grazes. NGC ID# 254L, PCGS# 7150

4617 1884-CC MS66+ PCGS. CAC. VAM-4A. Duel recognition from PCGS and CAC attests to outstanding overall quality of this 1884 Carson City dollar. Vibrant luster washes over entirely brilliant surfaces void of marks worth mentioning. Well-struck. NGC ID# 8BBF, PCGS# 7152

1884-CC Dollar, MS67 Dramatic Crescent Toning

4618 1884-CC MS67 PCGS. Occasionally — but not often — 1884-CC dollars are available with distinctive and attractive, naturally acquired toning from long years of vault storage. This example displays a wide crescent of earthy shades including forest-green, cerulean-blue, plum-red, and amber-orange. The nearly unmarked fields are reflective and semiprooflike in bold contrast to the heavily frosted central motifs. PCGS reports just three numerically finer coins (12/16). NGC ID# 8BBF, PCGS# 7152

4619 1884-CC MS66 Prooflike PCGS. In the Prooflike category, the 1884-CC Morgan is scarce as fine as the the MS66 grade level, and PCGS reports only a single numerically finer example (12/16). This piece is boldly struck with brilliant, frosty motifs set against deeply reflective fields. A few faint grazes do not distract. NGC ID# 254M, PCGS# 7153

4620 1884-CC MS66 ★ Prooflike NGC. VAM-2. Snow-white mirrored fields and icy motifs give this Carson City type coin the initial appearance of a modern proof. The strike is good, the cheek is smooth, and the fields show only minor contact. The central reverse field exhibits parallel diagonal roller marks, as minted. NGC ID# 254M, PCGS# 7153

4621 1884-CC MS65 Deep Mirror Prooflike PCGS. VAM-6. The first C in the mintmark is repunched, one of many interesting characteristics of the VAM-6 variety. This crisply struck and thoroughly reflective Gem exhibits noticeable white-on-black cameo contrast. Close to brilliant, though the upper reverse displays light tan toning. NGC ID# 254M, PCGS# 97153

4622 1884-CC MS66 Deep Mirror Prooflike NGC. VAM-6. A brilliant and remarkably mirrored Carson City type coin. The strike is bold, the portrait is well preserved, and the reverse is practically mark-free. Census: 52 in 66 (1 in 66+ Deep Mirror Prooflike, 3 in 66★), 3 finer (12/16). NGC ID# 254M, PCGS# 97153

4623 1884-CC MS66 Deep Mirror Prooflike PCGS. Rarely are Carson City Morgan dollars found with the amazing contrast of this example. Both sides are brilliant and untuned with deeply mirrored fields and highly lustrous devices that could easily be confused for a branch mint proof. PCGS has only certified three finer DMPL examples (1/17). NGC ID# 254M, PCGS# 97153

4624 1884-S AU58 ANACS. A well-struck, partially lustrous example of this better San Francisco issue, showing a brush of high-point friction that precludes a Mint State designation. The interiors are mostly brilliant, the borders show golden toning. Housed in an old, small size white ANACS holder. NGC ID# 254P, PCGS# 7156

4625 1884-S AU58 PCGS. Just a trace of high-point wear shows on the well-detailed design elements of this attractive near-Mint specimen. The lightly abraded surfaces show a few subtle hints of golden-tan toning and both sides retain much original mint luster. NGC ID# 254P, PCGS# 7156

4626 1884-S AU58 PCGS. An attractive near-Mint specimen of this popular issue, with lightly abraded surfaces that retain much of their original mint luster and show a few hints of lavender-gray and golden-tan toning. The well-detailed design elements exhibit just a trace of high-point wear. NGC ID# 254P, PCGS# 7156

4627 1884-S AU58 PCGS. From a mintage of 3.2 million pieces, the 1884-S Morgan dollar is an abundant issue in circulated grades, but Mint State specimens are elusive. This attractive near-Mint example offers well-detailed design elements, with just a trace of wear on the high points, and fields that show a mix of satiny mint luster and prooflike reflectivity. A scattering of minor abrasions does little to detract from the overall presentation, but a diagonal scratch on Liberty's cheek is mentioned for completeness. NGC ID# 254P, PCGS# 7156

4628 1885 MS67 PCGS. CAC. VAM-3. The top of the 5 is repunched north, and a dash is below the second 8. This magnificent Superb Gem shows only a trace of butter-gold toning. The strike is intricate, the luster is booming, and the fields are virtually immaculate. CAC: 76 in 67, 2 finer (1/17). NGC ID# 254R, PCGS# 7158

4629 1885-CC MS65 PCGS. CAC. VAM-2A. Dappled navy-blue and plum-red toning dominates the obverse. The reverse has a brilliant center with golden-brown and apple-green patina about the periphery. Lustrous and well struck with exceptionally smooth surfaces. NGC ID# 254S, PCGS# 7160

4630 1885-CC MS66 PCGS. VAM-3. A lightly toned and lustrous Premium Gem of this perennially popular Carson City issue. The reverse is well preserved, and the obverse shows only delicate marks. Certified in a green label holder. NGC ID# 254S, PCGS# 7160

4631 1885-CC MS66+ PCGS. VAM-3. Golden-brown and jade-green toning endow this lustrous and nicely struck Premium Gem. Exceptionally unabraded aside from a solitary mark between the PL in PLURIBUS. VAM-3 is promptly attributed by its die lines near Liberty's eye. A popular and low mintage Carson City issue. NGC ID# 254S, PCGS# 7160

4632 1885-CC Doubled Dash, VAM-4, MS65 PCGS. A Hot 50 Variety. A large dash under the second 8 and a clash mark near the neck confirm the variety. Brilliant and thickly frosted, this Gem Carson City dollar is sharply struck throughout. Minor chatter on the bust truncation and in the upper reverse field define the grade. Population (for the variety): 38 in 65, 18 finer (1/17). NGC ID# 254S, PCGS# 133999 Base PCGS# 7160

1885-O Silver Dollar, MS67+ Repunched Date, VAM-2

4633 1885-O MS67+ PCGS. CAC. VAM-2. The 5 in the date is repunched north. Booming luster and an intricate strike attest to the quality of this brilliant and well preserved Superb Gem. An ideal candidate for the advanced New Orleans type collector. As of (1/17), PCGS has certified 21 pieces as 67+ and only a single example finer. NGC ID# 254T, PCGS# 7162

1885-O Dollar, MS66 Deep Mirror Prooflike Border-Toned Beauty

4634 1885-O MS66 Deep Mirror Prooflike PCGS. Deeply mirrored fields contrast with frosty, sharply struck design elements on this Premium Gem 1885-O Morgan dollar. The 1885-O is seldom offered this fine and with this much contrast. The present coin shows attractive light golden interiors with deeper orange-gold and blue border toning. Population: 50 in 66 (2 in 66+) Deep Mirror Prooflike, 1 finer (1/17). NGC ID# 254T, PCGS# 97163

4635 1885-O MS66 Deep Mirror Prooflike NGC. Although this New Orleans issue is plentiful in higher Mint State grades, examples with strong contrast are elusive. This brilliant piece has untuned silver surfaces with deeply mirrored fields around lustrous devices. Census: 21 in 66 Deep Mirror Prooflike, 1 finer (1/17). NGC ID# 254T, PCGS# 97163

4636 1885-S MS65 PCGS. This attractive Gem offers well-detailed design elements and well-preserved, lustrous surfaces, under dappled shades of greenish-gold toning. Housed in a new 30th Anniversary green label holder. PCGS has graded 44 numerically finer examples (12/16). NGC ID# 254U, PCGS# 7164

4637 1885-S MS65 PCGS. A well-preserved, brilliant coin with just a few marks that prevent a finer grade. This Gem 1885-S Morgan dollar is accessible in its given grade, but pieces just one point finer are rare. This coin shows minor strike weakness on the central high points. NGC ID# 254U, PCGS# 7164

1886 Silver Dollar, MS67+ Spectacular Obverse Toning

4638 1886 MS67+ PCGS. Dramatic bands of forest-green, cherry-red, powder-blue, orange-gold, and lavender march across the obverse. The reverse is brilliant save for an arc of lemon patina along the left margin. Fully struck and lustrous with remarkably smooth surfaces. As of (1/17), PCGS has 58 pieces as MS67+ with only eight finer. NGC ID# 254V, PCGS# 7166

**1886 Dollar, MS67 Prooflike
Brilliant, Scarce, and Flashy**

4639 1886 MS67 Prooflike PCGS. Only occasionally seen with prooflike contrast, most 1886 dollars display lower contrast when they are located as Prooflike. This coin shows very deeply mirrored fields with moderate mint frost over the devices. Each side is brilliant and, as one would expect from the grade, there are no mentionable abrasions. Population: 2 in 67 Prooflike, 0 finer (1/17). NGC ID# 254V, PCGS# 7167

4640 1886-O MS62 PCGS. This impressive MS62 Morgan dollar is sharply detailed for a New Orleans issue, with vibrant, frosty mint luster on both sides. The lightly marked surfaces show attractive hints of sea-green and lavender-gray toning. NGC ID# 254W, PCGS# 7168

4641 1886-O MS62 PCGS. Brilliant save for a blush of autumn-brown toning near the M in UNUM. A lustrous example of this high mintage but conditionally challenging issue. The reverse is well preserved. The dies are rotated approximately 30 degrees counter-clockwise from coin turn, unusual for the series. NGC ID# 254W, PCGS# 7168

4642 1886-O Clashed E, VAM-1A1, MS61 NGC. A Top 100 Variety. The variety is undesignated on the NGC holder, but the letter E from LIBERTY is prominently clashed below the tailfeathers. The double-clashed variant of VAM-1A1, without the transfer of the first T in TRUST characteristic of VAM-1A2. Lustrous, nicely struck, and pleasing for the MS61 level. Rich orange-gold toning graces the reverse border. NGC ID# 254W, PCGS# 133905 Base PCGS# 7168

4643 1886-O Clashed E, VAM-1A2, Top 100, MS62 PCGS. A Top 100 Variety. Double clashed inside the wreath. VAM-1A exhibits one of most impressive E (from LIBERTY) clash marks of the Morgan dollar series. The clashed letter is prominent northwest of the ribbon loops. The lustrous surfaces display light straw-gold toning, along with a blush of deeper brown patina near the AM in AMERICA. Liberty's lower cheek has a mint-made strike-through. NGC ID# 254W, PCGS# 133905 Base PCGS# 7168

**1886-S/S VAM-2 Dollar
MS64 Deep Prooflike**

4644 1886-S VAM-2, MS64 Deep Prooflike NGC. A Top 100 Variety. The mintmark is nicely repunched. The variety is undesignated on the prior generation holder. NGC has certified four Deep Prooflike 1886-S dollars as VAM-2, two pieces each in MS62 and MS63 but none finer. The present crisply struck and carefully preserved near-Gem is richly patinated steel-gray with orange and lime-green undertones. PCGS# 42794 Base PCGS# 97171

**1887/6 Dollar, MS64 Deep Mirror Prooflike
Seldom Encountered as a DMPL**

4645 1887/6 VAM-2 MS64 Deep Mirror Prooflike PCGS. A Top 100 Variety. Prooflike and Deep Mirror Prooflike examples of this popular *Guide Book* issue are somewhat of a curiosity. One would think that by polishing the dies, there would be a strong likelihood that the thin arc of the 6 might be effaced. That is not the case, however, as the underdigit is as plain on this flashy, lightly toned example as it is on a non-prooflike example. Still, very few Prooflike or DMPL pieces are known, as evidenced by the population data. Population: 7 in 64 Deep Mirror Prooflike, 3 finer (1/17). Ex: *Denver Signature* (Heritage, 8/2006), lot 2967; *FUN Signature* (Heritage, 1/2010), lot 2930. PCGS# 42843 Base PCGS# 97175

4646 1887 MS67 PCGS. CAC. A beautifully preserved, frosty example of this Philadelphia type-coin issue, showing brilliant, unabraded surfaces and vibrant luster. Slight weakness on the hair above Liberty's ear is not unusual for the issue. PCGS has seen a single numerically finer coin (1/17). NGC ID# 27Y3, PCGS# 7172

**1887/6-O Morgan Dollar, MS64
Popular VAM-3 Overdate**

4647 1887/6-O VAM-3 MS64 NGC. A Top 100 Variety. Close inspection shows the curve of an undertype 6 below the final digit in the date, on either side of the lower upright. This well-detailed Choice example shows just a trace of the usual softness on the hair strands above the ear, and the lightly marked surfaces display satiny mint luster under shades of lavender-gray toning. Census: 16 in 64 (2 in 64+), 11 finer (12/16). NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

4648 1887-O MS65 PCGS. The design elements of this impressive Gem are well-detailed, with just a touch of the typical softness on the hair above the ear. The well-preserved brilliant surfaces radiate vibrant mint luster, with outstanding eye appeal. PCGS has graded 11 numerically finer examples (1/17). NGC ID# 2547, PCGS# 7176

4649 1887-O MS65 PCGS. An attractive Gem representative of this popular branch mint type coin, with unusually sharp design elements for a New Orleans issue. The well-preserved, lustrous surfaces are enhanced by subtle shades of golden-tan toning, with outstanding eye appeal. PCGS has graded 11 numerically finer examples (1/17). NGC ID# 2547, PCGS# 7176

**1887-O Dollar, MS65 Prooflike
Significantly Scarce With Reflectivity**

4650 1887-O MS65 Prooflike PCGS. The Prooflike designation is often sought but seldom granted at PCGS. This New Orleans example is clearly deserving of the honor, with smooth, reflective fields and lightly frosted devices. The central strike is sharper than often encountered on prooflike coins. Liberty's cheek and neck are nearly unblemished, although a short abrasion above the eyebrow is noted. Overall, an exceptional Gem dollar — brilliant and well-preserved. Population: 18 in 65 Prooflike, 2 finer (12/16). NGC ID# 2552, PCGS# 7177

4651 1887-S MS65 NGC. Frosty silver luster shows wisps of gold across each side on this Gem 1887-S Morgan dollar. The strike is bold, and abrasions are minimal. This better San Francisco issue is rarely seen finer, where NGC has recorded only nine submissions (1/17). NGC ID# 2554, PCGS# 7180

**1888-O Dollar, MS66
Attractively Toned on Each Side**

4652 1888-O MS66 PCGS. The mintage was huge for the 1888-O with 12.1 million minted. Curiously, there is only a small percentage of coins that have survived in Gem and finer grades. This piece displays concentric rings of toning on the obverse, while the reverse has a wide band of peripheral color with a brilliant center. Bright mint luster is especially notable. The centers show the often-seen strike weakness. NGC ID# 2556, PCGS# 7184

4653 1888-O MS64+ Deep Mirror Prooflike PCGS. CAC. A glasslike glimmer in the fields gives this contrasted near-Gem exceptional eye appeal, and a hint of light golden toning on each side accentuates the presentation. The coin is sharp and shows few abrasions. Finer Deep Mirror Prooflike 1888-O Morgan dollars are scarce. NGC ID# 2556, PCGS# 97185

4654 1888-O MS65 Deep Prooflike NGC. Golden-brown and cobalt-blue toning visits the peripheries, but this well struck New Orleans dollar is mostly brilliant. Lustrous and exceptionally free from contact. Certified in a prior generation holder. Census: 29 in 65 (1 in 65+) Prooflike, 2 finer (1/17). NGC ID# 2556, PCGS# 97185

**1888-S Silver Dollar
MS64 Deep Prooflike**

4655 1888-S MS64 Deep Prooflike NGC. CAC. Frosty motifs contrast with glassy fields. This nicely struck and well preserved near-Gem is brilliant except for glimpses of peach patina near the rims. A splendid DMPL example of a better San Francisco issue. Certified in a former generation holder. Census: 16 in 64 Deep Prooflike, 3 finer. CAC: 5 in 64, 0 finer (12/16). NGC ID# 27MY, PCGS# 97187

4656 1889 MS66 PCGS. Available in this grade, the 1889 Morgan dollar is extremely rare any finer, as PCGS has seen only four higher-grade pieces (1/17). The strike is bold, and each side displays frosty, brilliant mint luster. NGC ID# 2558, PCGS# 7188

**1889 Morgan Dollar, Brilliant MS66+
Exceptional Quality for the Grade**

4657 1889 MS66+ PCGS. CAC. Collectors searching for a Premium Gem example of the 1889 should have little difficulty locating one, but those who demand an even better-preserved example will encounter tremendous difficulty. PCGS has only seen four finer submissions (12/16), and few MS66 coins at that service boast a Plus designation and a CAC approval sticker. Each side is completely brilliant with cartwheel luster and well-defined devices. NGC ID# 2558, PCGS# 7188

4658 1889-CC VF35 PCGS. This Choice VF 1889-CC dollar is perfect for the collector on a budget who desires a well-detailed example of the most challenging Carson City issue in the set. An original skin of antique-gold and olive patina covers each side, though the obverse is deeper in tone than the reverse. From a low mintage of 350,000 coins. NGC ID# 2559, PCGS# 7190

4659 1889-CC VF35 PCGS. A Choice VF specimen of this important key issue, with moderate wear on the design elements. About two-thirds of the hair lines from Liberty's brow to ear remain intact and the ear is well-defined. The lightly abraded surfaces are blanketed in shades of sea-green and lavender-gray toning. NGC ID# 2559, PCGS# 7190

4660 1889-CC VF35 PCGS. Excellent detail for the grade gives this Choice VF 1889-CC Morgan pleasing eye appeal. Both sides are deeply toned in uniform olive-brown patina. There are no distracting abrasions. The 1889-CC is the key to the Carson City short set. NGC ID# 2559, PCGS# 7190

4661 1889-CC VF35 PCGS. Uniform olive-gray patina blankets both sides of this Choice VF 1889-CC Morgan dollar. The devices show excellent detail for the grade, and the surfaces are generally smooth save for a few marks on Liberty's cheek. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Choice XF

- 4662 1889-CC XF45 PCGS. CAC.** Deep slate-gray surfaces show mottled olive-green overtones on this Choice XF example, while a loupe reveals tiny bits of greenish verdigris in the crevices. The detail is strong, and the patina is original. No major abrasions affect the visual impression, which is pleasing. NGC ID# 2559, PCGS# 7190

1889-O Morgan Dollar, MS64 Deep Prooflike Choice Mirrored Fields, Strong Contrast

- 4663 1889-O MS64 Deep Prooflike NGC. CAC.** Overall, Uncirculated examples of the 1889-O are readily available but Gems are scarce and those with deep mirrors are rare. This near-Gem Deep Prooflike example displays strong cameo contrast and a clean cheek on Liberty. A thin band of gold toning at the rims surrounds brilliant-silver surfaces. Field ticks are sparse and tiny. The sole abrasion to mention is a short reeding mark above the eagle's head. The strike is sharp for this O-Mint dollar. Housed in a previous generation, pre-barcode NGC holder with CAC endorsement. Census: 13 in 64 Deep Mirror Prooflike, 7 finer. CAC: 4 in 64, 1 finer (1/17). NGC ID# 45YN, PCGS# 97193

- 4664 1889-S MS65 PCGS.** A well-preserved, frosty Gem example with silvery interiors that cede to light golden border toning. The strike is a trifle soft on the central high points, as often seen on this issue. Finer 1889-S dollars are scarce. NGC ID# 255B, PCGS# 7194

1889-S Morgan Dollar, MS64 Elusive Deep Mirror Prooflike Example

- 4665 1889-S MS64 Deep Mirror Prooflike NGC.** Hints of lime-green and violet toning visit the peripheries of this impressive Choice Morgan dollar. The design elements are sharply detailed, with a frosty texture that contrasts dramatically with the prooflike reflective fields, and the surfaces show only minor signs of contact. Overall eye appeal is quite strong. Census: 13 in 64 Deep Mirror Prooflike, 3 finer (1/17). NGC ID# 255B, PCGS# 97195

- 4666 1890-CC MS63 Deep Mirror Prooflike PCGS.** An impressive Select specimen of this popular Carson City dollar, with sharply detailed, frosty design elements and deeply reflective prooflike fields. The mostly brilliant surfaces show a scattering of minor hairlines and chatter, mostly on the obverse. NGC ID# 45YV, PCGS# 97199

1890-CC Dollar, MS64 Deep Mirror Prooflike Thickly Frosted and Strongly Impressed

- 4667 1890-CC MS64 Deep Mirror Prooflike PCGS. CAC.** It would be exceedingly difficult to improve upon the captivating eye appeal of this Choice Deep Mirror Prooflike dollar. Each side is black-and-white with the faintest trace of gold. The fields are remarkably reflective, and the motifs are covered in a thick blanket of frost. PCGS has certified 28 finer Deep Mirror Prooflike coins (1/17). NGC ID# 45YV, PCGS# 97199

- 4668 1890-O MS65 PCGS.** This Gem Morgan dollar is all-brilliant with a crescent of gold, bluish-green, and maroon patina along the right obverse border. The strike is typical of a New Orleans product, while the surfaces are free of any major blemishes. There are 29 finer submissions at PCGS (1/17). NGC ID# 255E, PCGS# 7200

1890-O Dollar, MS65 Vivid Multihued Toning

- 4669 1890-O MS65 PCGS.** The 1890-O is always a bit soft over the ear, yet the strike is otherwise sharp on this Gem dollar. Primary attention goes to the dramatic toning of the coin, which displays crescents of vivid rainbow toning on both the obverse and reverse. The shades are deepest at the border and lighten through a progression of colors ranging from eggplant-purple to cerulean-blue, deep violet, lavender, sun-gold, lemon-yellow, and aquamarine. A light-olive hue covers the balance of the obverse while the reverse cedes to brilliant-white. Just 29 examples are numerically finer than this vibrant MS65 coin at PCGS. NGC ID# 255E, PCGS# 7200

- 4670 1890-O MS65+ PCGS.** Delicate golden patina graces this thoroughly lustrous and well-preserved Gem. The fields are virtually void of contact. The centers are incompletely impressed, usual for New Orleans issues of the era. As of (1/17), PCGS has certified just 50 pieces as MS65+ and only 29 finer. NGC ID# 255E, PCGS# 7200

- 4671 1890-O MS65 Prooflike PCGS. VAM-31.** The 9 in the date is lightly repunched north. A lustrous snow-white Gem with an exceptionally smooth obverse. The 1890-O is surprisingly scarce in prooflike format, given its mintage of more than 10 million pieces. Population: 32 in 65 (2 in 65+) Prooflike, 3 finer (1/17). NGC ID# 2XU9, PCGS# 7201

- 4672 1890-S MS66 PCGS.** The 1890-S is moderately collectible in MS66 but is rarely offered finer. This piece displays brilliant, radiant luster and a bold strike with semiprooflike fields. PCGS records only seven numerically finer submissions (1/17), coins which will be far out of reach for most collectors. NGC ID# 255F, PCGS# 7202

1891 Dollar, Richly Toned MS65

- 4673 1891 MS65 PCGS.** Although a high-mintage issue (8.6 million struck), the 1891 is generally found in lower grades and Gems are notably scarce. This is an original coin with rich, multicolored toning that covers both sides. The central strike definition is sharper than often seen, and there are no mentionable marks on either side. NGC ID# 255G, PCGS# 7204

- 4674 1891-CC MS64 NGC.** An attractive mix of violet pale-gold, and sea-green toning visits the well-preserved surfaces of this impressive Choice specimen, with most of the color at the peripheries. The design elements are well-detailed and vibrant mint luster shines through the toning. NGC ID# 255H, PCGS# 7206

- 4675 1891-CC Spitting Eagle, VAM-3, MS64 PCGS.** A Top 100 Variety. A well struck and minimally toned Choice Carson City dollar. Cartwheel luster sweeps across lightly marked surfaces. The "Spitting Eagle" represents a sizeable percentage of Uncirculated '91-CC examples, but is better known than a majority of its peers in the Top 100 set. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

1891-CC Morgan Dollar, MS65 VAM-3, 'Spitting Eagle'

- 4676 1891-CC Spitting Eagle, VAM-3, Top 100, MS65 PCGS.** A Top 100 Variety. Famous for the egg-shaped die chip near the eagle's beak, the Spitting Eagle variety also displays a repunched mintmark where the first C is entered slightly north of an underlying C. Brilliant and frosty, this minimally abraded example is brightly lustrous and brilliant-white except for a thin hint of gold at the rims. The strike is quite sharp. Population: 17 in 65 (2 in 65+), 2 finer (1/17), although the population is undoubtedly understated in the recently introduced numbering system. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

- 4677 1891-O MS64+ PCGS. CAC.** A ring of fire-orange patina encircles the outermost areas, ceding to completely untuned centers awash in cartwheel luster. Thickly frosted central motifs are well-detailed and generate partial contrast against fields that feature relatively few marks for the grade. NGC ID# 255J, PCGS# 7208

- 4678 1891-S MS65 PCGS.** A wisp of tan-gray within Liberty's hair denies absolute brilliance, but this lustrous Gem is boldly struck and impressively smooth. What a difference a year makes, since the 1891-S is available in Gem while the 1892-S is exceptionally rare as such. Ex: Dallas Signature (Heritage, 7/2006), lot 2881. NGC ID# 255K, PCGS# 7210

- 4679 1891-S MS65 Prooflike NGC. CAC.** This Gem Prooflike 1891-S Morgan is certified in a "no-line fatty" NGC holder, popular with collectors. The surfaces are thoroughly contrasted with beautiful color ranging from deep rose-purple near the rims to frosty silver in the centers. The strike is sharp, and few minor field marks do not distract. Census: 17 in 65 (1 in 65+) Prooflike, 1 finer. CAC: 6 in 65, 1 finer (1/17).

Ex: Orlando Signature (Heritage, 7/2013), lot 4300, which realized \$2,232.50. NGC ID# 255K, PCGS# 7211

CAC-Confirmed 1891-S Dollar MS64 Deep Prooflike

- 4680 1891-S MS64 Deep Prooflike NGC. CAC.** Only a minute percentage of 1891-S dollars exhibit field reflectivity comparable with the present near-Gem. The flashy surfaces are brilliant aside from narrow peripheral bands of peach-gold and navy-blue. Nicely struck, moderately marked, and housed in a prior generation holder. Census: 34 in 64 Deep Prooflike, 7 finer. CAC: 11 in 64, 1 finer (12/16). NGC ID# 3VXL, PCGS# 97211

1892 Dollar, Attractively Toned Gem Extremely Rare Any Finer

- 4681 1892 MS65 PCGS.** Sharp and lustrous examples are in the minority among 1892 Mint State silver dollars. The mintage was low (barely exceeding 1 million pieces) and few pieces were released into circulation at time of production. By the time many bags were released in the 1950s and 1960s, the 1892 was an established rarity in the series few coins qualified for Gem or finer grades. The obverse of this lustrous and well-struck example displays attractive ivory-silver patina with amber-gold and blue accents at the margins. The reverse is more extensively toned in attractive reddish-gold and blue shades. PCGS reports just five numerically finer coins. NGC ID# 255L, PCGS# 7212

1892 Morgan Dollar, MS65
Seldom Seen Any Finer

- 4682 1892 MS65 PCGS.** From a mintage of just over 1 million pieces, the 1892 Morgan dollar is a better date, especially in high grade. This impressive Gem exhibits well-detailed design elements, with just the slightest blending in the hair strands above Liberty's ear. The well-preserved surfaces radiate vibrant mint luster and eye appeal is outstanding. PCGS has graded five numerically finer examples (1/17). NGC ID# 255L, PCGS# 7212

- 4683 1892-CC MS63+ PCGS.** Brilliant mint luster features semiprooflike reflectivity in the fields of this high-end Select 1892-CC Morgan dollar. The strike is pleasing, and abrasions are at a minimum for the grade. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64
All-Brilliant and Sharply Struck

- 4684 1892-CC MS64 NGC.** Examples of the 1892-CC Morgan dollar can be found with relative ease in lower Uncirculated grade levels. The coins are usually heavily bagmarked from years of rough handling in storage. This all-brilliant near-Gem displays minimal marks in the fields, and the cheek shows a single tick. Readily appealing with a sharp strike. NGC ID# 255M, PCGS# 7214

- 4685 1892-CC MS62 Prooflike PCGS. VAM-8.** Flashy fields, a good strike, and a well-preserved reverse are the chief attributes of this brilliant better-date Carson City dollar. A couple of moderate facial marks correlates to the grade. NGC ID# 255M, PCGS# 7215

1892-S Morgan Dollar, AU55
Scarce Issue in High Grade

- 4686 1892-S AU55 PCGS.** The 1892-S Morgan dollar was long overlooked by collectors, but numismatists have recently come to appreciate the elusive nature of this issue in high grade. This Choice AU specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain significant amounts of original mint luster. Hints of golden-tan toning visit the pleasing surfaces. NGC ID# 255P, PCGS# 7218

- 4687 1893 MS63 PCGS. VAM-2.** Light to medium tan-gold toning accompanies this lustrous and nicely struck example. Smooth aside from a solitary tick on the cheek. Interesting die polish lines are noted across the left reverse periphery. A low mintage Philly issue. Certified in a green label holder. NGC ID# 255R, PCGS# 7220

- 4688 1893 MS63 PCGS. VAM-3.** This low mintage Morgan dollar has sweeping luster and a good strike. Toning is essentially absent, and the reverse is uncommonly smooth. The obverse displays only minimal contact. VAM-3 has a repunched 3 in the date and minor die doubling on the reverse near 9 o'clock.
Ex: Dallas Signature (Heritage, 10/2009), lot 1046, which realized \$862.50. NGC ID# 255R, PCGS# 7220

- 4689 1893 MS64 PCGS. VAM-2.** The 3 in the date is lightly repunched north. A brilliant Choice better date dollar that provides booming luster and well preserved surfaces. The centers are inexactly impressed, but the remainder of the strike is good. NGC ID# 255R, PCGS# 7220

- 4690 1893 MS64+ PCGS.** This Plus-graded Choice specimen exhibits well-detailed design elements, with just a touch of blending in the hair strands above Liberty's ear. Especially vibrant mint luster radiates from the well-preserved surfaces, with attractive highlights of pale jade toning. NGC ID# 255R, PCGS# 7220

- 4691 1893-S Good 4 PCGS. CAC.** A well-worn specimen of this sought-after key. The major design elements are complete in outline and the date and lettering remain legible, but the rim is worn smooth in many areas. Collectors prize the 1893-S in all grades and conditions. NGC ID# 255U, PCGS# 7226

- 4692 1893-S — Whizzed — NGC Details. VF. VAM-2.** Both sides of this key date silver dollar are extensively whizzed. The cream-gray surfaces exhibit diagnostics for VAM-2, such as a low, tilted mintmark, a die crack between the TES in STATES, and a brief die line at the central top of the T in LIBERTY.

1893-S Dollar, XF Details
Dusky Grayish-Lilac Coloration

- 4693 1893-S XF40, VAM-2 — Questionable Color — PCGS Genuine. XF Details.** Some light hairlines reside beneath mottled grayish-lilac and blue toning that covers both sides of this key San Francisco issue. Strong definition on the devices remains for the designated XF sharpness. Only a few minor marks are visible along with glints of silver luster. A coin that should not be overlooked based on the grade, since it is more attractive than the holder implies, and should fit nicely into a circulated set.

1893-S Morgan Dollar, XF Details

4694 1893-S — Cleaning — PCGS Genuine. XF Details. A nice XF-level example of this key Morgan dollar date, showing subtle hints of luster in the reverse fields and sporting bold design detail. Each side displays dusky tan-gold toning. Liberty's cheek has a few marks that are consistent with the grade and not overly bothersome.

4695 1894-S MS63 PCGS. Semireflective fields add to the appeal of the nearly pristine reverse on this Select 1894-S Morgan dollar, while the satiny obverse has a few scattered abrasions that denote the grade. The strike is a trifle weak on the hair above Liberty's ear. Each side displays a hint of light champagne toning. NGC ID# 255X, PCGS# 7232

4696 1894-S MS63 NGC. CAC. The design elements of this impressive Select specimen are well-detailed, with just a touch of softness on the hair above the ear, and the lustrous surfaces show some scattered, minor contact marks on both sides. Hints of lavender and greenish-gold toning add to the overall eye appeal. NGC ID# 255X, PCGS# 7232

4697 1894-S MS64 PCGS. The 1894-S Morgan dollar is a scarce issue in grades above MS64. This impressive Choice specimen exhibits well-detailed design elements, with some horizontal planchet striations that were not completely effaced by the striking process seen on the hair above Liberty's ear. The lightly marked surfaces are lustrous and appealing. NGC ID# 255X, PCGS# 7232

4698 1894-S MS64 PCGS. The 1894-S is a semikey in all grades, but the date becomes particularly scarce in Gem condition. This near-Gem remains collectible but still shows pleasing preservation and eye appeal. Frosty luster has warm champagne toning with daubs of light olive-green near the lower obverse border. A few light marks on the cheek are consistent with the grade, and the hair above Liberty's ear is predictably incomplete. NGC ID# 255X, PCGS# 7232

4699 1895-O AU55 NGC. CAC. Mottled olive-gold toning appears on each side of this Choice AU semikey Morgan dollar. Luster remains in the protected regions of the fields. Weakness on the hair above Liberty's ear is due to strike rather than wear — New Orleans issues from the mid-1890s are seldom seen well-struck. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58 Low-Mintage New Orleans Issue

4700 1895-O AU58 PCGS. Just the slightest trace of friction shows on the high points of the well-detailed design elements, and the lightly abraded surfaces of this pleasing near-Mint example retain much of their original mint luster. Highlights of golden-tan and lavender toning visit both sides and the overall presentation is quite attractive. From a low mintage of 450,000 pieces. NGC ID# 255Y, PCGS# 7236

4701 1895-S S Over Horizontal S, VAM-4 — Altered Surfaces — PCGS Genuine. Unc Details. A Top 100 Variety. The design elements of this extremely popular variety are sharply detailed and the remnants of the undertype horizontal S are easily seen below the primary mintmark. The surfaces show a number of minor contact marks, but no actual wear, and the fields are brightly reflective, under shades of greenish-gold toning. Some areas around the lower wreath show subtle signs of alteration. NGC ID# 255Z, PCGS# 133943 Base PCGS# 7238

1895-S Over Horizontal S Dollar, VAM-4 MS62 Deep Mirror Prooflike

4702 1895-S S Over Horizontal S, VAM-4, MS62 Deep Mirror Prooflike ANACS. A Top 100 Variety. The low mintage 1895-S has two of the most interesting repunched mintmark varieties of the Morgan dollar series: VAM-3 and VAM-4. VAM-3 is among the Hot 50, and VAM-4 is a charter member of the Top 100. This flashy silver dollar displays peripheral peach patina and a smattering of minor marks. Housed in a small-sized holder. NGC ID# 255Z, PCGS# 43808 Base PCGS# 97239

1896 Silver Dollar, MS67 Multicolor Obverse

4703 1896 MS67 PCGS. The obverse of this Superb Gem piece a multicolor masterpiece, lemon, ice-blue, pink, violet, and orange in abundant display. The reverse is far more demure, showing just a touch of orange near a portion of the rim. The glowing luster on both sides and lack of mentionable marks put this piece into a small minority. NGC ID# 2562, PCGS# 7240

4704 1896-O MS60 NGC. From a substantial mintage of 4.9 million pieces, this impressive Mint State Morgan dollar exhibits a typical strike for the issue, with just a touch of softness on the hair above the ear. The lustrous surfaces show the minimum number of minor contact marks for the grade. NGC ID# 27ZU, PCGS# 7242

4705 1896-O MS61 PCGS. This New Orleans issue has an average certified grade between AU53 and AU55. Mint State coins are somewhat available through MS62 but very scarce any finer. Reddish-violet and olive patina clings to the recesses, while the exposed areas are largely brilliant. Typically struck at the extreme centers. NGC ID# 27ZU, PCGS# 7242

4706 1896-O MS62 NGC. The 1896-O claims a substantial mintage of 4.9 million pieces, but the issue is among the most challenging Morgan dollars to locate in high grade. This attractive MS62 specimen is well-detailed and lightly marked for the grade, with satiny mint luster and highlights of sea-green, amber, and lavender-gray toning. NGC ID# 27ZU, PCGS# 7242

4707 1896-S — Improperly Cleaned — NGC Details. Unc. A highly lustrous example of the conditionally rare San Francisco issue. The borders show light tan-brown toning, but marks are relatively few. The hair above the ear is incompletely impressed. Although designated as cleaned by NGC, hairlines are difficult to locate.

4708 1897-O MS61 NGC. An impressive Mint State example of this popular branch mint issue, with scattered minor contact marks and satiny mint luster on both sides. The strike is about average for a New Orleans issue, with just a touch of softness on the hair above the ear. NGC ID# 2565, PCGS# 7248

4709 1897-S MS66 PCGS. Dappled shades of sea-green, turquoise, and amber toning visit the well-preserved surfaces of this delightful Premium Gem, with well-detailed design elements and vibrant mint luster underneath. PCGS has graded 27 numerically finer examples (1/17). NGC ID# 2567, PCGS# 7250

4710 1897-S MS66 PCGS. This attractive Premium Gem exhibits well-detailed design elements and lustrous, well-preserved surfaces with highlights of sea-green and violet toning. Housed in a new 30th Anniversary green label holder. PCGS has graded 27 numerically finer examples (12/16). NGC ID# 2567, PCGS# 7250

4711 1897-S MS66+ PCGS. CAC. The 1897-S covers a wide middle-ground, scarcer than the common issues, but too plentiful to be called a rare date. However, few can match the quality of this piece, and finer examples are elusive. Both sides are frosty and highly lustrous with brilliant, untuned silver surfaces. A stunning specimen. PCGS has graded 27 numerically finer examples (1/17). NGC ID# 2567, PCGS# 7250

**1897-S Morgan Dollar, MS66
Elusive Prooflike Example**

4712 1897-S MS66 Prooflike PCGS. CAC. The 1897-S Morgan dollar was a well-made issue, with a mintage of 5.8 million pieces. This spectacular Premium Gem exhibits razor-sharp definition on the frosty design elements and the well-preserved surfaces show only the most minor signs of contact. The fields are deeply mirrored and eye appeal is terrific. Population: 47 in 66 (4 in 66+) Prooflike, 4 finer. CAC: 15 in 66, 2 finer (12/16). NGC ID# 267S, PCGS# 7251

4713 1897-S MS65 Deep Mirror Prooflike NGC. Freckled orange-gold and sea-green visits the margins, but the remainder of this lustrous Gem is untuned. The centers show only minor inexactness. Certified in a former generation holder. Census: 38 in 65 Deep Mirror Prooflike, 5 finer (1/17). NGC ID# 2567, PCGS# 97251

4714 1898 MS66 Prooflike PCGS. CAC. Distinctly prooflike fields accent softly frosted devices on this Premium Gem 1898 Morgan dollar. The coin is essentially brilliant and shows no major abrasions. Prooflike 1898 Morgans are rarely seen this well-preserved. Population: 26 in 66 (4 in 66+) Prooflike, 2 finer. CAC: 8 in 66, 0 finer (1/17). NGC ID# 2568, PCGS# 7253

4715 1898-O MS67 PCGS. CAC. A brilliant Superb Gem New Orleans type coin. Sweeping luster illuminates exceptionally smooth surfaces. The strike is good aside from minor blending at the centers. Virtually unobtainable any finer. NGC ID# 2569, PCGS# 7254

4716 1898-S MS65 PCGS. VAM-4. Mahogany-brown toning enriches the peripheries of this lustrous Gem Morgan dollar. Remarkably smooth except for a single horizontal line on Liberty's jaw. Encapsulated in a first-generation holder. NGC ID# 256A, PCGS# 7256

4717 1898-S MS63 Deep Mirror Prooflike PCGS. A scarce Deep Mirror Prooflike example of this otherwise fairly plentiful San Francisco issue, showing brilliant surfaces and appreciable cameo contrast. Scattered abrasions are consistent with the grade. Population: 35 in 63 Deep Mirror Prooflike, 42 finer (1/17). NGC ID# 256A, PCGS# 97257

**1899 Dollar, MS66+
Pristine Fields**

4718 1899 MS66+ PCGS. CAC. The 1899 Morgan dollar becomes very scarce in MS66. Those looking for a finer representative will encounter considerable difficulty. The fields are absolutely pristine, and both sides are completely brilliant with coruscating mint luster. There is evidence of minor chatter on the cheek. Well-struck with terrific visual appeal. There are 22 finer submissions at PCGS and only three at CAC (1/17). NGC ID# 256C, PCGS# 7258

**1899 Morgan Dollar, MS66+
Low-Mintage, Turn-of-the-Century Issue**

4719 1899 MS66+ PCGS. CAC. From a low mintage of 330,000 pieces, the 1899 Morgan dollar becomes somewhat scarce in MS66 condition, and finer coins are rare. This Plus-graded Premium Gem offers well-preserved, creamy surfaces, with vibrant mint luster and no mentionable distractions. The design elements are sharply detailed and eye appeal is extraordinary. PCGS has graded 22 numerically finer examples (1/17). NGC ID# 256C, PCGS# 7258

**1899 Silver Dollar, MS66 Prooflike
Conditionally Rare**

4720 1899 MS66 Prooflike PCGS. A conditionally rare Premium Gem Prooflike example of this better Philadelphia issue, ranking among the finest certified at either service. The coin is well-struck and free of major abrasions. Warm golden-orange toning surrounds the peripheries. Population: 11 in 66 Prooflike, 0 finer (1/17). NGC ID# 256B, PCGS# 7259

4721 1899-O MS67 PCGS. Radiant brilliance and smooth, unabraded surfaces are the hallmarks of this amazing Superb Gem, but the strike is just as impressive for a New Orleans coin. Despite a high mintage of 12.2 million pieces, a single example is graded finer at PCGS (1/17). NGC ID# 256C, PCGS# 7260

4722 1899-O MS67 PCGS. A conditionally scarce Superb Gem with softly frosted surfaces that show a hint of pale champagne color. There are no distracting abrasions, and the strike is well-executed for the issue. Only a single numerically finer example is certified (1/17). NGC ID# 256C, PCGS# 7260

4723 1899-O MS67 PCGS. CAC. This New Orleans Morgan dollar issue can be obtained as high as MS67, but CAC-approved Superb Gems are rarely offered. Only a single coin is graded finer at both services combined (1/17). This is a fully brilliant example virtually without fault. Bold die cracks join the reverse legends. NGC ID# 256C, PCGS# 7260

4724 1899-O MS66+ Prooflike PCGS. CAC. Exceptional surface preservation and prooflike fields gives this CAC-approved 1899-O Morgan dollar exceptional eye appeal for a New Orleans issue from this period. The strike is above average, and each side displays a hint of light golden toning. Population: 18 in 66 (2 in 66+) Prooflike, 0 finer. CAC: 5 in 66, 0 finer (1/17). NGC ID# 256C, PCGS# 7261

4725 1899-S MS65 PCGS. Not a speck of color is present on either side of this fully brilliant San Francisco dollar. A thick layer of mint frost covers well-preserved surfaces. The strike is incomplete over the centers, where parallel roller marks appear. A few microscopic flecks prevent a higher grade. NGC ID# 256D, PCGS# 7262

4726 1899-S MS65 PCGS. 30th Anniversary Green Label Holder. Light butter-gold patina visits the margins of this lustrous and splendidly smooth Gem. The eye appeal is undeniable, and the strike shows incompleteness only on the hair above the ear. NGC ID# 256D, PCGS# 7262

1899-S Dollar, MS65+ Prooflike Scarce With a Prooflike Finish

4727 1899-S MS65+ Prooflike PCGS. This delightful Gem exhibits delicate champagne toning over its silver surfaces with nicely mirrored fields. The strike details are strong throughout and the mint luster exhibits the bright flashiness seen on most of the finer 1899-S dollars seen. A few trivial bagmarks prevent an even higher grade. Population: 41 in 65 (1 in 65+) Prooflike, 3 finer (1/17). NGC ID# 256D, PCGS# 7263

4728 1900-O/CC VAM-10A MS65 PCGS. 30th Anniversary Green Label Holder. A Top 100 Variety. Remnants of the Carson City mintmark are apparent as a curved line on each side of the New Orleans mintmark. The later die state with a clashed N from IN near Liberty's neck. Lustrous and carefully preserved with peripheral peach-gold patina. NGC ID# 256G, PCGS# 133962 Base PCGS# 7268

1901 Morgan Dollar, MS61 One of the Premier Condition Rarities

4729 1901 MS61 PCGS. The 1901 is a well-known condition rarity, its scarcity as such propelling it into the top five of all Morgan dollars in mint condition. This piece exhibits complete mint luster, satiny in appearance, and surfaces that show a number of small but individually insignificant abrasions. Just a bit softly detailed in the centers. NGC ID# 256J, PCGS# 7272

4730 1902 MS66+ PCGS. CAC. The 1902 Morgan dollar is available in MS66 but is rarely seen finer. This Plus-designated, CAC-endorsed Premium Gem is as close to MS67 as one can get without breaking the bank. The strike is bold, and each side displays satiny luster with a hint of light golden toning. PCGS reports 39 Superb Gems finer (1/17). NGC ID# 256M, PCGS# 7278

1902-O Dollar, MS66 Prooflike Scarce With Such Reflectivity

4731 1902-O MS66 Prooflike PCGS Secure. The 1902-O is a scarcer dollar with prooflike contrast. This piece shows undeniably deep mirrors in the fields, but as always, the frost over the devices is thin. However, the depth of mirroring leaves no doubt that this is a Prooflike dollar. Each side is brilliant, except for a thin ring of golden patina around the margins. Population: 16 in 66 Prooflike, 1 finer (1/17). NGC ID# 256N, PCGS# 7281

4732 1902-S MS63 Prooflike NGC. The 1902-S is rarely found with prooflike surfaces. We have offered Prooflike examples fewer than 20 times since 1993. This largely brilliant Morgan dollar features a ring of peripheral fire-orange patina. Incompletely defined over the centers with roller marks visible on the reverse. Census: 24 in 63 (1 in 63+) Prooflike, 4 finer (12/16). NGC ID# 256P, PCGS# 7283

4733 1903 MS64 Deep Prooflike NGC. Peach-gold and navy-blue toning embraces the borders of this well struck Choice silver dollar. The surfaces are uncommonly unabraded for the designated grade. Although the 1903 is available with cartwheel luster, Deep Prooflike examples are comparatively rare. Housed in a former generation holder. Census: 10 in 64 Prooflike, 4 finer (1/17). NGC ID# 256R, PCGS# 97285

4734 1904 MS65 PCGS. A pleasing Gem example of this conditionally better-date Philadelphia issue, showing a clean cheek and satin luster. A champagne reverse complements lavender and gold hues over the obverse, with the latter side also featuring rich navy blue occasionally around the border. The strike is a trifle soft on the eagle's breast feathers but excellent elsewhere. PCGS reports 33 numerically finer representatives (1/17). NGC ID# 256U, PCGS# 7290

4735 1904 MS65 PCGS. A well-struck Gem example of this conditionally elusive Philadelphia issue, showing champagne-tinted interiors surrounded by vivid golden peripheries. PCGS reports only 33 numerically finer representatives (1/17). NGC ID# 256U, PCGS# 7290

4736 1904-O MS66+ Prooflike PCGS. Moderately reflective fields and a thin layer of frost over needle-sharp motifs combine to produce marked Prooflike contrast on each side. This high-end Premium Gem Morgan dollar is totally brilliant and impeccably preserved. PCGS has seen one finer Prooflike submission (1/17). NGC ID# 256V, PCGS# 7293

4737 1904-S AU58 PCGS. The design elements of this impressive near-Mint specimen show just the slightest trace of wear on the high points, like the eagle's breast and the hair above the ear, but the devices were strongly impressed. The surfaces are lightly abraded and retain much of their original mint luster. NGC ID# 256W, PCGS# 7294

4738 1921 MS66+ PCGS. CAC. A high-end Premium Gem from the final year of the Morgan design, this coin offers sharply detailed design elements and impeccably preserved brilliant surfaces, with especially vibrant mint luster on both sides. PCGS has graded 13 numerically finer examples (12/16). NGC ID# 256X, PCGS# 7296

1921 Morgan Dollar, MS64 Deep Prooflike None Certified Finer

4739 1921 MS64 Deep Prooflike NGC. A faint patina of clear, lemon-gold toning deepens slightly at the rims of this deeply mirrored 1921 Morgan dollar. A speckling of olive-gold accents shares the reflective fields, while the frosted devices provide moderate contrast. The strike is sharp for this technically challenged issue, which is seldom well-struck. Abrasions are limited to minor high point contact and some delicate die polish field lines. Housed in a previous generation, pre-barcode NGC holder. Census: 53 in 64 Prooflike, 6 finer (1/17). NGC ID# 256X, PCGS# 97297

4740 1921-D MS66+ PCGS. CAC. Iridescent shades of lime-green, violet, and magenta toning blanket the virtually pristine surfaces of this Plus-graded Premium Gem, with sharply detailed design elements and vibrant mint luster underneath. Eye appeal is tremendous. PCGS has graded 11 numerically finer examples (1/17). NGC ID# 256Y, PCGS# 7298

4741 1921-S MS65+ PCGS. 30th Anniversary Green Label Holder. A lustrous stone-gray Gem. Glimpses of tan-brown toning accompany the obverse border. The strike is above average for the issue, though portions of the wreath are incomplete. NGC ID# 256Z, PCGS# 7300

4742 1921-S MS65+ PCGS. Frosty, original mint luster gives this high-end Gem 1921-S Morgan dollar exceptional visual appeal. Traces of champagne toning grace each side, and the strike is above-average on the wreath and eagle. Finer 1921-S Morgans are seldom offered, and the present coin is so appealing that the pursuit of a numerically finer coin may be unnecessary. NGC ID# 256Z, PCGS# 7300

1921-S Morgan Dollar, MS66 Toned Obverse, Brilliant Reverse

4743 1921-S MS66 PCGS. Dappled multicolor toning on the obverse counterbalances a brilliant reverse on this conditionally scarce Premium Gem Morgan dollar. Forest-green, steel-blue, and russet-brown shades predominate while satiny luster flows across both sides. Only occasional tiny marks are visible with the aid of a loupe. The strike is sharp for a 1921-S (which is almost never fully struck), one reason that accounts, in part, for the amazing fact that no coins are certified numerically finer at PCGS despite more than 14,000 1921-S submissions. Population: 97 in 66 (6 in 66+), 0 finer (1/17). NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1889 Morgan Dollar, PR64 Blended Multicolor Hues

4744 1889 PR64 PCGS. Blended multicolor hues encompass each side of this CAC-endorsed proof 1889 Morgan dollar, although the obverse patina is somewhat deeper than the reverse. Both sides are sharply struck and unmarked. A total of 811 pieces made up the entire mintage of 1889 proofs. Population: 45 in 64, 29 finer (1/17). NGC ID# 27ZJ, PCGS# 7324

4745 1894 PR60 NGC. As one might expect, the strike is completely defined on each side. Wispy hairlines over largely silver-gray surfaces limit the grade of this proof Morgan dollar, one of 972 specimens struck that year. Contact marks on the cheek and breast are also seen. NGC ID# 2577, PCGS# 7329

4746 1896 PR61 PCGS. A vivid mix of sea-green, cerulean-blue, and lavender toning blankets the surfaces of this attractive PR61 Morgan dollar. Aside from a few short scratches in the upper-left field, between the legend and Liberty's brow, the surfaces are lightly marked for the grade. The design elements are sharply detailed and the fields are deeply reflective, under the patina. NGC ID# 27ZT, PCGS# 7331

1896 Morgan Dollar, PR64
Mintage of 762 Pieces

- 4747 1896 PR64 PCGS.** From a small mintage of 762 pieces, this Choice proof Morgan dollar exhibits sharply detailed design elements and deeply reflective fields, under vivid shades of lime-green, lavender-gray, and violet toning. The surfaces are well-preserved and eye appeal is outstanding. Housed in an old green label holder. Population: 62 in 64, 70 finer (1/17). NGC ID# 27ZT, PCGS# 7331

1897 Morgan Dollar, PR64
Vivid, Multicolor Toning

- 4748 1897 PR64 PCGS.** Only 731 proof Morgan dollars were struck in 1897. This attractive Choice example exhibits the sharply detailed design elements expected of proofs of this era, along with deeply mirrored fields, all under vivid shades of lime-green, cerulean-blue, and slate-gray toning. Well-preserved surfaces add to the outstanding eye appeal. Housed in an old green label holder. Population: 48 in 64 (1 in 64+), 52 finer (1/17). NGC ID# 27ZV, PCGS# 7332

1903 Dollar, PR64
Reflective Fields

- 4749 1903 PR64 PCGS.** Reflective fields produce a moderate degree of contrast on each side of this Choice Morgan dollar proof, though minimal frost is present over the devices, a characteristic typical of proofs struck after 1902. Brilliant with couple of microscopic contact flecks. This is one of only 755 specimens manufactured at the Mint in 1903, the penultimate year of proof production in the series. Housed in an old green label holder. NGC ID# 2823, PCGS# 7338

1904 Morgan Dollar, PR65
Final Regular Proof Issue

- 4750 1904 PR65 PCGS.** From a limited mintage of just 650 pieces, the 1904 Morgan dollar was the last issue of the series to be struck in regular proof format (not counting the controversial Zerbe and Chapman "proofs" of 1921). This impressive Gem exhibits sharply detailed design elements and deeply mirrored fields, under attractive shades of greenish-gold and cerulean-blue toning. Population: 33 in 65 (1 in 65+), 38 finer (1/17). NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

- 4751 1921 MS65+ NGC.** The high relief of the design caused some softness on Liberty's curls on virtually all examples of the 1921 Peace dollar. This Plus-graded Gem exhibits a better-than-average strike and lustrous, well-preserved surfaces, with a few hints of golden-tan toning. NGC ID# 2U4E, PCGS# 7356

1921 Peace Dollar, MS66
Remarkably Strong Detail

- 4752 1921 MS66 NGC.** Strike detail is almost invariably soft over the central design features, but not so with this exemplary Premium Gem. The High Relief motifs are about as sharp as one may hope for. Bright untoned surfaces are beautifully preserved with subdued, satiny luster. NGC counts six finer representatives (1/17). NGC ID# 2U4E, PCGS# 7356

- 4753 1922-D MS66 PCGS.** Locating a Gem 1922-D Peace dollar should pose little trouble, but Premium Gems are rare and finer survivors are reserved for the most advanced and well-financed specialists. This dollar is totally brilliant with remarkably crisp legends, save for IN. A couple of small grazes are unimportant. PCGS reports merely three finer submissions (12/16). NGC ID# 257D, PCGS# 7358

- 4754 1922-S MS65 PCGS. CAC.** Despite the large mintage of nearly 17.5 million pieces, the 1922-S Peace dollar is seldom seen in grades above MS65. This attractive Gem exhibits sharply detailed design elements and lustrous, well-preserved surfaces. PCGS has graded 12 numerically finer examples (1/17). NGC ID# 257E, PCGS# 7359

- 4755 1923 Extra Hair, VAM-1V, MS66+ NGC. CAC.** Designated as a Top 50 variety on the NGC holder, but VAMworld.com designates it instead as an Elite 30 variety. The "Extra Hair" is a vertical die break in Liberty's hair above the neckline. The present lustrous Premium Gem exhibits light olive-gold toning. The strike is crisp, and the obverse field is well preserved. NGC ID# 257F, PCGS# 133826 Base PCGS# 7360

**1923-D Peace Dollar, MS66
Radiant Mint Luster**

4756 1923-D MS66 PCGS Secure. Remarkably vibrant mint bloom radiantly illuminates subtle golden hues on each side of this Premium Gem example which deepens toward the peripheries. The strike is bold, and only a few faint surface grazes preclude an even finer numeric grade. Excellent quality for the issue. NGC ID# 257G, PCGS# 7361

4757 1923-S MS65 PCGS. The availability of the 1923-S Peace dollar declines significantly in MS65, and finer coins are prohibitively rare in most cases. This Gem displays frosty, luminous luster accented by a blush of golden toning. The strike is good but lacks a touch on the very central high points. The preservation will please even the most discerning grader. PCGS has seen three numerically finer coins, NGC only one (1/17). NGC ID# 257H, PCGS# 7362

4758 1924-S MS64+ PCGS. Rich golden toning encompasses each side of this high-end Choice 1924-S Peace dollar, allowing for hints of lavender and mint-green on each side near the borders. The strike is bold, and the preservation nearly befits a finer grade. Higher-grade examples of this issue are elusive. NGC ID# 257K, PCGS# 7364

4759 1924-S MS64 PCGS. CAC. Booming luster, a nice strike, and a clean cheek attest to the quality of this better date near-Gem. Hints of wheat-gold toning visit the centers. A conditionally rare branch mint issue. Certified in a green label holder.
Ex: West Palm Beach Signature (Heritage, 7/2009), lot 1065; Long Beach Signature (Heritage, 2/2010), lot 736; Sacramento ANA Signature (Heritage, 3/2011), lot 4216, which realized \$1,667.50. NGC ID# 257K, PCGS# 7364

**1925 Peace Dollar, MS67
Prohibitively Rare Any Finer**

4760 1925 MS67 PCGS. Peace dollars, in general, are much scarcer in Superb Gem condition than their Morgan dollar predecessors, regardless of date or Mint. This lustrous, pale champagne-gold 1925 dollar is a case in point. The mintage of more than 10 million pieces suggests it is readily available in all grades, yet any MS67 coin is a scarce discovery and only two pieces are certified numerically finer by both services combined. Only a few light marks in Liberty's tiara keep this sharply struck Superb Gem from an even finer grade. Population: 114 in 67 (1 in 67+), 1 finer (1/17). NGC ID# 257L, PCGS# 7365

4761 1925-S MS64+ PCGS. This Plus-graded Choice specimen displays well-detailed design elements, with a touch of softness on Liberty's hair and the eagle's shoulder. The well-preserved lustrous surfaces show pleasing shades of golden-tan toning. PCGS has graded 41 numerically finer examples (1/17). NGC ID# 257M, PCGS# 7366

4762 1926-D MS66 PCGS. CAC. The 1926-D enjoys a healthy mintage of 2.3 million coins, yet it is surprisingly scarce in MS66 and should be considered uncollectible in MS67 for most specialists. Bold, arching die cracks travel through Liberty's bust and the eagle's head. Each side is brilliant with satin luster. Beautifully preserved with only eight finer coins at PCGS (12/16). NGC ID# 257P, PCGS# 7368

4763 1926-S MS65+ PCGS. This delightful high-end Gem exhibits sharply detailed design elements throughout and the well-preserved surfaces radiate vibrant mint luster on both sides. Delicate shades of golden-tan toning add to the outstanding eye appeal. NGC ID# 257R, PCGS# 7369

**1926-S Dollar, MS66
Registry Quality Example**

4764 1926-S MS66 PCGS. Collectors building Peace dollar Registry Sets must opt for an appealing Premium Gem example of the 1926-S, for there are only two finer Superb Gems at both services combined. This lovely, well-detailed dollar is largely brilliant with speckled golden patina and thick S-mint frost. Population: 90 in 66, 2 finer (1/17). NGC ID# 257R, PCGS# 7369

4765 1927 MS65 PCGS. An impressively sharp strike characterizes each side of this Gem 1927 Peace dollar, while the satiny surfaces offer a hint of warm golden toning. Grade-limiting abrasions are minor, consistent with the MS65 designation. PCGS reports only 16 higher-grade coins (1/17). NGC ID# 257S, PCGS# 7370

4766 1927 MS65 PCGS. An attractive Gem representative of this low-mintage issue, with well-detailed design elements and well-preserved, lustrous surfaces that show hints of golden-tan toning. PCGS has graded 16 numerically finer examples (1/17). NGC ID# 257S, PCGS# 7370

4767 1927 MS65 PCGS. This Gem 1927 Peace dollar displays vibrant, frosty mint luster cast in a warm yellow-gold hue. Abrasions are trivial, if that, and the strike is sharply executed. Only 16 examples are numerically finer at PCGS (1/17). NGC ID# 257S, PCGS# 7370

4768 1927-D MS64+ PCGS. CAC. VAM-3. Minor die doubling is apparent on the designer's monogram and the E in WE. A brilliant and lustrous near-Gem that boasts an exceptionally unabraded obverse. The major devices are sharply struck. Scarce in the present quality relative to demand. NGC ID# 257T, PCGS# 7371

4769 1927-D Doubled Motto, VAM-2, MS64+ PCGS. CAC. A Top 50 Variety. WE TR and the designer's monogram are nicely die doubled. This precisely struck and lustrous Gem has light butter-gold patina and an absence of mentionable marks. VAM-2 Population: 13 in 64 (1 in 64+), 5 finer (1/17). NGC ID# 257T, PCGS# 133777 Base PCGS# 7371

4770 1927-S MS64 PCGS. CAC. Frosty luster swirls beneath a hint of dusky silver-gray toning on this near-Gem 1927-S Peace dollar. The strike is bold, and neither side displays any abrasions that are bothersome to the naked eye. Finer 1927-S dollars are elusive. NGC ID# 26J6, PCGS# 7372

4771 1927-S MS64 PCGS. CAC. Canary-gold toning graces this sharply struck and lustrous silver dollar. Nicer than some MS65 examples seen by the present cataloger. The leaves near the claw are die doubled and the well-preserved surfaces are free of mentionable distractions. PCGS has graded 93 numerically finer examples (1/17). NGC ID# 26J6, PCGS# 7372

4772 1928-S MS64+ PCGS. The 1928-S is notoriously scarce in Gem condition, heightening the appeal of the current Plus-designated near-Gem. This coin is well-struck and displays frosty mint luster with traces of light golden toning. NGC ID# 257W, PCGS# 7374

4773 1928-S MS64+ PCGS. CAC. Light to medium wheat-gold toning accompanies this lustrous and well struck near-Gem. The fields are smooth and the portrait is well preserved. As is the case with most high grade examples of the conditionally rare issue, the designer's monogram and the TR in TRVST are die doubled. NGC ID# 257W, PCGS# 7374

4774 1928-S MS64+ PCGS. CAC. The 1928-S is the rarest Peace dollar in Gem condition, making this high-end Choice example an especially attractive option from the standpoint of price versus quality. This attractive well struck example displays vibrant mint luster and light golden toning. PCGS has graded 62 numerically finer examples (1/17)

Ex: *Central States Signature (Heritage, 4/2011)*, lot 5972. NGC ID# 257W, PCGS# 7374

4775 1928-S MS64+ NGC. CAC. This frosty and highly lustrous near-Gem borders on a substantially higher price level with only 43 finer NGC certified examples (1/17). This brilliant white example has delicate peripheral gold toning, primarily on the obverse. NGC ID# 257W, PCGS# 7374

4776 1934 MS66 PCGS. The 1934 Peace dollar claims a small mintage of 954,057 pieces. This delightful Premium Gem exhibits sharply detailed design elements and vibrant mint luster throughout, with virtually pristine surfaces that display delicate highlights of golden-tan toning. PCGS has graded only three numerically finer examples (12/16). NGC ID# 257Y, PCGS# 7375

1934-D Peace Dollar, MS66 Flashy and Brilliant

4777 1934-D MS66 PCGS. Micro D. Only in MS66 does the 1934-D become truly difficult to locate, and the certified population drops even more substantially in MS67. Anything finer than this flashy, brilliant Premium Gem should be considered uncollectible. The obverse is razor-sharp, while the reverse displays minor incompleteness on the legends. Population: 86 in 66 (3 in 66+), 2 finer (1/17). NGC ID# 257Y, PCGS# 7376

4778 1935 MS66 PCGS. A spectacular Premium Gem, with sharply detailed design elements and impeccably preserved, lustrous surfaces. Eye appeal is terrific. Although this issue can be found in MS66 with a little patience, PCGS has graded no numerically finer examples (12/16). NGC ID# 2582, PCGS# 7378

4779 1935-S MS65+ PCGS. The 1935-S Peace dollar becomes scarce in grades above MS65. This Plus-graded Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces, with subtle hints of golden-tan toning. Eye appeal is outstanding. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

4780 1971-D MS67 PCGS. The 1971-D Eisenhower dollar is scarce in Superb Gem condition, and this MS67 coin is among the finest certified (1/17). The strike is bold, and each side displays lovely satin luster with hints of iridescence throughout champagne-tinged surfaces. Population: 31 in 67, 0 finer (1/17). NGC ID# 2585, PCGS# 7407

1976 Bicentennial Dollar, MS66 Scarce Type One Guide Book Variety

4781 1976 Type One MS66 PCGS. 30th Anniversary Green Label Holder. This satiny Premium Gem avoids many of the surface marks that plague the issue. The coin is untuned save for a thin band of subtle gold toning at the rims. Originally struck with thick border lettering to create the Type One variety, it was soon replaced by the Type Two reverse design with thinner letters on the reverse legend to better match the obverse type style. Population: 32 in 66 (1 in 66+), 0 finer (1/17). NGC ID# B76K, PCGS# 7418

4782 1977 MS67 PCGS. A beautifully preserved example, among the finest certified. The strike is bold, and the lustrous surfaces display lovely multicolor toning. Few examples are known this fine, creating strong demand among Registry collectors. Population: 20 in 67, 0 finer (1/17). NGC ID# 258M, PCGS# 7423

4783 1977 MS67 PCGS. A conditionally rare Registry-grade example, tied for the finest 1977 Eisenhower dollar known. The strike is bold, and each side displays blended aquamarine, champagne, and pale lavender toning. Population: 20 in 67, 0 finer (1/17). NGC ID# 258M, PCGS# 7423

PROOF EISENHOWER DOLLAR

4784 1971-S Silver PR70 Deep Cameo PCGS. Out of more than 4.2 million silver-clad proof Eisenhower dollars struck in the debut year of 1971 at San Francisco, only 79 Deep Cameo specimens have received the ultimate grade from PCGS (12/16). While this example's holder has accumulated some scratches that may appear in the images, the piece itself is blissfully flaw-free. NGC ID# 258S, PCGS# 97428

MODERN ISSUE

4785 2011-W Lucretia Garfield Half-Ounce Gold Ten Dollar MS70 PCGS. The Lucretia Garfield ten dollar gold issue has one of the smallest circulation-strike mintages among all U.S. commemoratives, let alone the First Spouse series (2,168 coins). This is a pristine, lemon-gold example with few peers. Population: 72 in 70 (1/17). PCGS# 506969

MODERN BULLION COINS

4786 1986 Silver Eagle MS70 PCGS. The debut Silver Eagle is scarce in MS70 at PCGS, making the present offering important for Registry Set collectors. The strike is sharp, and each side displays unmarred, frosty silver luster. NGC ID# 26J4, PCGS# 9801

4787 1986 Half-Ounce Gold Eagle MS70 PCGS. 1986 was the first year of the American gold eagle bullion program, and more Uncirculated half-ounce gold pieces were sold that year than the next ten years combined. But PCGS has certified surprisingly few in the ultimate grade. This fully struck example exhibits flawless apricot-gold surfaces. Population: 65 in 70 (1/17). NGC ID# 28Y8, PCGS# 9805

4788 1988 Half-Ounce Gold Eagle MS69 NGC. From a low mintage of 45,000 pieces, this half-ounce Gold Eagle exhibits razor-sharp definition on all design elements and the lustrous orange-gold surfaces are virtually pristine. NGC has certified 99 numerically finer examples (12/16). NGC ID# 26N9, PCGS# 9822

4789 1988 Half-Ounce Gold Eagle MS69 NGC. The vivid orange-gold surfaces of this half-ounce Gold Eagle show a single imperfection, a tiny mark non the torch. The design elements are sharply detailed and vibrant mint luster radiates from both sides. NGC has graded 99 finer examples (12/16). NGC ID# 26N9, PCGS# 9822

4790 1989 Tenth-Ounce Gold Eagle MS70 PCGS. Of the 264,790 tenth-ounce Gold Eagles struck in 1989, only an elite few have achieved a flawless grade assessment. PCGS has seen 22 at this ultimate level (12/16). A fully struck lemon-gold representative that should not be overlooked by dedicated Registry builders. NGC ID# 26KY, PCGS# 9828

4791 1989 Half-Ounce Gold Eagle MS69 PCGS. From a low mintage of 44,798 pieces, this spectacular half-ounce Gold Eagle is a virtually perfect specimen, with razor-sharp definition on all design elements and vibrant mint luster throughout. PCGS has graded only seven numerically finer examples (1/17). NGC ID# 26NA, PCGS# 9832

4792 1990 Half-Ounce Gold Eagle MS69 PCGS. Since one-ounce gold eagles were sold at a lower premium above bullion value, the 1990 mintage of Uncirculated half-ounce eagles was less than one-tenth the production of its one-ounce counterpart. Its low mintage has enabled the 1990 to trade for approximately double its gold value. This is an intricately struck and essentially flawless butter-gold representative. NGC ID# 26NB, PCGS# 9842

1991 Silver Eagle, MS70 Very Scarce in This Ultimate Grade

4793 1991 Silver Eagle MS70 NGC. Not a single tick or fleck is present anywhere on this immaculate, Registry-quality Silver Eagle. The 1991 had an unremarkable mintage approaching 7.2 circulation strikes, unlike later issues from the same decade. However, the 1991 has one of the lowest certified population totals in this ultimate grade. NGC ID# 26JE, PCGS# 9846

4794 1991 Tenth-Ounce Gold Eagle MS70 PCGS. The 1991 is a key date among tenth-ounce Gold Eagles, as only 165,200 pieces were manufactured in circulation-strike format. This technically flawless Registry coin is fully struck. Lustrous, lemon-gold surfaces are devoid of any flaws whatsoever. Population: 57 in 70 (12/16). NGC ID# 26L2, PCGS# 9848

4795 1991 Half-Ounce Gold Eagle MS69 PCGS. The 1991 half-ounce Gold Eagles were the last issue with Roman Numerals in the date. This fully struck MS69 specimen is just one tick away from technical perfection, with vibrant mint luster and terrific eye appeal. PCGS has graded 20 numerically finer examples (1/17). NGC ID# 26NC, PCGS# 9852

1992 Tenth-Ounce Gold Eagle, MS70

4796 1992 Tenth-Ounce Gold Eagle MS70 PCGS. The obverse of this tenth-ounce Gold Eagle features Augustus Saint-Gaudens iconic design in miniature. The design elements are fully detailed and the technically perfect orange-gold surfaces radiate vibrant mint luster on both sides. PCGS has seen surprisingly few examples of this issue in the ultimate grade of MS70. Population: 13 in 70 (12/16). NGC ID# 26L3, PCGS# 9858

1992 Quarter-Ounce Gold Eagle, MS70 Few Seen This Fine

4797 1992 Quarter-Ounce Gold Eagle MS70 PCGS. From a mintage of 59,546 pieces, the 1992 quarter-ounce Gold Eagle used Arabic Numerals in the date for the first time. This delightful specimen offers fully detailed design elements and technically perfect orange-gold surfaces with vibrant mint luster on both sides. Population: 15 in 70 (12/16). NGC ID# 26M8, PCGS# 9860

1992 Quarter-Ounce Gold Eagle, MS70 First Arabic Numerals Issue

4798 1992 Quarter-Ounce Gold Eagle MS70 PCGS. A technically perfect example of the 1992 quarter-ounce Gold Eagle, the first issue of the series to use Arabic Numerals in the date. This spectacular example offers fully struck design elements and vibrant mint luster on both sides. PCGS has graded only 15 examples in MS70, while NGC has certified 44 specimens in this ultimate grade (12/16). NGC ID# 26M8, PCGS# 9860

4799 1994-P Silver Eagle PR70 Deep Cameo PCGS. A powerfully reflective specimen, with fully detailed design elements and technically perfect surfaces. Milk-spotting is minimal with only a small area to the left of the eagle of any concern. Eye appeal is tremendous. NGC ID# 26UF, PCGS# 9877

4800 1994-P Silver Eagle PR70 Deep Cameo PCGS. From a low mintage of 372,168 pieces, this magnificent Silver Eagle exhibits fully struck design elements and deeply mirrored fields that contrast profoundly with the richly frosted devices. The brilliant surfaces are technically perfect. NGC ID# 26UF, PCGS# 9877

**1995-W Silver Eagle, PR69 Deep Cameo
Low-Mintage Key Modern Issue**

- 4801 1995-W Silver Eagle PR69 Deep Cameo PCGS.** The proof 1995-W Silver Eagles were only issued in special 10th anniversary proof sets (celebrating the 10th year of the American Eagle Bullion program), which stunted their mintage to a total of just 30,125 coins. A modern-day rarity, this issue is the key to the Silver Eagle series, where it ranks as high in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. This example is nearly perfect in both strike and preservation, displaying exceptional field-motif contrast. NGC ID# CFWX, PCGS# 9887

**1995-W One-Ounce Silver American Eagle
PR69 Deep Cameo**

- 4802 1995-W Silver Eagle PR69 Deep Cameo PCGS.** Astounding black-and-white contrast dominates the eye appeal of this virtually flawless specimen. Even under magnification, this coin's few trivial faults are difficult to spot, particularly within the rich silver-white frost of the central devices. One of just 30,125 proofs struck for the issue. Ex: *Baltimore Signature (Heritage, 3/2009)*, lot 1831. NGC ID# CFWX, PCGS# 9887

- 4803 Five-Piece 1995-W 10th Anniversary American Eagle Set.** A complete five-piece 10th Anniversary American Eagle proof set. Contains the one-ounce \$50, half-ounce \$25, quarter-ounce \$10, and tenth-ounce \$5 gold eagles, but the featured attraction is the one-ounce silver eagle, the key to its widely collected series. All coins appear pristine. Accompanying the lot is the government-issued case, box, and certificate of authenticity. (Total: 5 coins)

- 4804 1996 Half-Ounce Gold Eagle MS69 NGC.** Production of half-ounce gold eagles dropped below 40,000 pieces in 1996, as investors sought other avenues in the burgeoning economy. This sharply detailed MS69 specimen offers virtually perfect orange-gold surfaces with vibrant mint luster throughout. NGC ID# 26NH, PCGS# 9906

- 4805 1996 Half-Ounce Gold Eagle MS69 NGC.** The mintage of half-ounce Gold Eagles was reduced to 39,287 pieces in 1996, reflecting the lower demand for bullion among competing investments at the time. This fully detailed, brightly lustrous example is just one tick away from technical perfection. NGC ID# 26NH, PCGS# 9906

- 4806 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 NGC.** A popular *Guide Book* variety, this issue was produced with West Point dies that lacked the proof finish typically imparted on working dies for that mint. The current example is boldly struck and almost perfectly preserved. It is important to note that PCGS has only certified 10 numerically finer examples (1/17). NGC ID# 26MG, PCGS# 99942

- 4807 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 PCGS.** Struck from unfinished proof dies, this brilliant and nearly perfect Superb Gem exhibits satiny luster rather than the deeply mirrored fields expected on proof coinage. NGC ID# 26MG, PCGS# 99942

- 4808 Three-Piece 2006 Silver Eagle 20th Anniversary Set PCGS.** The trio are separately certified in 20th Anniversary, First Strike holders. The lot includes a 2006-W Burnished MS70; a 2006-P reverse proof PR70; and a 2006-W regular proof PR70 Deep Cameo. All three coins are fully struck, untoned, and immaculate. (Total: 3 coins)

- 4809 Three-Piece 2006-W One-Ounce Gold Eagle 20th Anniversary Set NGC.** The three pristine one-ounce \$50 gold eagles are separately holdered. The set includes a reverse proof PR70, a regular proof PR70 Ultra Cameo, and an Uncirculated finish MS70. The trio is as issued, with immaculate preservation and bold strikes. (Total: 3 coins)

- 4810 2008-W Quarter-Ounce Gold Buffalo, First Strike, MS70 PCGS.** From a mintage of 9,949 pieces, this technically perfect First Strike American Buffalo represents the popular quarter-ounce gold ten dollar denomination. This coin exhibits fully struck design elements and brightly lustrous orange-gold surfaces. NGC ID# 26XZ, PCGS# 399929 Base PCGS# 399928

- 4811 2008-W Half-Ounce Gold Buffalo, Fraser Facsimile Signature, MS70 PCGS.** A fully impressed lemon-gold example that boasts immaculate surfaces and coruscating luster. A wire rim is present near 6 o'clock on both sides. Fractional ounce gold Buffalo coins were struck only in 2008, the first year for the bullion series. PCGS# 91015 Base PCGS# 399930

- 4812 2008-W One-Ounce Gold Buffalo, First Strike, MS70 PCGS.** This technically perfect example of the 2008-W American Buffalo was struck during the first production run at the West Point facility. These were the first 24-carat gold coins ever struck by the U.S. Mint. The design elements are fully detailed and vibrant matte luster radiates from both sides. NGC ID# 26RS, PCGS# 400038 Base PCGS# 400037

**2008-W One-Ounce Gold Buffalo
PR70 Deep Cameo**

- 4813 2008-W One-Ounce Gold Buffalo, .9999 Fine, PR70 Deep Cameo PCGS.** The 2008-W proof one-ounce Gold Buffalo comes from a minimal mintage of 18,863 coins, down from nearly 59,000 pieces the year before and trailing a production of more than 49,000 examples the next year. This perfectly preserved Deep Cameo representative displays full detail and dramatic field-device contrast. NGC ID# 26RH, PCGS# 393329

- 4814 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 PCGS.** The double-thick, small diameter Ultra High Relief twenty is a modern replica of the very rare Judd-1917 patterns in the Smithsonian Institution. This spectacular example is fully struck, with vibrant mint luster throughout, and the impeccably preserved orange-gold surfaces are just one tick away from technical perfection. NGC ID# 26S4, PCGS# 407404

- 4815 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** The 2009 Ultra High Relief twenty dollar gold coins were each struck twice at 65 metric tons per strike, allowing for a full appreciation of Saint-Gaudens' masterful design. This technically pristine representative offers deep yellow-gold coloration and an unimprovable level of eye appeal. NGC ID# 26S4, PCGS# 407404

4816 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. Mint Director Ed Moy conceived the idea of coining a one-ounce Ultra High Relief gold piece that would replicate the reduced diameter, double-thick double eagle patterns, Judd-1917, in the Smithsonian Institution. This magnificent specimen is fully struck and technically perfect, with incredible eye appeal. NGC ID# 26S4, PCGS# 407404

4817 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. A breath-taking technically perfect representative of this popular bullion issue, with fully struck design elements and vibrant mint luster throughout. The 2009 Ultra High Relief double eagles were modeled after the extremely rare Judd-1917 patterns in the Smithsonian Institution. NGC ID# 26S4, PCGS# 407404

4818 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 Prooflike PCGS. Numismatic art gets no better than this design, at one time out of reach to all but a few extremely well heeled collectors, but now available to collectors of any budget, thanks to the recent U.S. Mint production. This nearly perfect piece has deeply mirrored fields around its satiny devices, exceptionally well executed in brilliant yellow gold. NGC ID# 26S4, PCGS# 506602

4819 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, MS69 Deep Prooflike NGC. A fully struck example from an early state of the dies, showing highly reflective fields. The coin is seemingly flawless, and eye appeal is correspondingly superb. Arguably the most beautiful modern issue from the United States Mint. NGC ID# 26S4, PCGS# 506602

2009 One-Ounce Twenty Dollar, MS70 Prooflike Ultra High Relief Saint-Gaudens Pattern Replica

4820 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. Based on the extremely rare Judd-1917 patterns in the Smithsonian Institution (Saint-Gaudens double eagles struck on a double-thick planchet with the diameter of a ten dollar gold piece) the 2009 one-ounce Ultra High Relief double eagles were conceived by U.S. Mint Director Ed Moy. This fully struck, technically perfect specimen displays deeply reflective prooflike surfaces. NGC ID# 26S4, PCGS# 506602

2009 One-Ounce Gold Ultra High Relief Twenty MS70 Prooflike

4821 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. This is a fully struck, glimmering example of the 2009-reproduction of Saint-Gaudens' Ultra High Relief pattern design from 1907. The coin is flawlessly preserved and displays moderately reflective fields. Examples of this issue remain highly sought-after nearly a decade after their issuance from the Mint. NGC ID# 26S4, PCGS# 506602

2009 One-Ounce Gold Twenty, MS70 Prooflike Ultra High Relief Design

4822 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. A Prooflike example that shows subtle field-device contrast on the obverse, this 2009 one-ounce gold Ultra High Relief twenty dollar piece is perfectly preserved and showcases a flawless strike. Many collectors would consider an example of this modern issue essential for any Saint-Gaudens gold collection, since the original patterns are essentially unobtainable for most enthusiasts. NGC ID# 26S4, PCGS# 506602

4823 Four-Piece 2015 One-Ounce Gold Eagle Set MS70 PCGS. All four coins are individually certified in First Strike holders. The set includes the **tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50.** An intricately struck and pristine quartet. (Total: 4 coins) NGC ID# BHHJ, PCGS# 535976 Base PCGS# 535980

4824 2015-W High Relief One-Ounce Gold, First Strike, David Hall Signature, MS70 PCGS. The 2015-W one-ounce 100 dollar gold piece is the first issue from the U.S. Mint to bear that denomination. This fully detailed First Strike example offers technically perfect orange-gold surfaces and vibrant mint luster throughout. Struck in .9999 fine gold, eye appeal is terrific. Population: 83 in 70 (12/16). NGC ID# 3NBM, PCGS# 594894 Base PCGS# 545532

COINS OF HAWAII

4825 1847 Hawaii Cent AU55 PCGS. M. 2CC-1. Crosslet 4, 18 berries. Metcalf 2CC-1 is designated as the second rarest die variety in his standard reference. It is attributed by the presence of a berry below the right side of the W in HAWAII. A lightly circulated chocolate-brown representative. The surfaces are smooth aside from faint lines below HANERI. Listed on page 420 of the 2017 *Guide Book*. NGC ID# 2C52, PCGS# 10965

4826 1847 Hawaii Cent MS63 Brown PCGS. M. 2CC-2. Crosslet 4, 15 berries. A chocolate-brown example of this popular single-year type. The strike is sharp, and the fields and motifs lack any mentionable marks. The reverse rim displays minor contact near 12 o'clock. Listed on page 420 of the 2017 *Guide Book*. NGC ID# 2C52, PCGS# 10965

4827 1847 Hawaii Cent MS63 Red and Brown PCGS. M. 2CC-2. Crosslet 4, 15 berries. Peach-red and gunmetal-gray compete for territory across this well struck and virtually unabraded example. A blush of russet patina is noted at 9 o'clock on the obverse. Certified in a first generation holder. Listed on page 413 of the 2017 *Guide Book*. NGC ID# 2C52, PCGS# 10966

4828 1883 Hawaii Ten Cents MS64 NGC. Ex: Louis Kaufman Collection. This well struck and coruscating near-Gem displays cream-gray, apple-green, and rose-red toning. Marks are absent except below the IM in DIME. Krueger & Krueger held the Louis G. Kaufman Collection Sale in January 2014. Kaufman was no relation to the well-known violinist. NGC ID# 2C54, PCGS# 10979

4829 1883 Hawaii Quarter MS66 PCGS. A sharply detailed Premium Gem representative of this popular Hawaiian issue, the most available of the four denominations issued in 1883. The well-preserved surfaces are blanketed in shades of bluish-gray, golden-brown, and amber patina. PCGS has graded 19 numerically finer examples (1/17). NGC ID# 2C5B, PCGS# 10987

- 4830 1883 Hawaii Quarter MS66 PCGS.** An extraordinary 1883 Hawaiian quarter, this piece exhibits bold hair and beard details along with sharp crown and shield details on the reverse. The frosty surfaces are predominately brilliant with peripheral blue-steel and silver-gray toning. PCGS has only certified 19 numerically finer examples (1/17). NGC ID# 2C5B, PCGS# 10987

**1883 Hawaii Quarter, Bold MS67
Frosty Condition Census Piece**

- 4831 1883 Hawaii Quarter MS67 PCGS.** Daubs of mauve and jade-green patina adhere to the margins of this Barber-designed 1883 Hawaiian quarter dollar. The centers remain brilliant, allowing the viewer to fully appreciate the frosty luster that swirls over each side. From a mintage of 500,000 coins. Population: 19 in 67 (2 in 67+), 0 finer (1/17). NGC ID# 2C5B, PCGS# 10987

WORLD

- 4832 1903 Philippines 20 Centavos PR67 PCGS.** The brilliant central obverse is framed by lovely peripheral bands of peach-gold and electric-blue. The reverse has a deep aquamarine field and a blush of orange toning across the lower margin. Well struck, and free from contact or carbon. Population: 10 in 67 (1 in 67+), 1 finer (1/17). NGC ID# 2C8R, PCGS# 90323
- 4833 1904 Philippines 20 Centavos PR67 PCGS.** Rich jade-green and autumn-gold toning envelops this well preserved and boldly struck proof 20 centavos. A remarkable representative, tied for the finest certified at both services. Population: 9 in 67 (1 in 67+), 0 finer (1/17). NGC ID# BKCX, PCGS# 90324
- 4834 1905 Philippines 20 Centavos PR66 PCGS.** The well struck and gently coruscating surfaces are devoid of detractors. Pastel almond-gold, ice-blue, and russet toning ensures the originality. The date is lightly repunched, evident on the 1, 0, and 5 when studied beneath a lens. The proof mintage of 471 pieces is the lowest of the series. Population: 10 in 66 (1 in 66+), 4 finer (1/17). NGC ID# 2C8W, PCGS# 90325
- 4835 1906 Philippines 20 Centavos PR67 PCGS.** Exquisite jade-green and olive-gold toning consumes the reverse. The lower left obverse displays similar shades, while tan-brown patina adorns the volcano. A sharply struck and undisturbed Superb Gem. A mere 500 proofs were produced. Population: 13 in 67 (5 in 67+), 1 finer (1/17). NGC ID# 4K7F, PCGS# 90326
- 4836 1903 Philippines 50 Centavos PR66 PCGS.** Light tan-gold toning visits the margins, but this intricately impressed specimen is otherwise brilliant. The satiny surfaces are nearly immaculate, and the eye appeal is unsurpassable. Population: 17 in 66, 9 finer (1/17). NGC ID# 2C9R, PCGS# 90367
- 4837 1905 Philippines 50 Centavos PR65 PCGS.** A fully struck and nicely mirrored Gem. The fields are brilliant and the motifs are frosty. The borders display blushes of apple-green and tan-gold toning. The proof mintage of 471 pieces is lowest for the type. Population: 9 in 65 (1 in 65+), 12 finer (1/17). NGC ID# 2C9W, PCGS# 90369
- 4838 1906 Philippines 50 Centavos PR66 PCGS.** Rotation beneath a light reveals iridescent orange-gold, violet-red, and powder-blue patina. A satiny and razor-sharp Premium Gem. Both sides appear free from contact. The obverse is minutely die doubled, apparent on the bases of FIFTY. Population: 14 in 66 (2 in 66+), 14 finer (1/17). PCGS# 90370

- 4839 1908 Philippines 50 Centavos PR65 PCGS.** A beautifully preserved Gem draped in light to medium shades of sun-gold and powder-blue. The margins offer freckles of deep green and gunmetal toning. The final-year proof issue has a scant mintage of 500 pieces. Population: 14 in 65, 16 finer (1/17). PCGS# 90371

- 4840 1906 Philippines Peso PR64 PCGS.** Mottled autumn-brown and forest-green toning encompasses the obverse. The reverse displays a wheat-gold field bounded by an aquamarine periphery. Crisply struck and devoid of contact. Population: 16 in 64 (1 in 64+), 30 finer (1/17). NGC ID# 2CAL, PCGS# 90405

GSA DOLLARS

- 4841 1878-CC GSA MS64 ★ Prooflike NGC. VAM-1B.** A brilliant near-Gem with flashy fields, a sharp strike, a clean cheek, and a well preserved reverse. The obverse field displays minor contact. VAM-1B is the "Line in IB" variety. This example also shows considerable die rust near the TED in UNITED, presumably of greater numismatic interest. Without a box or certificate. NGC ID# 253M, PCGS# 518846 Base PCGS# 7081
- 4842 1880/79-CC Reverse of 1878, VAM-4, GSA, MS64+ NGC.** A Top 100 Variety. A lustrous Choice Carson City dollar. Light straw-gold toning visits the pristine reverse and moderately marked obverse. The most prominent overdate variety of the Morgan series. No box or certificate accompanies the lot. NGC ID# AP7P, PCGS# 518922 Base PCGS# 407108
- 4843 1881-CC GSA MS66 NGC. VAM-2.** Hints of orange-gold toning visit the margins near ONE and PLURIBUS, but this high-grade Carson City dollar is predominantly brilliant. A lustrous and sharply struck Premium Gem with smooth fields and only minor grazes on the portrait. No box or certificate are included. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126
- 4844 1881-CC GSA MS65+ Prooflike NGC. VAM-4.** A brilliant Gem with dazzling fields and noticeable white-on-black cameo contrast. The strike is bold and the fields are well preserved. The portrait exhibits delicate contact. The second-lowest Carson City emission of the series. NGC ID# 2547, PCGS# 518864 Base PCGS# 7127
- 4845 1882-CC GSA MS66 NGC.** An essentially brilliant obverse is paired with a wheat-gold reverse. Lustrous and sharply struck with uncommonly smooth surfaces. The fields are virtually pristine. A GSA box is included without a certificate. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134
- 4846 1882-CC GSA MS66 NGC.** Traces of honey-gold toning adorn this thoroughly lustrous and magnificently preserved Carson City type coin. Well-struck and certain to please even the most jaded specialist. The box and certificate of GSA issue are included. NGC lists 16 numerically finer submissions (1/17). NGC ID# 254H, PCGS# 518866 Base PCGS# 7134
- 4847 1882-CC GSA MS66 PCGS.** A trace of golden patina visits this sharply struck Carson City type coin. Dynamic luster sweeps across uncommonly smooth surfaces. Although the 1882-CC is readily available in GSA format, the present example is clearly superior to most of its peers. GSA Population: 47 in 66 (11 in 66+), 3 finer (1/17). NGC ID# 254H, PCGS# 518866 Base PCGS# 7134
- 4848 1882-CC GSA MS66 NGC. VAM-2B1.** A Hit List 40 Variety. The VAM-2 die marriage has been exhaustively researched, with 11 die states assigned to varieties at VAMworld.com. An outstanding Carson City type coin. A mere hint of tan toning accompanies lustrous and sharply struck surfaces. The fields are practically pristine. No box or certificate is included. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134
- 4849 1882-CC GSA MS66 NGC. CAC.** Pleasing cherry-red, sea-green, and lemon-gold toning consume the obverse. The reverse remains brilliant. A lustrous and well struck Carson City GSA dollar. Both sides are splendidly smooth. Without a GSA box or certificate. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134

**1882-CC GSA Dollar, MS66+
Outstanding Carson City Type Coin**

4850 1882-CC GSA MS66+ NGC. CAC. This lustrous Carson City GSA type coin is nearly snow-white, but shows hints of butter-gold toning along the lower reverse margin. The strike is good and the reverse is essentially immaculate. The obverse is also well preserved, with only inconsequential contact. Desirable in the present quality. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134

4851 1883-CC GSA MS66 PCGS. VAM-5C. Autumn-brown toning accompanies UNITED and the lower obverse margin, but the majority of this lustrous Carson City type coin is brilliant. Vibrant luster sweeps splendidly smooth surfaces. Only a vertical line on the eagle's breast merits mention. NGC ID# 254H, PCGS# 518869 Base PCGS# 7144

4852 1884-CC GSA MS66 NGC. VAM-4A. The "Spiked Date" obverse is paired with the "Pinned Wing Gouge" reverse. The variety nicknames refer to die characteristics instead of the preservation of the present piece, which is exemplary. Sharply struck and lustrous. The obverse is brilliant, but half of the pristine reverse exhibits rich orange-gold and forest-green toning. A GSA box accompanies the lot, as does a GSA certificate without a serial number. NGC ID# 254L, PCGS# 518872 Base PCGS# 7152

4853 1884-CC GSA MS66 ★ NGC. CAC. VAM-2. Exquisite bands of rose-red, aquamarine, and olive-gold patina endow the upper obverse. The rest of this lustrous and boldly struck example is close to snow-white. The fields are remarkably close to pristine, and the cheek shows only incidental contact. No GSA box or certificate is included. NGC ID# 254L, PCGS# 518872 Base PCGS# 7152

4854 1885-CC GSA MS64 NGC. VAM-3. Dusky apricot toning embraces the obverse of this Choice Carson City dollar. The reverse is close to brilliant. The strike is good and the fields are smooth. The grade is determined by moderate contact on the cheek. A GSA box is included, as is a GSA certificate without a serial number. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

**1885-CC GSA Dollar, MS66
Popular Low-Mintage Issue**

4855 1885-CC GSA MS66 NGC. CAC. VAM-2. As the lowest mintage Carson City Morgan dollar issue, the 1885-CC is highly popular among Western silver collectors. The present lustrous Premium Gem is brilliant save for a trace of tan-gold toning. The fields are practically pristine, and the portrait exhibits only inconsequential grazes. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

**1885-CC VAM-3 GSA Dollar
MS64 ★ Deep Prooflike**

4856 1885-CC GSA MS64 ★ Deep Prooflike NGC. VAM-3. A stone-white Choice Carson City dollar that boasts remarkably mirrored fields. Icy motifs rise in bold definition to contrast with glassy and moderately marked fields. The low mintage '85-CC will always be popular, especially examples that mimic the appearance of modern proofs. NGC ID# 254M, PCGS# 518877 Base PCGS# 97161

**1891-CC GSA Dollar, MS63
VAM-3, 'Spitting Eagle'**

4857 1891-CC Spitting Eagle, VAM-3, GSA, MS63 NGC. A Top 100 Variety. The die lump just beneath the eagle's beak provides the source for the "Spitting Eagle" nickname. A lustrous and lightly toned representative. The obverse field is well preserved, and reverse contact is localized to the field near UNITED. The 1891-CC ranks among the scarcer GSA Carson City issues. NGC ID# 255H, PCGS# 518881 Base PCGS# 7206

1891-CC GSA Dollar, MS63

4858 1891-CC Spitting Eagle, VAM-3, GSA MS63 NGC. A Top 100 Variety. A brilliant, sharply struck, and lustrous better date GSA dollar. The fields and cheek display minor marks. Coinage at Carson City resumed in 1889 with the Harrison Administration, but most silver dollars entered commerce instead of Treasury vaults, unlike the first era of CC-mint Morgan dollar production. NGC ID# 255H, PCGS# 518881 Base PCGS# 7206

4859 1921-S GSA Soft Pack MS61 NGC. The 1921-S silver dollar is very scarce in a soft pack GSA holder. The (1/17) NGC Census shows 20 in all grades, with only two certified as Mint State, both as MS61. This is a predominantly cream-gray piece with light golden-brown toning across the borders. The central strike is typical, and moderate marks are noted near Liberty's nose and eye.

REDFIELD DOLLAR

- 4860 1889-S MS65 Paramount (MS65 NGC).** Ex: Redfield Collection. Peach-gold and jade-green toning graces the margins of this crisply struck and lustrous Gem. The fields are virtually void of marks, and the cheek shows only moderate grazes. A lower mintage San Francisco issue. NGC ID# 255B, PCGS# 7194

ERRORS

- 4861 1864 L On Ribbon Indian Cent — Struck 20% Off Center — MS64 Brown PCGS.** The strike is off-center toward 4:30, but enough of the date remains that the top half of the 4 in the date is still evident, as is the L on the ribbon. The glossy surfaces are pleasing and medium-brown. A high grade for such a dramatic 19th century mint error.
- 4862 1886 Liberty Nickel — Struck-Through Obverse and Reverse — MS62 PCGS.** The obverse border has a series of conspicuous shallow strike-throughs between 3 and 6 o'clock. The central and upper-right reverse display a number of similar strike-throughs. Lustrous and unmarked with peripheral sun-gold and lime-green toning. The 1886 is a key date of the Liberty nickel series, and one of only three issues (along with the 1912-S and 1885) with a mintage of less than 5,000,000 pieces.

Buffalo Nickel on a Cent Planchet AG3, Popular Off-Metal Error

- 4863 No Date Buffalo Nickel — Struck on a Cent Planchet — AG3 PCGS.** Deep olive-brown and lavender toning. Struck aligned with the collar at 3 o'clock. This off-metal Buffalo nickel was presumably a pocket piece for its finder, many years ago. Although the date is worn smooth, E PLURIBUS UNUM, FIVE CENTS, and most of LIBERTY are bold. A few faded hair-thin test marks are noted on the upper portion of the Indian's head.
- 4864 1917-S Buffalo Nickel — Struck 20% Off Center — AU58 PCGS.** Off center toward 4:30. Virtually all of the date is present, and the mintmark is clear. About half of LIBERTY is off the flan, along with the bison's tail and nearly all of STATES OF AMERICA. A steel-gray and chestnut-gold example without any consequential marks.

MINT SETS

- 4865 Pair of U.S. Mint Products:** Nearly complete 1951 Double Mint Set missing a 1951 cent, a 1951-D nickel, and a 1951-S nickel, in the original holder with the mailing envelope addressed to Eric P. Newman, each piece exhibiting exceptional toning; two-piece 1984 Olympic Uncirculated coin set with a 1984-P silver dollar and a 1984-W 10-dollar gold piece.
Ex: Eric P. Newman Numismatic Education Society. (Total: 2 sets)

CERTIFIED MODERN PROOF SETS

- 4866 Five-Piece 1937 Proof Set PR65 to PR66 NGC.** Each of the five coins are separately holdered, but from the same grading submission. The set includes:

Cent PR65 Red. The orange-gold color is seamless aside from a blush of iridescent toning above the O in ONE.

Nickel PR66. A well struck Premium Gem. Essentially brilliant, and flawless except for a few pinpoint flecks.

Dime PR66. A fully struck specimen with light straw-gold toning. Glimpses of deeper color are noted on the rims near the I in LIBERTY and the ST in STATES.

Quarter PR66. Faint wheat-gold and lilac toning graces crisply struck and exemplary surfaces.

Half dollar PR65. Light golden-brown patina visits the borders of this fully struck and conservatively assessed Gem. (Total: 5 coins)

**1937 Proof Set, PR66-PR67+
All PCGS-Certified**

4867 Five Piece 1937 Proof Set, PR66 to PR67+ PCGS. Included are:

Cent PR66 Red. CAC. Even, blazing mint red color over both sides. Brightly reflective fields.

Nickel PR67+. CAC. The grade is derived from three sources. First, the overall preservation of the surfaces; second, the fabulous subtle iridescent toning on each side; third, the carbon-free surfaces.

Dime PR67. CAC. Absolutely problem-free, as one would expect, each side shows just the slightest hint of iridescent toning.

Quarter PR66. CAC. Surprisingly deep mirrors in the fields. Each side is very lightly toned, at first glance appearing brilliant.

Half Dollar PR66. Pale, even yellow patina covers each side of this deeply mirrored proof. Seldom found so fine. (Total: 5 coins)

4868 Five-Piece 1938 Proof Set PR64 to PR66 NGC. The coins are individually housed in holders with certification numbers from the same grading submission. The set includes:

Cent PR64 Red. Predominantly orange-red, with a blush of mauve and a few small spots near LIBERTY.

Nickel PR66. A butter-gold Premium Gem with powder-blue borders and minor carbon near the B in PLURIBUS.

Dime PR66. A razor-sharp specimen that displays light golden-brown freckles east of the fasces.

Quarter PR65. Light autumn-gold toning visits the margins. A well stuck Gem with a few trivial hairlines on the left obverse field.

Half dollar PR66. A well struck and undisturbed example. Light to moderate tan-brown toning encroaches from the borders. (Total: 5 coins)

4869 Five-Piece 1939 Proof Set, PR65-PR67 PCGS. CAC. The set is all PCGS-certified in modern individual holders with consecutive certification numbers. It includes:

Cent PR65 Red CAC. A glimmering copper-red Gem with unmarked fields. A lone speck appears above the date.

Nickel — Reverse of 1938 — PR66 CAC. A boldly struck proof with tints of ice-blue and champagne throughout.

Dime PR67 CAC. Delicate hints of light golden toning add warmth to this high-end proof, which shows full detail on each side.

Quarter PR66 CAC. Similar to the dime in sharpness and eye appeal, the quarter in this set shows slightly deeper, dusky tan-gold toning.

Half Dollar PR67 CAC. A fully struck coin with a hint of dusky champagne toning and exquisite eye appeal. (Total: 5 coins) NGC ID# 22L6, PCGS# 3344

4870 Five-Piece 1939 Proof Set PR66 to PR66+ NGC. Individually encapsulated in holders bearing certification numbers from the same third-party submission. The set includes:

Cent PR66 Red. A magnificent orange-red specimen with outstanding eye appeal. Minor carbon near the G in GOD.

Reverse of 1940 nickel PR66+. The flawless and fully struck surfaces exhibit hints of olive-green and straw-gold toning.

Dime PR66. Sharply struck and lightly toned save for dabs of iridescent color at the base of the fasces and below the N in UNUM.

Quarter PR66. A well struck and essentially brilliant Premium Gem. No detractors are evident across coruscating surfaces.

Half dollar PR66. Intricately impressed and close to brilliant. Carbon and contact are absent. (Total: 5 coins)

4871 Five-Piece 1940 Proof Set PR65 to PR67 NGC. The quintet is individually encapsulated in holders that have certification numbers from the same grading submission. The set includes:

Cent PR65 Red. A pristine orange-red Gem with a linear diagonal flan flaw (as made) on Lincoln's cheekbone.

Reverse of 1940 nickel PR66. A razor-sharp specimen with whispers of almond-gold and powder-blue toning.

Dime PR66. Glimpses of light golden-brown toning adorn this lustrous and fully struck Premium Gem.

Quarter PR67. An exquisite cream-gray Superb Gem with orange-gold toning across the obverse periphery.

Half dollar PR66. A virtually brilliant and essentially pristine example. Well struck and desirable. (Total: 5 coins)

4872 Five-Piece 1940 Proof Set PR65 to PR67 PCGS. The coins are individually certified in holders with consecutive certification numbers. The set includes:

Cent PR65 Red. The reverse is peach-gold while the obverse is orange-red with moderate toning above LIBERTY.

Nickel PR66. CAC. Intricately struck. Perfect aside from flecks near the 0 in the date and the U in TRUST.

Dime PR66. CAC. A flashy Premium Gem. Delicate lilac patina graces sharply struck and unblemished surfaces.

Quarter PR66. CAC. A lustrous and lovely specimen. Pastel tan toning emerges beneath a loupe. A few pinpoint flecks near DOLLAR.

Half dollar PR67. A well struck example with light lilac and tan toning. The monogram was hand-engraved on the die, usual for the proof issue. (Total: 5 coins)

4873 Five-Piece 1941 Proof Set PR65 to PR67 NGC. Individually encapsulated in holders bearing certification numbers from the same submission. The set includes:

Cent PR65 Red and Brown. Lemon-gold centers cede to orange-red margins.

Nickel PR66. Brilliant save for light ice-blue toning on the portrait. The strike is full and carbon is minimal.

Dime PR67. A razor-sharp Superb Gem, mostly brilliant except for a russet freckle near the D in UNITED.

Quarter PR66. Sharply struck and lightly toned with exceptional preservation.

Half dollar PR67. Splendid honey-gold, rose-red, and lime-green peripheral patina. The designer's monogram is faint but perceptible. (Total: 5 coins)

4874 Five-Piece 1941 Proof Set PR65 to PR67 PCGS. The quintet are separately housed in holders bearing consecutive serial numbers. The set includes:

Cent PR65 Red. CAC. A gorgeous orange-red Gem. Fully struck and exemplary for the designated grade.

Nickel PR66. CAC. A razor-sharp Premium Gem with only a hint of straw-gold and ice-blue patina.

Dime PR66. Lightly toned and well struck. A hair-thin vertical line on Liberty's neck.

Quarter PR66. CAC. Pastel wheat-gold freckles visit boldly struck and undisturbed surfaces.

Half dollar PR67. CAC. A sharply struck Superb Gem. Void of contact or carbon. Faint tan and olive-gold toning confirms the originality. (Total: 5 coins)

4875 Six-Piece 1942 Proof Set PR65 to PR67 NGC. All six coins are separately holdered and exhibit certification numbers from the same consignment. The set includes:

Cent PR65 Red and Brown. Cherry-red dominates the reverse and Lincoln's face. The obverse field and Lincoln's coat are mostly olive-gold.

Type One nickel PR67. Iridescent powder-blue, jade-green, and chestnut-gold toning.

Type Two nickel PR66. A straw-gold Premium Gem with hints of ice-blue on the reverse field.

Dime PR66. A lightly toned and pristine example struck from slightly rotated dies.

Quarter PR66. A nearly brilliant specimen whose sole imperfection is a pinpoint depression below the E in WE.

Half dollar PR66+. Faint lilac toning adorns the mirrored fields and fully impressed devices. (Total: 6 coins)

End of Session Four

SESSION FIVE

PATTERNS

1859 Indian Cent Pattern, MS64 Transitional Judd-228 Example

- 4876** 1859 Indian Cent, Judd-228, Pollock-272, R.1, MS64 PCGS. A transitional pattern that combines the issued 1859 Indian Head cent obverse with the Shield Reverse first issued for commerce in 1860. Struck in copper-nickel with a plain edge. Its inclusion in the *Guide Book* accounts, in part, for strong collector demand. This is a lovely tan-gold representative with an area of deeper amber-bronze color at the upper reverse. Minimally marked for the grade. NGC ID# 29C8, PCGS# 11932

1869 Standard Silver Ten Cents Judd-709, Silver, Gem Proof

- 4877** 1869 Standard Silver Ten Cents, Judd-709, Pollock-788, High R.6, PR65 NGC. This Standard Silver design variety has only one star at the front of Liberty's head on the obverse. The reverse has 10 CENTS in the center, crowded by a wreath of oak and laurel, with STANDARD SILVER 1869 around the margin. Struck in silver with a plain edge. Rich lilac-red toning is prevalent, though aquamarine freckles congregate near the rims. The strike shows minor blending on the leaves below CENTS. NGC ID# 29RP, PCGS# 60934

1870 William Barber Seated Half Dollar in Copper Judd-935, PR65 Brown

- 4878** 1870 Half Dollar, Judd-935, Pollock-1041, High R.6, PR65 Brown PCGS. A seated figure of Liberty faces left on the obverse with 13 stars surrounding. The date is below, a free-standing liberty pole is behind, and LIBERTY is inscribed on a scroll crossing a small shield. The reverse is the same type that was used to coin regular issue With Motto Seated halves. Struck in copper with a reeded edge. The fields are brightly reflective and highlight the jade-green centers and reddish peripheral toning seen on each side. Crisply defined, there are also no mentionable contact marks on either side. NGC ID# 29Y7, PCGS# 61181

1870 Standard Silver Half, PR63 Judd-988, Plain Edge, Silver

- 4879** 1870 Standard Silver Half Dollar, Judd-988, Pollock-1117, High R.7, PR63 PCGS. Ex: Simpson. The obverse features a bust of Liberty facing right. She wears a headband inscribed LIBERTY, which is decorated in the center with a star. Her hair is tied up in a bun. IN GOD WE TRUST is beneath within a scroll, UNITED STATES OF AMERICA is centered above her. The reverse exhibits a wreath of cotton and corn, with 50 CENTS crowded inside the wreath. STANDARD SILVER is centered above the wreath, and 1870 is beneath the wreath. Struck in silver with a plain edge. Iridescent powder-blue, pumpkin-orange, and mauve-red toning adorns this flashy and fully struck specimen. Delicate obverse field hairlines are strictly assessed by PCGS. Ex: Long Beach Signature (Heritage, 2/1990), lot 1799; Frank O. Fredericks Collection, Part III (Heritage, 1/2004), lot 8482; Tampa FUN Signature (Heritage, 1/2011), lot 6617; New York Signature (Heritage (12/2011), lot 4345; Rosemont Signature (Heritage, 8/2013), lot 4919; Central States Signature (Heritage, 4/2014), lot 6101. NGC ID# 29ZC, PCGS# 61234

**(1850-1866) Double Eagle Reverse Die Trial, AU50
Judd-Unlisted**

- 4880 (1850-1866) Type One Double Eagle, Reverse Die Trial, Copper AU50 NGC.** The regular issue reverse die of the Type One double eagle, uniface, struck in copper with a plain edge. A number of die trials for double eagles are recorded in the Pollock reference, in the Judd pattern book, and in Don Taxay's coinage encyclopedia. However, none of those listings match this piece. Likely unique and one of the highly important offerings from the Newman Collection. Unevenly struck on a copper planchet that weights 201.5 grains, with a specific gravity of about 9.0, this piece shows strong details above the horizontal axis and weak details below that reference line. The planchet is uneven and out of round, and the blank back of this piece has an extra arc line apparently from a planchet cutter, ruling out the possibility of a complete copper pattern with the back ground down.

Ex: Burdette G. Johnson; Eric P. Newman Numismatic Education Society.

GOLD DOLLARS

- 4881 1849 Open Wreath, D-4, Close Stars, MS64 PCGS.** A fully struck green-gold near-Gem. Both sides display only minor field grazes. The E in UNITED is repunched, and bold die cracks pass through UNITED STA. Not all examples of Dannreuther-4 share these interesting characteristics. NGC ID# 25B9, PCGS# 521671 Base PCGS# 7502
- 4882 1849 Open Wreath, D-4, Close Stars, MS64 PCGS.** Breen's thin date numerals variety. Hints of green overtones are present on the brilliant yellow surfaces of this frosty Choice Mint State first-year gold dollar. Trivial scattered marks limit the grade. PCGS has certified 73 finer examples of this issue (1/17). NGC ID# 25B9, PCGS# 521671 Base PCGS# 7502
- 4883 1849-D — Improperly Cleaned — NGC Details. AU. Variety 1-B.** The mintmark is centered. A bold die crack travels through the ribbons ends on the reverse of this Dahlonga gold dollar, one of 21,588 pieces struck in the denomination's first year. Sharply detailed, yellow-gold surfaces are not overly bright from the noted cleaning.

**1851 Gold Dollar, MS65
Excellent Type Coin**

- 4884 1851 MS65 PCGS.** The 1851 gold dollar claims a huge mintage of 3.3 million pieces, making it an available issue and a popular type coin. However, examples in MS65 condition are still very scarce in today's market. This impressive Gem offers well-detailed design elements, with a touch of the usual softness on the centers. The well-preserved orange-gold surfaces radiate vibrant mint luster with outstanding eye appeal. Population: 83 in 65 (2 in 65+), 46 finer (1/17). NGC ID# 25BK, PCGS# 7513

**1851-C Gold Dollar, MS61
Preferred Branch Mint Issue**

- 4885 1851-C MS61 NGC. Variety 1.** The mintage of more than 41,000 pieces makes the 1851-C a popular selection for type, since it is the only Charlotte gold dollar that is moderately available in Uncirculated condition. Mint-made die striations join light abrasions and minor marks with some slight surface porosity, but overall the surfaces display a pleasing greenish-gold color with satinlike reflectivity for nice eye appeal. The strike is bold at the centers. Census: 58 in 61, 60 finer (1/17). NGC ID# 25BL, PCGS# 7514
- 4886 1851-D XF40 PCGS. Variety 3-E.** Despite a mintage of less than 10,000 pieces, two die marriages are confirmed for the 1851-D. The differences are subtle, such as the date position slightly further right for Variety 3-E. The present butter-gold Dahlonga representative is without any noticeable marks. Wear is concentrated on Liberty's forehead curls. NGC ID# 25BM, PCGS# 7515

1851-D Gold Dollar, AU55
Popular D-Mint Type Coin

- 4887 1851-D AU55 PCGS. Variety 3-E.** The 1851-D gold dollar claims a mintage of 9,882 pieces and the issue is one of the more available dates in the Dahlonega series, making it a popular choice of branch mint type collectors. This attractive Choice AU specimen offers lightly worn, well-detailed design elements and lightly abraded, lustrous orange-gold surfaces. Housed in a green label holder. Population: 23 in 55, 52 finer (1/17). NGC ID# 25BM, PCGS# 7515

1853 Gold Dollar, MS65
An Available Type One for Type Purposes

- 4888 1853 MS65 PCGS.** The mintage of 4 million 1853 gold dollars assures availability of this issue in all grades up to and including Gem. The fields show evidence of striations but little brightness resulted, the striations were probably done to eliminate die cracks or other Mint-made imperfections. The strike is complete throughout. A few stray marks on the reverse are all that prevent an even higher grade. NGC ID# 25BU, PCGS# 7521

1853-D Gold Dollar, AU58
Smooth and Semiprooflike

- 4889 1853-D AU58 NGC. Variety 5-G.** A semiprooflike example with radiant and smooth honey-gold surfaces. The strike is sharp for the Dahlonega facility, especially on Liberty's hair. A vast majority of 1853-D gold dollars exhibit normal coin turn, but a few, such as the present piece, were struck from widely rotated dies. They were likely among the first struck for the issue, since prominent die lines are apparent on both sides, such as below Liberty's chin. The coiner apparently soon noticed the error, stopped the press, and secured the loose die. NGC ID# 25BW, PCGS# 7523

1853-O Gold Dollar, MS64

- 4890 1853-O MS64 NGC. Variety 1.** Type One gold dollars were struck in great quantities at Philadelphia, to replace hoarded Seated silver. But mintages at New Orleans were much lower, and never exceeded 290,000 pieces. This well struck apricot-gold Choice example displays vibrant cartwheel luster. Marks are limited to a few wispy field lines above the hairbun. NGC ID# 25BX, PCGS# 7524

- 4891 1855 Type Two MS62 PCGS.** An attractive MS62 representative of the short-lived Type Two design, with well-detailed design elements and some dramatic clash marks on the reverse. The lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 25C4, PCGS# 7532

1858-D Gold Dollar, AU55
Difficult Dahlonega Issue

- 4892 1858-D AU55 NGC. Variety 10-M.** Another rare Dahlonega issue, since just 3,477 pieces were produced. A radiant sun-gold Choice AU representative with minimal actual wear. The clashed surfaces lack relevant marks, but show incompleteness of strike on Liberty's curls, the date, and the U in UNITED. Dahlonega struck gold dollars each year between the introduction of the denomination and the advent of the Civil War. Nonetheless, annual mintages never exceeded four figures. NGC ID# 25CJ, PCGS# 7549

- 4893 1860 MS64 PCGS.** Most Uncirculated examples of the 1860 gold dollar are in lower grades. This is a conditionally scarce Choice example, and finer pieces are rare. The strike is sharp, and warm peach-gold surfaces offer hints of pale rose on each side. Population: 19 in 64, 10 finer (1/17). NGC ID# 25CR, PCGS# 7555

- 4894 1870 MS63 PCGS.** This Select 1870 gold dollar is among only 6,335 such coins struck that year. Survivors are very scarce in MS63 and rare in higher grades. Pale golden color adorns partly reflective surfaces that retain substantial luster. The strike is razor-sharp. NGC ID# 25D6, PCGS# 7569

- 4895 1884 MS65 NGC.** A fully struck Gem Type Three gold dollar with satiny orange-gold luster that yields tinges of rose-gold in the centers. Eye appeal is outstanding. Census: 22 in 65, 32 finer (1/17). NGC ID# 25DN, PCGS# 7585

- 4896 1887 MS66 PCGS.** This is a boldly struck Premium Gem type coin with satiny peach-gold and rose luster. A few tiny ticks are not out of line for the grade. Finer examples are scarce. Population: 71 in 66 (2 in 66+), 32 finer (1/17). NGC ID# 25DS, PCGS# 7588

1888 Gold Dollar, MS67
Lustrous, Subtle Color

4897 1888 MS67 PCGS. The reverse exhibits a slight counter-clockwise rotation on this Premium Gem representative. Rich yellow-gold color, with hints of peach and green, along with matte luster provide this piece with a pleasing appearance. A tiny alloy spot is present near the bridge of Liberty's nose. Population: 57 in 67 (5 in 67+), 5 finer (1/17). NGC ID# 25DT, PCGS# 7589

4898 1889 MS67 PCGS. A Superb Gem example represents the final year of issue for the regular-issue gold dollars. This piece exhibits a bold strike and brilliant yellow luster with hints of rose overtones. PCGS has only certified nine finer pieces (1/17). NGC ID# 25DU, PCGS# 7590

4899 1889 MS67 PCGS. This is a well-struck, frosty Superb Gem with delicate rose-gold patina and no distracting abrasions. The 1889 gold dollar is available in this grade, but PCGS reports only nine numerically finer representatives (1/17). NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

4900 1834 AU58 PCGS. Breen-6140, Variety 4, R.3. A predominantly yellow-gold first-year Classic quarter eagle. The obverse border displays rose-red toning. The strike is good, and no marks are consequential. The moderately scarce Variety 4 has a repunched star 2 and a missing diagonal within the M in AMERICA. NGC ID# 25FS, PCGS# 7692

1836 Two and a Half, MS60
Script 8, Variety 11

4901 1836 Script 8 MS60 PCGS. Breen-6143, Variety 11, R.2. A satiny and lightly marked green-gold Classic type coin. The centers show blending of impression, but peripheral elements are sharp. As usual for Variety 11, A radial die crack passes through star 6 and the portrait, and Liberty's curls near her shoulder are incomplete due to polishing of the obverse die at the Mint. NGC ID# 25FU, PCGS# 7694

LIBERTY QUARTER EAGLES

1840-C Two and a Half, AU50
Low-Mintage Early Charlotte Issue

4902 1840-C AU50 NGC. The first Charlotte Liberty two and a half issue has a stingy mintage of 12,822 pieces. The present charming example offers many pockets of lemon-gold luster. The fields display hints of peach patina. Strike-throughs (as coined) are noted below the eagle's beak and near Liberty's chin and neck, but post-strike contact is only incidental.

Ex: Dallas Signature (Heritage, 10/2012), lot 5536, which realized \$3,290. NGC ID# 25GB, PCGS# 7718

4903 1840-D — Improperly Cleaned — NGC Details. XF. Variety 1-A. An early Dahlonega issue with a meager mintage of 3,532 pieces. The present olive-gold example has a slightly glossy appearance but would please many Southern gold collectors. Minor marks are noted on the upper reverse field. Both sides exhibit prominent bisecting die cracks.

4904 1842-O AU53 NGC. Variety 1. Just a single die marriage is known. A lemon-gold representative of this low mintage New Orleans issue. The strike is typical, but the surfaces are only lightly abraded. From a mintage of 19,800 coins. Census: 14 in 53, 59 finer (1/17). NGC ID# 25GK, PCGS# 7726

4905 1843-O Large Date, Plain 4 AU53 NGC. Variety 1. Second rarest O-mint quarter eagle. Only 75-85 pieces are believed known today out the original mintage of 76,000 examples — indicating a very high attrition rate. This pale yellow-gold piece shows a faint accent of reddish patina. Even high-point friction and numerous small abrasions explain the grade. NGC ID# 25GS, PCGS# 7732

1843-O Two and a Half, AU55
Large Date, Plain 4

4906 1843-O Large Date, Plain 4 AU55 NGC. Variety 1. The very scarce *Guide Book* variety with a large date and a clearly repunched mintmark. Well struck except for the BER in LIBERTY. The sun-gold surfaces are luminous and surprisingly unabraded, save for a minor obverse rim tick at 7 o'clock.

Ex: Long Beach Signature (Heritage, 2/2012), lot 4634, which realized \$1,955. NGC ID# 25GS, PCGS# 7732

4907 1844-D — Cleaning — Genuine PCGS. XF Details. Variety 5-J. The mintmark is lower and tilts right, compared with the other known '44-D die marriage, Variety 5-I. The same obverse die likely struck all 17,332 pieces. This caramel-gold quarter eagle is well struck for a Dahlonega product, but patient rotation reveals parallel hairlines.

**1844-D Two and a Half, AU55
Lustrous Borders**

4908 1844-D AU55 NGC. Variety 5-I. The margins display substantial luster, and incompleteness on the eagle's neck feathers is principally due to the strike. The straw-gold surfaces are boldly clashed on both sides, but apparent abrasions are confined to a small field tick above the arrowheads. A relatively early Dahlonega issue with a meager mintage of 17,332 pieces. NGC ID# 25GV, PCGS# 7736

4909 1845 MS62 PCGS. CAC. This Mint State coin is well-struck save for on the eagle's left (facing) leg, and the lustrous green-gold surfaces exhibit only minor abrasions. The reverse is cracked through both wings and the neck to the rim, with another break traveling down through the D in the denomination. The 1845 quarter eagle is rarely seen this fine. Population: 14 in 62, 14 finer. CAC: 5 in 62, 3 finer (1/17). NGC ID# 25GW, PCGS# 7737

4910 1847-O AU55 PCGS. Variety 6. Considerable luster remains on this lemon-yellow Choice AU New Orleans quarter eagle. Relatively few high grade pieces survive from the 124,000 coin mintage. Population: 16 in 55, 37 finer (1/17). NGC ID# 25H8, PCGS# 7747

4911 1847-O AU55 NGC. Variety 2. The tail die is in an advanced state of deterioration, with all design elements fuzzy, and with a heavy die crack throughout the lower dentils. The obverse is sharper, with the date position clear. Bright yellow-gold patina shows hints of luster in the fields. Census: 55 in 55 (1 in 55+★), 78 finer (1/17). NGC ID# 25H8, PCGS# 7747

4912 1849-C VF35 PCGS Secure. Variety 1. The only known dies for the issue, represented here by a pleasing light yellow example that retains traces of luster. The surfaces exhibit the usual scattered marks expected for the grade. NGC ID# 7HRT, PCGS# 7753

4913 1850-D XF45 NGC. Variety 14-N. A recently discovered variety and much rarer than the other 1850-D quarter eagle variety. This piece was lightly cleaned long ago, and has since regained much of its former originality. NGC ID# 25HJ, PCGS# 7757

4914 1850-O AU58 PCGS. Variety 1. An apricot-gold example. Luster illuminates the margins and motifs. Abrasions are minor overall, though we note a thin line on the cheek. A scarce New Orleans issue with a mintage of only 84,000 pieces. The "mintmark right" die variety with the mintmark closer to the branch stem than the claw. NGC ID# 25HK, PCGS# 7758

4915 1851 MS62 PCGS. Peach-gold surfaces with glints of lime-green yield soft luster and sharply struck design elements. Minute contact marks are noted on Liberty's cheek and neck, and in the left obverse and upper reverse fields.
Ex: Central States Signature (Heritage, 4/2006), lot 2381. NGC ID# 25HL, PCGS# 7759

4916 1851-D — Cleaning — PCGS Genuine. AU Details. Variety 15-N. The 1851-D quarter eagle is a scarce issue in all grades and conditions, from a mintage of 11,264 pieces. This lightly abraded reddish-gold example shows just a touch of actual wear on the well-detailed devices and the luster is slightly dimmed by the noted toning.

**1851-O Liberty Quarter Eagle, AU58+
Repunched Date**

4917 1851-O AU58+ PCGS. CAC. Variety 1. The 1851-O Liberty quarter eagle claims a substantial mintage of 148,000 pieces, but the issue is more difficult to locate than that high production total suggests. This Plus-graded near-Mint specimen offers well-detailed design elements with just a trace of high-point wear and a repunched date. The lightly abraded orange-gold surfaces retain traces of original mint luster in sheltered areas. Population: 17 in 58 (2 in 58+), 22 finer. CAC: 16 in 58, 5 finer (12/16). NGC ID# 25HP, PCGS# 7762

**1852-C Quarter Eagle, AU53
Original Color, Scarce in All Grades**

4918 1852-C AU53 PCGS. Variety 1. The small mintage of 9,772 pieces ranks seventh out of the 20 Charlotte quarter eagle issues, with an estimated survivorship of 115 to 165 pieces in all grades. No additional quarter eagles were struck at the Charlotte Mint in 1853, and only small mintages were produced over the next several years until no more quarter eagles were struck after 1860. This is a natural deep green-gold example with a comparatively sharp strike and faint orange accents. The obverse is bold, with customary weakness on the reverse at the eagle's neck and leg plumage. Population: 10 in 53, 31 finer (1/17). NGC ID# 25HS, PCGS# 7764

4919 1852-O AU55 PCGS. CAC. Variety 2. The donut-shaped mintmark is oversized and has high relief. Apparently, a reverse die arrived at New Orleans without a mintmark, which was then entered by hand on the working reverse die, similar to the 1854-O Huge O quarter. A nicely struck and lightly abraded caramel-gold Choice AU quarter eagle. CAC: 7 in 55, 19 finer (12/16). NGC ID# 7HX8, PCGS# 7766

**1854-D Quarter Eagle, AU Details
Rare, Low-Mintage Issue**

- 4920 1854-D — Scratch — Genuine PCGS. AU Details. Variety 18-N.** The 1854-D Liberty quarter eagle is an elusive issue, from a low mintage of 1,760 pieces. The design elements show the typical strike for this issue, with some softness on the hair at the brow and the eagle's legs, but only light wear is evident. The orange-gold surfaces are lightly abraded, aside from a faint, X-shaped scratch in the upper reverse field. Housed in a new 30th Anniversary holder.

**1856 Quarter Eagle, MS64+
Glittering Lemon-Gold Surfaces**

- 4921 1856 MS64+ PCGS. CAC.** The Mint struck 384,240 quarter eagles in 1856, yet Choice Uncirculated coins are conditionally rare. This lemon-gold MS64+ example is the only piece so-graded at PCGS. Each side presents glittering luster that illuminates nearly fully struck relief elements. Population: 18 in 64 (1 in 64+), 10 finer. CAC: 5 in 64, 3 finer (1/17). NGC ID# 25J7, PCGS# 7777

**1858-C Quarter Eagle, AU55
Available Issue From the 1850s**

- 4922 1858-C AU55 NGC. Variety 1.** Even though only 9,056 pieces were struck, the 1858-C is the most frequently encountered Charlotte quarter eagle from the decade of the 1850s. Doug Winter believes a small hoard was released sometime in the 1980s, thus accounting for the increased availability. The surfaces on this example are more yellow-gold in color with traces of mint luster remaining. The “deep, distracting marks” mentioned by Doug are evident on this piece. The most obvious are three parallel diagonal depressions on the reverse of unknown origin. NGC ID# 25JH, PCGS# 7787

- 4923 1859-S AU53 NGC.** The mintage of 15,200 pieces likely entered circulation almost immediately in the hard-money starved West. This coin saw only minimal circulation. The recognizable light-gold color typifies California gold bullion, while abrasions are small and a trace of luster remains. NGC ID# 25JN, PCGS# 7790

- 4924 1859-S AU55 PCGS.** This is a sharp Choice AU example of this scarce San Francisco issue, showing satiny surfaces with rich orange-gold patina. There are no major abrasions. Population: 9 in 55, 24 finer (1/17). NGC ID# 25JN, PCGS# 7790

- 4925 1860 Old Reverse, Type One, AU53 PCGS.** Light yellow surfaces retain traces of luster on this old-style Liberty quarter eagles. The hubs were redesigned Type One examples having short arrows and Type Two having longer arrows. Population: 5 in 53, 24 finer (1/17). NGC ID# 25JR, PCGS# 97791

- 4926 1860 New Reverse, Type Two, MS62 PCGS.** Thinner arrowheads identify the Type Two Reverse. This Mint State 1860 quarter eagle displays frosty orange-gold luster with surprisingly few abrasions and good eye appeal for the grade. Only a few faint lines in the fields appear to prevent a finer numeric assignment. Population: 14 in 62, 26 finer (1/17). NGC ID# 25JS, PCGS# 7791

**1861 Quarter Eagle, MS64
Type Two Reverse, Pinpoint Strike**

- 4927 1861 New Reverse, Type Two, MS64 PCGS.** Smaller arrowheads and a wider space between the claw and fletchings identify the Type Two Reverse. Frosty luster, rose-gold coloration, and a pinpoint impression are attributes of this phenomenal Choice Uncirculated quarter eagle. A lint mark appears on the tip of Liberty's bust. NGC ID# 25JX, PCGS# 7794

**1861-S Quarter Eagle, AU55
Challenging San Francisco Issue**

- 4928 1861-S AU55 NGC.** The 1861-S quarter eagle claims only about 85 survivors in all grades, making this Choice About Uncirculated example a largely unrecognized condition rarity. Mint luster remains strong across both sides, while the strike is sharp except on the eagle, which always comes weak for the issue. Just 24,000 pieces were struck, and virtually all succumbed to rigorous circulation in the Old West. Census: 12 in 55, 27 finer (12/16). NGC ID# 25JY, PCGS# 7795

**1862 Liberty Quarter Eagle, MS61
Seldom Seen Any Finer**

- 4929 1862 MS61 NGC.** Gold coins of the Civil War era were widely hoarded and melted, resulting in small mintages and low survival rates for most issues of this period. Accordingly, the 1862 Liberty quarter eagle is an elusive issue in all Mint State grades. This well-detailed MS61 example exhibits lustrous orange-gold surfaces with the minimum number of minor contact marks for the grade. Census: 31 in 61, 19 finer (1/17). NGC ID# 25JZ, PCGS# 7796

**1863-S Quarter Eagle, AU50
Very Scarce, Low-Mintage Issue**

- 4930 1863-S AU50 NGC.** The 1863-S Liberty quarter eagle claims a paltry mintage of 10,800 pieces, and probably no more than 70-80 examples survive today in all grades. This pleasing AU specimen shows a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. Census: 5 in 50, 35 finer (1/17). NGC ID# 25K3, PCGS# 7799

- 4931 1865-S AU55 NGC.** The design elements of this pleasing Choice AU specimen are well-struck, with a touch of the usual softness on the eagle's legs and claws, but only light wear is evident. The orange-gold surfaces are lightly abraded and retain traces of original mint luster. Census: 12 in 55, 20 finer (12/16). NGC ID# 25K6, PCGS# 7802

- 4932 1868-S AU58 NGC.** The 1868-S quarter eagle is scarce in high grade and rare at the Mint State level. This near-Mint coin displays a bold strike with satiny fields. Delicate mint-green and rose obverse hues contrast with deep orange-gold reverse toning. Census: 82 in 58 (1 in 58+), 17 finer (1/17). NGC ID# 25KC, PCGS# 7808

- 4933 1872-S AU58 PCGS.** Coming from a mostly lost mintage of 18,000 pieces, the 1872-S quarter eagle is scarce in AU condition and rare in Mint State. This piece displays moderately lustrous fields with satiny bronze-gold color. The central devices are incompletely struck, as is sometimes seen on this issue. Population: 15 in 58, 9 finer (1/17). NGC ID# 25KL, PCGS# 7816

**1873-S Quarter Eagle, Bold MS62
Far Finer Than the Typical Survivor**

- 4934 1873-S MS62 PCGS.** Perhaps 225 to 300 example survive from a small mintage of 27,000 1873-S quarter eagles. The typical representative at the leading grading services falls just shy of AU50. This Uncirculated two and a half is more than 13 grade points higher, and anything finer than this is extremely rare. Luminous luster emanates from surfaces that show blended yellow and rose-gold hues, strongly struck design elements, and minimal marks. Population: 11 in 62, 6 finer (1/17). NGC ID# 25KP, PCGS# 7820

- 4935 1878 MS64+ PCGS.** A sharp, frosty example with rich orange-gold coloration and no major abrasions. The 1878 quarter eagle is collectible in this grade but seldom encountered finer. The Plus designation adds to the appeal. NGC ID# 25KY, PCGS# 7828

- 4936 1878 MS65 PCGS.** This delightful Gem Liberty quarter eagle is fully lustrous with lovely peach-gold surfaces. The strike is a trifle weak as usual over Liberty's forehead and at the eagle's left leg. Population: 47 in 65 (2 in 65+), 11 finer (1/17). NGC ID# 25KY, PCGS# 7828

- 4937 1878 MS65 PCGS.** Wisps of rose overtones grace the brilliant and highly lustrous yellow-gold surfaces of this lovely Gem 1878 quarter eagle. Population: 47 in 65 (2 in 65+), 11 finer (1/17). NGC ID# 25KY, PCGS# 7828

- 4938 1878 MS65+ PCGS.** Frosty rose-gold luster shows warmer orange hues near the borders. This well-preserved Gem offers excellent eye appeal despite minor strike weakness on the central shield of the reverse. The 1878 is scarce in this condition and rare finer. Population: 47 in 65 (2 in 65+), 11 finer (1/17). NGC ID# 25KY, PCGS# 7828

**1878 Quarter Eagle, MS66
Elegant Visual Appeal**

- 4939 1878 MS66 NGC.** The 1878 is difficult to locate in the better grades of Mint State. Indeed, NGC and PCGS have certified only 16 MS66 pieces, and five coins finer. The Premium Gem offered here displays lustrous orange-gold surfaces with complementary rose shadings. The design elements are sharply impressed throughout, and there are no mentionable abrasions to report. Census: 7 in 66, 3 finer (1/17). NGC ID# 25KY, PCGS# 7828

- 4940 1879-S MS60 NGC.** The lemon-yellow surfaces of this impressive Mint State specimen are lightly marked for the grade and retain much of their original mint luster. The design elements are sharply detailed throughout. Census: 3 in 60, 16 finer (12/16). NGC ID# 25L3, PCGS# 7831

- 4941 1884 MS61 NGC.** Semireflective fields complement sharp design elements on this Mint State 1884 quarter eagle. The issue is seldom offered in Uncirculated condition, coming from a mintage of only 1,950 coins, and low-end Mint State coins rarely possess the visual appeal of the present. This example offers warm orange-gold color and has minimal abrasions. Census: 36 in 61, 30 finer (1/17). NGC ID# 25L8, PCGS# 7836

**1884 Liberty Quarter Eagle, MS62 Prooflike
Rare With Designated Reflectivity**

- 4942 1884 MS62 Prooflike NGC.** It has been eight years since we last offered a Prooflike 1884 quarter eagle, a format that is seldom offered at auction and exists to the extent of just four pieces with designated Prooflike surfaces. The tiny mintage of just 1,950 circulation strikes suggests more prooflike coins might survive, yet the population has not changed for many years. This rich-gold example is distinctly reflective and sharply struck on the frosted motifs with a few light lines visible on the mirrored fields. Census: 1 in 62 Prooflike, 3 finer (1/17). NGC ID# 25L8, PCGS# 77836

**1887 Two and a Half, MS64
Extremely Low Mintage of 6,160 Coins**

- 4943 1887 MS64 PCGS.** Some crumbling appears in the dentilation on the left side of the reverse. A curving, U-shaped strike-through occurs at Liberty's jawline, with light marks nearby. The reverse is well-preserved, and both sides show a good strike. The 1887 quarter eagle saw an extremely low mintage of 6,160 circulation strikes at a time when few gold coins of any denomination were struck in Philadelphia. Population: 20 in 64, 2 finer (1/17). NGC ID# 25LB, PCGS# 7839

- 4944 1888 MS64 PCGS.** Shimmering yellow-gold luster gives this near-Gem 1888 quarter eagle excellent visual appeal. The strike is a trifle soft on the vertical shield lines, but well-executed elsewhere. There are no major abrasions. Population: 61 in 64 (2 in 64+), 32 finer (1/17). NGC ID# 25LC, PCGS# 7840

**1888 Quarter Eagle, MS65
Vibrant Luster, Nice Color**

- 4945 1888 MS65 PCGS.** The mintage of 16,001 Liberty quarter eagles represented a significant increase in production at the Philadelphia Mint in 1888, but the issue is still rare at the MS65 grade level. This spectacular Gem displays impeccably preserved orange-gold surfaces, with razor-sharp definition on all design elements and vibrant mint luster throughout. Population: 28 in 65 (3 in 65+), 6 finer (12/16). NGC ID# 25LC, PCGS# 7840

**1888 Liberty Quarter Eagle, MS65
Well-Preserved, Satiny Surfaces**

- 4946 1888 MS65 NGC.** According to Mint records, 16,001 Liberty quarter eagles were struck at the Philadelphia Mint in 1888, a small total in absolute terms, but actually quite generous in the context of the series. This attractive Gem displays well-preserved peach-gold surfaces, with vibrant satiny mint luster and sharply detailed design elements. Eye appeal is terrific. Census: 29 in 65 (3 in 65+), 6 finer (12/16). NGC ID# 25LC, PCGS# 7840

- 4947 1892 MS63 PCGS.** This Select example boasts a sharp strike and vivid tangerine-gold patina. Scattered hairlines on the obverse determine the grade as there are no individually significant abrasions. Finer 1892 quarter eagles are rare. Population: 28 in 63, 33 finer (1/17). NGC ID# 25LG, PCGS# 7844

**1893 Two and a Half, MS66
Bright Luster, Frosted Surfaces**

- 4948 1893 MS66 NGC. CAC.** Scarce in high Mint State grades and seldom offered with CAC endorsement, the 1893 quarter eagles were struck in a year of economic turmoil. The Panic of '93 saw many gold coins exported to Europe, where demand for gold was strong. The 1893 mintage of quarter eagles was 30,000 pieces — a large increase over previous years — yet Gem or finer examples are seen less frequently than the surrounding lower mintage issues. This Premium Gem is frosty and lustrous with a greenish-gold coloration, sharply struck, without any copper stains that often accompany the issue. Census: 30 in 66 (1 in 66+), 4 finer. CAC: 10 in 66, 1 finer (12/16). NGC ID# 25LH, PCGS# 7845

**1893 Quarter Eagle, MS66+
Captivating Color, Frosty Luster**

- 4949 1893 MS66+ PCGS. CAC.** A production increase of 1,400% from 2,000 coins in 1892 to 30,000 coins in 1893 explains the availability of the 1893 quarter eagle through MS64. However, representatives become very scarce in MS65 and conditionally rare at the Premium Gem level. Sun-gold marginal elements meld with rose-gold centers. A thick layer of frost covers each exceptionally preserved side. Lovely eye appeal. Population: 32 in 66 (2 in 66+), 2 finer. CAC: 11 in 66, 1 finer (1/17). NGC ID# 25LH, PCGS# 7845
- 4950 1894 MS63 PCGS.** The strike is strong throughout, but especially on the peripheral elements. Each side is thickly frosted with yellow-gold as the dominant color, complemented by accents of rose. Minimally marked without any singular impairments. Population: 34 in 63, 50 finer (12/16). NGC ID# 25LJ, PCGS# 7846
- 4951 1895 MS64 PCGS.** A collectible date in this and lower grades, the 1895 quarter eagle is scarce any finer. This Choice example displays a bold strike and satiny wheat-gold luster. A few light marks define the grade. Population: 36 in 64, 29 finer (1/17). NGC ID# 25LK, PCGS# 7847

**1896 Liberty Quarter Eagle, MS66
Sharply Struck and Lustrous**

- 4952 1896 MS66 PCGS.** Only 19,000 Liberty quarter eagles were struck at the Philadelphia Mint in 1896, but a number of high-quality specimens were saved by contemporary collectors, like the present coin. This delightful Premium Gem exhibits sharply detailed design elements and virtually pristine peach-gold surfaces, with vibrant mint luster throughout. Population: 36 in 66 (3 in 66+), 7 finer (12/16). NGC ID# 25LL, PCGS# 7848
- 4953 1899 MS66 PCGS.** An outstanding example, this Liberty quarter eagle has frosty yellow mint luster with pristine surfaces. A lovely Premium Gem for the connoisseur, displaying a few small reverse copper and blue toning spots that attest to its originality. Population: 27 in 66 (4 in 66+), 7 finer (1/17). NGC ID# 25LP, PCGS# 7851
- 4954 1902 MS66 PCGS. CAC.** A sharp strike characterizes the motifs, while the fields display frosty, original luster in rich orange-gold hues. A few faint little coppery alloy spots seen beneath a loupe attest to the originality of the surfaces. Elusive in finer grades. NGC ID# 25LT, PCGS# 7854
- 4955 1903 MS66 PCGS.** The 1903 quarter eagle was struck to the extent of 201,060 coins. Premium Gems are accessible and appropriate for type purposes, while finer examples are very scarce. This crisp, butter-gold example displays a couple of coppery alloy spots and scintillating luster. NGC ID# 2688, PCGS# 7855
- 4956 1903 MS66+ NGC.** The outer areas feature deep yellow-gold hues, while the interiors display a rich shade of sun-gold with an alloy spot above the eagle's head. This high-quality Premium Gem quarter eagle is fully struck and readily appealing. NGC ID# 2688, PCGS# 7855
- 4957 1904 MS66 NGC.** There are virtually no marks to be found on either side of this magnificent Liberty quarter eagle. A complete impression, vibrant luster, and medium yellow-gold coloration round out the eye appeal. Tiny alloy spots appear intermittently. NGC ID# 25LV, PCGS# 7856
- 4958 1904 MS66 PCGS.** This 20th century Liberty Head type coin displays frosty orange-gold luster and boldly rendered design elements. There are no bothersome abrasions, and eye appeal excels. Finer 1904 quarter eagles are infrequently seen. NGC ID# 25LV, PCGS# 7856
- 4959 1905 MS66 PCGS.** One would be hard-pressed to locate any noticeable imperfections throughout this gorgeous MS66 quarter eagle, save for a fleck above the eagle's head. The lustrous, yellow-gold surfaces are smooth and fully defined. From a mintage of 217,800 pieces. NGC ID# 267S, PCGS# 7857
- 4960 1905 MS66 PCGS.** A boldly defined and frosty Premium Gem, this 1905 Liberty quarter eagle exhibits brilliant mint luster on both sides. An outstanding representative for an advanced date or gold type set. NGC ID# 267S, PCGS# 7857
- 4961 1905 MS66+ PCGS. CAC.** This Plus-graded Premium Gem exhibits razor-sharp definition on all design elements and the impeccably preserved orange-gold surfaces radiate vibrant, satiny mint luster on both sides. Eye appeal is terrific. NGC ID# 267S, PCGS# 7857

**1905 Quarter Eagle, MS67+
Vivid Gold Luster**

- 4962 1905 MS67+ PCGS.** A spectacular type coin, aglow in luminous sun-gold luster that rolls over each side in frosty shimmers. The strike is fully executed. Occasional lilac and coppery hues attest to the originality of the surfaces. A tiny planchet lamination near star 3 should not be mistaken for an abrasion, as there are essentially no marks or abrasions detectable. Only four coins are finer at PCGS. Population: 8 in 67+, 4 finer (1/17). NGC ID# 267S, PCGS# 7857

**1906 Quarter Eagle, MS67
High-Grade Gold Type Coin**

- 4963 1906 MS67 PCGS.** Frosty mint luster coruscates across the attractive and essentially mark-free surfaces of this exceptional Superb Gem. A razor-sharp strike joins the list of accolades. Vibrant sun-gold base toning shows radiant, reddish-gold accents around the portrait for remarkable eye appeal. Population: 66 in 67 (4 in 67+), 2 finer (9/16). NGC ID# 7JW8, PCGS# 7858

**1906 Liberty Quarter Eagle, MS67
Only Two Finer Coins at PCGS**

- 4964 1906 MS67 PCGS.** With a reported mintage of 176,330 pieces, the 1906 Liberty quarter eagle is easily located in all grades up through MS66, but MS67 examples are very scarce, and finer coins are prime condition rarities. This spectacular Superb Gem offers sharply detailed design elements and impeccably preserved apricot-gold surfaces, with vibrant satiny mint luster. Population: 71 in 67 (5 in 67+), 2 finer (1/17). NGC ID# 7JW8, PCGS# 7858

PROOF LIBERTY QUARTER EAGLES

- 4965 1902 PR58 PCGS.** An affordable proof example for a budget-based type or date set. This piece retains significant mirroring in the fields with sharply detailed devices. Faint hairlines and trivial rim nicks are evident, with a few small spots of verdigris. NGC ID# 288S, PCGS# 7928

**1904 Quarter Eagle, Low-Mintage PR62
Just 170 Pieces Struck**

- 4966 1904 PR62 PCGS.** Just 170 quarter eagle proofs were produced in 1904, a number slightly less than the usual gold proof mintages of the decade, but a truly tiny number in the context of most 20th and 21st century proof production now available to collectors. This example displays attractive medium-gold color and deeply mirrored surfaces tempered by cloudiness in the fields surrounding the central devices, the result of scattered microscopic lines and tiny marks. Still, an attractive, fully struck proof with light frost on the crisp devices. Population: 9 in 62, 47 finer (1/17). NGC ID# 288U, PCGS# 7930

INDIAN QUARTER EAGLES

- 4967 1908 MS65 NGC.** An impressive Gem from the first year of the innovative incuse Indian design, this coin exhibits well-detailed design elements, with just a touch of softness on the eagle's shoulder. The vivid orange-gold surfaces are impeccably preserved and vibrant mint luster adds to the outstanding eye appeal. NGC ID# 288Y, PCGS# 7939
- 4968 1908 MS65 PCGS.** Designated a Gem by PCGS, and at least that fine when viewed beneath a loupe. This satiny 1908 Indian quarter eagle displays soft yellow-gold luster and excellent eye appeal. The ideal first-year type coin. NGC ID# 288Y, PCGS# 7939
- 4969 1909 MS64 PCGS.** A brilliant Choice Mint State example, this Indian quarter eagle is quite attractive despite slight strike weakness on a few of the obverse feathers. Faint hairlines at the upper obverse limit the grade. NGC ID# 288Z, PCGS# 7940
- 4970 1909 MS64 PCGS. CAC.** The vivid orange-gold surfaces of this attractive Choice specimen show only minor signs of contact, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is terrific. From a mintage of 441,700 pieces. NGC ID# 288Z, PCGS# 7940
- 4971 1910 MS64 PCGS. CAC.** This is a well-struck Indian Head type coin with frosty wheat-gold luster that shows hints of deeper orange and greenish color when rotated beneath a light. There are no mentionable abrasions, as only a few light lines in the fields prevent a Gem designation. NGC ID# 2892, PCGS# 7941

**1911-D Quarter Eagle, AU55
Very Weak Mintmark**

- 4972 1911-D Weak D AU55 NGC.** Bright yellow-gold color with slight, even wear over each side. With the physical description out of the way, on to what everyone will want to know: Where is the D? It actually is there, but this is admittedly the faintest D we have seen. A strong magnifier will be needed. The D is tilted. It is roughly defined by two very shallow marks at top and bottom. Now angle the coin slightly toward you so much of the reverse is in shadows. The tilted D should appear when there is very little light left in that area. See it? If not, the obverse does show the diagnostic wire rim around the right margin, and on this piece it is unusually wide. A coin not for the faint of heart, but it really is a 1911-D. **Note:** The enlargement took two weeks of on-off-again frustration by our photographer (Thanks, Travis). The D has had some black added to the image to show its location. It will **NOT** look like this in-person. NGC ID# 2895, PCGS# 7954

- 4973 1911-D — Damage — PCGS Genuine. AU Details.** Strong D. The mintmark is clear despite faint circular scrapes that surround portions of the outer peripheries. Unnaturally glossy surfaces are evidence of cleaning. This yellow-gold key-date quarter eagle will appeal to the budget-conscious collector, as substantial detail remains on the devices.

- 4974 1911-D — Scratched — ANACS. AU Details.** Although a number of small scratches appear on both sides of this lightly cleaned yellow-gold quarter eagle, the reverse exhibits an unusually bold mintmark, an important consideration for this key issue.

**1911-D Quarter Eagle, AU53
Important Strong D example**

- 4975 1911-D AU53 PCGS.** Strong D. Only 55,680 Indian quarter eagles were struck at the Denver Mint in 1911, the lowest business-strike mintage of the series. The design elements of this impressive AU53 example were strongly impressed, with a bold mintmark, and only a touch of actual wear is evident on the pleasing lemon-yellow surfaces. Much original mint luster remains intact. NGC ID# 7KR7, PCGS# 7943

1912 Quarter Eagle, CAC-Approved MS64+

- 4976 1912 MS64+ PCGS. CAC.** The certified population at PCGS declines by nearly 87% from MS64 to MS65, and the price increase from one grade to the next reflects that. Thus, this wheat-gold MS64+ example with CAC approval strikes an ideal balance between quality and collectibility. Lustrous and strongly detailed without any mentionable marks. An area of coppery color occurs near PLU. NGC ID# 7KR8, PCGS# 7944

- 4977 1913 MS64+ PCGS.** A sharp, satiny near-Gem with bright yellow-gold luster and pleasing eye appeal. A few lines in the reverse fields prevent a Gem designation, although the outstanding preservation of the obverse prompts the given Plus grade. NGC ID# 7KR9, PCGS# 7945

- 4978 1914 MS62 PCGS. CAC.** A boldly struck and satiny caramel-gold representative. Occasional minor field marks fail to affect the eye appeal. A semikey to the Indian quarter eagle series, which is widely collected by date and mintmark. Only the 1911-D has a lower mintage. NGC ID# 7KRA, PCGS# 7946

- 4979 1914-D MS64 PCGS.** The 1914-D Indian quarter eagle is not too difficult to locate in Choice condition, but it is a rarity at the Gem level. Most collectors find an attractive MS64 example represents a good balance of quality and value. The present coin displays well detailed devices, with bright mint luster and vivid orange-gold surfaces.

Ex: Long Beach Signature (Heritage, 6/2011), lot 4555. NGC ID# 2899, PCGS# 7947

- 4980 1914-D MS64 PCGS.** The strike is sharp on this near-Gem example, complementing satin luster and minimally marked yellow-gold surfaces. The 1914-D is a major series key just one grade point finer. PCGS reports 51 submissions above the present coin (1/17). NGC ID# 2899, PCGS# 7947

**1914-D Indian Quarter Eagle, MS64+
Vibrant Luster, Vivid Color**

- 4981 1914-D MS64+ PCGS.** The 1914-D Indian quarter eagle claims an adequate mintage of 448,000 pieces, but few examples were saved by contemporary collectors, making the issue more difficult to locate in high grade than that production total would suggest. This Plus-graded Choice example offers well-detailed design elements and vivid orange-gold surfaces with vibrant mint luster and outstanding eye appeal. NGC ID# 2899, PCGS# 7947

**1914-D Quarter Eagle, MS64
Rarely Encountered Finer**

- 4982 1914-D MS64 PCGS. CAC.** A beautiful Choice Mint State example, this well-known Denver-Mint quarter eagle is scarce in better grades. This piece exhibits bright honey-gold luster with peripheral rose toning, mostly on the obverse, and inconsequential surface marks on each side. PCGS has only certified 51 finer examples (1/17).
Ex: Long Beach Signature (Heritage, 9/2012), lot 4829. NGC ID# 2899, PCGS# 7947

- 4983 1925-D MS65 NGC.** Accents of rose and jade appear among the prevailing khaki-gold color on this appealing Gem coin, a well-struck piece with only a couple of minor marks that may preclude an even finer grade. Higher-grade pieces are scarce.
Ex: Central States Signature (Heritage, 4/2013), lot 5608. NGC ID# 7KRD, PCGS# 7949

- 4984 1925-D MS65+ PCGS.** The 1925-D is arguably the most popular type-coin issue in the Indian Head quarter eagle series due to its frequently strong eye appeal, such as is showcased by the present coin. This high-end Gem displays a good strike and mostly untouched, frosty surfaces with original wheat-gold coloration. There are only 36 finer examples reported by PCGS (1/17). NGC ID# 7KRD, PCGS# 7949

- 4985 1925-D MS65+ PCGS.** Frosty wheat-gold luster covers this well-preserved Gem 1925-D quarter eagle. The strike is well-executed, and there are no bothersome abrasions. The lower headdress feathers show the only mentionable strike weakness, as usual. PCGS lists 36 finer representatives (1/17). NGC ID# 7KRD, PCGS# 7949

- 4986 1925-D MS65+ PCGS. CAC.** Luminous, frosty rose-gold luster is original on this high-end Gem, and it is largely unmarred by post-minting abrasions. The strike is a trifle soft on the lower headdress feathers, but this is a minor complaint considering the outstanding eye appeal generated by the luster. PCGS reports only 36 finer examples (1/17). NGC ID# 7KRD, PCGS# 7949

- 4987 1927 MS65 PCGS.** Certified in a green label holder. A lovely orange-gold Gem. The strike is precise, even on the lower portions of the headdress. Imperfections are confined to a shallow field mark behind the eagle's neck. NGC ID# BUTL, PCGS# 7951

- 4988 1929 MS65 NGC.** Both sides of this sharply defined Gem exhibit brilliant light yellow-gold surfaces and excellent eye appeal. This is the final issue of the quarter eagle series and rarely found in finer grades. In fact, NGC has only certified four finer pieces (1/17). NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

**1854-O Three Dollar, Choice XF
Requisite for New Orleans Type Set**

- 4989 1854-O XF45 PCGS. CAC. Variety 2.** An olive-gold representative with hints of gunmetal toning on the portrait high points. Both sides are minimally abraded but display minor mint-made strike-throughs, as often encountered on this first-year issue. The wreath ribbon is lapped, usual for the sole New Orleans three dollar issue. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar Gold Piece, AU53
Sole New Orleans Issue**

- 4990 1854-O AU53 NGC. Variety 2.** Lapped dies. A bright yellow-gold About Uncirculated example of the only New Orleans issue in the three dollar gold series. This piece is well-struck with light high-point wear. Some mild weakness is seen on the wreath bow, as always. The 1854-O three dollar is occasionally available in this grade but always in demand. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar, AU53
Popular Branch Mint Issue**

- 4991 1854-O AU53 PCGS. Variety 2.** A yellow-gold example with lightly marked fields and moderate contact on Liberty's cheek. A few small, shallow strike-throughs are of mint origin. Luster fills the legends and outlines the motifs. The ribbon loop and ends are lapped, characteristic of most New Orleans three dollar gold pieces. NGC ID# 25M5, PCGS# 7971

1855 Three Dollar, MS62
Accessible Second-Year Issue

- 4992 1855 MS62 PCGS.** Second-year three dollar gold coins derive from a production of 50,555 pieces. Aside from the 1874 and 1878, they are among the most collectible examples to locate in Uncirculated condition, though they are rarely seen at all in grades higher than MS63. This lightly abraded MS62 features a lemon-gold obverse and a decidedly semiprooflike reverse. The devices are well-impressed. NGC ID# 25M6, PCGS# 7972

1856 Three Dollar Gold, MS61
Elusive in High Grade

- 4993 1856 MS61 NGC.** A lustrous example of this somewhat better date, which is much less often encountered in Mint State than the 1878, 1874, 1854, and 1855 issues. Liberty's hair, the U in UNITED, and the wreath bow are not fully struck, but the remainder of the design is bold. A curly pinscratch in the obverse exergue prevents a better grade.

Ex: Portland Signature (Heritage, 3/2004), lot 6152; Long Beach Signature (Heritage, 2/2008), lot 2417. NGC ID# 25M8, PCGS# 7974

- 4994 1859 AU53 NGC.** An impressive AU53 example of this pre-Civil War date, from a mintage of 15,558 pieces. Only light wear shows on the well-detailed design elements and the lightly abraded orange-gold surfaces exhibit traces of prooflike reflectivity in sheltered areas. NGC ID# 7K5K, PCGS# 7979

- 4995 1861 XF40 PCGS.** The 1861 three dollar gold piece claims a mintage of just 5,959 pieces, making the date scarce in all grades. This lightly worn XF specimen retains a surprising amount of mint luster. Bold design elements reside amid lightly marked yellow-gold surfaces.

Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4251. NGC ID# 7K5N, PCGS# 7982

1861 Three Dollar Gold Piece, AU53
Lightly Circulated Wartime Issue

- 4996 1861 AU53 PCGS.** The Mint suspended specie payments toward the end of 1861 as a result of widespread hoarding of precious-metal coinage that began with the opening of the Civil War. This low-mintage 1861 three dollar gold piece apparently circulated for a short-time before it was pulled from circulation, but the pleasing orange-gold surfaces show only minor abrasions and retain a few traces of original mint luster. NGC ID# 7K5N, PCGS# 7982

1861 Three Dollar Gold, Unc Details

- 4997 1861 — Cleaning — Genuine PCGS. Unc Details.** The 1861 three dollar gold piece is a scarce-to-rare issue in all grades, from a mintage of 5,959 pieces. This well-detailed specimen shows no actual wear, but the design elements were softly struck in some areas, like the date and denomination. The orange-gold surfaces are lightly marked, but the luster is subdued by the effects of a cleaning in the past.

1863 Three Dollar Gold, AU53
Better P-Mint Civil War Issue

- 4998 1863 AU53 NGC.** *Ex: Suwannee River Collection.* A pale gold example struck during the midst of the Civil War from a modest mintage of just 5,000 pieces. The Bowers reference suggests the 1863 three dollar pieces were not deliberately saved and "across the board they are quite rare." This example displays double die clashing in each side and only tiny marks from circulation. Traces of luster linger in protected areas. NGC ID# 7K5R, PCGS# 7984

- 4999 1871 AU50 NGC.** A paltry total of 1,300 coins made up the entire production of three dollar gold coins in 1871. This lightly circulated orange-gold piece shows wispy abrasions and strong strike detail, including the central reverse and wreath elements. NGC ID# 25MU, PCGS# 7993

5000 1874 AU58 PCGS. The lightly abraded orange-gold surfaces of this impressive near-Mint specimen show a mix of satiny mint luster and prooflike reflectivity at certain angles, and the well-detailed design elements exhibit just a trace of actual wear on the high points. NGC ID# 7KDE, PCGS# 7998

5001 1878 MS62 PCGS. Rich orange-red toning embraces coruscating and unblemished surfaces. Crisply struck and pleasing. The 1878 is often the date selected by gold type collectors. Encased in a first-generation "rattler" holder. NGC ID# 25MZ, PCGS# 8000

1878 Gold Three Dollar, MS64 Mostly Prooflike on Both Sides

5002 1878 MS64 PCGS. Minted in large quantity to provide gold coins for exchange — at par — for paper currency, demand by the public never materialized and the three dollar gold denomination remained as unpopular as ever. The 1878 is one of the few dates in the long-running series that is somewhat available in a range of Mint State grades. This Choice Uncirculated example is especially appealing with lilac and orange accents over mostly prooflike, minimally marked surfaces. A terrific type representative from the penultimate year of the series. NGC ID# 25MZ, PCGS# 8000

1879 Three Dollar, MS61 Reflective and Contrasted

5003 1879 MS61 PCGS. Reflective fields and prooflike contrast are the norm for this low-mintage issue (only 3,000 coins struck). This Uncirculated representative is in keeping with that tradition. A razor-sharp strike features bold detail on the lower wreath leaves. Light abrasions are peppered over each side, accounting for the grade, while a pair of digs near AM are the only flaws deserving of individual attention. NGC ID# 25N2, PCGS# 8001

1879 Three Dollar Gold, MS61 Reflective Fields

5004 1879 MS61 PCGS. An impressively sharp strike defines both the portrait and the wreath bowknot. This Mint State 1879 gold three dollar piece displays semiprooflike fields and vivid orange-gold patina. Light handling marks limit the grade in the absence of noticeable abrasions. A very appealing coin for the grade. NGC ID# 25N2, PCGS# 8001

5005 1882 AU53 PCGS. A lightly circulated orange-gold example with semiprooflike fields and minimal surface chatter. The strike is bold, and only slight blending is observed on the high points of the design. NGC ID# 25N5, PCGS# 8004

1882 Three Dollar, MS61 Merely 1,500 Coins Struck

5006 1882 MS61 NGC. As was the case with all three dollar gold issues from the period, the 1882 was produced in strictly limited quantities (just 1,500 coins). Both sides have semiprooflike tendencies, but not the glassy reflectivity and pronounced contrast that is sometimes found. Instead, frosty luster flows over rose-gold surfaces. The impression is bold and small marks are peppered uniformly throughout each side. NGC ID# 25N5, PCGS# 8004

1887 Three Dollar Gold Piece, MS61

5007 1887 MS61 NGC. A large percentage of the 6,000-coin mintage survives, and found most often are Mint State pieces, such as this MS61 that represents the average certified grade for this issue. Both sides have satin yellow luster with mirrored fields and trivial marks that limit the grade.
Ex: Central States Signature (Heritage, 4/2012), lot 6549. NGC ID# 25NA, PCGS# 8009

5008 1888 AU50 NGC. A minimally marked and original example. Peach-gold luster illuminates the legends, while open areas are olive-green. The leaves and Liberty's curls show moderate wear. Just 5,000 pieces were struck for this penultimate issue. NGC ID# 25NB, PCGS# 8010

- 5009 1888 AU58 PCGS.** The pleasing orange-gold surfaces of this impressive near-Mint specimen show only a few scattered, minor abrasions and retain much original mint luster. Only slight wear shows on the well-detailed design elements and eye appeal is quite strong for the grade. From a mintage of 5,000 pieces. NGC ID# 25NB, PCGS# 8010

1888 Three Dollar, Shimmering MS63

- 5010 1888 MS63 PCGS.** The 1888 is one in a series of low-mintage issues that round out the ill-conceived three dollar gold series. Merely 5,000 examples were struck. Many were acquired by speculators and saved in mint condition. The cotton bolls and lower wreath elements are boldly detailed over shimmering yellow-gold surfaces. An alloy spot appears above the M in AMERICA. UNITED is die doubled, as always for business strikes of the date. NGC ID# 25NB, PCGS# 8010

- 5011 1889 AU50 ANACS.** The 1889 is moderately more available than other late-dates in the series, and as such makes an excellent type choice. This moderately circulated piece has even reddish patina over each side. Only one mark is worthy of mention, located in the right obverse field. NGC ID# 7KDU, PCGS# 8011

1889 Three Dollar, MS63 Lustrous Final-Year Representative

- 5012 1889 MS63 PCGS.** The unpopular three dollar gold denomination was discontinued after 1889, following a small mintage of 2,300 pieces. Its low mintage and final-year status contribute to the popularity of this issue today. Peach-gold and apricot patina resides over the highly lustrous surfaces of this strongly struck Select representative. A few scattered marks do not detract. NGC ID# 7KDU, PCGS# 8011

CLASSIC HALF EAGLES

- 5013 1836 AU50 PCGS. Breen-6509, McCloskey 4-D, R.2.** Second Head, Large Date. Luster fills the legends of this lightly worn Classic type coin. The green-gold surfaces are only lightly abraded. The die marriage is distinguished by a left-leaning 6 in the date, and a widely spaced TAT in STATES.
Ex: Anaconda Rare Coins (Heritage, 6/2008), lot 1977, which realized \$1,380. NGC ID# 25RY, PCGS# 8174

- 5014 1837 AU50 NGC. Breen-6513, McCloskey 3-C, R.4.** Small Date, Script 8. The 2017 *Guide Book* notes for the 1837 half eagle that "varieties have either script 8 or block-style 8 in date" but does not give the very scarce Script 8 variety a separately priced listing. That may change someday, since the date is also clearly smaller for McCloskey 3-C than the other two known die marriages. This apricot-gold example is minimally abraded aside from a small rim knock near 9 o'clock on the reverse. NGC ID# 25RZ, PCGS# 8175

- 5015 1838 AU55 PCGS. Breen-6515, McCloskey 2-B, R.1** Final year and scarcer date in the Classic series. The surfaces on this example show significant remaining luster around the devices. Each side is minimally abraded. This is a lovely piece for an AU set of Classic fives. NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

- 5016 1839 AU50 PCGS.** An attractive AU specimen, from the first year of the Liberty design, this coin offers lightly abraded orange-gold surfaces that retain traces of original mint luster. Only slight wear is evident on the well-detailed design elements and the overall presentation is most attractive. Population: 21 in 50, 77 finer (12/16). NGC ID# 25S7, PCGS# 8191

1839-D Half Eagle, XF Details Transitional Dahlonge Issue

- 5017 1839-D — Improperly Cleaned — NGC Details. XF. Variety 2-A.** The first Liberty half eagle issue from the Dahlonge Mint was also the last such issue with an obverse mintmark. An underappreciated single-year design subtype with a different portrait of Liberty. This apricot-gold example has a somewhat subdued appearance, but the only mentionable mark is a slight rim knock east of the date. The eagle's wings are well defined, though the curls near the ear are lightly brought up.

- 5018 1840-C XF40 NGC. Variety 1.** A bold die crack travels from the rim through the I in AMERICA and the arrowheads. The 1840-C represents the first year of the modified portrait design and the first time the mintmark was placed on the reverse. Examples are very scarce in XF condition or better. Red-gold colors this typically struck 1840-C half eagle. Surfaces marks are numerous, though not overly distracting as is often the case. Census: 12 in 40, 66 finer (1/17). NGC ID# 25VD, PCGS# 8196

1845-D Liberty Half Eagle, AU50 Scarcer Variety 14-H

- 5019 1845-D AU50 PCGS. Variety 14-H.** The 1845-D Liberty half eagle is an available issue in the context of the series, from a mintage of 90,629 pieces. This pleasing AU specimen represents the scarcer Variety 14-H, with the date placed high and to the right. The design elements are well-detailed, with just a touch of high-point wear and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 25TC, PCGS# 8224

1845-O Liberty Half Eagle, AU55
Underrated Branch Mint Issue

5020 1845-O AU55 PCGS. Variety 1. The 1845-O Liberty half eagle is a scarce, underrated issue from a mintage of 41,000 pieces. This attractive Choice AU specimen shows just the slightest trace of wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded and lustrous. Population: 12 in 55, 12 finer (12/16). NGC ID# 25TD, PCGS# 8225

5021 1846-D/D — Cleaning — PCGS Genuine. AU Details. Variety 16-J. The popular repunched mintmark reverse, paired to the low date obverse. This AU-level 1846-D/D half eagle displays impressively sharp detail but with unnaturally bright yellow-gold surfaces that reveal a vigorous cleaning. Still, a pleasing and affordable example of the variety.

5022 1846-D/D — Cleaning — PCGS Genuine. AU Details. Variety 16-J. The remains of an undertype D are clearly visible above and to the right of the primary mintmark on this popular *Guide Book* variety. The surfaces are lightly abraded and only a touch of actual wear is evident on the well-detailed devices, but the luster is somewhat dimmed by the noted cleaning.

1848-C Five Dollar, AU55
Conditionally Scarce Charlotte Issue

5023 1848-C AU55 NGC. Variety 1. A pleasing Choice AU Charlotte five. Sun-gold luster surrounds the stars and fills the legends. Small marks are distributed, but none are noteworthy. The strike shows softness on Liberty's curls and the upper stars. The 1848-C is underrated relative to its less elusive 1849-C successor. Census: 32 in 55, 24 finer (12/16). NGC ID# 25TT, PCGS# 8237

1849-C Liberty Five, AU55
Popular Branch Mint Type Issue

5024 1849-C AU55 PCGS. Variety 1. The 1849-C Liberty half eagle is a relatively available issue from a mintage of 64,823 pieces. This Choice AU specimen shows some light wear on the high points of the well-detailed design elements and an unfinished area on the reverse, between the eagle's wing and the branch, diagnostic of Variety 1. A die crack from the rim near U in UNITED indicates the later Die State II. The lightly abraded lemon-yellow surfaces exhibit traces of prooflike reflectivity in sheltered areas. Population: 28 in 55, 22 finer (1/17). NGC ID# C5XD, PCGS# 8241

5025 1852-C — Improperly Cleaned — NGC Details. AU. Variety 2. A Charlotte five dollar type coin with far fewer marks than is customary for the issue. Contact is chiefly confined to the lower reverse rim. The strike is soft on the eagle's neck and fletchings. The sun-gold surfaces are microgranular and moderately luminous.

5026 1853 MS61 PCGS. The satiny, orange-gold surfaces of this impressive Mint State example are lightly marked for the grade and the design elements are well-detailed, with just a touch of softness on Liberty's curls and the eagle's right (facing) claw. Population: 25 in 61, 46 finer (12/16). NGC ID# 25UD, PCGS# 8253

1853-D Half Eagle, AU55
Popular Branch Mint Type Coin

5027 1853-D AU55 PCGS. Variety 34-Y. From a mintage of 89,678 pieces, the 1853-D Liberty half eagle is a relatively available issue and a popular choice of branch mint type collectors. This impressive Choice AU specimen displays vivid orange-gold surfaces, with vibrant mint luster and scattered minor abrasions. The well-detailed design elements show just a touch of actual wear. Housed in an old green label holder. Population: 31 in 55, 57 finer (1/17). NGC ID# 25UF, PCGS# 8255

**1855-D Half Eagle, Orange-Gold AU53
Medium D Mintmark**

- 5028 1855-D Medium D AU53 PCGS.** Although the holder notes that this is an example of the Large D variety, it is actually the scarcer Medium D mintmark, attributed by the distance between the fletching and the upper right serif. The stars, wing feathers, olive leaves, and claws are strongly detailed. Rich orange-gold hues dominate lightly abraded surfaces. The 1855-D is an elusive Dahlonega product with an estimated 125 to 150 pieces extant. Survivors are rarely seen finer. NGC ID# 25US, PCGS# 98263

**1855-O Three Dollar, AU53
Better New Orleans Emission**

- 5029 1855-O AU53 NGC. Variety 1.** A mintage of only 11,100 pieces confirms the rarity of the 1855-O. This is a luminous peach-tinged representative with surprisingly few marks on the fields and devices. Nicely struck for a Southern gold No Motto issue. The rims show moderate contact above star 10 and the E in UNITED. Census: 12 in 53, 19 finer (12/16). NGC ID# 25UT, PCGS# 8264

**1856 Half Eagle, MS62
No Motto Condition Rarity**

- 5030 1856 MS62 NGC.** The 1856 is a moderately scarce No Motto half eagle in terms of its overall availability. Mint State survivors are very rare, however. Aside from slight softness on the forecurls and the eagle's neck feathers, the devices exhibit a pinpoint impression. The obverse presents a hint of semiprooflikeness in the fields, while the reverse displays lively luster over rose-gold surfaces. Census: 8 in 62, 10 finer (1/17). NGC ID# 25UV, PCGS# 8266

- 5031 1857-S AU55 NGC.** Unlike the double eagles struck at the same facility during the same year, the 1857-S half eagle is not widely available in high grades. In fact, it is very scarce across the entire grade spectrum. This is a brightly lustrous, lightly circulated Choice AU five dollar gold piece with good detail. Census: 22 in 55, 27 finer (12/16). NGC ID# CBE7, PCGS# 8275

- 5032 1859-C — Improperly Cleaned — NGC Details. XF. Variety 2.** A butter-gold and lime-green representative. The stars are sharp for the XF level. There are no distracting marks. As invariably encountered for this late Charlotte issue, the eagle is somewhat indistinct because of its improperly prepared reverse die. The strike-through above the eagle's neck is also usual for the '59-C.

- 5033 1859-C — Improperly Cleaned — NGC Details. AU. Variety 1.** A peach-gold and olive-green example with moderately hairlined and occasionally microgranular surfaces. As always for the 1859-C, the eagle has a blurry appearance, due to an improperly annealed reverse die.

- 5034 1859-D Medium D VF25 PCGS. Variety 44-HH.** An outstanding collector-grade example of this scarce Dahlonega issue, showing smooth orange-gold surfaces that have deeper hues around the relief elements. Detail is pleasing for the grade. The 1859-D five is seldom offered so appealing in this grade. NGC ID# 25VD, PCGS# 8282

- 5035 1861 AU58 PCGS. CAC.** Just a trace of wear shows on the high points of the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. From a mintage of 688,084 pieces, the 1861 half eagle becomes somewhat scarce in higher grades. NGC ID# 25VK, PCGS# 8288

- 5036 1861 AU58 PCGS. CAC.** Significant amounts of original mint luster remain on each side of this yellow-gold example. Lightly abraded. Excellent for an AU type set. NGC ID# 25VK, PCGS# 8288

- 5037 1861 MS61 PCGS Secure.** This is a well-struck Mint State coin with no major abrasions, despite the grade. We note only light chatter in the fields that prevents a finer numeric designation. The reverse shows evidence of die lapping at the eagle's tailfeathers and the olive leaves. NGC ID# 25VK, PCGS# 8288

- 5038 1861 MS61 NGC.** The design elements of this impressive Mint State Liberty half eagle are well-detailed, but some definition on the eagle's leg was lost, due to lapping. The lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 25VK, PCGS# 8288

- 5039 1861 MS61 PCGS.** From a mintage of 688,150 pieces, the 1861 Liberty half eagle is a popular type issue because of its relative availability in high grade. This well-detailed Mint State specimen exhibits lustrous orange-gold surfaces with the expected number of scattered, minor contact marks for the grade. NGC ID# 25VK, PCGS# 8288

- 5040 1870 — Obverse Damage — NGC Details. AU.** From a small mintage of 4,000 pieces, the 1870 half eagle is an elusive issue in all grades and conditions. This well-detailed specimen shows just a touch of actual wear, and the orange-gold surfaces retain traces of original mint luster, but a small hole is evident near Liberty's brow and a few noticeable abrasions are evident in the obverse field.

- 5041 1870-S VF35 NGC.** From a mintage of 17,000 coins, it is estimated that between 100 and 150 examples of the 1870-S half eagle survive, perhaps one of them in Mint State. The coins circulated as originally intended, including this Choice VF example. Well-detailed with orange-gold color and scattered abrasions. Census: 2 in 35, 67 finer (12/16). NGC ID# 25WB, PCGS# 8321

**1871-S Five Dollar, AU53
Rarely Seen This Fine**

5042 1871-S AU53 PCGS. Less than 1% of the 25,000 half eagles struck at San Francisco in 1871 are believed extant, indicative of the wide extent to which the 1871-S circulated in Western commerce. This piece survives in an unusually high grade for the issue. Each side is bright yellow-gold with scattered abrasions. Most stars are remarkably crisp, as are the eagle's feathers, talons, and olive leaves. Population: 6 in 53, 17 finer (12/16). NGC ID# 25WE, PCGS# 8324

5043 1873 Open 3 MS62 PCGS. Mint State example of the Open 3 type are scarce in any grade. This piece displays a bold strike and vibrant orange-gold mint luster. Scattered abrasions determine the grade, but none are individually significant. Population: 13 in 62, 21 finer (1/17). NGC ID# 25WK, PCGS# 8328

**1873 Open 3 Half Eagle, MS63
Very Rare in High Grade**

5044 1873 Open 3 MS63 PCGS. A mintage of 112,480 Liberty half eagles was accomplished in 1873, split between the Closed 3 and Open 3 varieties. The Open three variant is slightly more common than its Closed 3 counterpart, but it is still a scarce-to-rare issue in all grades today. This well-detailed Select example displays rich orange-gold surfaces with scattered minor contact marks and slightly subdued mint luster. Population: 11 in 63, 10 finer (1/17). NGC ID# 25WK, PCGS# 8328

**1876-CC Half Eagle, AU Sharpness
Lowest-Mintage Carson City Five Dollar**

5045 1876-CC — Reverse Improperly Cleaned — NGC Details. AU. Variety 1-A. A single set a dies was needed to strike a meager quantity of 6,887 half eagles at the Carson City Mint in 1876. The 1876-CC enjoys status as the lowest-mintage CC half eagle ever produced, and demand is correspondingly high. Although the reverse shows signs of an improper cleaning, this reddish-gold example offers strong strike characteristics.

5046 1877-S AU55 NGC. The 1877-S half eagle comes from a mintage of only 26,700 coins and is scarce in all grades. Mint State pieces are extremely rare. This Choice AU coin displays a bold strike and lightly abraded orange-gold patina with hints of luster in the fields. Census: 23 in 55, 10 finer (1/17). NGC ID# 25X3, PCGS# 8344

5047 1880 MS64+ PCGS. CAC. Frosty, original mint luster displays beautifully on the mostly unabraded surfaces of this CAC-endorsed, high-end near-Gem. The strike is bold throughout. PCGS reports only 27 finer submissions for the 1880 half eagle (1/17). NGC ID# 25XA, PCGS# 8351

**1880 Liberty Half Eagle, MS65+
Only Three Finer Coins at PCGS**

5048 1880 MS65+ PCGS. Mint records indicate production of half eagles increased tremendously at the Philadelphia Mint in 1880, to more than 3.1 million pieces, but the issue is still rare at the MS65 grade level. This Plus-graded Gem exhibits sharply detailed design elements and lustrous peach-gold surfaces, with vibrant mint luster and outstanding eye appeal. Population: 22 in 65 (2 in 65+), 3 finer (12/16). NGC ID# 25XA, PCGS# 8351

5049 1880 MS65 PCGS. CAC. A scarce Gem example with a sharp strike and frosty rose-gold and peach mint luster. There are no major abrasions. Finer examples of the 1880 half eagle are rarely offered. Population: 23 in 65 (2 in 65+), 4 finer. CAC: 2 in 65, 1 finer (1/17). NGC ID# 25XA, PCGS# 8351

5050 1881 MS64+ PCGS. CAC. The 1881 is a popular issue to represent the With Motto half eagle type. This high-end MS64+ example with CAC approval offers frosty luster and rose-gold coloration. Boldly struck with a couple of reeding marks on the chin. PCGS has seen 20 submissions finer (1/17). NGC ID# 25XD, PCGS# 8354

5051 1881 MS65 PCGS. Frosty, original orange-gold luster illuminates Gem-quality surfaces on this conditionally scarce 1881 Liberty half eagle. The strike is bold, and no coins are finer at PCGS. Population: 20 in 65, 0 finer (1/17). NGC ID# 25XD, PCGS# 8354

**1882-S Half Eagle, MS65
San Francisco Condition Rarity**

5052 1882-S MS65 PCGS. Despite a sizeable mintage approaching 1 million coins, the 1882-S is very scarce in MS64. In Gem condition, it is a true rarity. This apricot-gold, Registry-quality half eagle radiates frosty luster from surfaces that exhibit lightly scattered bagmarks, none of which merit individual mention. Population: 15 in 65, 1 finer (1/17). NGC ID# 25XJ, PCGS# 8360

5053 1884 MS63 NGC. One might mistakenly assume that the 1884 half eagle (191,030 coins) is readily available, but it is very scarce in Mint State and downright rare in Select Uncirculated condition. This rose and green-gold Liberty five is well-struck and lightly marked. A pleasing example of the date. Census: 24 in 63, 6 finer (12/16). NGC ID# 25XN, PCGS# 8364

5054 1884 MS63 NGC. Rose and green hues color the obverse, while the reverse is mostly light yellow-gold. Both sides are equally radiant, awash in frosty luster. The devices exhibit crisp detail. Scattered flecks and ticks limit the grade, but this remains one of the finer survivors from this challenging issue. Census: 24 in 63, 6 finer (12/16). NGC ID# 25XN, PCGS# 8364

5055 1884 MS63 NGC. Similarly well-preserved examples of the 1884 five dollar gold piece are surprisingly rare. Shimmering luster and rose-gold hues are the defining features of this Select offering. Light abrasions and minor high-point incompleteness are typical. Census: 24 in 63, 6 finer (1/17). NGC ID# 25XN, PCGS# 8364

5056 1884-CC XF40 PCGS. This is a lightly worn example with vivid orange-gold patina. Hints of original mint luster remain in the protected regions of the fields, and the surfaces are mostly smooth and appealing. It is difficult to imagine a visually finer 1884-CC half eagle for the grade. NGC ID# 25XP, PCGS# 8365

5057 1885-S MS65 NGC. This Gem Liberty Head five dollar shows a frosted portrait and razor-sharp definition on all the design elements. The obverse is partly contrasted, and both sides present pleasing honey-gold coloration. The only visible flaw occurs behind the hair bun. Rare any finer. NGC ID# 2Y7X, PCGS# 8368

1885-S Five Dollar, MS65 Seldom Seen This Nice

5058 1885-S MS65 PCGS. CAC. The 1885-S is eminently collectible through MS65, although CAC-approved Gems represent a tiny fraction of comparable submissions. Peach-gold and rose tones blends with cartwheel luster. Smooth surfaces display a couple of tiny flecks, none of which detract from the top-notch eye appeal. Population: 65 in 65 (1 in 65+), 6 finer. CAC: 16 in 65, 2 finer (1/17). NGC ID# 2Y7X, PCGS# 8368

5059 1891 MS63 PCGS. Conditionally scarce in Mint State and rarely encountered finer than the present Select example. This 1891 half eagle displays a sharp strike and offers frosty wheat-gold luster with no major abrasions. Population: 33 in 63 (1 in 63+), 18 finer (1/17). NGC ID# 25Y4, PCGS# 8377

1891-CC Liberty Half Eagle, MS62+ Popular Branch Mint Type Coin

5060 1891-CC MS62+ NGC. CAC. Variety 1-A. From a relatively generous mintage of 208,000 pieces, the 1891-CC is the most available half eagle from the Carson City Mint. It's availability in Mint State grades makes it a favorite choice of branch mint type collectors. This Plus-graded MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces that show scattered, minor contact marks on both sides. NGC ID# 25Y5, PCGS# 8378

5061 1892 MS64 PCGS. CAC. A plentiful date that is conditionally elusive in high grade. This near-Gem CAC coin offers a sharp strike and frosty yellow-gold luster. Grade-limiting abrasions are minor and require a loupe to discern. NGC ID# C5XG, PCGS# 8379

5062 1893 MS65 NGC. Glowing peach and lavender-gold surfaces are awash in thick mint frost. The design elements are strongly rendered, including full star centers, talons, and fletchings. An interesting die crack travels from the rim through ES OF to the wingtip. Minute ticks define the grade. NGC shows 10 finer submissions. NGC ID# 25YA, PCGS# 8383

1894 Half Eagle, MS65 A Condition Rarity, Great Eye Appeal

5063 1894 MS65 PCGS. CAC. Frosty honey-gold color beams forth with strong mint luster from both sides of this Gem five. Although nearly 1 million coins were struck, full Gems are rare and the issue is virtually unavailable any finer. The outstanding eye appeal is amply rewarded by the MS65 grade and CAC endorsement, while only a few tiny field ticks are revealed by magnification. Population: 5 in 65 (1 in 65+), 3 finer. CAC: 3 in 65, 0 finer (1/17). NGC ID# 25YE, PCGS# 8387

5064 1895 MS65 NGC. The 1895 is more available in Gem condition than the 1894 and 1896 that precede and succeed it, but MS65 examples still pose a moderate challenge. This is a frosty rose-gold representative with strong strike characteristics. Tiny ticks are inconsequential. Only 12 coins finer at NGC (1/17). NGC ID# 25YH, PCGS# 8390

5065 1896-S MS62 PCGS. Original, frosty luster emits hues of orange-gold and pale yellow, giving this vibrant Mint State 1896-S half eagle pleasing eye appeal. The strike is sharp. Scattered abrasions limit the grade. Population: 22 in 62, 12 finer (1/17). NGC ID# 25YL, PCGS# 8393

**1897 Half Eagle, MS65+
Extremely Rare Any Finer**

5066 1897 MS65+ NGC. CAC. This is a frosty Gem example of the conditionally elusive 1897 Philadelphia Mint half eagle, showing luminous orange-gold surfaces and sharp design elements. A few faint grazes are visible, none out of line for the grade. Finer examples are extremely rare. CAC: 12 in 65, 2 finer (1/17). NGC ID# 25YM, PCGS# 8394

5067 1900-S MS64+ PCGS. CAC. Frosty orange-gold luster blankets vibrant, well-preserved surfaces on this final-year 19th century San Francisco half eagle. The strike is bold, and the Plus designation/CAC green label combination is immensely appealing. PCGS reports only 13 finer examples of the date (1/17). NGC ID# 25YV, PCGS# 8401

5068 1901-S MS65+ NGC. The ideal type-coin issue in the ideal grade, this Gem 1901-S half eagle displays a sharp strike and frosty yellow-gold luster. Close examination with a loupe fails to reveal any mentionable flaws. Finer examples are elusive. NGC ID# 25YX, PCGS# 8404

5069 1901-S MS65+ PCGS. This is a sharp, Gem 20th century type coin, showing frosty wheat-gold luster and a pleasing cartwheel effect. A single tiny tick on Liberty's chin appears to be all that prevents a full MS66 grade. Finer coins are scarce. NGC ID# 25YX, PCGS# 8404

1902 Half Eagle, Fully Struck High-End Gem

5070 1902 MS65+ PCGS. Engaging luster and a full strike are hallmarks of this Gem 1902 half eagle. A few trivial ticks appear in the obverse fields and within the shield stripes on the reverse, but they fail to defeat the broad eye appeal. Despite a mintage of 172,400 circulation strikes, this issue becomes elusive in finer grades. Population: 24 in 65 (1 in 65+), 9 finer (1/17). NGC ID# 25YY, PCGS# 8405

5071 1902-S MS65 PCGS. Frosty yellow-gold luster gives this Gem 1902-S half eagle excellent visual appeal. The strike is sharp, and neither side exhibits major abrasions. Some strike doubling is seen on the mintmark and portions of the peripheral legends. PCGS reports only 43 numerically finer submissions (1/17). NGC ID# 25YZ, PCGS# 8406

5072 1903-S MS65 PCGS. Green-gold and warm rose hues blend together over lustrous fields on this Gem 1903-S half eagle. The central devices are sharp, but the lowest two obverse stars are incomplete. A few trivial grazes are not out of line for the grade. There are only 21 numerically finer representatives at PCGS (1/17). NGC ID# 25Z3, PCGS# 8408

**1903-S Half Eagle, MS66
Green-Label Holder**

5073 1903-S MS66 PCGS. The smooth surfaces are alive with frosty luster and Liberty's portrait is essentially mark-free, while the strike is needle-sharp as often seen on the popular San Francisco issue. While a few other dates are also suitable candidates for high-end type, it will be difficult to improve on this radiantly lustrous 1903-S for eye appeal and surface quality. PCGS shows no numerically finer examples. Housed in a green label holder. Population: 21 in 66 (3 in 66+), 0 finer (1/17). NGC ID# 25Z3, PCGS# 8408

5074 1906 MS65 NGC. Luminous surfaces yield frosty orange-gold luster on this Gem 1906 Liberty half eagle. This strike is sharp, and there are no major abrasions. Finer examples are infrequently offered. Census: 51 in 65 (1 in 65+), 35 finer (1/17). NGC ID# 25Z9, PCGS# 8413

5075 1906-D MS64+ PCGS. CAC. Frosty original luster gives this high-end near-Gem its eye appeal, and neither side is affected by serious abrasions. The eagle's left (facing) talons show trivial weakness, while the obverse is sharp. Finer 1906-D half eagles are elusive. NGC ID# 25ZA, PCGS# 8414

5076 1906-D MS65 NGC. Frosty yellow-gold luster shows no mentionable abrasions on this Gem 1906-D half eagle. The strike is sharp, and eye appeal is strong for the issue. The 1906-D is elusive in this grade and rarely seen finer. Census: 67 in 65 (1 in 65+), 8 finer (1/17). NGC ID# 25ZA, PCGS# 8414

5077 1907-D MS64+ PCGS. CAC. The final Denver issue of this type, the 1907-D Liberty half eagle is a popular type-coin issue in high grade. This Plus-designated near-Gem boasts CAC approval and has frosty yellow-gold mint luster. A few light grazes do not detract. NGC ID# 25ZD, PCGS# 8417

INDIAN HALF EAGLES

**1908 Indian Head Five Dollar, MS64+
Nearly Fully Struck**

5078 1908 MS64+ PCGS. The year 1908 was a transitional one in the half eagle series, with the Mint striking 421,874 Liberty Head fives and later 577,845 examples of Pratt's sunken-relief Indian Head design. This outstanding near-Gem is absolutely radiant with delicate glints of rose over warm, yellow-gold surfaces. Nearly fully struck and scarcely found finer. NGC ID# 28DE, PCGS# 8510

5079 1909-D MS64 NGC. Satiny mint luster shines from medium yellow-gold surfaces with a slight greenish tint. As usual for the 1909-D, both sides show a razor-sharp impression. A minor grease spot occurs above the N in UNUM, and tiny marks are peppered uniformly. NGC ID# 28DJ, PCGS# 8514

- 5080 1909-D MS64 PCGS.** Frosty rose-gold luster attests to the originality of the surfaces on this near-Gem 1909-D Indian half eagle. The strike is bold, and grade-limiting abrasions are uniformly scattered with minimal impact on eye appeal. NGC ID# 28DJ, PCGS# 8514
- 5081 1909-D MS64+ PCGS. CAC.** Satiny bronze-gold luster gives this high-end near-Gem pleasing visual appeal. The strike is well-executed, and no major abrasions are observed. The 1909-D is a popular and plentiful type-coin issue, although pieces grading finer than the present coin are infrequently offered. NGC ID# 28DJ, PCGS# 8514
- 5082 1910-D MS62 PCGS. CAC.** A sharp, honey-gold example of this conditionally better date. Light surface chatter limits the grade, but there are no individually significant abrasions. CAC-approved and appropriately pleasing for the grade. NGC ID# 28DL, PCGS# 8518
- 5083 1911 MS64 PCGS.** A lustrous and boldly struck orange-gold near-Gem. A lens reveals scattered unimportant field contact. Although the 1911 is an available issue, examples with the rich toning of the present coin are undeniably scarce. NGC ID# 28DP, PCGS# 8520
- 5084 1911 MS64 PCGS.** The 1911 half eagle is easily obtainable in grades through MS64, but Gem-quality examples are scarce, and finer pieces are prohibitively rare. This Choice example exhibits satiny green-gold luster, with only a few minor abrasions limiting the grade. The strike is lacking on the lower portion of the headdress feathers, though the eagle's feathers are well-defined. NGC ID# 28DP, PCGS# 8520
- 5085 1911-S MS62 NGC. CAC.** While the San Francisco Mint struck more than 1.4 million half eagles in 1911, surviving examples are surprisingly elusive in mint condition. This CAC-endorsed representative is typically defined with deep orange-gold coloration. Moderate marks are scattered evenly throughout. NGC ID# 25ZM, PCGS# 8522
- 5086 1911-S MS62 PCGS. CAC.** An attractive MS62 specimen of this popular early series issue, with well-detailed design elements and lustrous orange-gold surfaces that show a few scattered, minor contact marks on both sides. NGC ID# 25ZM, PCGS# 8522
- 5087 1912 MS64 PCGS.** Vibrant luster produces tremendous visual appeal for this yellow-gold MS64 half eagle with rose and green accents. The devices are strongly rendered, while a loupe reveals a few trivial marks that do not detract in the least. The 1912 becomes very scarce in higher grades. NGC ID# 28DS, PCGS# 8523
- 5088 1913-S MS61 NGC.** The strike is above-average with sharp headdress feathers and bold detail on the eagle's shoulder. Each side is light yellow-gold with subdued mint frost. Grade-limiting marks are confined mainly to the reverse. A pleasing S-mint semikey. NGC ID# 25ZP, PCGS# 8526
- 5089 1914-S MS61 PCGS.** The 1914-S is among the most difficult issues of the series to locate in Uncirculated grades. The present coin is nicely struck despite a touch of softness on the lower headdress feathers. The surfaces display light apricot-gold color with few abrasions for the grade.
Ex: Sacramento ANA Signature (Heritage, 3/2011), lot 4797, which realized \$4,025. NGC ID# 28DW, PCGS# 8529
- 5090 1914-S MS61 PCGS.** Hints of light blue-green toning appears on the lustrous light yellow surfaces of this scarce and important Indian half eagle. Some strike weakness is evident among the lower feathers of the headdress. NGC ID# 28DW, PCGS# 8529
- 5091 1915 MS64 PCGS.** A collectible Choice example of this available Philadelphia issue, showing satiny straw-gold luster with hints of rose throughout. The strike is sharp, and there are no major abrasions. Finer examples of the 1915 half eagle are elusive. NGC ID# 28DX, PCGS# 8530
- 5092 1916-S MS62 PCGS.** David Akers once wrote that the 1916-S invariably comes well-struck, and that trait is on full display here. The devices are razor-sharp with slight buckling around the borders. Each side is bright straw-gold with frosty luster and scattered wispy marks. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

1839 Ten Dollar, VF25 Rare Type of 1840 Variant

- 5093 1839 Type of 1840, Small Letters VF25 NGC.** Mid-way through 1839, the Mint modified Christian Gobrecht's Liberty Head design. Earlier coins show a more rounded bust with a pointed tip, and a sweeping hairstyle. The modified portrait coins represent about one third of the ten dollar gold pieces struck that year and are about four times as rare as the Type of 1838 coins. From a mintage of 12,447 pieces, roughly 50 to 60 survive. This well-circulated survivor has deep orange-gold coloration. Marks are generally minor with only two noteworthy digs between stars 5 and 6. Census: 2 in 25, 33 finer (12/16). NGC ID# 54XJ, PCGS# 8580

- 5094 1840 AU55 NGC.** This early issue in the Liberty Head series claims a modest mintage of 47,338 coins, of which fewer than 200 pieces are believed to have survived. Examples of this quality are rare. A wheat-gold Choice AU eagle with good detail and scattered abrasions. NGC ID# 262G, PCGS# 8581

- 5095 1842 Large Date AU55 PCGS. CAC.** The Crosslet 4 easily distinguishes the scarce Large Date variety from the rare Small Date variant. This is a partially lustrous, lightly circulated example with wheat-gold color and glints of deeper reddish tones near the upper reverse. Liberty and the eagle display good detail, while myriad abrasions and a couple of rim nicks appear on each side. Population: 16 in 55, 9 finer. CAC: 1 in 55, 1 finer (12/16). NGC ID# 262M, PCGS# 8584

- 5096 1843-O AU55 NGC. Variety 2.** The third New Orleans ten dollar issue is more available than its two predecessors, yet is scarce at the Choice AU level. This original caramel-gold example is moderately abraded and displays a couple of slight rim bumps. Luster glimmers from protected regions. NGC ID# 262R, PCGS# 8589

1844-O Liberty Eagle, AU55 Pleasing O-Mint Type Coin

- 5097 1844-O AU55 PCGS. Variety 1.** Some light wear shows on the well-detailed design elements of this attractive Choice AU specimen and the vivid orange-gold surfaces show the expected number of minor contact marks for the grade. As usual for this issue, the reverse is sharper than the obverse and the mintmark shows repunching inside the loop. Both sides retain traces of original mint luster. NGC ID# 554G, PCGS# 8591

1845 Liberty Ten, AU55
Elusive, Low-Mintage Issue

5098 1845 AU55 NGC. From a low mintage of 26,153 pieces, the 1845 Liberty eagle is an elusive date in all grades, and Mint State specimens are especially rare. This impressive Choice AU specimen shows just a touch of wear on the well-detailed design elements and the lustrous lemon-yellow surfaces show the expected number of minor contact marks for the grade. Census: 26 in 55, 11 finer (12/16). NGC ID# 262U, PCGS# 8592

5099 1846 — Improperly Cleaned — NGC Details. AU. The 1846 is yet another underrated Philadelphia issue in the series. Only 20,095 pieces were struck, and essentially all went into commerce. Between 200 and 300 pieces have survived, and PCGS has yet to certify an example as Mint State. The present straw-gold example is glossy from a wipe, and displays field abrasions consistent with limited circulation.

5100 1846-O — Improperly Cleaned — NGC Details. AU. Variety 3. Later die state, lacking any trace of the repunching on the O mintmark. Four varieties are known of the 1846-O ten, increasing their collectibility. As usual, the surfaces are extensively abraded and bright from cleaning.

1846/5'-O Liberty Eagle, XF45
Popular Guide Book and Cherrypickers Variety

5101 1846/5'-O XF45 PCGS. Variety 3. FS-301. Although NGC and the *Guide Book* both list this issue as an overdate, PCGS has reservations about what the undertype below the final digit in the date actually represents. Hence the quotation marks around the 5 on the PCGS holder. This Choice XF specimen shows some light wear on the well-detailed design elements and the moderately abraded orange-gold surfaces exhibit a few traces of prooflike reflectivity in sheltered areas. From the early die state that shows the mintmark repunched to the North, FS-301. Population: 21 in 45, 33 finer (12/16). NGC ID# 262Y, PCGS# 8596 Base PCGS# 8595

5102 1847-O XF45 PCGS. CAC. Variety 2, showing the base of the 1 repunched in the date. This Choice XF 1847-O Liberty eagle displays medium green-gold patina with small hints of luster in the protected regions of the fields. Scattered surface chatter and light high-point wear are as expected for the grade. NGC ID# 2632, PCGS# 8598

5103 1850 Large Date AU55 PCGS. An impressive No Motto Liberty eagle, this piece exhibits reflective greenish-gold surfaces with nearly full luster. The strike is typical for the issue with weakness on the eagle's left (facing) leg. Population: 16 in 55, 21 finer (1/17). NGC ID# 2637, PCGS# 8603

5104 1851-O AU55 NGC. Variety 2. A straw-gold New Orleans No Motto type coin. Luster fills the legends and outlines the stars. The reverse is refreshingly unabraded, while the obverse displays a trio of faded thin marks. Customary for the 1851-O, a shield ring rests atop the second vertical stripe. NGC ID# 557V, PCGS# 8607

5105 1853-O AU50 PCGS. Variety 1. No shield ring. Four die marriages are confirmed, despite a low mintage of 51,000 pieces. Orange-gold luster outlines design elements. The open fields and high points are olive-green. Nicely struck and lightly abraded. A late die state with peripheral obverse cracks and a clash mark above the eagle's right (facing) shoulder. NGC ID# 263F, PCGS# 8612

1854-S Ten Dollar, AU55
Original Coloration

5106 1854-S AU55 NGC. The inaugural San Francisco ten is popular in high grade. This Choice AU representative displays bold detail and original olive-gold patina with mild surface chatter as appropriate for the grade. Hints of luster emerge from the protected regions of the fields when rotated beneath a light. NGC ID# 263K, PCGS# 8615

1857 Liberty Ten, AU58
Conditionally Elusive, Rare Any Finer

5107 1857 AU58 NGC. Breen-6925, "Extremely rare." A raised die line connects the 5 and 7 in the date. Breen believed that this variety was an overdate, and for many years the variety was listed as such, but no longer. The centers have a good strike, while a few of the stars are flat. Lines from die clashing are visible above the eagle's right shoulder. The fields show many light abrasions, but both sides retain considerable bright luster. Only 16,606 pieces were struck, and Mint State survivors are excessively rare. Census: 26 in 58, 4 finer (1/17).
Ex: New York Signature (Heritage, 7/2002), lot 9296; Dallas Signature (Heritage, 10/2006), lot 2933. NGC ID# 55GV, PCGS# 8622

**1858-O Ten Dollar, AU55
Strong Central Detail**

5108 1858-O AU55 PCGS. Variety 1. From a production of 20,000 coins, Doug Winter estimates 200 to 250 pieces are extant. Most survive in VF to XF condition, while AU coins are decidedly scarcer. The 1858-O tends to come well-struck, excluding the stars. That is precisely the case here, with sharp detail on the portrait and eagle, and incomplete star centers. Bright yellow-gold color and partial luster enliven this Choice AU New Orleans eagle. NGC ID# 55GX, PCGS# 8626

5109 1859 AU53 NGC. The major devices are boldly struck, although the stars are generally soft. There are no heavy marks, and glimpses of luster surround design the recesses. A scant 16,013 pieces were struck.
Ex: ANA National Money Show (Heritage, 3/2007), lot 2058. NGC ID# 263Z, PCGS# 8628

**1861 Ten Dollar, Near-Mint
Civil War Type Coin**

5110 1861 AU58 NGC. A sun-gold Civil War type coin. Luster illuminates the motifs and legends, and although small to moderate marks are distributed, none are individually noteworthy. The right obverse exhibits a wire rim. There are two subtypes for 1847, 1860, and 1861 Philadelphia Mint eagles. The present example has a Rounded Bun, with a five-fold central hairbun. Six-fold Bulging Bun pieces are also known. NGC ID# 2647, PCGS# 8633

5111 1862 — Altered Surfaces — PCGS Genuine. AU Details. PCGS calls the surfaces altered, although other than the expected field chatter and a hint of unnatural “gloss” there do not appear to be any significant complaints for the viewer. This 1862 eagle is well-detailed, and each side displays uniform olive-gold patina.

5112 1866-S No Motto — Improperly Cleaned — NGC Details. XF. A lightly abraded but somewhat bright sun-gold example. Although less famous than its double eagle counterpart, the No Motto ‘66-S ten is significantly rarer. From the mintage of 8,500 pieces, PCGS estimates only 40 to 55 survivors. By comparison, NGC has certified 192 ‘66-S No Motto twenties in all grades.

5113 1874 MS61 PCGS. A scarce Mint State example of this conditionally elusive Philadelphia issue. The coin is sharply struck and exhibits bright yellow-gold luster with semiprooflike fields. Scattered abrasions determine the grade. Population: 28 in 61, 17 finer (1/17). NGC ID# 2657, PCGS# 8669

5114 1874-S VF30 PCGS. From a mintage of just 10,000 pieces, the 1874-S Liberty eagle is rare in all grades today. This pleasing VF30 specimen offers lightly abraded orange-gold surfaces and moderately worn design elements that retain much of their interior detail intact. Population: 8 in 30, 65 finer (1/17). NGC ID# 2659, PCGS# 8671

**1878-S Liberty Eagle, AU58
Elusive Low-Mintage Issue**

5115 1878-S AU58 PCGS. Only 26,100 Liberty eagles were struck at the San Francisco Mint in 1878, making the issue scarce-to-rare in all grades today. This impressive near-Mint example exhibits well-detailed design elements that show just a trace of wear on the high points, and lightly abraded lemon-yellow surfaces that retain much original mint luster. Population: 8 in 58, 2 finer (12/16). NGC ID# 265L, PCGS# 8682

5116 1891 MS62+ PCGS. CAC. Original, frosty orange-gold luster shows tinges of rose-red and tangerine through each side. The strike is sharp, and scattered light abrasions are not bothersome. The Plus designation and CAC green label boost the appeal. Finer 1891 eagles are scarce. NGC ID# 266T, PCGS# 8719

5117 1891-CC AU55+ PCGS. Variety 1-A. The surfaces show light, even reddish patina with noticeable, bright portions of mint luster showing around the margins. An obviously original coin. NGC ID# 266U, PCGS# 8720

5118 1892-CC Tripled Die Reverse, FS-801, AU53 PCGS. Variety 1-A. A partly lustrous caramel-gold example with moderate marks confined to the field above the eagle's neck. Scarcer than its 1891 Carson City immediate predecessor. All 1892-CC tens were struck from the same reverse die, which exhibits a tripled IN GOD WE TRUST. Two obverse varieties exist, with the lightly repunched date Variety 1-A more available than the normal date Variety 2-A. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

5119 1892-S MS63 NGC. CAC. The 1892-S is underrated as a whole. All examples are scarce, and finer survivors that this are extremely rare. Glints of green and rose complement yellow-gold color. A strong impression softens a touch over a few of the higher points of the design. Census: 22 in 63, 2 finer. CAC: 3 in 63, 0 finer (12/16). NGC ID# 266Y, PCGS# 8724

5120 1893 MS64+ PCGS. Hints of peach-orange accent frosty yellow-gold surfaces on this high-end Choice 1893 Liberty eagle. The strike is bold, and there are no major abrasions. PCGS reports only 12 finer examples (1/17), which are far out of reach for the average collector. NGC ID# 266Z, PCGS# 8725

5121 1893 MS64+ PCGS. Shimmering peach-gold luster gives this high-end near-Gem exquisite eye appeal, while a lack of severe abrasions endorses the grade. The 1893 eagle is available in this grade, but PCGS has seen only a dozen finer representatives (1/17). NGC ID# 266Z, PCGS# 8725

1893-CC Liberty Eagle, AU53
Final Carson City Eagle

5122 1893-CC AU53 NGC. Variety 1-A. A meager mintage of 14,000 Liberty eagles was struck at the Carson City Mint in 1893, the final year of coinage operation at the fabled Western facility. This impressive AU53 specimen shows just a touch of wear on the high points of the well-detailed design elements, and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 2672, PCGS# 8726

5123 1893-S MS63 NGC. An impressive Select example of this popular issue, which is seldom seen in higher grades. This sharply detailed specimen exhibits lustrous orange-gold surfaces with only scattered, minor signs of contact. Census: 18 in 63, 3 finer (12/16). NGC ID# 2674, PCGS# 8728

5124 1893-S MS63 PCGS. The caramel-gold surfaces are well-struck, and marks are moderate aside from a cluster below the hairbun. The 1893-S is a better, low-mintage issue that is virtually unobtainable above the MS63 level, where only four coins are certified finer at PCGS (1/17). NGC ID# 2674, PCGS# 8728

5125 1896-S MS62 PCGS. The underrated 1896-S is very rare at this grade level and extremely so any finer. Although incompletely struck, the motifs display good detail. Yellow-gold surfaces feature radiant frost and small marks throughout. Population: 29 in 62, 7 finer (1/17). NGC ID# 267C, PCGS# 8736

5126 1898 MS64+ PCGS. CAC. This lovely near-Gem exhibits impressive frosty orange-gold luster with bold design motifs. The eye appeal is outstanding and the surfaces are virtually mark free. Population: 75 in 64 (2 in 64+), 11 finer. CAC: 19 in 64, 4 finer (1/17). NGC ID# 267G, PCGS# 8740

5127 1899 MS64+ PCGS. An attractive end-of-the-century Liberty eagle, with slightly subdued mint luster and well-detailed design elements. The well-preserved orange-gold surfaces of this Plus-graded Choice example add to the pleasing overall presentation. NGC ID# 267J, PCGS# 8742

5128 1899 MS64+ PCGS. CAC. Frosty orange-gold luster revolves around minimally marked surfaces on this CAC-approved high-end near-Gem. The strike is sharp, and finer representatives of the date are scarce. NGC ID# 267J, PCGS# 8742

1899 Liberty Eagle, MS65
Rarely Seen Finer

5129 1899 MS65 PCGS. From a large mintage of 1.2 million pieces, the 1899 Liberty eagle is an abundant issue in grades up to MS64, but MS65 examples are very scarce, and finer coins are definitely rare. This attractive Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster on both sides. Population: 49 in 65 (5 in 65+), 6 finer (1/17). NGC ID# 267J, PCGS# 8742

5130 1901 MS64 PCGS. An orange-gold near-Gem that offers potent luster and a bold strike. The reverse is well preserved, and the obverse displays only unimportant contact. A popular Liberty type issue. Certified in a green label holder. NGC ID# 7LHF, PCGS# 8747

5131 1901 MS64+ PCGS. Frosty wheat-gold luster yields hints of pale rose over the interiors, giving this high-end Choice 1901 eagle excellent visual appeal. The strike is sharp, and abrasions are minimal. NGC ID# 7LHF, PCGS# 8747

5132 1901-S MS64+ NGC. CAC. Spidery die cracks join sharply defined stars and reverse legends. The interior motifs are well-struck, too. Yellow-gold surfaces emit glistening luster and display minimal marks, the obverse in particular. Eye appeal is top-notch for this S-mint eagle. NGC ID# 267S, PCGS# 8749

5133 1902 MS62 NGC. Rose-gold surfaces show a faint hint of semiprooflike reflectivity in the fields, but contrast is minimal against razor-sharp motifs. Numerous bagmarks limit the grade. The 1902 claims a mintage of just 82,400 coins. NGC ID# 267T, PCGS# 8750

5134 1902-S MS64+ PCGS. A Plus-graded Choice representative of this popular issue, with well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is excellent. NGC ID# 267U, PCGS# 8751

5135 1906-O MS62 PCGS. Variety 1. A lustrous and boldly struck orange-gold example. A single line on the cheek and small field marks near the chin determine the grade. The final New Orleans ten dollar issue is low mintage and conditionally scarce, similar to preceding O-mint issues. NGC ID# 53FB, PCGS# 8761

INDIAN EAGLES

5136 1907 No Motto MS62 NGC. A satiny Mint State Indian eagle, this piece has lustrous light yellow surfaces with trivial microscopic marks. An excellent example of the two-year No Motto type. NGC ID# 28GF, PCGS# 8852

5137 1907 No Motto MS63 PCGS. An impressive Select specimen from the first year of the Indian design, with the short-lived No Motto motif, this coin exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's hair and the eagle's shoulder. The lustrous orange-gold surfaces are lightly marked, suggestive of a higher grade. NGC ID# 28GF, PCGS# 8852

5138 1907 No Motto MS63 PCGS. A well-struck, satiny Select example with bright yellow-gold luster and only minor abrasions. A coppery alloy spot appears at 2 o'clock on the obverse, serving as a pedigree marker. NGC ID# 28GF, PCGS# 8852

1907 Indian Eagle, MS64
First-Year, No Motto Type Issue

- 5139 1907 No Motto MS64 PCGS.** This 1907 Indian eagle represents the popular, but short-lived, No Motto design, the closest business-strike approximation to Augustus Saint-Gaudens' original concept. This attractive Choice specimen is well-detailed, with a touch of the usual softness on the hair and headdress feathers. The well-preserved orange-gold surfaces are brightly lustrous and appealing. NGC ID# 28GF, PCGS# 8852

1908 No Motto Ten, MS62
Small Mintage of 33,500 Coins

- 5140 1908 No Motto MS62 NGC.** Faint traces of green and rose hues complement this pleasing No Motto eagle, one of only 33,500 such coins struck at the Philadelphia Mint before July 1, 1908. That total represents the second-lowest regular-issue mintage in the Saint-Gaudens series after the 1911-D. The highest points of the design are typically impressed. Tiny ticks are scattered over each side, many of them well-hidden within the headdress. NGC ID# 28GG, PCGS# 8853

1908 Indian Ten, MS64
With Motto Type

- 5141 1908 Motto MS64 PCGS.** The IN GOD WE TRUST motto was left off the initial Saint-Gaudens design for the Indian eagles, but was restored in 1908, a date that exists in both styles. Representing the first year of the design for type collectors, this Choice Mint State piece has pleasing surfaces and frosty orange-gold luster. NGC ID# 28GJ, PCGS# 8859

1908-S Indian Ten, AU58
First Year 'With Motto' Eagle

- 5142 1908-S AU58 PCGS.** A briefly circulated example of the first San Francisco Indian ten, sharply struck with a fine-grained texture to the surfaces that retain considerable soft mint luster. Light abrasions are scattered across the high points, but they require a lens for viewing as there are no heavy marks. Pale olive-gold color covers both sides of this moderately available, low-mintage issue, important as the first year with the motto added to the series. NGC ID# 28GL, PCGS# 8861

- 5143 1908-S — Improperly Cleaned — NGC Details. Unc.** The 1908-S has one of the lowest mintages of the Indian eagle series. Fewer than 60,000 pieces were struck. This unworn caramel-gold example displays cartwheel sheen and is surprisingly free from bagmarks. Hairlines are present but difficult to discern, even upon close examination.

- 5144 1910 MS64+ PCGS.** From a production of 318,500 coins, this wheat-gold 1910 eagle is on the cusp of a full Gem assessment. The fields are remarkably smooth and unabraded. A couple of thin grazes are seen but are of no significance. Minor softness occurs over the forecurls, while detail elsewhere is pinpoint-sharp. NGC ID# 28GR, PCGS# 8865

- 5145 1910 MS64+ PCGS.** The lowest feathers on the Indian's headdress exhibit full strike detail, just one indication of the sharp impression seen throughout. Coruscating frost combines with pale yellow-gold and lilac tones, explaining this near-Gem's splendid aesthetic quality. The 1910 becomes very scarce in MS65. NGC ID# 28GR, PCGS# 8865

- 5146 1910-D MS64+ PCGS.** The design elements show a good strike, and the fields offer satiny yellow-gold luster. Grade-limiting abrasions are minor, as the Plus designation suggests. The 1910-D is plentiful in MS64 but elusive any finer. NGC ID# 28GS, PCGS# 8866

- 5147 1910-S MS62 PCGS. Breen-7114.** The mintmark is repunched, with the curve of a prior mintmark visible northwest. Breen called the variety "extremely rare," but most examples have likely been overlooked by both dealers and collectors. This is a lustrous caramel-gold representative with lightly marked surfaces aside from contact on the cheek. NGC ID# 268D, PCGS# 8867

- 5148 1912 MS64+ PCGS.** Available in MS64 but scarce in Gem condition. This is a coveted Plus-graded near-Gem with a sharp strike and frosty wheat-gold luster. A small tick on the neck and a few others on the eagle contribute to the grade. PCGS reports 53 finer submissions (1/17). NGC ID# 28GW, PCGS# 8871

1913-S Indian Eagle, AU58
Low-Mintage, Early Series Issue

5149 1913-S AU58 PCGS. CAC. Only 66,000 Indian eagles were struck at the San Francisco Mint in 1913, making the issue elusive in any condition, and one of the most difficult coins of the series to locate in high grade. This attractive near-Mint example shows just a trace of high-point wear on the well-detailed design elements and the lustrous orange-gold surfaces are lightly abraded. NGC ID# 28GZ, PCGS# 8874

5150 1914-D MS63 PCGS. A well-struck 1914-D Indian eagle, showing satiny yellow-gold luster with light, scattered abrasions that determine the grade. This is a scarce date in high grade but remains accessible at the current level. NGC ID# 28H3, PCGS# 8876

5151 1915 MS64 NGC. The 1915 is an ideal type in the Saint-Gaudens series. This near-Gem offers radiant sun-gold tones with splashes of lovely lavender color. Each side is awash in vibrant luster and strongly defined. A small grease mark occurs above UR in PLURIBUS. NGC ID# 28H5, PCGS# 8878

1915-S Saint-Gaudens Eagle, AU55
Surprisingly Elusive, Low Mintage

5152 1915-S AU55 PCGS. A mintage of 59,000 coins makes this San Francisco issue a semikey in the Indian Head series. Examples are surprisingly difficult to locate at this grade level, appearing infrequently at auction. This Choice AU ten dollar has the look of finer coin with little apparent friction and smooth surfaces. Frosty, boldly struck, with deep honey-gold tones. NGC ID# 28H6, PCGS# 8879

5153 1926 MS64+ PCGS. Deep hues of orange-gold blend with glimmering frost. Elements of lavender add to the appeal. A tick behind Liberty's eye and another in the field above PL(URIBUS) account for the grade. Well-detailed and great for type purposes. NGC ID# 28H9, PCGS# 8882

5154 1932 MS64+ PCGS. The 1932 Indian eagle is an available issue in high grade and a popular choice of type collectors. This Plus-graded Choice example is well-detailed and well-preserved, with lustrous orange-gold surfaces. Eye appeal is outstanding. NGC ID# 28HB, PCGS# 8884

5155 1932 MS64+ PCGS. The 1932 is a go-to type coin among Saint-Gaudens tens, and this glowing near-Gem would serve that purpose well. Luminous pale gold color and strong detail appear throughout. There are a couple of marks near Liberty's temple that preclude an even higher grade. NGC ID# 28HB, PCGS# 8884

5156 1932 MS64+ NGC. CAC. The 1932 makes for the perfect type coin. Examples are usually well-produced and always accessible in high grades. This is a gorgeous near-Gem with luminous frost and lavender-gold accents. Well-struck with an exceptionally clean obverse. That added designations from CAC and PCGS are entirely appropriate. NGC ID# 28HB, PCGS# 8884

5157 1932 MS64+ PCGS. CAC. A bold strike shows hint of incompleteness on the 1 and the two lowest headdress feathers. Glowing luster issues from attractive peach and green-gold surfaces. A loupe reveals scattered ticks that preclude a full Gem grade. The 1932 is the final collectible year in the series. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1851 Liberty Double Eagle, AU55
Popular Type One Representative

5158 1851 AU55 PCGS. CAC. From a large mintage of more than 2 million pieces, the 1851 Liberty double eagle is a popular choice among type collectors seeking an example of the Type One design. This pleasing Choice AU specimen shows just a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces display traces of original mint luster on both sides. NGC ID# 268H, PCGS# 8904

1852 Liberty Double Eagle, AU53

5159 1852 AU53 PCGS. CAC. From a large mintage of 2 million pieces, the 1852 Liberty double eagle is a relatively available early series issue. The still-lustrous orange-gold surfaces of this attractive AU53 specimen exhibit the expected number of minor contact marks for the grade, and the well-detailed design elements show just a touch of wear on the high points of the devices. NGC ID# 268K, PCGS# 8906

5160 1854 Small Date AU50 PCGS. Peach-gold luster fills the legends and illuminates the eagle. The olive-gold fields are moderately marked near Liberty's profile. Clashed from the rays behind the neck curls. The 1854 Small Date is usually encountered in XF and AU grades. NGC ID# 268R, PCGS# 8911

5161 1854 Small Date AU53 NGC. A butter-gold double eagle with plentiful pockets of mint luster. Minor abrasions are distributed, but none merit individual discussion. The 1854 mintage was lower than the preceding three Philadelphia issues of the denomination, perhaps due to the advent of the San Francisco Mint. NGC ID# 268R, PCGS# 8911

1855-S Twenty Dollar, AU55
Second-Year San Francisco Emission

- 5162 1855-S AU55 NGC. CAC.** Medium S. Although unattributed as such, this Choice AU No Motto double eagle has the look of one of the 304 1855-S twenties recovered from the S.S. *Central America* and appears to be SSCA Variety 14D. Frosty luster issues from lilac and orange-gold surfaces that house a number of small, unimportant marks. The motifs are boldly struck for the type, including fully star radials and crisp feather definition. A couple of digs occur around the obverse. CAC: 21 in 55, 43 finer (12/16). NGC ID# 268X, PCGS# 8916

1855-S Liberty Twenty, AU58
Nice Color and Luster

- 5163 1855-S AU58 PCGS.** Like most Type One double eagles, the 1855-S was very rare in high grade before the recovery of the S.S. *Central America* and the S.S. *Republic*. Fortunately, more than 350 examples were recovered from those famous shipwrecks, many in high grade, making the 1855-S much more available today. This attractive near-Mint specimen offers lustrous, lightly abraded orange-gold surfaces and well-detailed design elements, with just a trace of wear. Population: 69 in 58 (1 in 58+), 28 finer (1/17). NGC ID# 268X, PCGS# 8916

- 5164 1856-S XF45 PCGS. Variety 17O.** Struck from a die pair associated with the S.S. *Central America* shipwreck, though the provenance of the present lot is unknown. The caramel-gold surfaces have a slight matte texture and retain noticeable luster. Minor marks are scattered and inoffensive. NGC ID# 2692, PCGS# 8919

- 5165 1856-S AU53 NGC.** An apricot-gold third-year San Francisco double eagle. Luster is especially prevalent across the reverse border. A few small gray spots are noted on the reverse, but marks are relatively minor for the grade and denomination. NGC ID# 2692, PCGS# 8919

1856-S Twenty Dollar, AU58
Collectible No Motto Representative

- 5166 1856-S AU58 NGC.** Pale yellow-gold coloration and frosty luster combine across this strongly defined double eagle. Myriad abrasions occur over each side, including two notable marks near the eye and around star 10. A total of 59 and 1,085 examples of the 1856-S were recovered from the S.S. *Republic* and S.S. *Central America*, respectively. Accordingly, representatives of this S-mint issue rank among the most collectible Type One twenties. NGC ID# 2692, PCGS# 8919

1856-S Liberty Twenty, AU58
Exceptional Type Coin

- 5167 1856-S AU58 PCGS.** Before the era of modern shipwreck finds, the 1856-S Liberty double eagle was almost always found in circulated grades, but more than a thousand examples were recovered from the wreck of the S.S. *Central America* alone, making the 1856-S one of the most available Type One issues in high grade. This attractive near-Mint specimen offers sharply detailed design elements, with just a trace of wear, and lightly abraded orange-gold surfaces that retain much original mint luster. Population: 61 in 58 (1 in 58+), 53 finer (1/17). NGC ID# 2692, PCGS# 8919

1857 Twenty Dollar, AU55
Reddish and Green-Gold Color

- 5168 1857 AU55 NGC.** Attractive and inarguably original, this Choice AU twenty presents rich reddish-gold color with green accents. A bit of rub occurs over the curls, which are otherwise well-detailed. Luster glows from the hidden regions, furthering the eye appeal. Although small marks are peppered over each side, they are not overly deep or detracting. NGC ID# 2693, PCGS# 8920

- 5169 1857-S AU55 NGC.** This light green and yellow-gold No Motto twenty retains glints of original mint luster within the design recesses. The motifs are razor-sharp with a bit of friction over the hair bun. The 1857-S was famously discovered in vast quantities on board the wreckage of the S.S. *Central America*. Nearly all coins were in Uncirculated condition. We can neither confirm nor deny the nautical origin of this Choice AU representative. NGC ID# 2696, PCGS# 8922

1859-S Liberty Twenty, AU50
Popular Type One Example

- 5170 1859-S AU50 PCGS.** From a mintage of 636,445 pieces, the 1859-S Liberty double eagle is a popular Type One issue, easily acquired in lower circulated grades, but seldom seen in Mint State. Of the 67 examples recovered from the wreck of the S.S. *Republic*, only one coin achieved a Mint State grade. This attractive AU specimen is lightly worn and lightly abraded, and the orange-gold surfaces retain traces of original mint luster. NGC ID# 269C, PCGS# 8928

1859-S Double Eagle, AU55
Ideal for a No Motto Date Set

- 5171 1859-S AU55 NGC.** A date set of Type One double eagles is likely to include an example of the 1859-S, for that is the most accessible of the three No Motto twenties produced that year. The Philadelphia and New Orleans coins are significantly rarer. This lightly circulated twenty dollar gold piece offers glints of rose and green-gold. The relief elements are well-detailed for the type, and myriad marks are in line with the grade. NGC ID# 269C, PCGS# 8928

1859-S Liberty Double Eagle, AU55
Vivid, Colorful Surfaces

- 5172 1859-S AU55 PCGS.** Dazzling luster around the perimeter highlights the delightful pumpkin-orange patina that coats the surfaces. The peripheral details are razor-sharp, but Liberty's hair is a bit soft, as often seen. Scattered abrasions do not detract from the impressive eye appeal. The 1859-S can be challenging in high grades.
Ex: *Los Angeles Signature* (Heritage, 8/2009), lot 2695. NGC ID# 269C, PCGS# 8928

1859-S Doubled Die Obverse Twenty, AU58
FS-101, Bold Obverse Die Doubling

- 5173 1859-S Doubled Die Obverse, FS-101, AU58 NGC.** This *Cherrypicker's* variety shows strong doubling on LIBERTY and the portrait, where the eye is broadly doubled and Liberty's curls and profile less obviously so. The current example also shows a sizeable struck-through planchet lamination on the reverse at ST of STATES and within the rays beneath, described as a Mint Error on the holder. Despite the anomaly, this is a remarkably vibrant and frosted twenty with strong mint luster throughout and few marks, abrasions, or wear from circulation. The surface quality certainly suggests a full Mint State coin.

- 5174 1860 AU53 PCGS.** The obverse shows pumpkin toning, while the reverse has lemon patina. This partly lustrous Type One twenty has a good strike and the expected number of small to moderate obverse marks. NGC ID# 269D, PCGS# 8929

- 5175 1860 — Obverse Graffiti — NGC Details. Unc.** A lustrous pumpkin-gold example. Close examination shows the letter X is lightly pinscratched twice, on Liberty's cheek and on the field near her chin. No other marks are remotely relevant, and the NGC designation might be regarded as unduly strict by some observers.

- 5176 1861 XF45 NGC. CAC.** The 1861 Liberty double eagle was produced in large numbers, but the issue circulated heavily and few examples were saved for numismatic purposes. Only light wear shows on the well-detailed design elements of this Choice XF specimen and the orange-gold surfaces are lightly abraded. NGC ID# 269G, PCGS# 8932

**1861 Liberty Twenty, AU58
Colorful, Lustrous Example**

- 5177 1861 AU58 PCGS.** From a large mintage of more than 2.9 million pieces, the 1861 Liberty double eagle is an available issue and a popular choice of collectors seeking an example of the Type One design. This pleasing near-Mint specimen exhibits well-detailed design elements, with just a trace of wear on the high points of the devices. The lustrous orange-gold surfaces show a number of minor, grade-consistent abrasions on both sides. NGC ID# 269G, PCGS# 8932

**1861-S Liberty Double Eagle, AU50
Nice Type One Branch Mint Specimen**

- 5178 1861-S AU50 NGC. CAC.** After a small number of double eagles with the Paquet reverse was struck early in the year at the San Francisco Mint, a substantial mintage of 768,000 Type One gold twenties was accomplished. The 1861-S is easily located in mid-grade circulated condition, but high grade specimens are elusive. This lightly worn AU example offers lustrous, vivid orange-gold surfaces with the expected number of minor abrasions for the grade. NGC ID# 269K, PCGS# 8935

**1861-S Double Eagle, AU53
Abundant Luster Remains**

- 5179 1861-S AU53 NGC.** The year 1861 is significant in the double eagle series. Perhaps best known are the highly desirable Paquet Reverse types struck at the Philadelphia and San Francisco mints. There is also the fact that the Philadelphia Mint production of nearly 3 million pieces would stand as the highest twenty dollar mintage until 1904. In this context, the 1861-S often gets forgotten, but it is scarce in About Uncirculated condition and very rare in Mint State. This lightly circulated, partly lustrous AU53 representative maintains good design detail. Myriad marks are to be expected. NGC ID# 269K, PCGS# 8935

**1863-S Twenty Dollar, AU53
Medium S Mintmark**

- 5180 1863-S AU53 NGC. Breen-7216.** Medium S. An apricot-gold Civil War double eagle with hints of microgranularity. The sole noticeable abrasion is below the second S in STATES. Pockets of luster are particularly plentiful on the reverse. Two mintmark sizes are known for the 1863-S, but the Small S and Medium S are approximately equal in rarity. NGC ID# 269R, PCGS# 8940

- 5181 1864-S VF30 NGC. CAC.** Moderately abraded surfaces display original olive-gold patina and pleasing detail for the grade. The CAC endorsement adds to the appeal of this coin, which is ideal for the collector who appreciates old-time coloration. NGC ID# 269T, PCGS# 8942

- 5182 1866-S Motto XF40 PCGS.** Tall S. An original peach-gold representative with exceptional eye appeal for the XF40 level. The surfaces display fewer than the anticipated number of abrasions, and pockets of luster accompany design elements. NGC ID# 26B2, PCGS# 8950

**1868-S Twenty Dollar, AU55
Choice Natural Appeal**

- 5183 1868-S AU55 PCGS.** Nice eye appeal remains on this briefly circulated San Francisco twenty. Lightly abraded, the surfaces retain both sharp definition and traces of original mint luster. There are no heavy marks, and the medium orange-gold patina provides ample evidence of its natural coloration. A Choice example with generous eye appeal. For most collectors, the 1868-S in About Uncirculated is the optimal grade since Uncirculated pieces are rare and expensive. NGC ID# 26A4, PCGS# 8954

1870-S Liberty Double Eagle, AU58
Attractive Type Two Example

- 5184 1870-S AU58 PCGS.** Like most Type Two double eagles, the 1870-S was produced in large numbers (982,000 pieces), but the issue was widely circulated and few high-grade examples were preserved by contemporary collectors, making the issue very scarce in Mint State grades today. This well-detailed near-Mint specimen shows just a trace of high-point wear and the lustrous orange-gold surfaces exhibit the expected number of minor abrasions for the grade.. NGC ID# 26A9, PCGS# 8959

1870-S Double Eagle, AU58
Lustrous Wheat-Gold Surfaces

- 5185 1870-S AU58 PCGS. CAC. Ex:** Granite Lady Hoard. This 1870-S double eagle was among the cache of coins that survived within the walls of the rock-solid Second San Francisco Mint during the earthquake and fire of 1906. Each side is lustrous with attractive wheat-gold color, both indications of originality. The devices display a typical impression. The certified population declines markedly in Mint State grades. NGC ID# 26A9, PCGS# 8959

1871 Twenty Dollar, AU53
Low-Mintage Type Two Issue

- 5186 1871 AU53 NGC.** The individual strands of Liberty's hair are largely indistinct, but the star radials and eagle's feathers retain strong detail despite a hint of friction. Lively luster glitters from lightly abraded straw-gold surfaces. The Mint reduced double eagle output by a substantial amount in 1871, dropping to 80,120 pieces. That would stand as the lowest P-mint production until 1880. A scarce Type Two issue. NGC ID# 26AA, PCGS# 8960

- 5187 1871-S AU58 PCGS. Micro S.** Exceptional eye appeal is created through nearly full luster, excellent design definition, and minimal surface marks. Heavy abrasions are expected on the open surfaces of these large gold coins, but they are conspicuously absent on this lovely piece. A great opportunity for the specialist or type collector. NGC ID# 26ND, PCGS# 8962

- 5188 1873 Open 3 MS62+ NGC. CAC.** Die doubling is most obvious on LIBERTY but is also discernible along the top of the coronet. This Plus-graded Open 3 double eagle shows radiant, frosty yellow-gold luster and a sharp strike. Light marks in the left obverse field are the primary obstacle preventing a finer grade but pose minimal distraction for the current designation. NGC ID# 26AL, PCGS# 8967

1873 Open 3 Twenty Dollar, MS62
Doubled Die Obverse, FS-101

- 5189 1873 Open 3, Doubled Die Obverse, FS-101, MS62 PCGS. CAC.** Die doubling is evident on LIBERTY. Vibrant, frosty luster and radiant rose-gold coloration are the defining attributes of this marvelous 1873 double eagle. Scattered abrasions appear throughout. The 1873 Open 3 is apt to be found in MS61 to MS62 when found at all in Mint State. Anything finer is rare. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

1873-S Liberty Twenty, AU58
Less Available Open 3 Variant

- 5190 1873-S Open 3 AU58 PCGS. CAC.** Double eagle production was well-underway in 1873 by the time the new Open 3 dies reached the San Francisco Mint, so most S-mint examples of this date show the older Closed 3 design. This well-detailed near-Mint specimen shows an extensive network of die cracks in the reverse legend and the moderately abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 26AM, PCGS# 8979

1874 Liberty Double Eagle, MS60
Popular Type Two in Mint State

- 5191 1874 MS60 PCGS.** A frosted example, lightly abraded but free of any sign of wear. Traces of reflectivity remain in protected areas of the lustrous, sun-gold fields. Elsewhere, brief areas of gray toning and pleasing rose highlights confirm the natural surfaces of this Uncirculated Type Two double eagle. NGC ID# 26AN, PCGS# 8970

5192 1874-CC — Obverse Damage — NGC Details. XF. Variety 3-B. The seldom-encountered Close CC die variety. Most 1874-CC twenties exhibit a widely spaced mintmark. An attempted obverse puncture at 3 o'clock corresponds to the NGC designation. Ample pumpkin-gold luster outlines design elements.

5193 1874-S MS60 NGC. Broad S mintmark. Despite a mintage of more than 1.2 million pieces, the 1874-S Type Two twenty is significantly scarcer in Uncirculated condition than the comparably produced 1875-S and 1876-S double eagles. This frosted, honey-gold example is sharply struck with surprisingly few bagmarks for the grade. Cartwheel mint luster adds to the strong eye appeal. NGC ID# 26AR, PCGS# 8972

5194 1875 MS61 NGC. A splendid representative of the Type Two Liberty double eagle design, this lustrous Mint State piece has trivial grade-consistent marks. This frequently encountered date is ideal for a gold type collection. NGC ID# 2547, PCGS# 8973

5195 1875-CC — Improperly Cleaned — NGC Details. AU. Variety 2-B. The orange-gold and lime-green surfaces are slightly glossy but retain significant luster. A richly detailed representative of this popular Carson City Type Two issue. Abrasions are relatively few given its brief service in the Old West economy.

5196 1875-S MS61 PCGS. An attractive Mint State Type Two double eagle, with well-detailed design elements that show just a touch of softness on some obverse stars. Vibrant mint luster radiates from the vivid orange-gold surfaces that exhibit the expected number of minor contact marks for the grade. NGC ID# 26AU, PCGS# 8975

5197 1876 MS61 NGC. Light Motto, a subtype seen only on a portion of the present issue. This collectible Uncirculated offering would make an ideal representative of the Type Two double eagle design, coming from a mintage of 583,860 coins. A preponderance of frosty luster rolls over this green and rose-gold twenty. The centers are softly struck, as usual. NGC ID# 26AV, PCGS# 8976

5198 1876-S MS62 PCGS. A well-struck example with frosty golden luster that emits warm peach-orange hues in the centers. Scattered light abrasions limit the grade, but finer examples of this date are seldom available. NGC ID# 26AX, PCGS# 8978

5199 1876-S MS62 PCGS. CAC. A lovely peach-gold Type Two twenty whose orange-gold fields and devices are smooth save for a minor cluster of obverse marks near star 12. Sharply struck and coruscating with good eye appeal. The 1876-S is scarce with a CAC seal and becomes a costly acquisition any finer. NGC ID# 26AX, PCGS# 8978

**1877 Twenty Dollar, MS62
Scarcely Found This Well-Preserved**

5200 1877 MS62 PCGS. Although an available Type Three date in the absolute sense, the 1877 double eagle becomes a condition rarity at the MS62 level. This collectible Mint State coin displays a sharp strike and vibrant yellow-gold luster. Light, scattered abrasions define the grade but pose little distraction. There are 18 finer grading events at PCGS (1/17). NGC ID# 2547, PCGS# 8982

**1877-CC Liberty Double Eagle, AU Details
First Type Three Issue**

5201 1877-CC — Cleaning — PCGS Genuine. AU Details. Variety 1-A. The design of the double eagle was modified in 1877, with the denomination spelled out as DOLLARS on the reverse. This was the only major design change for gold coinage that took place during the years when the Carson City Mint was operational. This impressive specimen shows just a trace of wear on the sharply detailed design elements and the lightly abraded orange-gold surfaces retain considerable amounts of original mint luster, despite the noted cleaning. NGC ID# 26AZ, PCGS# 8983

5202 1877-S MS61 PCGS. This San Francisco issue is the most-available first-year Type Three design, by far outnumbering the Carson City and Philadelphia mintages in the number of pieces struck and survival. The 1877-S is readily available through MS62, but scarce in MS63 and rare any finer. This lustrous and original MS61 example displays medium orange-gold toning and a sharp strike, with lightly abraded surfaces and a few deep toning accents. NGC ID# 254B, PCGS# 8984

5203 1878 Doubled Die Reverse MS60 PCGS. Variety 3. Three doubled die varieties are known for the 1878 double eagle. This is the third variety, with doubling most apparent on the base of STATES. The present piece is high-end for its designated grade, since it boasts booming luster, and the sun-gold surfaces show fewer than the expected number of abrasions. NGC ID# 26B3, PCGS# 8985

5204 1878 Doubled Die Reverse MS61 PCGS. Variety 2. Though no doubled die reverse is listed for the 1878 in any standard reference, three different varieties are known. This is the second variety, with doubling strongest on the bases of STATES OF AMERICA. The Motto is also lightly die doubled. The second 8 in the date is repunched, possibly Breen-7269. The varieties are undesignated on the holder. This is a lustrous pumpkin-gold double eagle with a good strike and a bagmark beneath Liberty's eye. NGC ID# 26B3, PCGS# 8985

5205 1879-S MS60 PCGS. The orange-gold and lilac surfaces of this Mint State Type Three double eagle show the expected number of contact marks for the grade, the worst being a long scrape in the left obverse field. The design elements are well-detailed and vibrant mint luster radiates from both sides. NGC ID# 26B9, PCGS# 8991

5206 1880 AU55 NGC. Rose accents complement this green-gold twenty. The motifs are sharp despite trivial high-point blending. Small marks congregate on Liberty's cheek and in the adjacent fields. The 1880 is the only obtainable Philadelphia double eagle from the first seven years of the decade. NGC ID# 26BA, PCGS# 8992

1880 Double Eagle, AU58
Rare in Mint State

5207 1880 AU58 NGC. With fewer than 100 Mint State representatives believed extant, most collectors must opt instead for a high-end About Uncirculated piece like the one offered here. This near-Mint 1880 double eagle, one of only 51,456 coins struck, presents minimal friction and scattered marks over well-detailed, straw-gold surfaces. Plenty of luster remains. NGC ID# 26BA, PCGS# 8992

5208 1881-S MS61 PCGS. For an MS61 coin, this 1881-S double eagle is quite attractive. Sharp design elements reside amid vivid tangerine-orange toning, while the fields emit semiprooflike reflectivity. Abrasions are light and scattered. NGC ID# 26BD, PCGS# 8995

5209 1882-CC — Scratches — NGC Details. AU. Variety 1-B. The fields display fine marks, most apparent near Liberty's shoulder curl. An apricot-gold example of this low mintage Carson City issue. Bagmarks are minimal though we note a speck of aqua residue on the right border of the eagle's tail.

5210 1882-S MS61 PCGS. Breen-7284. Tall S. This California issue is available through MS62, but virtually uncollectible in Select condition or finer. Frosty surfaces show light green and rose-gold color. Each side is sharply struck with a somewhat baggy appearance, typical for the grade. NGC ID# 26BG, PCGS# 8998

5211 1883-CC — Cleaning — PCGS Genuine. AU Details. Variety 2-A. Smooth olive-gold patina blankets this AU-level 1883-CC double eagle. The strike is sharp, and wear is trivial. Hints of luster remain in the protected regions of the fields, and light cleaning on each side is almost unnoticed.

5212 1884-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A. Patches of hairlines along the obverse stars confirms a long-ago cleaning, but this Carson City double eagle displays little if any circulation wear. A nicely struck green-gold representative. Abrasions are minor for the AU level aside from a cluster of small marks on the field near Liberty's chin.

1884-S Liberty Twenty, MS63
Seldom Encountered Any Finer

5213 1884-S MS63 PCGS. From a liberal mintage of 916,000 pieces, the 1884-S Liberty double eagle is an abundant issue in circulated grades, and lower Mint State examples are not too hard to locate, but the issue becomes rare above MS63. This sharply detailed Select specimen exhibits lustrous orange-gold surfaces with a scattering of minor contact marks on both sides. PCGS has graded 28 numerically finer examples (1/17). NGC ID# 26BL, PCGS# 9002

1889 Double Eagle, MS62
Exceedingly Rare in Finer Grades

5214 1889 MS62 PCGS. The highest collectible grade for the 1889 double eagle is MS62. Anything finer becomes rare for this low-mintage issue of 44,000 coins. Each side displays blended hues of rose and green-gold. Frosty luster shimmers over lightly marked surfaces. Heavy clash marks appear on the reverse. PCGS reports 31 finer submissions (1/17). NGC ID# 2695, PCGS# 9010

1889-CC Double Eagle, XF45
Affordable Collector Grade

5215 1889-CC XF45 PCGS. Variety 1-A. Although visited by the expected number of bagmarks and abrasions from transport and circulation, this Choice XF double eagle shows pleasing antique-gold color with orange accents surrounding the straw-gold fields and motifs. The resumption of coinage operations at the Carson City Mint resulted in low mintages of both silver dollars and double eagles, yet the twenty dollar pieces are more readily acquired according to demand. NGC ID# 26BV, PCGS# 9011

1890-CC Liberty Twenty, AU Details
Popular Branch Mint Type Coin

5216 1890-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A. From a mintage of 91,209 pieces, the 1890-CC Liberty double eagle is not too difficult to locate in AU through lower Mint State grades, making it a popular choice of branch mint type collectors. This well-detailed specimen shows AU sharpness on the design elements and the pleasing orange-gold surfaces are lightly abraded throughout. The luster is slightly dimmed by the noted cleaning, but the overall presentation remains quite attractive.

**1892-S Twenty Dollar, MS63 ★
Exceptional Eye Appeal**

- 5217 1892-S MS63 ★ NGC.** This eye-catching Select twenty dollar gold piece features a semiprooflike obverse and a lustrous reverse with green and rose-gold hues throughout. The hair strands, stars, and feathers showcase pinpoint detail. Shallow grazes and reeding marks are seen on each side but are of little import relative to the phenomenal eye appeal for which NGC has awarded a Star. Higher-graded examples are very scarce. NGC ID# 26C7, PCGS# 9021

**1892-S Double Eagle, MS62 Prooflike
Extremely Rare with Bold Contrast**

- 5218 1892-S MS62 Prooflike NGC.** This MS62 double eagle is tied for the finest Prooflike 1892-S twenty we have offered since 2005. Only a handful of similarly contrasted representatives have been made available publicly since that time, according to our Permanent Auction Archives. Deep orange-gold color blankets reflective fields and partly frosted, fully struck devices. Myriad abrasions appear over each side. Census: 4 in 62 Prooflike, 0 finer (1/17). NGC ID# 26C7, PCGS# 79021

1893-S Double Eagle, Peach-Gold MS63

- 5219 1893-S MS63 PCGS.** The fields are surprisingly smooth for the technical assessment, and no major marks appear on Liberty's cheek. Small abrasions are peppered throughout but are of little consequence. Frosty luster issues from this peach-gold Select Uncirculated double eagle. Well-struck with moderate softness on the hair curls. NGC ID# 26CA, PCGS# 9024

1893-S Liberty Double Eagle, MS63

- 5220 1893-S MS63 PCGS.** The 1893-S Liberty double eagle was produced in large numbers and the issue is easily located in grades up to the MS63 level, but finer examples are very scarce. This attractive Select specimen offers well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster on both sides. PCGS has graded 62 numerically finer examples (1/17). NGC ID# 26CA, PCGS# 9024

**1893-S Liberty Twenty, MS63+
Scarce in Higher Grades**

- 5221 1893-S MS63+ PCGS. CAC.** The 1893-S Liberty double eagle was produced in large numbers, but many coins were used in foreign trade and few high-quality examples were saved for numismatic purposes. Accordingly, the 1893-S is seldom encountered above the MS63 grade level. This Plus-graded Select specimen offers well-detailed design elements and lightly marked, lustrous surfaces. NGC ID# 26CA, PCGS# 9024

- 5222 1895 MS64 NGC.** Sharp devices complement partially reflective fields on this Choice 1895 double eagle. The surfaces display pleasing yellow-gold coloration with only a few light marks on Liberty's cheek. NGC has seen only 11 numerically finer 1895 double eagles (1/17). NGC ID# 26CD, PCGS# 9027

- 5223 1896-S MS63+ PCGS.** A sharp strike complements satiny yellow-gold mint luster on this eye-appealing 1896-S double eagle. Faint surface grazes on the cheek and in the adjacent field limit the grade, but the Plus designation is fully warranted. The 1896-S is available through MS63 but becomes elusive in finer grades. The present coin will appeal to the budget-conscious collector. NGC ID# 26CG, PCGS# 9030

**1897 Liberty Double Eagle, MS64
Vivid Color, Vibrant Luster**

- 5224 1897 MS64 PCGS.** The 1897 Liberty double eagle claims a substantial mintage of 1.3 million pieces, making it an available date and a popular type coin. The vivid orange-gold surfaces of this attractive Choice example radiate vibrant mint luster and show only minor signs of contact. The design elements are sharply detailed and eye appeal is terrific. PCGS has graded eight numerically finer examples (1/17). NGC ID# 26CH, PCGS# 9031

**1897-S Liberty Twenty, MS64
Seldom Seen in Higher Grades**

- 5225 1897-S MS64 NGC. CAC.** From a substantial mintage of 1.4 million pieces, the 1897-S Liberty double eagle can be located in grades up to MS64 with some patience, but finer examples are condition rarities. This attractive Choice specimen is sharply detailed in most areas, with just a touch of softness on some star centers. The lustrous orange-gold surfaces show only minor signs of contact and eye appeal is outstanding. NGC has graded 20 numerically finer examples (12/16). NGC ID# 26CJ, PCGS# 9032

**1897-S Double Eagle, MS64+
Conditionally Scarce, Seldom Finer**

- 5226 1897-S MS64+ NGC. CAC.** The frosty surfaces of this highly lustrous San Francisco twenty shows only minuscule marks and displays a needle-sharp strike — factors that contribute to the NGC Plus designation and the accompanying CAC endorsement. If anything, near-Gem piece seems poised for an even finer grade, since the eye appeal is terrific and its technical merit is clearly evident. Census: 24 in 64+, 3 in 64★, 20 finer. CAC: 60 in 64, 2 finer (1/17). NGC ID# 26CJ, PCGS# 9032

- 5227 1899 MS64+ PCGS. CAC.** This is a sharp, frosty example with well-preserved yellow-gold luster. The Plus designation and CAC green label make the coin highly appealing, especially since only 30 finer representatives are reported by PCGS (1/17). NGC ID# 26CM, PCGS# 9035

- 5228 1899-S MS63+ PCGS.** Despite a mintage of more than 2 million coins, the 1899-S becomes scarce in grades finer than the coin offered here. Elements of green and rose join the medium yellow-gold coloration that adorns each sharply struck side. Highly lustrous and well-preserved for the Select Uncirculated assessment. NGC ID# 26CN, PCGS# 9036

- 5229 1900 MS64+ NGC.** A Plus-graded Choice specimen of this popular turn-of-the-century issue, with well-detailed design elements that show just a touch of the usual softness on Liberty's curls, and well-preserved reddish-gold surfaces with only minor signs of contact. NGC ID# 26CP, PCGS# 9037

- 5230 1901 MS64 PCGS.** This near-Gem representative presents a single noteworthy tick on the cheek, but other marks are shallow and undistracting. A fully struck and peach-gold Liberty Head type coin with scintillating luster. NGC ID# 26CS, PCGS# 9039

- 5231 1903 MS64 PCGS.** Satiny straw-gold luster gives this Choice 1903 double eagle a traditional look for the issue, complete with a hint of reflectivity in the fields. The strike is sharp, and abrasions are minimal. The eye appeal is excellent for the grade. NGC ID# 26CW, PCGS# 9043

- 5232 1903 MS64 PCGS. CAC.** An absence of alloy spots and Choice semireflective, smooth fields make this near-Gem 1903 twenty with CAC endorsement an obvious winner. The lustrous, yellow-gold surfaces are well-struck and minimally abraded. The mintage of 1903 double eagles was a fraction of many of the surrounding dates at just 287,200 pieces struck. NGC ID# 26CW, PCGS# 9043

- 5233 1904 MS64 PCGS. CAC.** A lovely sea-green and pumpkin-orange Liberty twenty type coin. Sharply struck and lustrous with exceptionally smooth surfaces for the designated third-party grade. Housed in a green label holder. NGC ID# 26CY, PCGS# 9045

- 5234 1904 MS64+ PCGS. CAC.** A Plus-graded Choice example of this popular type issue, with sharply detailed design elements and especially vibrant mint luster throughout. The attractive orange-gold surfaces show no mentionable distractions and eye appeal is terrific. NGC ID# 26CY, PCGS# 9045

- 5235 1904 MS64+ NGC. CAC.** On the cusp of an even higher assessment, this near-Gem type coin presents glowing, frosty luster that issues from eye-appealing honey-gold surfaces. Each side is smooth with just a couple of reeding marks on the chin. NGC ID# 26CY, PCGS# 9045

**1904 Liberty Twenty, MS65
Green-Label Holder**

- 5236 1904 MS65 PCGS.** The strike on this uncommonly well preserved Gem is razor-sharp, and the shimmering surfaces are bathed in lovely mint-green and light orange toning. Flashy and highly attractive, with dynamically radiant fields. Minimally marked on both sides. An ideal candidate for a 20th century gold type set. NGC ID# 26CY, PCGS# 9045

**Gem 1904 Double Eagle
Quintessential Type Coin**

- 5237 1904 MS65 PCGS.** This glimmering Gem 1904 double eagle is an ideal type coin, showing frosty yellow-gold luster and beautifully smooth surfaces. A few faint grazes on Liberty's cheek are all that preclude an even finer grade. Eye appeal is outstanding. The 1904 is famously available in most grades, but coins grading higher than this Gem are scarcely seen. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65+
Ultimate Type Candidate**

- 5238 1904 MS65+ PCGS.** No other Liberty Head double eagle can match the availability of the 1904 in high grades — the result of a 6.2-million coin mintage. That makes it the ultimate choice for type purposes. This Plus-designated Gem is fully struck and thickly frosted with marvelous orange-gold coloration. Exceptionally clean fields. NGC ID# 26CY, PCGS# 9045
- 5239 1906-S MS63 PCGS.** A flashy piece with pale sun-gold surfaces. Well-struck on the peripheral elements, though Liberty's hair shows a degree of softness. Still, an attractive Select Uncirculated coin well-suited for gold specialists and type collectors alike. NGC ID# 26F6, PCGS# 9051

1907-D Twenty Dollar, Honey-Gold MS63

- 5240 1907-D MS63 NGC.** The Denver Mint was responsible for the production of 842,250 double eagles in 1907, its second year of operation. This is a splendid Select Uncirculated example with satiny luster over smooth, honey-gold surfaces. Razor-sharp with merely a few microscopic marks on the cheek. NGC ID# 26D8, PCGS# 9053

**1907-D Liberty Twenty, MS63
Popular Final-Date Type Coin**

- 5241 1907-D MS63 NGC.** The 1907-D double eagle represents the final year of the Liberty design, an important consideration for branch mint type collectors. From a mintage of 842,250 pieces, the 1907-D is reasonably available in high grade, indicating the issue may have been saved by contemporary collectors for its novelty value. This impressive Select specimen offers sharply detailed design elements throughout, and the lustrous peach-gold surfaces show a few scattered, minor contact marks. NGC ID# 26D8, PCGS# 9053

**1907-D Liberty Twenty Dollar, MS64
Clean, Orange-Gold Surfaces**

- 5242 1907-D MS64 NGC.** Satin luster abounds over this Choice Uncirculated double eagle, one of 842,250 twenty dollar gold pieces struck at the Denver Mint in the series' final year. Sharp relief elements, clean fields, and medium orange-gold color characterize each side. An appealing two-year type coin from the Colorado facility. NGC ID# 26D8, PCGS# 9053

**1907-D Liberty Double Eagle, MS64+
Final-Year Branch Mint Type Coin**

- 5243 1907-D MS64+ PCGS. CAC.** From a mintage of 842,250 pieces, the 1907-D double eagle represents the last year of the long-lived Liberty design. This Plus-graded Choice specimen offers sharply detailed design elements and vibrant mint luster throughout. The well-preserved orange gold surfaces enhance the terrific overall eye appeal. NGC ID# 26D8, PCGS# 9053

SAINT-GAUDENS DOUBLE EAGLES

- 5244 1907 Arabic Numerals MS64 PCGS.** Frosty yellow-gold luster illuminates well-preserved surfaces, while the design elements exhibit good definition. This was the first issue of the low-relief design, issued after the Mint's failure to efficiently mass-produce the original High Relief models. NGC ID# 26F5, PCGS# 9141

5245 1908-D No Motto MS64 NGC. Long Rays Obverse. A lustrous, nicely struck, and carefully preserved pumpkin-gold near-Gem of the briefly coined No Motto type. This issue is scarcer in better Mint State grades than its prevalent Philadelphia counterpart. NGC ID# 26F7, PCGS# 9143

5246 1908-D Motto MS64 NGC. The 1908-D Motto twenties are about as available as their No Motto brethren despite a mintage nearly 50% smaller. This is a pleasing, well-struck example with apricot-gold color and hints of rose. Satiny luster swirls undisturbed over each side. NGC ID# 26F9, PCGS# 9148

5247 1909/8 FS-301 AU58 PCGS. CAC. Satiny orange-gold surfaces offer modest cartwheel luster on this near-Mint overdate double eagle. The strike is bold, and each side shows only grade-consistent light chatter. A pleasing example of this popular *Guide Book* variety. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

5248 1909 MS62 PCGS. Bright yellow-gold luster complements well-struck design elements on this Mint State 1909 Saint-Gaudens double eagle. Scattered abrasions limit the grade, but the overall eye appeal is pleasing. The 1909 comes from a small mintage of little more than 161,000 pieces. NGC ID# 26FC, PCGS# 9150

5249 1909-S MS64 PCGS. The orange and reddish-gold surfaces of this attractive Choice specimen radiate vibrant mint luster on both sides, with only minor signs of contact. The design elements are well-detailed and overall eye appeal is outstanding. NGC ID# 26FE, PCGS# 9153

5250 1909-S MS64 PCGS. From a large mintage of 2.7 million pieces, the 1909-S Saint-Gaudens double eagle is a popular branch mint type coin. This impressive Choice specimen displays well-preserved orange-gold surfaces with vibrant mint luster throughout, and well-detailed design elements. NGC ID# 26FE, PCGS# 9153

5251 1909-S MS64+ NGC. This is a fully struck, peach-gold double eagle that inarguably merits the Plus designation for quality within the grade. Minimally marked surfaces radiate swirling frost typical of the San Francisco branch mint. The 1909-S becomes scarce in higher grades. NGC ID# 26FE, PCGS# 9153

5252 1909-S MS64+ NGC. A Plus-graded Choice specimen of this popular branch mint issue, with well-detailed design elements that show a touch of softness on the fingers and torch. The yellow and reddish-gold surfaces are well-preserved and lustrous, with ample eye appeal. NGC ID# 26FE, PCGS# 9153

5253 1910 MS64 PCGS. The fingers on Liberty's torch hand are fully delineated, while the Capitol dome shows minor merging. Lively luster coalesces with attractive peach-gold coloration, delivering wonderful visual appeal. The certified population falls precipitously in higher grades. NGC ID# 26FF, PCGS# 9154

5254 1910 MS64 PCGS. This well-struck near-Gem displays vibrant orange-gold mint luster with vivid coloration. A loupe reveals only light, grade-consistent marks, none individually significant. Finer examples of the 1910 double eagle are scarce. NGC ID# 26FF, PCGS# 9154

5255 1911 MS63 NGC. This attractive Select specimen offers well-detailed design elements and vivid orange-gold surfaces that show a scattering of minor contact marks and vibrant mint luster on both sides. From a mintage of 197,200 pieces. NGC ID# 26FK, PCGS# 9157

5256 1913 MS62 NGC. The average certified example grades between MS61 and MS62, speaking to the challenging nature of the 1913 in the higher levels of Uncirculated condition. This khaki-gold twenty is well-struck but expectedly bagmarked. Luster is softly frosted. NGC ID# 26FN, PCGS# 9161

5257 1913 MS62 NGC. This MS62 twenty is minimally abraded for the assigned grade and has the appearance of a finer coin, with glittering mint luster and attractive rose and green-gold coloration. The Capitol rows and columns are crisply defined. NGC ID# 26FN, PCGS# 9161

5258 1913 MS63+ PCGS. From a relatively low mintage of 168,700 pieces, this Plus-graded Select specimen exhibits well-detailed design elements and vivid orange-gold surfaces that show some scattered, minor contact marks on both sides. Vibrant mint luster adds to the considerable eye appeal. NGC ID# 26FN, PCGS# 9161

1913 Saint-Gaudens Double Eagle, MS63+ Lower-Mintage, Pre-War Issue

5259 1913 MS63+ PCGS. CAC. A smallish mintage of 168,780 Saint-Gaudens double eagles was accomplished at the Philadelphia Mint in 1913, as movement of gold in foreign exchange dwindled with the approach of World War I. This Plus-graded Select specimen exhibits well-detailed design elements and lustrous orange-gold surfaces with some scattered minor contact marks and luster grazes. NGC ID# 26FN, PCGS# 9161

5260 1913-D MS64 PCGS. Warm shades of sun-gold adorn the border areas on each side, turning to lighter rose-gold hues at the centers. This Choice Uncirculated double eagle boasts good detail and few marks, but the satiny mint luster is undeniably its most appealing quality. NGC ID# 26FP, PCGS# 9162

5261 1914-D MS65 NGC. Although plentiful in this grade, the 1914-D Saint-Gaudens double eagle is seldom seen finer. The present Gem example displays a sharp strike and impressively vibrant tangerine-orange luster. Abrasions are trivial and pose little distraction. NGC ID# 26FT, PCGS# 9165

1914-D Double Eagle, MS65 Radiant Mint Luster

5262 1914-D MS65 PCGS. The granular surfaces this and other issues from the teens are known for is no impediment to the radiant mint frost that glows over both sides. Rich reddish-tinted golden color is seldom interrupted by abrasions. Definitely a conservatively graded coin that is housed in a first-generation PCGS holder. NGC ID# 26FT, PCGS# 9165

5263 1915-S MS65 NGC. United States gold coinage production was minimal as Europe was engaged in the early stages of World War I. Soon, the U.S. became involved, and gold coinage production was halted entirely. This lovely Gem exhibits brilliant and frosty orange-gold luster with excellent eye appeal. NGC ID# 26FW, PCGS# 9168

5264 1915-S MS65 NGC. An attractive Gem representative of this popular World War I era issue, with well-detailed design elements and well-preserved orange-gold surfaces that show only minor signs of contact. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 26FW, PCGS# 9168

5265 1916-S MS64 PCGS. The San Francisco Mint produced nearly 800,000 double eagles in 1916, after which point it ceased output until 1920. This high-end MS64 enjoys no shortage of frosty luster over luminous medium yellow-gold surfaces. Boldly rendered. NGC ID# 34NJ, PCGS# 9169

5266 1920 MS63+ PCGS. Lustrous and frosted medium-gold surfaces display sharply defined motifs and only a modest assortment of small marks for the Select Uncirculated level, thus receiving the PCGS Plus designation. The 1920 is a great rarity in Gem or finer grades, yet it is available at other Uncirculated levels because the mintage of 228,250 coins generally escaped the Gold Recall melting. NGC ID# 26FY, PCGS# 9170

5267 1922 Tripled Die Obverse MS65 NGC. VP-002. A strong loupe reveals tripling on the leaves of Liberty's branch. Strike softness is noted at the lower-left obverse and upper reverse, possibly the result of misaligned dies. A lustrous, orange-gold Gem that shows excellent preservation. Only eight finer submissions are reported at NGC (1/17). NGC ID# 26G3, PCGS# 9173

5268 1923-D MS66 PCGS. A beautiful, frosty Premium Gem type coin that is fully worthy of the grade. The strike is sharp, and each side displays luminous rose-gold and peach-orange coloration. The fields are clean, and Liberty's figure is devoid of the usually seen scattered ticks. Finer 1923-D double eagles are scarce. NGC ID# 26G6, PCGS# 9176

1923-D Double Eagle, Glowing MS66+ Great Branch Mint Type Coin

5269 1923-D MS66+ PCGS. Importations over the past three or four decades explains the availability of the 1923-D through MS66. Many coins were stored in European and Latin American vaults, where they were preserved in untouched condition before being returned to the United States. This glowing Premium Gem presents a full strike and radiant rose-gold surfaces devoid of imperfections. Great branch mint type coin. NGC ID# 26G6, PCGS# 9176

5270 1924 MS64 PCGS. This is a bright, satiny yellow-gold example of the most popular type-coin issue in the Saint-Gaudens double eagle series. A few light, scattered marks are consistent with the Choice grade level. NGC ID# 26G7, PCGS# 9177

5271 1924 MS65 PCGS. Vibrant satin luster gives this orange-gold Gem extravagant eye appeal. The strike is bold, and there are no major abrasions. The 1924 is popular among type collectors and gold coin investors. NGC ID# 26G7, PCGS# 9177

5272 1924 MS65 PCGS. A delightful Gem representative of this extremely popular type issue, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Eye appeal is tremendous. NGC ID# 26G7, PCGS# 9177

5273 1924 MS65 PCGS. Like many examples of this popular date, the design elements are well-detailed, with some blending on the Capitol dome. The lustrous orange-gold surfaces are free of all but the most insignificant signs of contact and overall visual appeal is quite strong. NGC ID# 26G7, PCGS# 9177

5274 1924 MS65 PCGS. A spectacular Gem representative of this popular type issue, with well-detailed design elements that show a trace of the typical softness on the fingers and the Capitol building. The lustrous orange-gold surfaces radiate vibrant mint luster and show no mentionable distractions. NGC ID# 26G7, PCGS# 9177

5275 1924 MS65 PCGS. Sharply detailed in most areas, this delightful Gem shows just a trace of the usual softness on the Capitol dome. The well-preserved, vivid orange-gold surfaces display a few hints of lilac and eye appeal is outstanding. NGC ID# 26G7, PCGS# 9177

5276 1924 MS66+ NGC. The 1924 Saint-Gaudens double eagle is perhaps the most available date of the series, from a large mintage of 4.3 million pieces. Even in MS66 condition, the 1924 is readily available, but the issue does become scarce in finer grades. This Plus-graded Premium Gem is sharply detailed and impeccably preserved, with vibrant mint luster and terrific eye appeal. NGC ID# 26G7, PCGS# 9177

1925 Double Eagle, MS66+ Very Rare Any Finer

5277 1925 MS66+ PCGS. Repatriated coins from Europe and Latin America explain the relative availability of the 1925 through MS66. However, less than 2% of all Premium Gem submissions at PCGS have received a Plus designation, and only seven grading events are reported finer (1/17). This strongly detailed Saint-Gaudens double eagle emits frosty luster from pleasing, butter-gold surfaces. Glints of rose appear centrally. NGC ID# 26GA, PCGS# 9180

5278 1926 MS65 ★ NGC. Shades of rich sun-gold and lavender mix with swirling luster, drawing the eye of the viewer. The excellent visual appeal accounts for the Star designation from NGC. The strike is strong and marks are scant. A fantastic Saint-Gaudens twenty. NGC ID# 26GD, PCGS# 9183

5279 1927 MS65 PCGS. CAC. A beautiful orange-gold Gem. The strike is precise, and the lustrous surfaces are uncommonly free from contact, even for the MS65 level. This impressive Saint-Gaudens type coin is certified in a first generation holder. NGC ID# 26GG, PCGS# 9186

1927 Twenty Dollar, MS66+ Smooth and Unabraded

5280 1927 MS66+ PCGS. Even yellow-gold color covers each side. The effect is enhanced by swirling mint frost that blankets this outstanding Saint-Gaudens double eagle type coin. The motifs are crisply defined and the surfaces smooth and unabraded. Although readily accessible through Premium Gem condition, the 1927 becomes rare in MS67, where PCGS has seen 21 finer submissions (1/17). NGC ID# 26GG, PCGS# 9186

**1928 Twenty Dollar, MS66+
Bright Mint Luster and Color**

- 5281** 1928 MS66+ PCGS. All that this date is known for is present on this coin. The thick mint luster is bright and the coin's color is just a bit on the yellow side, rather than the usual deep reddish-gold. Fully struck throughout, the surfaces overall are remarkably well-preserved; one can easily see how the Plus designation makes sense on this Premium Gem. NGC ID# 34VK, PCGS# 9189

TERRITORIAL GOLD

- 5282** (1837-42) C. Bechtler Dollar, N Reversed — Graffiti — Genuine PCGS. XF Details. K-4, R.4. The blundered N in ONE allows immediate attribution of this popular Bechtler variety. A caramel-gold example with clear legends. Both sides exhibit a pair of light intersecting hair-thin pinscratches, and a small depression is noted west of the B in BECHTLER. Listed on page 388 of the 2017 *Guide Book*.

**(1842-52) A. Bechtler Gold Dollar, MS60
27 G., 21 C., Plain Edge, K-24**

- 5283** (1842-52) A. Bechtler Dollar, 27 G. 21 C., Plain Edge, K-24, R.3, MS60 NGC. August Bechtler inherited the family coining business from his father, Christian, around 1840. The Bechtler gold coinage was highly regarded for its consistent weight and fineness, and examples could be found in circulation until the Civil War. This attractive Mint State specimen is sharply struck and lightly marked for the grade. Traces of prooflike reflectivity show in sheltered areas around the devices. Listed on page 389 of the 2017 *Guide Book*. NGC ID# 2B99, PCGS# 10040

- 5284** 1849 Moffat & Co. Five Dollar — Whizzed — NGC Details. AU. K-4a, R.4. The yellow-gold surfaces are unnaturally bright, but this first-year Moffat half eagle shows scant evidence of circulation. The obverse field displays a few thin marks. Star 7 is weak and the reverse is cracked through FIVE DOL, characteristic of Kagin-4a. Struck from rusted dies. Listed on page 391 of the 2017 *Guide Book*.

- 5285** 1850-Dated California Gold Mines Token MS62 NGC. K-1, Low R.7. Gilt copper, reeded edge. The design does not indicate a denomination, but the diameter is similar to a double eagle, and Don Kagin (page 373 of his classic reference) lists it as a \$20 piece. He adds, "probably engraved by William Lemme of San Francisco. All known pieces are gold plated." We have auctioned very few examples; a corroded Good Details piece realized \$977.50 as lot 5976 in our January 2009 FUN Signature. Satiny and unworn with minimal marks and an intricate strike.

S.S.C.A. RELIC GOLD MEDAL

**'1855 Kellogg Fifty Dollar' 2001 Relic Medal
Made from S.S.C.A. Gold Ingots, Gem Proof**

- 5286** 1855 SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. Struck on September 6, 2001, with a proof mintage for that date of 203 pieces. This 2.5-ounce round relic medal contains 1309 grains of 887 Fine gold, obtained from melted-down Kellogg & Humbert ingots recovered circa-1988 from the S.S. *Central America* shipwreck. A flawless example with glassy butter-gold fields. Housed in a copper-and-glass frame, but without other marketing material. NGC ID# 32DS, PCGS# 10358

BOOK

- 5287** *A California Gold Rush History* by Q. David Bowers. This copy is #135 of 400 printed, and has front and back glossy photographs of Justh & Hunter gold bar #4288 attached to the inside back cover. Like all examples, it includes a pinch of gold dust recovered from the S.S. *Central America*, embedded in the inside front cover. The shipwreck is best known for the many San Francisco Mint double eagles recovered circa-1988, but its most valuable cargo was a number of large gold ingots from forgotten assayers of the California Gold Rush era, all of which are featured on color plates within the text.

CALIFORNIA FRACTIONAL GOLD

- 5288** 1870 Liberty Round 25 Cents, BG-808, R.3, MS67 NGC. This spectacular Superb Gem from Frontier & Co. exhibits well-detailed design elements, with a touch of softness on the central reverse. The orange-gold surfaces are impeccably preserved, with vibrant mint luster throughout. Census: 5 in 67, 1 finer (12/16). NGC ID# 2BSW, PCGS# 10669

- 5289** 1872 Washington Round 25 Cents, BG-818, Baker-A504, Musante GW-821, Low R.4, MS65 PCGS. A prooflike caramel-gold Gem. The reverse is concave (as made) and retains glimpses of the planchet surface. BG-818 is the only round Washington quarter Breen-Gillio variety, and is both popular and important as a California small denomination gold type. NGC ID# 2BT9, PCGS# 10679

**1866 Round Liberty Quarter Dollar
Rare BG-824 Variety, MS64 Prooflike**

- 5290 1866 Liberty Round 25 Cents, BG-824, High R.5, MS64 Prooflike NGC.** A scarce Period Two round quarter dollar made by Robert B. Gray & Co. This piece is the sole finest at NGC (1/17), and it boasts an even strike. Bright yellow-gold surfaces show no major marks, and the fields are deeply reflective. Some softness of strike on the portrait is typical of the variety. NGC ID# 2BTH, PCGS# 710685

**1871 Liberty Round 25 Cents, BG-861
Gem Deep Mirror Prooflike Survivor**

- 5291 1871 Liberty Round 25 Cents, BG-861, Low R.5, MS65 Deep Mirror Prooflike NGC.** Quite possibly the only Gem Deep Mirror Prooflike example of this scarce Liberty Round. Overt contrast between the frosted devices and the mirrorlike fields is apparent at arms length. The top loop of the 8 in the date is characteristically filled, and diagnostic rusting at DO in DOLLAR appears on the reverse. Extremely sharp and problem-free with vibrant greenish-gold color. PCGS# 910722 Base PCGS# 10722
- 5292 1872/1 Indian Round 25 Cents, BG-868, High R.4, MS66 ★ Prooflike NGC.** A crisply struck and flashy honey-gold Premium Gem. Contact is limited to a hair-thin through the wreath west of the ribbon loop. Struck on a slightly incomplete planchet, with the date complete but flush against the rim. A scarce overdated variety from the shop of the prolific Christopher Ferdinand Mohrig. Census: 5 in 66 (1 in 66★) Prooflike, 2 finer (1/17). NGC ID# 28YP, PCGS# 710729
- 5293 1856 Liberty Octagonal 50 Cents, BG-916, R.6, MS62 PCGS.** A rare variety struck by Robert B. Gray, using a Period One reverse die made by Antoine Louis Nouzillet. Gray's obverse die was new, and bears his initial below the bust. This smooth peach-gold representative has rich peach-gold toning, and differs from the Jay Roe specimen in that the date is clear, and clash marks are apparent on the central reverse field. Population: 3 in 62, 0 finer (1/17). NGC ID# 2BWD, PCGS# 10774
- 5294 1872 Indian Octagonal 50 Cents, BG-939, Low R.5, MS66+ Prooflike NGC.** A Christopher Mohrig variety with a somewhat unusual appearance, since the date was hand-engraved on the obverse die, and the reverse exhibits a fancy 2 as the denominator. A flashy and well struck apricot-gold Premium Gem. As of (1/17), the present piece is single-finest among five examples certified as Prooflike by NGC. NGC has certified only one piece as Deep Prooflike, at the MS64 level. NGC ID# 2BX7, PCGS# 710797

- 5295 1876 Indian Octagonal 50 Cents, BG-953, R.5, MS64 Prooflike NGC.** A beautiful butter-gold representative of this scarce Mohrig variety. The reflective surfaces exhibit mint-made "ghost" stars within the wreath, but are devoid of any apparent marks or flan imperfections. Census: 2 in 64 Prooflike, 0 finer (1/17). NGC ID# 2BXP, PCGS# 710811

- 5296 1875 Indian Octagonal 1 Dollar, BG-1127, R.4, MS62 PCGS.** Rich peach-gold and lime-green toning ensures the eye appeal of this undisturbed octagonal dollar. The strike is slightly soft at the centers, usual for the variety, and minor flan imperfections are noted on the lower left obverse. Population: 20 in 62, 28 finer (1/17). NGC ID# 2C3V, PCGS# 10938

**1872 Round Dollar, BG-1207, MS64
Scarce Fractional Gold Type**

- 5297 1872 Indian Round 1 Dollar, BG-1207, R.4, MS64 PCGS.** The date is distant from the bust, and the reverse lacks the word TOKEN. Three varieties are known for the 1872 Round dollar, this one being the most frequently encountered. BG-1207 shares its obverse with BG-1208. This is a bright yellow-gold example with a uniformly strong reverse and slight softness on the obverse stars. Each side features a degree of semiprooflikeness and a dearth of major marks. Population: 10 in 64, 1 finer (1/17). NGC ID# 2C46, PCGS# 10952

COMMEMORATIVE SILVER

- 5298 1893 Isabella Quarter MS65 PCGS.** Navy-blue and russet-brown shades occupy the margins, but much of this lustrous Gem is untuned. The strike is exacting, and the preservation is laudable, particularly on the obverse. A real find for the connoisseur of vivid, naturally toned coins. NGC ID# BYJ9, PCGS# 9220
- 5299 1893 Isabella Quarter MS65 NGC.** The first quarter in the official silver commemorative series, the 1893 Isabella quarter was issued in conjunction with the World's Columbian Exposition. Attractive shades of cerulean-blue and golden-brown toning blanket the well-preserved surfaces of this delightful Gem, with well-detailed design elements and vibrant mint luster under the patina.. NGC ID# BYJ9, PCGS# 9220
- 5300 1893 Isabella Quarter MS66 PCGS.** A remarkably well-preserved and sharply struck example, draped in bluish-gray and pale rose shades with glowing mint luster throughout both sides. The Premium Gem surfaces are essentially mark-free — a coin of somewhat understated elegance, sure to please the purists for its originality and surface quality. NGC ID# BYJ9, PCGS# 9220
- 5301 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C.** From a distribution of 36,026 pieces, the Lafayette dollar is the first, and only, one-dollar issue in the classic silver commemorative series. This well-preserved, sharply detailed Choice specimen displays satiny mint luster under shades of pale gold and lavender-gray toning. Housed in a green label holder. NGC ID# BYKW, PCGS# 9222
- 5302 1921 Alabama 2X2 MS66 NGC.** The popular 2x2 variant claims a low distribution of 6,006 pieces. This attractive Premium Gem is sharply detailed, with vibrant mint luster under shades of champagne-gold and lavender toning. Census: 97 in 66 (9 in 66+, 9 in 66★), 6 finer (1/17). NGC ID# BYEZ, PCGS# 9225

- 5303 1937 Antietam MS67 PCGS. CAC.** From a distribution of 18,000 pieces (plus 28 Assay coins), this delightful Superb Gem exhibits sharply detailed design elements and vibrant, satiny mint luster, under attractive shades of pale gold and lavender-gray toning. PCGS has graded 20 numerically finer examples (1/17). NGC ID# BYF4, PCGS# 9229
- 5304 1936-S Arkansas MS67 NGC.** The typical Arkansas commemorative half is MS65 at best, and this Superb Gem is a marvelous exception to the rule. Both sides have light silver surfaces with lovely gold and pale green toning that intensifies near the borders. Census: 10 in 67, 0 finer (1/17). Ex: ANA *Signature* (Heritage, 3/2011), lot 4244. NGC ID# BYFA, PCGS# 9239
- 5305 1937-D Arkansas MS67+ NGC. CAC.** Light orange-gold patina adorns the borders of this coruscating and pristine Superb Gem. The strike is sharp except on portions of the eagle's left (facing) leg. Census: 17 in 67 (2 in 67+, 1 in 67★), 0 finer. CAC: 19 in 67, 0 finer (1/17). NGC ID# BYFC, PCGS# 9242
- 5306 1936-S Bay Bridge MS67+ PCGS. CAC.** A delightful Plus-graded Superb Gem, with sharply detailed design elements and strong, satiny mint luster, under highlights of lavender-gray toning. The surfaces are impeccably preserved and eye appeal is outstanding. PCGS has graded 11 numerically finer examples (12/16). NGC ID# BYFM, PCGS# 9254
- 5307 1935/34 Boone MS67+ PCGS. CAC.** An attractive mix of lavender, gray, and greenish-gold toning highlights the impeccably preserved surfaces of this high-end Superb Gem, with sharply detailed design elements and vibrant mint luster underneath. Population: 66 in 67 (8 in 67+), 3 finer. CAC: 26 in 67, 0 finer (1/17). NGC ID# 34SZ, PCGS# 9262
- 5308 1935/34-D Boone MS67 PCGS.** From a remarkably small distribution of 2,003 pieces, this spectacular Superb Gem displays impeccably preserved surfaces with vibrant, satiny mint luster, and subtle hints of golden-tan toning. The design elements are sharply detailed and eye appeal is outstanding. Population: 68 in 67 (4 in 67+), 9 finer (1/17). NGC ID# BYFU, PCGS# 9263
- 5309 1935/34-S Boone MS67 PCGS.** After the initial coinage in 1934, the Boone Bicentennial half dollar was again produced in 1935, but the bicentennial date, 1934, was added to the field above PIONEER YEAR. Thus, the issue bears two dates. This Superb Gem is conditionally rare. The strike is bold and the golden-toned surfaces exhibit fine matte-like luster. There are no bothersome abrasions. Population: 18 in 67 (3 in 67+), 3 finer (1/17). NGC ID# BYFW, PCGS# 9264
- 5310 1937-S Boone MS67 PCGS.** Marvelous cherry-red, apple-green, and orange-gold shades compete for territory throughout this semiprooflike Superb Gem. The sharply struck surfaces are void of detractors. A mere 2,506 pieces were struck. Population: 45 in 67 (4 in 67+), 3 finer (1/17). NGC ID# BYG5, PCGS# 9272
- 5311 1938 Boone MS67 PCGS.** The 1938 Philadelphia issue of the Daniel Boone half dollar is elusive in Superb Gem condition. This piece is beautifully preserved and sharply struck. Light golden toning over each side exhibits large areas of deep reddish-russet color. Population: 41 in 67 (5 in 67+), 1 finer (1/17). NGC ID# BYG6, PCGS# 9274
- 5312 1936 Cincinnati PDS Set MS66 NGC.** The lustrous, smooth, and low mintage trio is separately housed in holders with consecutive serial numbers. The set includes: **1936**, powder-blue and caramel-gold toning; **1936-D**, light straw-gold and lime-green patina; and a **1936-S**, delicate lilac and aquamarine shadings. (Total: 3 coins) NGC ID# BYCJ, PCGS# 9286
- 5313 1892 Columbian MS66+ PCGS. CAC.** The interior fields and central motifs are brilliant, surrounded by rings of blue, violet, green, and orange patina that confirm the originality of this wonderful Premium Gem. There are only a couple of barely perceptible marks near the upper reverse. NGC ID# BYGF, PCGS# 9296

1893 Columbian Half Dollar, MS67 None Graded Finer at PCGS

- 5314 1893 Columbian MS67 PCGS.** Radiant luster percolates through the usually seen shades of sea-green, violet, and cobalt blue that cover the obverse. The reverse features a ring of golden-russet patina around brilliant centers. The effect gives this top-graded Superb Gem unsurpassed aesthetic quality to match its impressive state of preservation. Population: 31 in 67 (3 in 67+), 0 finer (1/17). NGC ID# BYGG, PCGS# 9297
- 5315 1935 Connecticut MS67 PCGS.** Subtle hints of silver-gray and golden-brown toning visit the impeccably preserved surfaces of this delightful Superb Gem, with well-detailed design elements and satiny mint luster underneath. Eye appeal is terrific. PCGS has graded only one numerically finer example (12/16). NGC ID# BYGH, PCGS# 9299
- 5316 1922 Grant With Star MS63 PCGS.** A satiny Select example of the scarcer With Star variant, showing light toning around the borders. Slight strike weakness is seen on the high point of Grant's hair, as usual. NGC ID# BYPP, PCGS# 9307
- 5317 1922 Grant With Star MS64 NGC.** Reddish-purple patina covers much of this Choice Grant half dollar, an example of the much scarcer With Star variant (4,256 coins distributed). The other areas show brilliant powder-blue color. The strike is incomplete over the highest points of Grant's hair, but this remains a splendid representative of a challenging Classic commemorative issue. NGC ID# BYPP, PCGS# 9307
- 5318 1922 Grant With Star MS64 PCGS.** A attractive Choice specimen of the popular With Star variant, this coin offers well-detailed design elements and lightly marked surfaces, with satiny mint luster and delicate hints of lavender-gray toning. From a small distribution of 4,256 pieces. NGC ID# BYPP, PCGS# 9307
- 5319 1922 Grant With Star MS64 NGC.** An attractive Choice representative of the popular With Star variant, this coin displays well-preserved brilliant surfaces with especially vibrant mint luster. The design elements are well-detailed and overall eye appeal is outstanding. NGC ID# BYPP, PCGS# 9307
- 5320 1922 Grant With Star MS64 PCGS.** The With Star Grant Memorial half dollar is in short supply in high grades, although the present Choice example is at an accessible level for most collectors of classic commemoratives. This piece is well-struck and displays satiny luster tinted by light gold and lavender hues. There are no major abrasions. Housed in an old green label holder. NGC ID# BYPP, PCGS# 9307
- 5321 1928 Hawaiian MS62 NGC.** From a distribution of 9,958 pieces, the 1928 Hawaii half dollar is the most sought-after issue of the silver commemorative series. This well-detailed MS62 specimen offers lightly marked, lustrous surfaces with delicate champagne-gold patina. NGC ID# BYGR, PCGS# 9309
- 5322 1928 Hawaiian MS64 PCGS.** From a distribution of less than 10,000 pieces, the 1928 Hawaiian half dollar is the acknowledged key to the silver commemorative series. This impressive Choice specimen offers sharply detailed design elements and well-preserved lustrous surfaces, with highlights of greenish-gold and cerulean-blue toning. Housed in a green label holder. NGC ID# BYGR, PCGS# 9309

5323 1928 Hawaiian MS64 NGC. The Hawaiian is scarcest among the fifty classic silver commemorative types, since the mintage was low, and many examples were sold to local non-collectors. The present Choice commemorative displays dappled lime-green and rose-red toning on the left fields. The lustrous surfaces are well struck, and contact is limited to the right reverse margin. Certified in a prior generation holder. NGC ID# BYGR, PCGS# 9309

5324 1928 Hawaiian MS64 PCGS. This is a boldly struck, satiny near-Gem with uniform sea-green toning that shows interlaid wisps of light gold. There are no distracting abrasions. The Hawaiian Sesquicentennial half dollar is popular in all grades, coming from a mintage of 10,008 coins, including assay pieces and 50 sandblast proofs. NGC ID# BYGR, PCGS# 9309

5325 1946 Iowa MS68 PCGS. Light sea-green and autumn-gold toning adorns the margins, but this precisely struck commemorative is mostly white. A virtually immaculate representative of the final statehood centennial issue. Certified in a green label holder. Population: 86 in 68 (14 in 68+), 0 finer (1/17). NGC ID# BYGV, PCGS# 9316

**1925 Lexington Half, MS67
Bright Mint Luster, Subtle Accents of Color**

5326 1925 Lexington MS67 PCGS. The mint luster on this Lexington is nothing less than remarkable. It is bright and softly frosted. Equally impressive, but a bit more subtle is the pale yellow-green streaks of color that just barely interrupt the otherwise brilliant surfaces. In spite of the generous mintage, few high-grade Lexington halves have been certified. Population: 26 in 67 (3 in 67+), 1 finer (1/17). NGC ID# BYGW, PCGS# 9318

5327 1918 Lincoln MS67 NGC. A popular commemorative — both when issued and today — although the 1918 was the first issue from which all of the pieces authorized were distributed. Rich luster emanates from the frosted surfaces of this exceptional Superb Gem specimen. While the piece has an overall silver appearance, closer examination reveals splashes of pale rose-gold toning on both sides. A strong strike and well-preserved surfaces add to the appeal. NGC has awarded higher numeric grades to only six examples (1/17). NGC ID# BYGU, PCGS# 9320

**1918 Illinois Centennial Half, MS67+
Exemplary Quality and Luster**

5328 1918 Lincoln MS67+ PCGS. Celebrating the 100-year anniversary of Illinois' statehood, the unbearded portrait of a contemplative young Abraham Lincoln is radiant and fully defined against an iridescent backdrop of frosty, light toning. Shades of tan-gold and cerulean-blue come to the fore at the margins. The champagne-gold reverse is equally lustrous and sharply struck, with complete plumage on the eagle's breast. The issue typically shows small marks on the portrait, but not here — the high-end, Superb Gem surfaces are without fault and exceptionally appealing. 23 in 67+, 3 finer (1/17). NGC ID# BYGU, PCGS# 9320

5329 1921 Missouri 2x4 MS65 PCGS. This satiny Gem 1921 Missouri Centennial half dollar displays a sharp strike and shows no distracting abrasions. Each side is cast in blended lavender-gray, gold, and russet toning. PCGS reports only 40 numerically finer coins (1/17). NGC ID# 2FE9, PCGS# 9331

**1936 Norfolk Half Dollar, MS68 ★
Only One Finer Coin at NGC**

5330 1936 Norfolk MS68 ★ NGC. The impeccably preserved surfaces of this incredible MS68 specimen show dramatic lime-green tab toning on the obverse, while the central reverse is blanketed in lavender-gray patina, with lime-green hues at the peripheries. The design elements are sharply detailed and vibrant satiny mint luster enhances both sides. NGC has graded just one numerically finer example (1/17). NGC ID# BYH5, PCGS# 9337

5331 1925 Norse, Thin Planchet, MS65 PCGS. CAC. A beautifully patinated Gem. Sea-green, golden-brown, and lavender shades grace nicely struck and lightly abraded surfaces. The curious legends suggest that Vikings arrived in North America in 1825, and imply the U.S. Congress authorized the medal in the year 1000. Population: 54 in 65, 12 finer. CAC: 16 in 65, 8 finer (1/17). NGC ID# 2WHM, PCGS# 9451

5332 1933-D Oregon MS67+ PCGS. CAC. Ex: Young Collection. 30th Anniversary Green Label Holder. Pastel ice-blue and olive-green toning dominates despite glimpses of peripheral golden-brown. One tick noted on the ray through the W in WE. All 1933-D Oregon halves are FS-801 with blatant die tripling on the obverse legends. The Denver Mint struck only cents and Oregon halves during 1933. NGC ID# BYH9, PCGS# 9343

5333 1939 Oregon PDS Set MS67 NGC. The last and lowest mintage PDS set of the Oregon type. All three coins exhibit impressive obverse tab toning, and a richly patinated reverse. They are separately housed in NGC holders bearing consecutive certification numbers. The set includes: **1939**, sharply struck and unabraded; **1939-D**, lustrous and devoid of contact; and a **1939-S**, a good strike, exemplary preservation. (Total: 3 coins) NGC ID# BYHL, PCGS# 9355

5334 1915-S Panama-Pacific MS66 PCGS. CAC. An impressive Premium Gem representative of this popular issue, with well-detailed design elements well-preserved, lustrous surfaces, under dusky shades of lavender-gray and champagne-gold toning. NGC ID# BYHP, PCGS# 9357

**1915-S Panama-Pacific Half, MS66+
Lustrous, Lavender-Gray Example**

5335 1915-S Panama-Pacific MS66+ PCGS. CAC. This well-struck Premium Gem Panama-Pacific half dollar displays both the PCGS Plus designation and CAC endorsement. Soft, luminous luster underpins a dusting of lavender-gray toning. The originality and eye appeal are blatant. Close inspection fails to reveal any mentionable flaws on this high-end type coin. 17 in 66+, 105 finer. CAC: 98 in 66, 57 finer (1/17). NGC ID# BYHP, PCGS# 9357

5336 1921 Pilgrim MS67 PCGS. Swiatek suggests that the 1921 Pilgrims are quite undervalued and underrated in MS65 and higher grades. A light overlay of lilac and grayish-gold covers the surfaces of this phenomenal Superb Gem. The satiny luster complements a full strike and a near-total absence of abrasions. For the collector who demands only the finest. Population: 47 in 67 (4 in 67+), 1 finer (1/17).
Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 1428. NGC ID# BYHS, PCGS# 9360

5337 1937 Roanoke MS67+ PCGS. CAC. This Plus-graded Superb Gem exhibits impeccably preserved surfaces, with vibrant mint luster and vivid shades of sea-green and magenta toning on both sides. The design elements are sharply detailed and eye appeal is terrific. PCGS has graded 20 numerically finer examples (12/16). NGC ID# BYHW, PCGS# 9367

5338 1935 Spanish Trail MS65 PCGS. An impressive Gem specimen of this extremely popular silver commemorative, with sharply detailed design elements and vibrant mint luster, under attractive shades of golden-brown toning. Eye appeal is outstanding. NGC ID# BYJ5, PCGS# 9376

5339 1935 Spanish Trail MS65 PCGS. This Gem Spanish Trail half dollar is sharply struck with satin luster and dusky champagne toning. There are no obvious abrasions in the fields, only a few faint grazes that are seen at certain angles with a loupe. A very appealing coin for the grade. NGC ID# BYJ5, PCGS# 9376

5340 1935 Spanish Trail MS65 PCGS. Faint almond-gold, ice-blue, and olive-green toning visits this thoroughly lustrous and boldly struck Gem. A splendid example of this low mintage type. The obverse motif is a pun on the name of 16th century Spanish explorer Cabeza de Vaca. Encapsulated in an old green label holder. NGC ID# BYJ5, PCGS# 9376

5341 1935 Spanish Trail MS66 PCGS. The usual satin luster flows over this mostly brilliant Premium Gem, one of 10,000 Spanish Trail half dollars distributed to collectors (eight more were made for assay). Tinges of gold appear on the reverse. There are a few minute ticks on that side, but they are only visible under magnification. NGC ID# BYJ5, PCGS# 9376

5342 1935 Spanish Trail MS67 PCGS. Strong, satiny luster illuminates pale champagne toning on each side of this Superb Gem Old Spanish Trail commemorative half. The strike is bold throughout, and the surfaces are devoid of any discernable imperfections. Only three coins are numerically finer at PCGS (1/17). NGC ID# BYJ5, PCGS# 9376

**1937-D Texas Half, MS68
Tied for the Finest Certified**

5343 1937-D Texas MS68 NGC. The 1937-D is among the lower-distribution issues in the Texas Centennial half dollar series, coming in at 6,605 pieces, including assay coins. This remarkable MS68 representative is a grand condition rarity and is tied for the finest known. Frosty mint luster glows beneath faint pastel toning on each side, illuminating well-struck motifs. When viewed beneath a loupe, the superb preservation is especially impressive. Census: 6 in 68 (1 in 68★), 0 finer (1/17). NGC ID# BYJJ, PCGS# 9391

5344 1938 Texas PDS Set MS67 PCGS. CAC. The set is housed in separate PCGS holders bearing consecutive certification numbers. All three holders possess CAC seals. The set includes: **1938**, essentially immaculate; **1938-D**, a lustrous Superb Gem; and a **1938-S**, outstanding preservation. All three coins are nicely struck, and exhibit light to moderate cream-gray and tan-gold toning. (Total: 3 coins) PCGS# 9397

**1946 Booker T. Washington, MS67+
Magnificently Toned**

5345 1946 Booker T. Washington MS67+ PCGS. CAC. This spectacular, high-end Superb Gem is one of the finest survivors of this widely collected issue, with sharply detailed design elements, vibrant mint luster, and shades of golden-brown and lavender-gray patina. Only a single MS68 coin exceeds it at PCGS in numerical grade, yet it is hard to imagine an example with greater eye appeal or charisma. Plus-graded with CAC endorsement. Population: 12 in 67+, 1 finer (12/16). NGC ID# BYJS, PCGS# 9404

**1951 Booker T. Washington Half, MS67
Brilliant, Bright Mint Luster**

- 5346 1951 Booker T. Washington MS67 PCGS. CAC.** Commemorative collectors have long known how difficult the BTW and WC series are in high grade. Numerous abrasions are the usual culprit, but here the surfaces are remarkably free from post-striking distractions. Each side is brilliant and the surfaces display bright mint luster. Population: 24 in 67 (3 in 67+), 0 finer. CAC: 16 in 67, 0 finer (1/17). NGC ID# BYK9, PCGS# 9424

**1936 York Half Dollar, MS68
Tied for the Finest Certified**

- 5347 1936 York MS68 NGC.** Based upon sheer eye appeal, this must be one of the finest York commemorative halves in existence. In terms of technical merit, the piece is also outstanding, and the design elements are struck with razor-sharp precision on both sides. The real story is the toning, which occurs as vivid rainbow iridescence near the periphery, and more subtle but beautiful variations of rose, sky-blue, and champagne-gray over the fields and centers. Simply a great coin. Census: 38 in 68 (7 in 68★), 0 finer (1/17). NGC ID# BYKV, PCGS# 9449

COMMEMORATIVE GOLD

**1903 Jefferson Gold Dollar, MS67
None Numerically Finer at PCGS**

- 5348 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS.** From an estimated distribution of 17,500 pieces, the Louisiana Purchase gold dollar with Jefferson's portrait on the obverse is very scarce in MS67 condition, and finer coins are virtually unobtainable. This delightful Superb Gem exhibits sharply detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster and terrific eye appeal. PCGS has graded no numerically finer examples (1/17). NGC ID# BYLD, PCGS# 7443

- 5349 1903 Louisiana Purchase, Jefferson Gold Dollar, MS63 Prooflike NGC.** The fields are profoundly reflective, contrasting against lightly frosted, well-defined motifs. A deep shade of warm, honey-gold color blankets each side of this Jefferson gold dollar. Wispy abrasions and bagmarks are generally undistracting. Census: 7 in 63 Prooflike, 10 finer (12/16). NGC ID# BYLD, PCGS# 77443

- 5350 1904 Lewis and Clark Gold Dollar MS64 PCGS.** Well-detailed design elements and vibrant, frosty mint luster are the calling cards of this attractive Choice specimen. The well-preserved orange-gold surfaces show highlights of red and eye appeal is outstanding. From a distribution of 10,025 pieces. NGC ID# BYLF, PCGS# 7447

- 5351 1904 Lewis and Clark Gold Dollar MS64 PCGS.** A bold strike complements the satiny yellow-gold surfaces of this Choice 1904 Lewis and Clark gold dollar. There are no major abrasions, and the fields are mostly free of the usual metal flowlines common to this issue. Only a few stray lines prevent a Gem designation. NGC ID# BYLF, PCGS# 7447

- 5352 1905 Lewis and Clark Gold Dollar MS63 PCGS.** The second issue in this two-year commemorative set with a distribution of 10,000 coins, plus 41 assay examples. Luminous wheat-gold surfaces show a minimal number of ticks on each side. Typically struck. NGC ID# BYLG, PCGS# 7448

1915-S Panama-Pacific Quarter Eagle, MS64

- 5353 1915-S Panama-Pacific Quarter Eagle MS64 PCGS.** Chief Engraver Charles Barber designed the obverse of the 1915-S Panama-Pacific quarter eagle and his rival/subordinate George T. Morgan designed the reverse. This attractive Choice specimen exhibits well-detailed design elements and lightly marked orange-gold surfaces. Overall eye appeal is quite strong. NGC ID# BYLP, PCGS# 7450

**1915-S Pan-Pac Quarter Eagle, MS64
Vivid Color, Satiny Luster**

- 5354 1915-S Panama-Pacific Quarter Eagle MS64 PCGS.** The 1915-S Panama-Pacific quarter eagle was issued as part of a five-coin series produced in conjunction with the Panama-Pacific International Exposition. This attractive Choice specimen exhibits well-detailed design elements and vibrant, satiny mint luster, and the lustrous orange-gold surfaces show only minor signs of contact. Housed in an old green label holder. NGC ID# BYLP, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS64
Important Commemorative Gold Issue**

5355 1915-S Panama-Pacific Quarter Eagle MS64 PCGS. With a net distribution of just 6,749 pieces, the 1915 Panama-Pacific quarter eagle was not a huge success when issued, but now it is a favorite among gold and commemorative specialists alike. The unusual design was the combined work of Charles E. Barber (obverse) and George T. Morgan (reverse) for one of their most appealing collaborations. This near-Gem example is softly lustrous with greenish-gold patina. The strike is sharp for the issue, with only a few light abrasions. NGC ID# BYLP, PCGS# 7450

5356 1916 McKinley Gold Dollar MS66+ PCGS. CAC. Frosty orange-gold luster appears unblemished on this Plus-designated, CAC-approved Premium Gem. The strike is sharp, and eye appeal is exceptional. Finer 1916 McKinley Memorial gold dollars are elusive. NGC ID# BYLK, PCGS# 7454

5357 1916 McKinley Gold Dollar MS67 PCGS. McKinley gold dollars were struck in 1916 and 1917 to raise money for a memorial in the slain president's hometown of Niles, Ohio. Reportedly, 15,000 examples were sold in the first year. The surfaces of this Superb Gem radiate frosty luster and showcase attractive coppery-gold color. Well-struck and seemingly pristine. Population: 99 in 67 (6 in 67+), 0 finer (1/17). NGC ID# BYLK, PCGS# 7454

5358 1917 McKinley Gold Dollar MS66 PCGS. Multicolor shadings of honey, lavender, rose, and sun-gold grace the entirety of this eye-appealing McKinley Gold dollar. Both sides feature a strong strike and a handful of microscopic ticks that prevent an even higher grade. One of 10,000 pieces distributed. NGC ID# BYLL, PCGS# 7455

5359 1917 McKinley Gold Dollar MS66 PCGS. Three small alloy spots are seen on this glittering Premium Gem. The fields are pristine, and a high-powered loupe reveals a couple of otherwise indiscernible flecks on McKinley's cheek. Well-struck and readily appealing. NGC ID# BYLL, PCGS# 7455

5360 1917 McKinley Gold Dollar MS66 PCGS. The light yellow-gold surfaces of this attractive Premium Gem display a few hints of rose. Satiny mint luster and well-detailed design elements add to the eye appeal. A few small flecks are present on the obverse. NGC ID# BYLL, PCGS# 7455

5361 1922 Grant Gold Dollar, No Star, MS66 PCGS. Only 5,000 pieces were struck of No Star gold dollar, plus another 5,000 of the With Star variant. Each side has satiny mint luster and the otherwise even reddish-gold color. The design elements of this Premium Gem are fully defined just as Laura Gardin Fraser intended. Ex: *Central States Signature (Heritage, 4/2011)*, lot 6104. NGC ID# BYLN, PCGS# 7458

**1922 Grant Gold Dollar, MS67
Coveted With Star Version**

5362 1922 Grant Gold Dollar, With Star, MS67 PCGS. The popular 1922 Grant With Star gold dollar claims a small distribution of 5,000 pieces and the issue is a prime condition rarity in grades above the MS67 level. This well-detailed Superb Gem displays impeccably preserved lemon-yellow surfaces with vibrant mint luster and terrific eye appeal. PCGS has graded only four numerically finer examples (1/17). NGC ID# BYPS, PCGS# 7459

**1922 Grant Gold Dollar, MS67
With Star Variant**

5363 1922 Grant Gold Dollar, With Star, MS67 PCGS. Seldom are Grant gold dollars found with the crispness of strike seen on this piece. The general's hair curls and the window panes on the cabin are unusually well-defined. The coin's mint luster is thick over each side with light, even reddish-gold color, and only the slightest luster grazes are seen with a loupe. NGC ID# BYPS, PCGS# 7459

5364 1926 Sesquicentennial Quarter Eagle MS65 NGC. The 1926 Sesquicentennial gold piece is one of two commemorative quarter eagles, the other being the 1915-S Panama-Pacific coin. This rose-gold Gem showcases well-detailed motifs, a few scattered reeding marks, and several inconspicuous alloy spots. Only 46,019 examples were distributed. NGC ID# 2FE9, PCGS# 7466

5365 1926 Sesquicentennial Quarter Eagle MS65 NGC. Designer John R. Sinnock employed depictions of Liberty and Independence Hall to commemorate the 150th anniversary of the signing of the Declaration of Independence. This glittering peach-gold MS65 example boasts a crisp impression and minimal marks. Copper spots occur on each side. NGC ID# 2FE9, PCGS# 7466

5366 1926 Sesquicentennial Quarter Eagle MS65 NGC. These commemorative quarter eagles carried an issue price of \$4 and saw a total distribution of 46,019 coins. Examples are available through MS65 and very scarce in higher grades. Frosty luster washes over well-preserved rose-gold surfaces with few of the oft-seen copper spots. Crisp strike. NGC ID# 2FE9, PCGS# 7466

5367 1926 Sesquicentennial Quarter Eagle MS65 PCGS. Frosty luster cascades over each side of this rose and peach-gold Gem. Specks of coppery color dot the surfaces, which yield few distractions upon close inspection. A lovely example of this desirable quarter eagle commemorative (46,019 coins struck). NGC ID# 2FE9, PCGS# 7466

- 5368 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** A bright, Gem-quality Sesquicentennial quarter eagle with frosty, vibrant luster and bold design elements. A few tiny ticks are seen on each side, none out of line for the grade. Finer examples of this final classic commemorative gold issue are infrequently available. NGC ID# 2FE9, PCGS# 7466
- 5369 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** A notably attractive Gem Sesquicentennial quarter eagle, showing frosty luster that deepens in color toward the centers. The margins are bright yellow-gold, and the interiors take on a more sun-orange hue. There are no distracting abrasions, and finer coins are elusive. NGC ID# 2FE9, PCGS# 7466
- 5370 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** Frosty with original orange-gold luster and intricately detailed design elements. A few microscopic ticks are all that limit the grade. The Sesquicentennial quarter eagle had a distribution of 46,019 coins (including assay pieces), but representatives grading finer than the present coin are infrequently seen. NGC ID# 2FE9, PCGS# 7466
- 5371 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** Frosty yellow-gold luster is original, and exceptional surface preservation fully supports the Gem grade assignment. This well-struck Sesquicentennial quarter eagle displays outstanding eye appeal. Finer representatives are elusive. NGC ID# 2FE9, PCGS# 7466
- 5372 1926 Sesquicentennial Quarter Eagle MS65 PCGS. CAC.** A thoroughly lustrous peach-gold Gem. Sharply struck, and pristine aside from a single thin mark on the left wing of Independence Hall. Encapsulated in a green label holder.
Ex: Dr. Fred Firestone Collection (Heritage, 8/2001), lot 7538; Rosemont Central States Signature (Heritage, 4/2011), lot 6108; Orlando FUN Signature (Heritage, 7/2011), lot 4446, which realized \$3,881.25. NGC ID# 2FE9, PCGS# 7466

CERTIFIED MODERN PROOF SETS

- 8437** Five-Piece 1938 Proof Set PR65 to PR66 NGC. The set includes: cent PR65 Red; nickel PR66; dime PR66; quarter PR65; half dollar PR65. Housed in individual holders with certification numbers from the same NGC grading submission. (Total: 5 coins)
- 8438** Five-Piece 1939 Proof Set PR65 to PR66 NGC. The set includes: cent PR65 Red; Reverse of 1938 nickel PR66; dime PR65; quarter PR65; half dollar PR65. Housed in individual holders with certification numbers from the same NGC grading submission. (Total: 5 coins)
- 8439** Five-Piece 1941 Proof Set PR63 to PR66 NGC. The set includes: cent PR63 Red; nickel PR64; dime PR66; quarter PR65; No AW half dollar PR63. Housed in individual holders with certification numbers from the same NGC grading submission. (Total: 5 coins)
- 8440** Six-Piece 1942 Proof Set PR63 to PR67 NGC. The set includes: cent PR63 Red and Brown; Type One nickel PR66; Type Two nickel PR64; dime PR67; quarter PR64; half dollar PR65. Housed in individual holders with certification numbers from the same NGC grading submission. (Total: 6 coins)
- 8441** Five-Piece 1942 Proof Set PR63 to PR66 NGC. The set includes: cent PR63 Red; Type One nickel PR66; dime PR67; quarter PR65; half dollar PR65. Housed in individual holders with certification numbers from the same NGC grading submission. (Total: 5 coins)

PROOF SETS

- 8442 Uncertified 1942 Proof Set.** Housed in a plastic Capital holder. Includes the copper-nickel Jefferson five cent. The half dollar is brilliant and reflective save for a band of gold at the rim. The quarter is brilliant as well and essentially untuned, while the dime displays russet and blue toning that deepens at the rims. A deep toning spot is noted on the dime beneath TY of LIBERTY. Iridescent rainbow toning on the nickel features vibrant pink and blue shades, and the cent displays glossy and lustrous orange and cherry-red toning with golden highlights with two or three reverse carbon spots. (Total: 5 coins).
- 8443 Uncertified 1942 Proof Set.** Housed in a plastic Capital holder. Includes the copper-nickel Jefferson five cent. The silver pieces are well-matched and nearly untuned and brilliant-silver with occasional gold border toning, while the nickel is lilac-gray with a few tiny flecks. The cent displays lustrous, variegated Red toning with pale-yellow accents and a small carbon at the back shoulder edge. A glossy, pleasing set. (Total: 5 coins)
- 8444 Uncertified 1942 Proof Set.** Housed in a plastic Capital holder. Includes the copper-nickel Jefferson five cent. The quarter and dime are brilliant with a bit of gold border toning, while the half dollar displays overall pale-gold patina. The cent has gleaming mirrors, with flame-orange toning and peach-gold highlights with some delicate hairlines. A set with nice eye appeal. (Total: 5 coins)

MINT SETS

- 8445 1956 and 1958 Double Mint Sets.** The 1958 set is missing one 1958-D quarter and one 1958-D nickel. No 1956-D halves were struck. No outer mailing envelopes are included. (Total: 36 coins)
- 8446 Uncertified 1948 Double Mint Set,** containing 28 coins in the original cardboard holders, with the still-sealed outer envelope that is postmarked March 1949 and addressed to Bryan Texas. (Total: 28 coins)
- 8447 Uncertified 1948 Mint Set,** containing 28 coins in the original cardboard holders. The copper coins are Red and the silver coins display delicate iridescent toning. The outer envelope is postmarked March 1949 and addressed to Bryan, Texas. (Total: 28 coins)

MISCELLANEOUS MEDALS AND TOKENS

- 8600** Numismatic Potpourri: 1882 Pennsylvania Bicentennial, copper, Julian CM-42, Unc; 1884 New Brunswick, NJ Centennial, white metal, Unc, holed; 1888 P.O.S.A. medal, white metal, Unc, prooflike, holed; 1907 F.B.A. Convention Badge, ribbon, and clasp, XF; 1908 Founder's Week commemorative, copper, 25 mm., Unc; 1915 Panama-Pacific, brass, HK-424, XF, cleaned; (10) Washington-themed yellow bronze Mint medals of 20th century origin, including Baker-72M, 91E, 155B, 223R, 245R, 252C, 279B, 325D, 449R, 900C, each Unc. (Total: 16 medals)

- 8601** 1897-Dated Betsy Ross Memorial Association MS64 Deep Prooflike NGC. White metal, 35mm.

HOBO NICKELS

- 8602** A Collection of 25 Hobo Nickels, Mostly by Early Modern or Modern Carvers. A nice collection of Hobo nickels from modern carvers including Clarence Edwards, Joe Mercado, Mike Pezak, and more, plus some early-modern pieces by J. Press, J. Allen, and perhaps others. Two or three pieces are seemingly original Hobo nickels, one of which is above average. This is a lot that should be examined in person, or at least viewed carefully online to identify and rate the carvings. Housed in a Dansco Buffalo nickels album. (Total: 25 coins)
